PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, JANUARY 9, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of the Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the regular meetings of December 19 and December 26, and of the special meeting of December 31, 1919, be approved, as printed, without being read.

Mr. Nance moved that the motion be laid on the table.

Mr. Nance subsequently withdrew his motion.

Mr. Lawley withdrew his original motion and moved that the minutes of the regular meetings of December 19 and 26, 1918, be approved as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk presented his report of money received and deposited with the Treasurer during the month of December, 1918, which was ordered published and filed, as follows:

CHICAGO, January 9, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I beg to report the receipt of seventy-one thousand, one hundred seventy-eight and ninety-three hundredths ($71,178.93) dollars, during he month of December, 1918, from the following sources:

International Harvester Company, being refund of taxes paid on land they occupy under lease dated January 18, 1902		$ 4,927.75
James M. Dailey (Former Chairman Committee on Finance), return of Emergency Fund		1,500.00
United States Crushed Stone Company, in payment for judgment notes as follows:		
Dated January 2, 1918, due December 1, 1918	$ 333.33	
Dated January 2, 1918, due January 1, 1919	333.37	
		666.70
Atchison, Topeka & Santa Fe Railway Company, in payment for stone removed from the spoil banks at Romeo, Ill., during August and September, 1918, as follows: 3357.2 cubic yds. at .05c per yard		167.86
W. T. Lynch, Record Clerk, for money received from sundry persons for personal telephone service		3.30
Fred J. Ringley Company, refund of amount overpaid them on voucher No. 98445, their bill dated October 18, 1918		.50
The Coal Products Mfg. Company, semi-annual rental for strip of land in Will county, for period covering from January 1 to June 30, 1919		1,783.50
The Kettler-Elliott Erection Company, semi-annual rental under lease dated June 1, 1918, for period covering December 1, 1918, to June 1, 1919		1,645.87
Van Fleet Wood Working Company, monthly rental for premises at No. 1 Jefferson street, Joliet, Ill., being rental for months of December, 1917, and January, 1918		150.00
Peter Molenaar, semi-annual rental for land, lease dates March 10, 1909, for period covering from June 30, 1918, to January 1, 1919	$ 249.73	
Balance account amount due December 31, 1917	1.73	
Balance account amount due June 30, 1918	1.73	
Semi-annual rental on supplementary lease for 12 acres adjoining above for period covering from June 30, 1918, to January 1, 1919	30.00	
		283.19
Alex Karres, monthly rental of premises at 1028 Central street, Evanston, Ill., for the month of June, 1918		40.00
Sundry consumers, for electric power and light		$ 47,936.08
South Park Commissioners, for power and light for month of October, 1918	3,219.39	
County of Cook—		
For power and light for May, July and August, 1918	$1,983.72	
Amounts carried forward	$ 51,155.47	$ 11,168.67

Amounts brought forward		$ 51,155.47	$11,168.67
Interest and depreciation for May, July and August, 1918	470.16		
		2,453.88	
Commissioners of Lincoln Park—			
For power and light for October, 1918	$1,359.52		
Interest and depreciation for October, 1918	69.45		
		1,428.97	
West Chicago Park Commissioners—			
For power and light for October, 1918	$1,184.63		
Interest and depreciation for October, 1918	112.14		
		1,296.77	
Village of Dolton—			
For power and light for October, 1918	$ 669.60		
Interest and depreciation for October, 1918	18.65		
		688.25	
Village of Maywood—			
For power and light for October, 1918	$ 547.56		
Interest and depreciation for October, 1918	44.65		
		592.21	
Town of Cicero, for power and light for October, 1918		499.80	
Village of Summit—			
For power and light for October, 1918	$ 313.69		
Interest and depreciation for October, 1918	32.98		
		346.67	
City of Berwyn—			
For power and light for September, 1918	$ 206.73		
Interest and depreciation for September, 1918	24.34		
		231.07	
Village of Evergreen Park—			
For power and light for October, 1918	$ 230.19		
Interest and depreciation for October, 1918	26.87		
		257.06	
Village of Bellwood, for power and light for January, February and March, 1918		21.34	
War Recreation Board of Illinois, for power and light from October 8 to October 31, 1918		18.60	
City of Blue Island, for power and light for October, 1918		17.06	
Wilmette Park District—			
For power and light for October, 1918	$ 9.15		
Interest and depreciation for October, 1918	5.00		
		14.15	
Village of Stickney, for power and light for October, 1918		12.66	
State of Illinois, for power and light for October, 1918		7.15	
Village of Lyons, for power and light for October, 1918		3.49	
Chicago, Burlington & Quincy R. R. Company, re-routing circuit and additional charges for same at Kedzie avenue		630.39	
W. A. Jackson Company, purchase of 210 feet of 1-4 conduit cable		192.90	
Amounts carried forward		$ 59,867.89	$ 11,168.67

Amounts brought forward	$ 59,867.89	$ 11,168.67
Sterling Drop Forge Works, for rental of poles from October 1, 1917, to November 30, 1918	35.00	
Chicago Herald and Examiner, installing service at Grant Park	56.13	
The Texas Company, return of empty barrels	26.95	
Manhattan Rubber Mfg. Company, return of 16 lbs. No. 1 hydraulic packing	20.00	
Jas. J. Finneran, personal telephone calls	2.15	
Erie Railroad Company, refund of duplicate payment on freight invoice March 13, 1918, our order No. 867	1.84	
S. H. Reed, personal telephone calls	.30	
		60,010.26
Total		$ 71,178.93

The above amount has been deposited with the Treasurer to the credit of The Sanitary District of Chicago and of the appropriate accounts as shown by the attached receipt.

Respectfully submitted,

JOHN MCGILLEN,
Clerk.

CHICAGO, January 9, 1919.

$71,178.93.

Received from John McGillen, Clerk, the sum of seventy-one thousand, one hundred seventy-eight and ninety-three hundredths ($71,178.93) dollars, on the dates and in amounts as follows:

December 2	$ 3,414.57
December 3	1,677.77
December 4	121.85
December 5	6,207.01
December 6	637.96
December 7	171.86
December 9	23.26
December 10	1,769.28
December 11	1,557.89
December 12	2,514.22
December 13	7,231.35
December 14	1,063.34
December 16	1,478.16
December 17	1,041.51
December 18	5,984.68
December 19	9,615.18
December 20	5,948.52
December 21	5,743.23
December 23	4,321.45
December 24	1,318.10
December 26	426.08
December 27	322.97
December 28	52.24
December 30	105.51
December 31	8,430.94
Total	$ 71,178.93

to be deposited to the credit of The Sanitary District of Chicago, and of the following accounts:

Electrical Department	$ 60,010.26
Land Revenue	3,902.56
Taxes on District Property	4,927.75
Jas. M. Dailey, Chairman Committee on Finance	1,500.00
Bills Receivable	666.70
Atchison, Topeka & Santa Fe R. R. Company	167.86
Miscellaneous Engineering, Operating Expense, Maintenance and Operation	3.30
Clerical Department	.50
Total	$ 71,178.93

Respectfully submitted,

GEORGE M. REYNOLDS,

Treasurer, The Sanitary District of Chicago.

The Clerk presented the report of the Chief Engineer for the month of July, 1918, which was ordered published and filed, as follows:

CHICAGO, August 1, 1918.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of July, 1918, giving the detailed operation of the same.

CONSTRUCTION.

Union Loop Power House Dock.

The Brennan Construction Company, contractors, employed by the Northwestern Elevated Railroad Company, on the construction of a new dock on the cut-off line in front of the Union Loop Power House, continued operation throughout the month. The work done consisted of concreting the new wall of the power house east of the cut-off line.

NORTH SHORE CHANNEL.

Removal of Spoil Bank.

The National Brick Company removed 10,273 cu. yds. of material from the east bank of this channel between Brown and West Railroad avenues, from July 5th to 31st.

BRIDGES.

Lincoln Street Bridge.

The Sanitary District organization continued the work of underpinning the east abutment throughout the month. The south cylinder was completed and two anchor rods were placed from the abutment to a concrete "dead man" about fifty feet from the abutment.

CALUMET-SAG CHANNEL.

Section 1.

J. O. Heyworth, contractor for this section, continued operations throughout the month. Dragline No. 2 on the south berm continued excavating glacial drift in the channel between stations 937+50 and 970+50 (Main Channel stations), working two 10-hour shifts per day throughout the month. The total output was 55,000 cu. yds. of glacial drift. Drilling rock and blasting was carried on in channel between stations 3+50 and 4+00 from the 27th to 31st, working one 10-hour shift per day. A total of 438 lineal feet of holes was drilled. Travelers were engaged on form work on the north wall between stations 3+00 and 6+00, and on the south wall between stations 3+00 and 7+00 from the 1st to the 22nd. Concrete mixers and locomotive crane were engaged in concreting the walls between stations 3+50 and 9+00 from the 1st to the 20th, working one 10-hour shift per day. A

total of 2,990 cu. yds. of No. 2 concrete was placed. Backfilling walls was carried on by locomotive crane between stations 8+00 and 12+50 from the 25th to 31st, working one 10-hour shift per day. Three electric pumps were engaged in pumping channel at station 28+00, working two 12-hour shifts per day throughout the month. Miscellaneous work was carried on as follows: Finishing off retaining wall from the 1st to 31st; backfilling by hand between stations 26+00 and 53+00 from the 1st to 31st; building fences at Archer Road bridge on the 30th and 31st; making reinforcing rods on the 26th; cleaning up bottom of channel from the 19th to 31st. Force Account work was carried on as follows: Excavating for snubbing posts along the Main Channel walls from the 18th to 29th; unloading snubbing posts at Lambert Station on the 17th; grading road at Archer Road bridge on the 13th. An average daily force of 68.3 men was employed. At the end of the month 85.5 per cent of the total estimated value of the contract was completed.

Sections 2 to 12.

Pumping Contract.

Pumping channel for Sections 2 to 12, inclusive, was carried on by force account by J. O. Heyworth, the contractor for Section 1, throughout the month.

Section 5.

J. O. Heyworth, contractor for the construction of Section 1 under supplemental agreement dated May 9, 1918, was ordered by the Chief Engineer to drive a triple line of sheet piling south of the feeder between McLaughry Road and W. 82nd street to stop the underground seepage into the channel. The work was carried on from the 3rd to the 23rd. The bridge over the north drain ditch at McLaughry Road was repaired on the 10th by the contractor.

Rip-Rap Contract, Sections 7 and 8.

The contractor continued operations throughout the month. All work was carried on in one 10-hour shift per day. Dragline No. 4 on the north berm was engaged as follows: Excavating rock in channel for rip-rap between stations 525+50 and 524+00 from the 1st to 7th; rehandling spoil between same stations from the 8th to 10th, and at station 525+50 on the 10th, 22nd and 23rd; cleaning out channel cut between stations 525+50 and 523+25 from the 24th to 28th; excavating outfall ditch at station 523+25 on the 29th and 30th. An average of three teams was engaged in hauling stone and coal throughout the month. Men were engaged in laying rip-rap, loading and unloading rock throughout the month. An average daily force of 20.7 men was employed. At the end of the month 99.7 per cent of the total estimated value of the contract was completed.

Section 12.

A. Guthrie & Co., contractors for the construction of Section 13, engaged an average force of 9.5 men on the following work: Cleaning out ditch to drain low land lying south of channel and north of Broadway and east and west of Francisco avenue from the 20th to 25th; building concrete outlet to channel for east ditch on the 26th and 27th and removing forms from same on the 31st. One team was engaged in hauling material for outlet from Section 13 on the 23rd and 24th. All work was carried on in one 10-hour shift per day, except on the 31st, when the work was carried on in one 5-hour shift.

Section 13.

The contractor for this section continued operations throughout the month. Concreting plant was engaged in placing concrete for the north and south retaining walls throughout the month, working between stations 772+40 and 780+26 on the north wall, and be-

tween stations 760+00 and 778+72 on the south wall. A total of 950.59 cu. yds. of No. 1 concrete and 5,972.99 cu. yds. of No. 2 concrete was placed. Hand work was carried on as follows: Cleaning up glacial drift slide in channel south face between stations 775+25 and 774+00 on the 10th and 11th; on the north face at station 775+50 on the 12th, at station 774+00 on the 15th, at station 776+00 on the 17th and 30th, and on the south face at station 776+00 on the 31st. Finishing off north wall at station 786+00 on the 1st, at station 774+50 on the 2nd and between station 780+00 and 779+00 on the 26th and 27th; on the south wall at station 768+00 on the 17th and station 770+00 on the 22nd and station 778+00 on the 25th. At 7 p. m. on July 23rd the Division street sewer broke north of the channel, due to heavy rain. The water was stopped from flowing into channel at 10 P. M.; 41 men worked 4 hours repairing the break. Pumping channel was carried on at station 761+50, working one 10-hour shift per day from the 1st to the 5th and 22nd to 31st, and at station 782+00 working one 7-hour shift per day throughout the month. An average daily force of 46.9 men was employed. About 54.7 per cent of the total estimated value of the contract was completed at the end of the month.

Section 14.

The contractor continued operations throughout the month. All work was carried on in one 10-hour shift per day except pumping channel, which was carried on at station 844+25, working one 7-hour shift per day throughout the month, and mixing concrete which was carried on in one 7-hour shift per day. Backfilling behind south retaining wall between stations 819+00 and 822+00 from the 1st to 3rd and 20th to 22nd by dragline No. 4. Grading Controlling Works road and approach to bridge on the 12th, 13th, 16th and 19th by dragline No. 4. Excavating glacial drift in channel east of south curved wall between stations 852+00 and 845+75 from the 1st to 31st. The total output was 5463 cu. yds. of glacial drift. Concrete mixer engaged in mixing concrete for Morgan Park sewer from the 15th to 17th; for sewer discharge chamber on the 18th, 19th and 30th; for Controlling Works Road bridge floor on the 29th. The following hand work was carried on: Grading spoil area on south berm between stations 838+00 and 846+00 from the 1st to 18th and 29th to 31st; cleaning out north drainage ditch between stations 818+00 and 821+00 on the 8th and 9th. A force of 16 men was engaged in the folowing work; Building concrete forms for sewage discharge chamber from the 1st to 12th, 15th to 17th, 22nd to 25th, and on the 31st; placing concrete on the 18th, 19th and 30th; excavating east cylinder for Morgan Park sewer on the 2nd; building forms for concrete on the 13th; concreting from the 15th to 20th; unloading ballast and grading tracks between Stony Creek and the Channel on the 1st, 2nd, from the 6th to 8th, 10th to 13th and 15th to 20th; unloading cinders and spreading same at Public Service Co. on the 3rd, 8th, 9th and 12th. An average daily force of 48.5 men was employed by A. Guthrie & Co. G. P. Nichols, electrical contractor, employed an average daily force of two men, working one 8-hour shift per day, in placing electrical conduit in the sewage discharge chamber from the 16th to 19th, and at the Controlling Works road bridge on the 22nd and 23rd and connecting lamp post boxes on the north wall on the 25th and 26th. The Kelly-Atkinson Construction Co. was engaged in constructing bumpers for sector gates from the 23rd to 27th and drilling holes for diagonal plates on the southeast sector gate on the 30th and 31st, working one 8-hour shift per day. At the end of the month 98.9 per

cent of the total estimated value of the contract was completed.

BRIDGES.

Chicago Street.

An average daily force of four men, working one 10-hour shift per day, was engaged in excavating for concrete cylinders for south abutment from the 9th to 12th.

Division Street.

An average daily force of 6.5 men, working one 10-hour shift per day, was engaged in building forms for north abutment from the 1st to 3rd, on the 5th, 6th, 8th to 12th, and for the south abutment from the 13th to 20th, 22nd to 25th, 27th and 29th to the 30th.

Chicago, Rock Island and Pacific Ry. Co. (Main Line) Bridge.

The Overland Construction Company employed an average daily force of four men in erecting temporary west bound track bridge over Western avenue, working one 9-hour shift per day on the 1st and 2nd.

The C., R. I. & P. Ry. employed a force of eight men and locomotive crane No. 95017, and locomotive No. 111, in placing girders for temporary west bound track bridge, working 4½ hours on the 2nd. A force of thirty men, engaged in unloading and piling material to be used for temporary west bound track bridge over Western avenue, working two hours on the 13th. An average daily force of two men was engaged in repairing said girders, working one 10-hour shift from the 17th to 26th, and placing ties and guards over bridge from the 22nd to 27th and on the 29th. A force of 35 men was engaged in unloading ties and material on the 25th. A force of 31 men was engaged in grading and placing switch ties for crossover from present to new west bound track from the 29th to 31st. An average daily force of seven men was engaged in rearranging track circuit (signal) on account of changes to track, working one 10-hour shift per day on the 30th and 31st.

The Chicago Interurban Traction Co. employed a force of four men in lowering trolley wires to pass under temporary C., R. I. & P. Ry. west bound track bridge, working 9 hours on the 2nd.

The Knickerbocker Roofing Co. employed an average daily force of 10 men in waterproofing the top surface of the new bridge No. 1, working one 8-hour shift per day on the 8th, 11th and 12th.

B. & O. and G. T. W. Crossing.

The contractor continued operations throughout the month. The work was carried on in various shifts of from 2 to 10 hours per day. Pumping channel was carried on at station 749+00 on the 2nd, 3rd, and from the 8th to 13th and 17th to 31st. Two teams were engaged grading for the G. T. W. and R. I. connecting track diversion at station 745+00 working one 10-hour shift per day from the 1st to 22nd. One team grading for G. T. W. track diversion north of the new B. & O. diverted tracks, working one 5-hour shift per day on the 23rd and 24th, and hauling timber for the temporary I. H. B. Ry. trestle on the 25th and 26th. Hand work was carried on as follows: Removing forms from south abutment of the new B. & O. C. T. bridge on the 1st and 2nd, and north abutment on the 3rd; repairing crossing of new B. & O. McCook line at Vermont street on the 2nd, excavating to place bents for temporary trestle from south bank to south abutment of new B. & O. C. C. division bridge from the 13th to 19th; capping piles and framing bents for temporary trestle from the 18th to 24th; building cribbing on south bank of channel at B. & O. C. C. division tracks to hold south bank slide on the 24th and 25th; placing stringers for west bound track from the 26th to 31st.

The B. & O. Ry. Co. employing an average daily force of 8.5 men was en-

gaged in building trestle at the north approach to the B. & O. C. C. division bridge, working one 10-hour shift per day from the 1st to 3rd and 8th to 11th.

The Strobel Steel Construction Co. employing an average daily force of 8 men, carried on the following work: Unloading steel from new B. & O. C. C. division bridge on the 9th and from the 19th to 23rd; driving piles for first bent at south approach of temporary trestle on the 16th and 17th, placing bents and stringers for temporary trestle from south bank to south abutment from the 26th to 31st. Work was carried on in various shifts of from 3½ to 8 hours per day. The following hand work was carried on: Building trestle for north and south new B. & O. C. C. division bridge on the 15th and 16th to the 24th, 26th to 31st; building cribbing to hold back south bank slide on the 25th.

Controllng Works Road Bridge.

Building forms for concrete floor on the 2nd and 3rd; placing reinforcing rods for floor from the 8th to 12th; concreting floor on the 29th.

SEWERS.

CALUMET INTERCEPTING SEWER.

Contract Section No. 4.

Nash Bros., contractors, continued operations throughout the month. The work consisting largely of moving the equipment from the east side to the west side of the I. C. R. R. Excavation of the top cut by steam shovel was continued throughout the month, progressing from station 170+90 to station 178+20. At the Cottage Grove avenue crossing, street car service was interfered with on the 2nd. Excavation was completed on the 11th, the concrete was completed on the 13th, and the street car tracks replaced on the 20th. The dragline resumed excavation at South Park avenue and 104th street on the 24th and concreting was resumed on the 27th, the regular work progressing eastward from station 168+42 to station 168+91. An average daily force of 75.5 men and 20 teams was engaged throughout the month. The work was 76.8 per cent completed at the end of the month.

Contract Section No. 6.

Byrne Brothers' Dredging and Engineering Company, contractors, continued operations throughout the month. The work of moving the equipment to the north side of the C. & W. I. Ry. was carried on until the 22nd. The steam shovel resumed excavations of the top cut north of the railroad on the 5th and continued throughout the month. The dragline resumed excavation of the lower cut on the 22nd; concreting north of the C. & W. I. R. R. was begun on the 24th and progressed to station 68+78 at the end of the month. An average daily force of 81 men was employed throughout the month. The work was 73.5 per cent completed at the end of the month.

Contract Section No. 7.

T. J. Forschner Contracting Company, contractors, continued operations throughout the month. The regular work, consisting of excavation of the top cut by steam shovel and the bottom cut by dragline, and placing concrete section, was completed on the 18th. The work progressing from station 105+43 to the east end of the section at station 113+03. The street car service at Michigan avenue was discontinued on the 2nd and the service resumed on the 24th. The work on the special gaging chamber was completed on the 20th. This work completed all the main items on Contract No. 7. The balance of the month was occupied in backfilling and cleaning up, etc. An average daily force of 102 men and 1.5 teams was employed. The work was completed at the end of the month.

EVANSTON INTERCEPTING SEWER.

Contract Section No. 1.

Nash-Dowdle Company, contractors, continued operations throughout the

month. Work on the 7-ft. sewer in Orrington avenue was carried on in tunnel until the 7th, on which date the compressed air plant was dismantled and work continued by hand from the shaft at University place until the 16th, on which date the sewer was completed, except plastering and cleaning, which was continued throughout the month. The work progressing from station 10+38 to 9+70, and from station 27+16 to station 28+55. The 4½-foot sewer in Sheridan Road was completed on the 18th and the backfill completed on the 21st, the excavation being done by a Moore machine. The work progressed from station 49+27 to 54+18. The work on the 5-ft. sewer on the lake front was carried on throughout the month, the work consisting of excavation by means of a Parson's excavating machine and the placing of concrete section. The work progressed from station 4+38 to station 16+63.

The work of installing a pile driver for the placing of protections along the sewer on the lake front near Dempster street was begun on the 25th and continued throughout the month.

Work on the 3½-ft. sewer in Keeney street and Sheridan Road was started on the 6th and continued throughout the month. Excavation of top cut was carried on by steam shovel and the bottom cut by hand. Placing of the concrete sewer section was begun on the 24th and continued throughout the month. The work progressed from station 54+25 to station 56+34. The work of installing shaft and air locks for tunnel work on the 6-ft. sewer in Elmwood avenue was continued from the 1st to 29th, on which date the regular operations of tunneling were begun. About 100 ft. of 6-ft. sewer was completed at the end of the month.

Work of constructing a shaft for tunnel work on the 4½-ft. sewer in Custer avenue, south of Washington street, was begun on the 23rd and continued throughout the month. Work of constructing a shaft for tunnel work on the 6-ft. sewer in Lake street near Sheridan Road was continued to the 8th, on which date the regular tunneling operations were commenced and were continued intermittently throughout the month, the work progressing from station 99+14 to 99+65. On the outfall of Lake street and the North Shore Channel the concrete work was placed complete on the 14th; concrete blocks as slope paving were set complete on the 20th, and the cofferdam was removed on the 25th, completing all work on this outfall. An average daily force of 187 men was employed throughout the month. The work was 86.6 per cent complete at the end of the month.

Des Plaines River Intercepting Sewer.

Nash Brothers, contractors, began operations on the 19th and continued throughout the month, the work consisting of installation of plant and other work preparatory to starting construction. An average daily force of 6.7 men was employed from the 19th to the end of the month.

Pumping Stations.

Calumet Sewage Pumping Station.

The work of installation of the plant was carried on intermittently during the month, dragline being moved from Section 7 of the Calumet sewer to this work on the 29th. An average daily force of 25 men was employed on the last three days of the month.

Maintenance and Operation.

Main Channel.

Walls.

The Sanitary District organization employed a force of 16 men operating the "cement gun" on the work of plastering the east wall of the Main Channel just south of Romeo. A total of 23,000 sq. ft. was plastered with a mix of one part cement to three parts sand during the month.

Bridges.

Minor repairs were made to the floors of the bridges at Willow Springs, Lemont, Romeo and Ninth streets.

Controlling Works.

The bear trap dam at the Controlling Works was open some part of twenty days of a total of one hundred and fifty-seven hours and forty-five minutes, an average of five hours and fifty-six minutes for each day of the month.

MAIN CHANNEL EXTENSION.

Walls.

The Sanitary District organization employed a force of 30 men on cutting out disintegrated concrete and replacing the same with portland cement concrete, throughout the month. About 600 cu. yds. of concrete was placed in the east wall between 16th street, Lockport and the power house during the month.

BRIDGES.

9th and 16th Street Bridges.

Two men were on duty on these bridges, working shifts of 8 hours each from 7 A. M. to 3 P. M., and from 3 P. M. to 11 P. M. Each man caring for both bridges.

Butterfly Dam.

This dam was not operated during the month.

Dams at the Power House.

In order to maintain the flow of water required by law the forty-eight foot dam at the power house was open some part of each day of the month or a total of four hundred and nine hours and forty minutes, an average of thirteen hours and thirteen minutes for each day of the month. The twelve foot dam at the power house some part of sixteen days or a total of sixty-five hours and forty minutes, an average of two hours and seven minutes for each day of the month.

Samples of canal water were taken every 8 hours for the Sanitary Division. The water gage was repaired on the 24th. Three men were on duty, working shifts of 8 hours each, throughout the month.

I. and M. Canal Lock at the Power House.

During the month nine boats passed through the lock. No one was on duty on this lock except when the boats were passed through, this being done by the dam tender. The lock house circuit was repaired on the 13th.

Electrical Department.

The bulkhead which was built for the Electrical Department for use in repairing the head gates at the power house was made tight and the work of repairing the head gates of unit No. 4 was begun.

DES PLAINES RIVER DIVERSION.

Channel.

The Sanitary District organization employed a force of 20 men in cutting trees and underbrush and cleaning out the bed of the Des Plaines River south of the Lyons-Summit Road.

Bridges.

Minor repairs were made to the floor of the 16th street bridge over the Des Plaines River by the Bridge Division.

NORTH SHORE CHANNEL.

Outfalls and Ditches.

The Sanitary District Organization employed a force of 10 men from July 1st to 22nd constructing a new outfall on the west side of the channel just south of Lincoln avenue, and from the 23rd to 30th, cleaning out the ditches on the west side of the channel at Peterson avenue.

Bridges.

The Sanitary District organization made minor repairs at the Peterson avenue and Bryn Mawr avenue bridges.

PUMPING STATIONS.

39th Street Pumping Station.

The Great Lakes Dredge and Dock Company, contractors for repairing the

breakwater at this station, continued operations throughout the month as weather permitted. The work done consisted of driving piles, placing caps on wales and excavating for and placing back logs and anchor rods. This station was operated pumping sewage throughout the month. Repairs on sewage pump No. 2 were practically completed by the end of the month. The steam turbine and generator were not operated during the month. The boom on the coal hoisting derrick, which broke on May 29th, was repaired and put back into service on the 19th. Sewer pump No. 1 was operated some part of six days or a total of eighteen hours and five minutes. Pump No. 3 some part of one day or a total of four hours. Pump No. 4 some part of thirty-one days or a total of seven hundred and forty-one hours and thirty minutes. The three pumps were operated for a grand average of eight hours and twelve minutes for each day of the month and pumped an average of 10,438 cubic feet of sewage for each minute of the month. The sewage pump No. 2 and fresh water pumps Nos. 5 and 6 were shut down the entire month.

Lawrence Avenue Pumping Station.

The Great Lakes Dredge and Dock Company, contractors for repairing the intake crib at this station, employed two pile drivers in driving two seven-pile clumps at the west and northwest side of the crib on the 22nd. This completes all work on this contract.

This station was operated pumping sewage throughout the month, as follows: Sewer pump No. 2 was operated some part of twenty-five days or a total of five hundred and thirty-six hours and ten minutes. Pump No. 3 some part of thirteen days or a total of two hundred and thirteen hours and fifty-five minutes. The two pumps were operated for a grand average of twelve hours and fifty-eight minutes for each day of the month, and pumped an average of 6,417 cubic feet of sewage for each minute of the month. The sewer pump No. 1 and fresh water pump No. 4 were shut down the entire month. Sewage pumping engine No. 2 was out of service from the 8th to the 13th on account of a bent connecting rod.

Wilmette Pumping Station.

This station was operated pumping fresh water throughout the month. The pumps operated as follows: Pump No. 1 was operated some part of twenty-seven days or a total of six hundred and thirteen hours and forty-two minutes. Pump No. 2 some part of thirty-one days or a total of seven hundred and seventeen hours and seven minutes. Pump No. 3 some part of twenty-eight days or a total of six hundred and eleven hours and twenty-seven minutes. Pump No. 4 some part of thirty days or a total of six hundred and forty-three hours and seventeen minutes. All of the four pumps were operated for a grand average of twenty hours and fifty-one minutes for each day of the month and pumped an average of 44,606 cubic feet of water for each minute of the month.

STRUCTURES AND EQUIPMENT FOR SANITARY IMPROVEMENTS.

SEWAGE AND SPECIAL INVESTIGATIONS.

Morton Grove Sedimentation Plant.

This plant was operated throughout the month and the regular maintenance and operation superintended by the Sanitary Division.

Laboratory at 39th Street.

Chemical analysis were made weekly of samples collected from the Main Channel at Lockport, and the Illinois River at Morris, Ottawa, Peru and Chillicothe. Special analyses were made on the samples from Lockport. Analyses were made of routine samples from the Stock Yards testing station covering raw sewage, and activated sludge process effluents.

Stock Yards Testing Station.

This station was operated as usual with the following devices: Activated sludge process, aeration and settling tanks.

Sewer and Rain Gauges.

A sewer gauge was operated at Davis street, in Evanston. Rain gauges were operated at 39th street pumping station, Stock Yards testing station, Lockport, Kensington and 31st street and Western avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport. Weekly samples from the Main Channel at Lockport and the Illinois River at Morris, Ottawa, Peru and Chillicothe. A special trip of investigation was made up the North Branch of the Chicago River and down the Main Channel, with final analyses.

ENGINEERING.

Drafting Division.

During the month the following work was carried on: Compiling the Calumet Sewer atlas; indexing and filing maps, plans and field books. Writing the Chief Engineer's annual report for 1917 was begun and continued through the month. Work on the new Calumet Sag atlas was continued. Computations were made of the cost of steam shovel operations on Section 9 of the Calumet-Sag Channel. Revising section corner notes. Writing monthly reports of the Calumet-Sag construction work was continued. Real estate maps were revised. Main Channel gauges were inspected. Preparing plat of easement for the Des Plaines intercepting sewer. Preparing contract drawings and specifications for the removal of the union loop power house. Claims for extra pumping on Section 9 of the Calumet-Sag Channel were investigated. Inspecting work at Blue Island.

Bridge Division.

A tracing was made showing plat, profile and cross section of Western avenue at the end of the Western avenue bridge on the Calumet-Sag Channel for the use in making improvements to the pavements and sidewalks, as authorized by the Board. An effort was made to dispose of the old bridge across Stony Creek, on the C., R. I. & P. (Main Line) which is to be removed to clear the site for the bridge across the Calumet-Sag Channel. Bids were received and rejected as being too low. Work was continued on the plans for the steel work and for the reinforcing metal on the floors and walls of the Calumet pumping station. Shop details for miscellaneous structural steel work were made. A list of Sanitary District bridges outside of the City of Chicago, showing their cost and date of completion, was made.

Hydraulic Measurement Division.

The self-registering gages in the Main Channel at Willow Springs and Lemont and in Lake Michigan at the coast guard station at Chicago were operated and periodically inspected. Records from these gages were worked up in the office.

Sanitary Division.

The preparation of plans and specifications for the Calumet intercepting sewer and the Evanston sewage pumping station were continued. Conferences were held with officials of the City of Chicago and with Mr. W. D. Richardson and others from Packingtown on various topics related to the sewage problems in Packingtown. The preparation of plans and specifications of the Des Plaines intercepting sewer was completed. The preparation of plans for the Des Plaines River treatment works was continued. Conferences were held with village officials. Two test pits were dug on the site of the treatment works. The preparation of supplementary plans for the Calumet

sewage pumping station was continued. Correspondence was carried on with Constructing Engineer Wood on all pumping stations. Preparation was made of evidence in the lawsuits brought by the Pilsen Coal Company on account of contracts at the 39th street and Lawrence avenue Pumping Stations. In company with Messrs. George W. Fuller, Fales, and Majors Doten, Head and Messer of the U. S. Army, an inspection was made of the sanitary conditions along the north shore, visiting Evanston filter plant, Wilmette pumping station, Fort Sheridan and Great Lakes. A visit was made to the testing station of Milwaukee Sewerage Commission at Milwaukee, Wis.

Field Parties.

Party was employed on North Shore Channel sloping notes and field notes. Chicago River Dredging and docking. Repairs to breakwater at 39th street and intake crib at Lawrence pumping stations. Measuring spoil banks in Section 8 M. C. Investigation of sewage in the north branch of the Chicago River. Survey of Lot 13 on Main Channel. On Chicago and Illinois Western R. R. claim for damages caused by wash from spoil banks.

The Calumet-Sag field parties performed the usual routine construction duties as follows: The Sag Division on Sections 1 and 5. The Worth Division on Sections 7 and 8. The Blue Island Division on Sections 13 and 14.

The engineering force and other employees continued superintending engineering, construction and maintenance work, checking estimates, figuring unit costs of the Evanston and Calumet sewers and Calumet-Sag Channel sections. Keeping the accounts of the department, furnishing information to other departments and performing other necessary duties, etc.

Respectfully submitted,

G. M. WISNER,
Chief Engineer.

The Clerk presented the report of the Chief Engineer for the month of August, 1918, which was ordered published and filed, as follows:

CHICAGO, September 1, 1918.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of August, 1918, giving the detailed operations of the same.

CONSTRUCTION.

CHICAGO RIVER, MAIN OUTLET, SOUTH BRANCH, INCLUDING ITS FORKS.

Union Loop Power House Dock.

The Brennan Construction Company, employed by the Northwestern Elevated Railway Company, on the construction of a new dock on the cut-off line in front of the Union Loop Power House property, continued operations throughout the month. The work done consisted of concreting the new wall of the power house east of the cut-off line.

NORTH SNORE CHANNEL.

Removal of Spoil Banks.

The National Brick Company removed 12,701 cubic yards of material from the east bank of the channel between Brown and W. Railroad avenues during the month.

Contract for Sloping.

No work was done during the month on this contract by Byrne Brothers' Dredging & Engineering Company, contractors.

BRIDGES.

Lincoln Street.

The Sanitary District organization force completed the work of underpinning the east abutment of this bridge on the 13th. The work consisted of constructing two concrete cylinders resting on hard material at an elevation of —50.4 C. C. D. and anchoring the abut-

ment to a concrete block placed about 80 feet east of the east end of the bridge.

CALUMET-SAG CHANNEL.

Section 1.

James O. Heyworth, contractor for the construction of this section, continued operations throughout the month. Excavating glacial drift in connection and turning basin by dragline between stations 969+50 and 972+00 (M. C.) from the 1st to the 31st, working in one and two 10-hour shifts per day. Drilling rock in channel between stations 3+75 and 4+00 from the 1st to the 6th, in turning basin at station 968+00 (M. C.) from the 21st to 31st, along the Main Channel wall from the 1st to the 24th, working one 10-hour shift per day. Backfilling behind walls was carried on by locomotive crane, using material obtained from cleaning up channel, between stations 11+00 and 22+00 from the 1st to the 31st, working one 10-hour shift per day. Moving gravel out of channel was carried on by derrick and clam shell on the south berm, at station 20+50 from the 1st to the 3rd, working one 10-hour shift per day. Blasting rock in channel was done on the 10th at station 4+00, working one 10-hour shift. Pumping channel was carried on at stations 28+00, working two 12-hour shifts per day throughout the month. Traveler was dismantled on the 12th and 13th. The following miscellaneous work was carried on: Backfilling by hand at stations 53+00 on the 1st; building fence at Archer Road bridge on the 1st, painting same on the 12th; cleaning bottom of channel from the 1st to 31st; grading road for hauling coal to turning basin from the 18th to 20th. The following force account work was carried on: Pumping channel for Sections 2 to 12, inclusive, was carried on at Section 1 by James O. Heyworth, under supplementary agreements, throughout the month; excavating for snubbing posts from the 2nd to the 5th, moving gravel to snubbing post holes on the 9th. An average daily force of 68.5 men was employed. At the end of the month 88.4 per cent of the total estimated value of the contract was completed.

Section 5.

James O. Heyworth, the contractor for Section 1, continued driving sheet piling south of the feeder, between McLaughry Road and 82nd street, to stop the underground seepage into the channel, from the 1st to the 13th, working under supplemental agreements.

Sections 7 and 8, Riprap Contract.

Green & Sons Company, contractors for this work, employed an average daily force of 13.4 men and carried on the following work: Laying riprap slope, loading and breaking up rock and cleaning up. Dragline No. 4 was engaged in excavating slide on the north slope between stations 513+25 and 514+25 on the 2nd; backfilling between same stations on the 3rd; excavating glacial drift from outfall on west side of Piper Road on the 17th. Six teams were engaged in hauling rock and coal and cleaning up berm from the 1st to the 6th. All work was carried on in one 10-hour shift per day. All work under this contract was completed on the 19th.

Section 13.

A. Guthrie & Company, Inc., contractors for the construction of this section, continued operations throughout the month. The following work was carried on: Concreting the north and south retaining walls was carried on between stations 772+09 and 777+26 from the 1st to the 8th, 12th to 16th, working one 10-hour shift per day. Pumping channel was carried on at station 761+50 from the 1st to the 15th and 20th to 31st, working one 10-hour shift per day; at station 782+00 from the 1st to the 16th, working one 4-hour shift per day. The sewer along Canal

street broke at the Stony Creek Diversion and the work of repairing this break was carried on, on the 3rd, 5th, 6th, 10th and 12th. An average daily force of 22.3 men was employed. At the end of the month 56.6 per cent of the total estimated value of the contract was completed.

Section 14.

A. Guthrie & Company, Inc., contractors for the construction of this section, continued operations throughout the month. The following work was carried on: Excavating glacial drift was done by steam shovel No. 5 in channel east of south curved wall between stations 848+00 and 846+00 from the 1st to the 14th, also excavating spoil from spoil banks to be used for backfilling behind north wall from the 29th to 31st, working one 10-hour shift per day. Pumping channel was carried on at station 846+00 from the 1st to the 31st, and at station 837+00 on the 1st, 8th to 24th, working an average of 7 hours per day. An average daily force of 14 men was engaged in placing concrete in the Morgan Park sewer on the 15th and 16th, for the junction with the Calumet sewer on the 19th, 26th and 27th; for the transformer house on the 28th. The following hand work was carried on: Backfilling behind the south curved wall from the 1st to the 14th and behind the north wall between stations 833+00 and 834+00 from the 29th to the 31st. An average daily force of 13 men was engaged in laying a tile drain at station 796+00, from the Frentz and Fisher properties to the channel on the 15th, 16th, 19th to 21st, working one 10-hour shift per day. An average daily force of 54.8 men was employed. At the end of the month 99.2 per cent of the total estimated value of the contract was completed.

BRIDGES.

Western Avenue Bridge.

A. Guthrie & Co., contractors, employed an average daily force of 10 men on the work of preparing to lay temporary pavement at the south approach to this bridge on the 30th and 31st, working one 10-hour shift per day.

Division Street Bridge.

A. Guthrie & Co., contractors, employed an average daily force of 6 men, placing reinforcements in the north and south abutments of this bridge from the 14th to the 28th, working one 10-hour shift per day.

B. & O. and G. T. W. Ry. Bridge.

A. Guthrie & Co., contractors, employed 2 teams grading for G. T. W. track diversion on the 1st. Pumping channel at station 749+00 throughout the month, working one 5-hour shift per day. Handwork was done as follows: Excavating and placing stringers for temporary west bound track (I. H. B. Ry.) from the 1st to the 3rd; grading tracks of the B. & O. (McCook Line) diversion from the 5th to the 12th; concreting grillage on new B. & O. C. T. bridge over channel on the 23rd, working one 10-hour shift per day on all handwork.

The B. & O. Ry. Co. employed an average daily force of 9 men, installing new interlocking system on the B. & O. (McCook Line) diversion, from the 8th to the 30th, working one 10-hour shift per day.

The Strobel Steel Construction Co. employed an average daily force of 8 men on the following work: Placing bridge shoes for new bridge on the 5th and 6th, placing girders on same from the 14th to 16th, placing floor sections from the 17th to the 21st; unloading steel from the G. T. W. Ry. bridge on the 30th, working one 10-hour shift per day on this work. Handwork was carried on as follows: On the new B. & O. C. T. bridge; building trestle from the south abutment to the south bank from the 1st to 3rd; placing bridge shoes on the 5th and 6th; painting girders from the 7th to 13th; placing girders, floor sections and riveting same

from the 14th to the 29th. Unloading steel for the G. T. W. bridge on the 30th. This work was carried on in one 10-hour shift per day.

C., R. I. & P. Ry. Bridge.

The C., R. I. & P. Ry. employed an average daily force of 16 men rearranging track circuit (signals from the 1st to the 8th; unloading material for new track over Bridge No 1 on the 14th and 15th; laying track on Bridge No. 1 (west bound track) from the 16th to 21st. Work was carried on in one 10-hour shift per day.

Controlling Works.

The G. P. Nichols Co., electrical contractors, employed an average daily force of 3 men setting machinery on northwest sector gate from the 28th to the 30th, working an 8-hour shift per day.

The Kelly-Atkinson Construction Co., contractors, employed an average daily force of 22 men placing fenders, skin plates, uprights and riveting on the northeast sector gates from the 1st to the 26th, on the southeast sector gates from the 1st to the 27th and in painting steel for southwest sector gate from the 5th to the 8th, northwest gates from the 7th to the 10th, other steel on the 16th, 17th, 26th to 29th. All this work was carried on in one 10-hour shift per day.

Sewers.

CALUMET INTERCEPTING SEWER.

Contract Section No. 4.

Nash Brothers, contractors, continued operations consisting of excavation of the top cut by steam shovel and the bottom cut by dragline and placing of the concrete section until the 23rd, at which date the steam shovel reached the west side of the I. C. R. R. at station 182+84 and continued excavating under the said tracks. The balance of the work on the sewer was continued throughout the month, progressing from station 168+91 to 176+23. An average daily force of 85 men and 25 teams was employed throughout the month. The work was 83.7 per cent completed at the end of the month.

Contract Section No. 6.

Byrne Brothers' Dredging & Engineering Company, contractors, continued regular operations throughout the month. The work consisted of excavation of top cut by steam shovel and bottom cut by dragline and the placing of concrete sewer section: The work progressing from station 68+78 to station 75+45. Grading and leveling Indiana avenue south of 120th place and other miscellaneous grading was carried on throughout the month. An average daily force of 110 men was employed throughout the month. The work was 80.9 per cent completed at the end of the month.

Contract Section No. 7.

T. J. Forschner Contracting Company, contractor, continued operations throughout the month. The work of placing riprap at the creek crossing east of Wentworth avenue was carried on from the 7th to the 14th. The work of replacing fences along the line of the sewer and repairing and cleaning up was carried on intermittently throughout the month. An average daily force of 15.5 men and 0.5 teams was employed. The work reported complete in July.

EVANSTON INTERCEPTING SEWER.

Contract Section No. 1.

Nash-Dowdle Company, contractors, continued operations throughout the month. The work of dismantling the compressed air plant and cleaning up on the 7-foot sewer in Orrington avenue was completed on the 27th.

On the 5-foot sewer on the Lake Front excavation by Parson's trenching machine and the placing of the concrete section was continued throughout the month, the work progressing from station 16+63 to station 28+51. The work between Lee and Main streets was be-

gun on the 1st and completed on the 31st (stations 31+85 and 37+70), a Moore trenching machine being employed on this work.

The work of installing a pile driver for the placing of protection to the sewer on the Lake Front near Dempster street was completed on the 16th and the driving of piles was started on the 17th and continued throughout the month.

The work on the 3½-foot sewer on the Lake Front consisted of excavation of the top cut by steam shovel and the bottom cut by hand was continued throughout the month, progressing from station 66+34 to station 74+28.

Construction of the 6-foot sewer in Elmwood avenue by the tunnel method was continued throughout the month; the work being completed at the end of the month from station 19+72 to 32+33.

On the 4½-foot sewer in Custer avenue the shaft and air locks were installed complete on the 15th and the regular tunnelling operations continued throughout the month. The work being completed at the end of the month from station 45+46 to station 52+31.

Work on the 6-foot sewer in Lake street by the tunnel method was carried on to the 6th, from station 99+14 to station 98+93, when the tunnel work was abandoned owing to the instability of the ground. An average daily force of 257 men was employed throughout the month. The work was 95 per cent completed at the end of the month.

DES PLAINES RIVER INTERCEPTING SEWER.

Nash Brothers, Contractors, continued operations of installing plant, laying water pipe, etc., throughout the month. The work of sinking shafts for tunnel work was commenced on First avenue north of West 12th street on the 10th and continued throughout the month. An average daily force of 11.5 men was employed throughout the month.

PUMPING STATIONS.

The T. J. Forschner Contracting Company, contractors, continued operations throughout the month. Stripping of the black soil was started on the 1st and completed on the 26th; this work being done by the dragline.

The excavation for the substructure of the building was started on the 27th and continued throughout the month, spoil being used for backfill on section 7 of the Calumet sewer east of Michigan avenue. The work of dismantling the second dragline preparatory to shipment was begun on the 16th and continued throughout the month. The general work of the installation of the plant including the construction of standard gage switch track and storage tracks and erection of material bins, etc., was carried on throughout the month. An average daily force of 26 men was employed throughout the month.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

Walls.

The Sanitary District organization employed a force of 16 men operating the "cement gun" on the work of plastering the east wall of this channel south of Romeo throughout the month. About 31,500 square feet of wall was covered with a mixture of one part cement to three parts sand.

BRIDGES.

The Sanitary District organization made minor repairs to the bridges at Summit, Lemont and Romeo during the month.

CONTROLLING WORKS.

The bear trap dam at the controlling works was open some part of ten days or a total of fifty-three hours and fifty minutes, an average of one hour and forty-four minutes for each day of the month.

MAIN CHANNEL EXTENSION.

Walls.

The Sanitary District organization employed a force of 33 men on the work of cutting out disintegrating concrete in the walls of this channel just south of 16th street, Lockport, and replacing same with Portland cement mortar. About 360 cubic yards of concrete were replaced during the month.

BRIDGES.

9th and 16th Street Bridges.

The transformer at the 9th street bridge was fused on the 17th and at the 16th street bridge on the 17th and 30th. Two men were on duty on these bridges, working from 7:00 A. M. to 3:00 P. M. and 3:00 P. M. to 11:00 P. M. throughout the month.. Minor repairs were made to the floor of the 9th street bridge.

BUTTERFLY DAM.

This dam was operated on the 11th, 18th and 25th. The heater was repaired on the 21st.

DAMS AT THE POWER HOUSE.

These dams were operated during the month as follows: The forty-eight foot dam at the power house was open some part of each day of the month or a total of three hundred and sixty-seven hours and forty-five minutes, an average of eleven hours and forty-eight minutes for each day of the month. The twelve foot dam at the power house was shut down the entire month. Three men were on duty, working shifts of 8 hours each, throughout the month. Samples of canal water were taken every 8 hours for the Sanitary Divisions.

I. & M. Canal Lock at the Power House.

Three boats passed through the lock during the month. No one was on duty, except when the boats were passed through and this was done by the dam tender. The lock house circuit was repaired on the 7th, 8th, 9th and 12th, The motor was repaired on the 21st.

Power House (Electrical Dept.)

The work of repairing the head gates at the Power House was continued throughout the month.

Desplaines River Diversion.

The Sanitary District Organization employed a force of 22 men cutting trees and underbrush and cleaning out the bed of the Desplaines River south of the Lyons-Summit Road throughout the month.

NORTH SHORE CHANNEL.

Outfalls.

The Sanitary District organization employed a force of 11 men and one team from the 1st to the 6th and 26th to the 31st constructing a new outfall on the west side of the channel north of Touhy avenue and the same force was engaged in repairing the outfalls at Pratt avenue from the 7th to the 11th and filling in a gully east of the channel north of Main street from the 12th to the 25th.

BRIDGES.

Main Street Bridge.

The east abutment of this bridge was underpinned by constructing a concrete footing under the north end of the abutment where the earth had been washed from under the abutment by the water from an outfall. The work was begun on the 14th and completed on the 19th.

Peterson Avenue Bridge.

This bridge was barricaded on the 20th preparatory to reflooring with creosoted block. The work of removing the old floor was completed on the 30th and cleaning of the steel work was begun.

PUMPING STATIONS.

39th Street Pumping Station.

This station was operated pumping sewage throughout the month, the pumps working as follows: Sewer pump No. 1 was operated some part of eighteen days or a total of two hundred and thirty hours and ten minutes. Pump No. 2 some part of nineteen days or a

total of two hundred and seventy-five hours. Pump No. 4 some part of sixteen days or a total of three hundred and twenty-one hours. The three pumps were operated for a grand average of eight hours and fifty-three minutes for each day of the month and pumped an average of 10076 cubic feet of sewage for each minute of the month. Sewer pump No. 3 and fresh water pumps Nos. 5 and were shut down the entire month.

Repairs on sewage pump No. 2 were completed and the pumps were put back in service on the 2nd. The steam turbine and generator were not operated during the month.

No work was done during the month by the Great Lakes Dredge & Dock Company, contractors for the repairing of the breakwaters at this station.

Lawrence Avenue Pumping Station.

This station was operated in pumping sewage throughout the month, the pumps were operated as follows: Sewer pump No. 2 was operated some part of eleven days or a total of one hundred and seventy-one hours and fifteen minutes. Pump No. 3 some part of twenty-seven days or a total of five hundred and seventy-six hours and thirty-five minutes. The two pumps were operated for a grand average of twelve hours and four minutes for each day of the month and pumped an average of 5564 cubic feet of sewage for each minute of the month. Sewer pump No. 1 was shut down the entire month. Fresh water pump No. 4 was operated some part of eight days or a total of eighty-seven hours and fifteen minutes, an average of two hours and forty-nine minutes for each day of the month, and pumped an average of 2290 cubic feet of water for each minute of the month.

The parapets around the walls leading to the intake and discharge chambers of the fresh water pump were raised.

Wilmette Pumping Station.

This station was operated pumping fresh water throughout the month, the pumps were operated as follows: Pump No. 1 was operated some part of twenty-four days or a total of five hundred and fifteen hours and fifty-eight minutes. Pump No. 2 some part of twenty-one days or a total of four hundred and thirteen hours and three minutes. Pump No. 3 some part of twenty-three days or a total of four hundred and eighty-three hours and four minutes. Pump No. 4 some part of fifteen days or a total of two hundred and forty-eight hours and forty-nine minutes. All of the five pumps were operated for a grand average of thirteen hours and twenty-four minutes for each day of the month and pumped an average of 28389 cubic feet of water for each minute of the month.

STRUCTURES AND EQUIPMENT FOR SANITARY IMPROVEMENTS AND SPECIAL INVESTIGATIONS.

Morton Grove Sedimentation Plant.

This plant was operated throughout the month and the regular maintenance and operation superintended by the Sanitary Division.

Laboratory at 39th Street.

Chemical analyses were made weekly of samples collected from the Main Channel and from the Illinois River at Morris, Ottawa, Peru and Chillicothe. Special analyses were made on samples from Lockport.

Analyses were made of routine samples from the Stock Yards testing station covering raw sewage and activated sludge process effluents.

Stock Yards Testing Station.

This station was operated as usual with the following devices: activated sludge process, aeration and settling tanks.

Sewer and Rain Gages.

A sewer gage was operated on Davis street in Evanston. Rain gages were operated at the 39th street pumping sta-

tion, Stock Yards testing station, Lockport, Kensington and 31st and Western avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport. Weekly samples from the Main Channel at Lockport and the Illinois River at Morris, Ottawa, Peru, and Chillicothe. Special samples were collected along the Main Channel and the Illinois River on a trip from Chicago to the Mississippi River.

ENGINEERING.

Drafting Division.

The work carried on during the month consisted of the following: Revising large real estate wall maps, indexing and filing maps and plans was continued, plotting cross sections of Main Channel spoil banks, writing the Chief Engineer's Annual Report for 1917 was continued, work on the Calumet-Sag atlas was continued, writing monthly reports of the Calumet-Sag Channel was continued, preparing contract drawings for the widening of the Chicago River at 16th street, copying section corner notes for permanent record, computing labor costs for pumping section 9 of the Calumet-Sag Channel, titles were printed on the plans of the Evanston Sewage Pumping Station, preparing notes on the Chicago River, copying records for the Calumet-Sag atlas at the County Building.

Bridge Division.

Work was continued on the shop details for the steel work of the Calumet Sewage Pumping Station and on the design and details of the reinforced concrete floors and walls.

Sanitary Division.

The preparation of a report on the testing station work was begun. The preparation of plans and specifications for the Calumet Intercepting Sewer was continued. Conferences were held with officials of the City of Chicago.

Conferences were held with Mr. W. D. Richardson and others from Packingtown on various topics relating to the sewage problems in Packingtown. Preparation of plans and specifications for the Evanston Sewage Pumping Station was completed and the work advertised. Preparation of plans of the Desplaines River treatment works was continued and conferences were held with the village officials. The preparation of supplementary plans for the Calumet Sewage Pumping Station was continued and correspondence was carried on with Consulting Engineer, A. B. Wood, on all pumping stations. Studies were made of the re-arrangement of the 95th Street Pumping Station.

A report was made on the condition of water supply and sewage disposal in Indiana. In company with Dr. Bundesen of the Chicago Health Department, an inspection was made of the plants of the American Steel Foundries Company at Indiana Harbor and inquiry made into the health conditions in East Chicago.

Mr. T. C. Hatton, Chief Engineer of the Milwaukee Sewage Commission, visited the testing station and the Calumet Intercepting Sewer construction work. Other visitors included the City Council of Kioto, Japan.

A report was made on the corn-products works of the Chicago Refining Company at Harvey, Ill.

Attention was given to the suit of H. J. McNichols Company for claims on the sewer contract completed by them in 52nd avenue and W. 39th stret.

Hydraulic Measurements Division.

The self-registering gages on the Main Channel at Willow Springs and Lemont and on Lake Michigan at the U. S. Coast Guard Station, Chicago Harbor, were operated and periodically inspected. The records from these gages were worked up in the Main Office.

Field Parties.

Party was employed on North Shore sloping, North Shore Channel outfalls repairs, Chicago River docking, repairs to cribs at the 39th Street Pumping Station, claims for damages by the C. & I. W. R. R. caused by wash from spoil banks, spoil bank measurements at Romeo for stone to be taken by the A. T. & S. F. R. R. Co.; land and dock rental survey, Lot 13 Section "O" Main Channel; setting gage at Lawrence avenue Pumping Station; right of way survey Section 7 Main Channel.

The Calumet-Sag field parties performed the usual routine construction as follows: The Sag Division on Section 1; the Worth Division on Sections 7 and 8; the Blue Island Division on Sections 13 and 14.

The general engineering force and other employees continued superintending engineering, construction and maintenance work, checking estimate notes, computing unit construction costs of the Evanston and Calumet sewers and of the Calumet-Sag Channel sections, keeping the accounts of the department, and performing other necessary duties, etc.

Respectfully submitted,

G. M. WISNER,
Chief Engineer.

The Clerk presented the report of the Chief Engineer for the month of September, 1918, which was ordered published and filed, as follows:

CHICAGO, October 1, 1918.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of September, 1918, giving the detailed operations of the same.

CONSTRUCTION.

Chicago River, Main Outlet, South Branch and Its Forks.

The Brennan Construction Company, employed by the Northwestern Elevated Railroad Company for the construction of a new dock on the cutoff line in front of the union loop power house property, below Van Buren street, continued operations throughout the month. The work done consisted in constructing a new wall for the power house, east of the cutoff line.

NORTH SHORE CHANNEL.

Removal of Spoil Banks.

The National Brick Company removed no material from the spoil banks of the channel during the month.

CALUMET-SAG CHANNEL.

Section 1.

J. O. Heyworth, contractor for the construction of this section continued operations throughout the month. The following work was carried on: Excavating glacial drift by dragline between stations 968+00 and 973+50 (M. C. Stations) from the 1st to 30th, working one 10-hour shift per day. Drilling rock in turning basin between stations 968+50 and 973+50 from the 1st to 30th, 10,368 lineal feet of holes were drilled. Backfilling behind north wall was carried on by steam shovel No. 4 between stations 3+50 and 15+50 from the 10th to 30th and by locomotive crane No. 1, using material cleaned up from channel, between stations 4+00 and 4+50 from the 1st to 16th, and by locomotive crane No. 2 between stations 43+50 and 67+00 from the 14th to 30th. Blasting rock in turning basin at station 973+00 on the 29th. All the aforementioned work was carried on in one 10-hour shift per day. Pumping channel was carried on at station 28+00, working two 12-hour shifts per day throughout the month. The following work was carried on by force account: Installing snubbing posts on the 10th, and from the 16th to the 25th. Pumping channel for sections 2 to 12 was done throughout the month on this section by the contractor under supplementary agreements. An average daily force of

80.5 men was employed. At the end of the month 90.5 per cent of the total estimated value of the contract was completed.

Section 13.

A. Guthrie & Co., contractors for the construction of this section, continued operations throughout the month. Pumping channel was carried on at station 761+50 from the 1st to 5th, and at station 782+00 on the 4th and 5th, working one 10-hour shift per day, and at station 782+00 on the 26th and 27th, working one 6-hour shift per day. An average daily force of 4 men was employed. At the end of the month 57.2 per cent of the total estimated value of the contract was completed.

Section 14.

A. Guthrie & Co., contractors for the construction of this section, continued operations throughout the month. The work was carried on as follows: Excavating spoil from spoil bank for backfilling behind the north wall, by steam shovel No. 5, between stations 824+00 and 835+25 from the 5th to 14th and 18th to 28th, working one 10-hour shift per day. Pumping channel was carried on at station 846+00 from the 3rd to 7th, working one 5-hour shift per day, and on the 19th and 20th working one 6-hour shift per day, and at station 837+00 from the 3rd to 15th working an average of 7½ hours per day, and from the 19th to 21st working one 7-hour shift per day. Backfilling north wall by hand was carried on between stations 834+00 and 844+00 from the 3rd to 28th, working one 10-hour shift per day. An average daily force of 5 men was employed in removing forms from the sewage discharge chamber from the 3rd to 5th and 13th and 14th, working one 10-hour shift per day. Backfilling Morgan Park sewer was carried on by an average daily force of four men from the 6th to 9th, working one 10-hour shift per day.

BRIDGES.

Western Avenue Bridge.

A. Guthrie & Co. employed an average daily force of ten men in laying temporary pavement at the south approach of this bridge from the 1st to 3rd and 5th to 7th, and at the north approach from the 24th to 30th, working one 10-hour shift per day.

Chicago Street Bridge.

A. Guthrie & Co. employed an average daily force of seven men building a temporary road bridge across the channel from the 26th to 30th.

Division Street Bridge.

A. Guthrie & Co. employed an average daily force of 11.5 men placing reinforcing metal in the south abutment from the 3rd to 6th and 13th and 14th, 20th and 21st; concreting north abutment from the 16th to 19th, and south abutment from the 23rd to 25th, removing forms from the abutments on the 26th and 27th. All the above work was carried on in one 10-hour shift per day, except concreting from the 16th to 19th, which was done in one 7½-hour shift per day.

B. & O. and G. T. W. Ry. Bridges.

A. Guthrie & Co. contractors, carried on the following work during the month: Excavating rock and glacial drift from the 13th and 27th between stations 749+00 and 747+25, working one 10-hour shift per day; drilling 10-ft. holes in rock from the 28th to 30th, working one 10-hour shift per day. Pumping channel was carried on at station 749+00 from the 1st to 3rd, working one 5-hour shift per day and on the 13th and 14th, working one 9-hour shift per day. Hand work was carried on as follows: Grading the north end of the new B. & O. (C. C. Division) bridge from the 6th to 10th; laying rails over said bridge on the 11th and 12th, working one 10-hour shift per day. The B & O. Ry. Company employed an ave

age daily force of 12.6 men installing new interlocking system on the new B. & O. (McCook Line) from the 3rd to 6th, 8th to 15th, 17th to 30th; laying tracks and decking over bridge B. & O. (C. C. Division) on the 7th; diverting tracks over new B. & O. (C. C. Division) bridge on the 16th. Traffic was diverted over new bridge at 9:52 A. M. on the 16th.

The Strobel Steel Construction Company employed an average daily force of nine men in riveting girder braces and placing stringers on the new B. & O. (C. C. Division) bridge from the 3rd to 6th and in unloading steel for the G. T. W. Ry. bridge on the 7th, working one 10-hour shift per day.

Chicago, Rock Island and Pacific Ry. (Main Line) Bridge.

The C. R. I. & P. Co. employed an average daily force of 21.9 men on the following work: Grading for and making connection to new west-bound track crossing new bridge No. 1, from the 3rd to 5th. The first train passed over the new bridge at 11:30 A. M. on the 5th. Ballasting new west-bound track on the 6th and 7th; grading and making connection to new east bound track crossing new bridge No. 1 on the 9th. The first train passed over diverted new east-bound track at 12:09 on the 9th. Making connection from new diverted east-bound track to A. Guthrie & Co.'s spur track on the 10th. Ballasting new east-bound track on the 10th; stripping felt and burlap from 10-inch water main on the C. R. I. & P. bridge over Stony Creek on the 10th; placing braces under same from the 13th to 17th; recovering same with frost proofing on the 18th and 19th. All work was carried in one 10-hour shift per day.

The Overland Construction Company employed an average daily force of seven men in cutting rivets to move girders on former east-bound track of bridge crossing Stoney Creek from the 17th and 19th; taking out said girders on the 20th; unloading same to Gregory street on the 22nd, working one 10-hour shift per day.

Controlling Works.

A. Guthrie & Co. employed an average daily force of 13 men in building forms and concreting lamp post bases on the south wall from the 25th to 28th, working one 10-hour shift per day.

G. P. Nichols, electrical contractor, employed an average daily force of three men setting machinery for sector gates from the 3rd to 30th, working one 10-hour shift per day.

The Kelly-Atkinson Construction Co. employed an average daily force of nine men setting racks on the northeast sector gates on the 3rd and 6th; placing screens from the 18th to 21st; setting up railings from the 22nd to 26th. Placing screens on the southeast sector gates on the 5th and 6th; painting steel on the 17th; placing fenders on the northwest gate on the 7th; placing ice cutters on the 13th and 14th; drilling holes in struts to drain water pockets from the 18th to 24th; also on the southwest gate from the 7th to 14th; placing screens on the 16th and 17th; painting steel on the 20th; placing ice cutters on the 27th. All work was carried in one 10-hour shift per day.

The Imperial Brass Co. employed one man in burning ice cutters on the southwest, northeast and southeast sector gates on the 17th and 18th, working one 8-hour shift per day.

The Sanitary District organization employed two men in moving brick and material to construct machinery houses at the sector gates on the 30th, working eight hours.

SEWERS.

CALUMET INTERSECTING SEWER.

Contract Section No. 4.

Nash Brothers, contractors, continued work of placing concrete sewer section throughout the month. The work progressing from station 176+23 to station

181+76. The work of excavating under the I. C. R. R. tracks was carried on by steam shovel throughout the month. An average daily force of 63.5 men and 17 teams was employed. The work was 89.4 per cent completed at the end of the month.

Contract Section No. 6.

Byrne Brothers Dredging and Engineering Company continued operations throughout the month. The work consisting of excavation of the top cut by steam shove land the bottom cut by dragline and placing concrete sewer section; progressed from station 75+44 to station 80+66. An average daily force of 105 men was employed. The work was 87.1 per cent completed at the end of the month.

Contract Section No. 7.

The T. J. Forschner Contracting Company, contractors, continued operation of cleaning sewer and grading throughout the month. The main items of this contract were reported completed in July. An average daily force of 3.5 men and one team was employed throughout the month.

Evanston Intercepting Sewer.

Nash-Dowdle Company, contractors, continued operations throughout the month. On the 5-foot sewer on the lake front, work was continued until the 9th, excavation being handled by the Parson's excavator. The work progressed from station 28+51 to station 31+85. Backfilling by steam shovel on this sewer was completed on the 28th, this completing all work on the said sewer.

The work of driving the pile protections for the sewer on the lake front near Dempster street was completed on the 5th and the pile driver was moved along the lake front to Lee street from the 5th to 13th, driving of piles for protection of the sewer at this point was continued throughout the month. The work on the 3½-foot sewer on the lake front was continued throughout the month. The work consisting of excavation of the top cut by steam shovel and the bottom cut by hand and placing concrete sewer section. The work progressed from station 74+28 to station 89+09. The work on the 6-foot sewer in Elmwood avenue, in tunnel, was continued throughout the month. The work progressing from station 19+72 to station 15+88 and from station 32+33 to station 34+65. At this point the sewer changes from 6-foot to 4½-foot. The work on the 4½-foot sewer was continued throughout the month, progressing from station 34+65 to station 36+32. Work on the 4½-foot sewer in Custer avenue and Washington street, in tunnel was continued throughout the month, work progressing from station 46+46 to station 42+49 and station 52+31 to station 55+71.

The work of installing machinery for the 4-foot sewer in Custer avenue was begun on the 4th, excavation was begun on the 6th, concreting begun on the 14th and continued throughout the month, progressing from station 58+75 to station 62+10. The excavation plant consisted of Parson's excavator for the top cut and a Moore excavator for the balance of the cut. The work of constructing the 6-foot sewer in Lake street by open cut method was begun on the 4th. Concreting was begun on the 17th and continued throughout the month, work progressing from station 95+39 to station 96+78. An average daily force of 237 men was employed throughout the month. The work was 99.2 per cent completed at the end of the month.

PUMPING STATIONS.

Calumet Sewage Pumping Station.

The T. J. Forschner Contracting Company continued operations throughout the month. The excavation for the sub-structure was continued from the 1st to 25th. During the balance of the month the drag line was engaged in

rehandling of the spoil. The spoil from the excavation was placed for backfill on section 7, of the Calumet sewer until the 7th, and from the 7th to 25th the spoil was used for grading the roadway at the north end of the property. The second dragline was received on the 18th and the work of assembling same was carried on for the balance of the month. The work of erecting material bins, cement sheds and general plant and the installation of two concrete mixers was carried out throughout the month. An average daily force of 39 men was employed throughout the month.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

Walls.

The Sanitary District organization employed a force of 20 men operating the "cement gun" throughout the month, plastering about 13,000 sq. ft. of the west wall, south of Romeo, with a mixture of one part cement to three parts sand.

Bridges.

The Sanitary District organization made minor repairs to the bridges at Summit during the month.

Controlling Works.

The bear trap dam at the controlling works was open some part of four days or a total of nine hours and forty-five minutes, an average of nineteen minutes for each day of the month.

MAIN CHANNEL EXTENSION.

Walls.

The Sanitary District organization employed a force of 35 men on the work of repairs to the walls of this channel throughout the month. The work consisted of cutting out distintegrating concrete and replacing same with portland cement concrete. Some 290 cu. yds. was replaced on the east wall just south of 16th street, Lockport.

BRIDGES.

Ninth and Sixteenth Street Bridges.

A transformer was repaired and installed on the 9th street bridge on the 5th and 6th. Two men were on duty on these bridges working shifts from 7 A. M. to 3 P. M. and from 3 P. M. to 11 P. M. throughout the month, each man caring for both bridges.

Butterfly Dam.

This dam was operated on the 1st, 8th, 15th and 22nd, to ascertain the condition of the same.

Dams at the Power House.

The forty-eight foot dam at the power house was open some part of twenty-five days or a total of one hundred and seventy-three hours and twenty-five minutes, an average of five hours and forty-seven minutes for each day of the month. The twelve foot dam at the power house was shut down the entire month.

New window shades were placed on the dam house on the 14th. Samples of the canal water were taken every eight hours for the Sanitary Division Three men were on duty, working three 8-hour shifts per day, throughout the month.

I. & M. Canal Lock at the Power House.

Nineteen boats passed through this lock during the month. No one was on duty except when the boats were locked through when this was done by the dam tender. The lights and switches were repaired and new gages were installed on the 19th. The switches were repaired on the 28th.

Power House (Electrical Department).

The Sanitary District organization continued work on the repairs to the head gates at the power house during the month.

Des Plaines River Diversion.

The Sanitary District organization employed a force of 22 men, working

from the 1st to 15th, cutting underbrush and cleaning out the bed of the Des Plaines River south of the Lyons-Summit Road.

Bridges.

Minor repairs were made to the 16th street bridge during the month by the Sanitary District organization.

North Shore Channel.

The Sanitary District organization employed a force of 11 men and one team from September 1st to 15th constructing a new outfall on the west side of the channel north of Touhy avenue. The same force worked from the 16th and 18th reinforcing the outfall west of the channel south of Touhy avenue, and from the 18th to 30th cleaning out the ditches west of the channel at Peterson avenue. Another force of 22 men worked from the 16th to 30th filling a gully east of the channel about 500 feet south of Oakton avenue.

BRIDGES.

Peterson Avenue Bridge.

Lumber for the re-flooring of this bridge arrived on the 2nd. During the month the steel work of the bridge was cleaned and painted. The back walls at the ends of the bridge were built up to the level of the roadway and the new floor was placed. The bridge was opened to traffic on the 27th. All work was done by the Sanitary District organization, except laying the paving blocks, which was done by the James A. Sackley Company. Minor repairs were made to the roadway floors of the bridges at Touhy, Devon and Howard avenues.

PUMPING STATIONS.

39th Street Pumping Station.

This station was operated pumping sewage throughout the month. The pumps were operated as follows: Sewer pump No. 1 was operated some part of three days or a total of fourteen hours and forty minutes. Pump No. 2 some parts of three days or a total of eleven hours and forty-five minutes. Pump No. 4 some part of thirty days or a total of seven hundred and twenty hours. The three pumps were operated for a grand average of 8 hours and eighteen minutes for each day of the month and pumped an average of 6520 cubic feet of sewage for each minute of the month. Sewer pump No. 3 and the fresh water pumps Nos. 5 and 6 were shut down the entire month. The steam turbine and generator were not operated and sewage pumping engine No. 3 was dismantled for a thorough overhauling during the first part of the month and not back in service at the end of the month. The construction of a housing for the coal crane was begun on the 9th and continued throughout the month by a force of two carpenters. The Great Lakes Dredge and Dock Company, contractors for repairing the breakwater and dredging the intakes at this station, begun dredging on the 19th and removed 2140 cubic yards from the intake proper and 1434 cubic yards from the intake entrance.

Lawrence Avenue Pumping Station.

This station was operated, pumping sewage, throughout the month. The pumps were operated as follows: Sewage pump No. 1 was operated some part of one day or a total of forty-five minutes. Pump No. 2 some part of seventeen days or a total of two hundred and ninety-three hours and fifteen minutes. Pump No. 3 some part of twenty-three days or a total of four hundred and forty-three hours and three minutes. All of the three pumps were operated for a grand average of eight hours and eleven minutes for each day of the month and pumped an average of 4234 cubic feet of sewage for each minute of the month. Fresh water pump was operated some part of seventeen days or a total of two hundred and fifty-seven hours and 30 minutes, an average of eight hours and thirty-two minutes for each day of the month, and pumped an average of 6848

cubic feet of water for each minute of the month. Minor repairs were made to pumping engine No. 1, to the boiled feed pump and to the coal conveyor during the first half of the month.

Wilmette Pumping Station.

This station was operated pumping fresh water throughout the month. The pumps were operated as follows: Pump No. 1 was operated some part of twenty-seven days or a total of five hundred and thirty-two hours and thirty-eight minutes. Pump No. 2 some part of nineteen days or a total of three hundred and three hours and forty-five minutes. Pump No. 3 some part of fourteen days or a total of two hundred and thirty hours and eight minutes. Pump No. 4 some part of eighteen days or a total of two hundred and seventy hours and fifteen minuts. All of the four pumps were operated for a grand average of seven hours and eight minutes for each day of the month and pumped an average of 24021 cubic feet of water for each minute of the month. A diver was employed in removing obstructions from the screens at this station from the 9th to 21st, and was assisted by a part of the bridge repair force.

STRUCTURES AND EQUIPMENT FOR SANITARY AND SPECIAL INVESTIGATION.

Morton Grove Sedimentation Plant.

This plant was operated throughout the month and the regular maintenance and operation supervised by the Sanitary Division.

Laboratory at 39th Street.

Chemical analyses were made weekly of samples collected from the Main Channel and the Illinois River at Morris, Ottawa, Peru and Chillicothe. Special analyses were made on the samples sent from Lockport. Analyses were made of routine samples from the Stock Yards testing station covering raw sewage and activated sludge process effluents. Special analyses were made on samples from the Main Channel and Illinois River, collected on a trip from Chicago to the Mississippi River.

Stock Yards Testing Station.

This plant was operated as usual with the following devices: Activated sludge process, aeration and settling tanks. The entire plant was shut down for dismantling on the 30th.

Sewer and Rain Gages.

Rain gages were operated at the 39th street pumping station, Stock Yards testing station, Lockport, Kensington, and at 31st street and Western avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport. Weekly samples from Lockport and the Illinois River at Morris, Ottawa, Peru and Chillicothe.

ENGINEERING.

Drafting Division.

Work of revising the real estate wall map was continued and completed. Compiling the Calumet-Sag atlas was continued. Preparing Chicago River notes was continued. Writing the Chief Engineer's annual report for 1917 was completed. Copying section corner notes was continued. Indexing and filing maps and plans was continued. Writing monthly reports of the Calumet-Sag Channel construction work was continued. Data at the warehouse was indexed. Preparing maps and plans for general use. Computing steel estimate for Union Loop power house. Investigation of claims for extra pumping on Section 9 of the Calumet-Sag Channel. Work on the Calumet sewer atlas was continued. Main Channel lease map was posted.

Bridge Division.

The details of the steel work of the

Calumet sewage pumping station were completed. Work was continued on the design and details of the reinforced concrete work. A plan was made for the re-flooring of the Peterson avenue bridge. A design was begun for a temporary dam at the 48th avenue bridge across the Calumet-Sag Channel to permit pumping out the channel between this point and the controlling works, after Section 1 has been cut through to the Main Channel. A permit was secured from the Council of Defense for building the machinery houses at the controlling works of the Calumet-Sag Channel.

Sanitary Division.

The preparation of a report on the testing station work at the Stock Yards was continued. The preparation of plans and specifications for the Calumet sewer was continued. Conferences were held with officials of the City of Chicago. Preparation of plans of the Des Plaines River treatment works was continued and conferences held with the village officials. The preparation of supplementary plans for the Calumet pumping station was continued. Correspondence was carried on with Consulting Engineer A. B. Wood on all pumping stations. Studies were made of the proposed re-arrangement of the 95th street pumping station. A visit was made to the north shore water and sewage plants.

Hydraulic Measurement Division.

The self-recording gages at the Main Channel at Willow Springs and Lemont and on the Lake Front at the U. S. Coast Guard Station were operated and periodically inspected. The records from the gages were worked up in the office.

Field Parties.

Party was engaged on North Shore Channel sloping, field work and outfall repairs at Lincoln avenue. Chicago River dredging and docking. Repairs to the cribs at 39th street Pumping Station. Spoil bank measurements on Section O, Main Channel, and also on Section 13, Main Channel for stone taken for the A. T. & S. F. Ry. Co.

The Calumet-Sag field parties performed the usual routine construction duties as follows: The Sag Division on Section 1; the Blue Island Division on Sections 13 and 14.

The general engineering force and other employees continued superintending engineering, construction and maintenance work, checking estimates, compiling unit construction costs of the Evanston and Calumet sewers and of the Calumet-Sag Channel sections. Keeping the accounts of the department, preparing vouchers, furnishing information for other departments, and performing other necessary duties, etc.

Respectfully submitted,

G. M. Wisner,
Chief Engineer.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

Chicago, January 9, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Electrical Development reports that the Board on August 1, 1918 (page 869 of the Proceedings) entered into a contract with the L. Wolff Manufacturing Company, located at Hoyne and Carroll avenues, Chicago, to supply said company 1,000 k. w. of electrical energy to be largely used in connection with Government work for a period of two years from October 1, 1918, and after said period until said contract is cancelled by either party by giving 30 days written notice.

Your Committee further reports that it has received a communication from the Electrical Engineer in which he

states that the Sanitary District expended the sum of $1,007.74 exclusive of the cost of transformers, for electrical equipment and labor required on the premises of said company in furnishing said service, and also the sum of about $2,000.00 exclusive of cost of cable and transformers in reinforcing the distributing circuits of the Sanitary District and substation equipment at he Rice and Lincoln sreets substation. He further states that the Government has cancelled its war contracts with said company, and said company now requires only 500 k. w. of electrical energy for its regular work, and has requested that said contract be cancelled, and offers to pay the Sanitary District the sum of $2,000.00 towards the expense above stated, if the Sanitary District will enter into a new contract with it to furnish 500 k. w. of electrical energy for a period of twenty-one months from January 1, 1919, and after said period until said contract is cancelled by either party by giving 30 days written notice.

Your Committee having considered said matter, is of the opinion that the offer of said company above set forth should be accepted, and said new contract which is herewith transmitted to the Board, be approved, and therefore recommends the passage of the following order:

Ordered, That the contract between The Sanitary District of Chicago and the L. Wolff Mfg. Co., dated July 25, 1918, for furnishing 1,000 k. w. of electrical energy to said company be, and the same is hereby cancelled upon the payment to the Sanitary District by said company the sum of $2,000.00; and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District, and the Clerk, be, and they are hereby authorized and directed to execute in duplicate the attached new contract for furnishing to said company 500 k. w. of electrical energy upon the terms and conditions therein set forth, which said contract has heretofore been duly executed by said company.

Respectfully submitted,
H. E. Littler,
Chairman.
Matt. A. Mueller,
Wm. J. Healy,
George W. Paullin,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

Chicago, January 9, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Electrical Development presents herewith in duplicate renewals of contracts with the Chicago Steel Foundry Company, 3720 South Kedzie avenue, and the Clapp, Norstrom and Riley Equipment Company, 28th street and 61st avenue, Clyde, Cook County, Illinois, both corporations, wherein said companies agree to take, and the Sanitary District agrees ot furnish electric power for the periods of time and upon the terms and conditions set forth in said contracts, which are in the usual form and have been approved by the Electrical Engineer. Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby au-

thorized and directed to execute, in duplicate, the attached contracts, the same having been heretofore properly executed by said companies.

Respectfully submitted,
H. E. Littler,
Chairman.
Matt. A. Mueller,
Wm. J. Healy,
George W. Paullin,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Judiciary.

Mr. Healy presented the following report from the Committee on Judiciary:

Chicago, January 9, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Judiciary reports that on October 16, 1915, Anna Kartak brought suit against hte Sanitary District in the Circuit Court of Cook County, General No. B17,153, to recover damages in the sum of $5,000.00 for injuries alleged to be due to an electric shock claimed to have been sustained by her on September 14, 1914, by reason of the falling of an electric transmission wire of the Sanitary District on West 25th street at the alley between Whipple street and Albany avenue in Chicago, Illinois.

Your Committee further reports that the Attorney has given it as his opinion that while there is some doubt about the liability of the Sanitary District as to the cause and result of said accident, it is advisable to accept her offer to settle said suit for the sum of $350.00.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw a warrant in the sum of $350.00 payable to Anna Kartak and deliver the same to her upon a voucher to be approved by the Attorney upon her furnishing a release in full, of all claims, and demands for damages against the Sanitary District because of said accident, and upon her furnishing such other releases as the Attorney may deem necessary, and also upon the receipt of a stipulation signed by her and her Attorney of Record to dismiss said suit without costs to the Sanitary District.

Respectfully submitted,
Wm. J. Healy,
Chairman.
H. E. Littler,
George W. Paullin,
Patrick J. Carr,
Committee on Judiciary.

Mr. Healy moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Eight.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, January 9, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Finance transmits herewith the bond of C. Arch Williams, as Attorney of The Sanitary District of Chicago, in the sum of $20,000.00, with the Globe In-

demnity Company thereon, as surety, conditioned upon the faithful performance of his duties as such Attorney.

Your Committee, having examined said bond, recommends the passage of the following order:

Ordered, That the bond of C. Arch Williams, as Attorney of the Sanitary District above specified be, and the same is, hereby approved.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 9, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it may be necessary to print and bind 500 copies of the biennial report of the receipts and disbursements of The Sanitary District of Chicago for the years 1916 and 1917, copies of which report are to be transmitted to the Governor and both houses of the General Assembly of the State of Illinois, as required by law.

Your Committee therefore recommends the pasage of the following order:

Ordered, That the Clerk of the Sanitary District be, and he is hereby, authorized and directed to prepare specifications for the printing and binding of said report, and to advertise for bids in accordance therewith.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 9, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of January payroll, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Mr. Lawley moved that the report be adopted and the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Eight.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, January 9, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that during the first part of October, 1918, he was authorized by your Committee to construct certain fences around the Lockport Power House in order to protect the approaches to said Power House during the war; that said matter was of an emergency character, and that, acting upon said authority, he constructed said fences at a cost of $772.37, and he now requests that his action in the premises be ratified and confirmed.

Your Committee, having had the matter under consideration, recommends the passage of the following order:

Ordered, That the action of the Chief Engineer in expending the sum of $772.37, as above specified, be, and the same is hereby ratified and confirmed.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT. A. MUELLER,
H. E. LITTLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark,

Healy, Lawley, Mueller, Nance and Paullin—Eight.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, January 9, 1919.

To The Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Employment herewith transmits the following report of actions taken:

DROPPED FROM SERVICE.

Police Department—

Joseph Ring, Patrolman, $115.00 mo.

A. J. Stasch, Patrolman, $115.00 mo.

Wm. Grace, Carpenter Helper, 50c per hour.

P. Carlin, Carpenter Helper, 50 per hour.

P. Lannon, Carpenter Helper, 50c per hour.

John Barzen, Carpenter Helper, 50c per hour.

M. Ryan, Carpenter Helper, 50c per hour.

Ernest Johnston, Laborer, 45c per hour.

John C. Morrison, Watchman, 40c per hour.

I. H. McMurphy, Watchman, 40c per hour.

TRANSFERS.

Engineering Department—

Edw. Weichinger, Laborer, 45c per hour; Carl Orlich, Laborer, 45c per hour. Transferred from the payroll of the Repairs to the Walls of the Main Channel of the payroll of the Testing Division.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
JAS. H. LAWLEY,
MATT. A. MUELLER,
H. E. LITTLER,
Committee on Employment.

Mr. Paullin moved that the report be approved, published and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

Passed and not voting—Mr. Sergel—One.

PETITIONS AND COMMUNICATIONS.

The Clerk presented the following resolution from the City of Blue Island:

Be it Resolved by the City Council of the City of Blue Island that the order of the Sanitary District dated November 27, 1918, is hereby concurred in, and the contract and lease existing between the City of Blue Island and said Sanitary District, dated December 20, 1908, and expiring December 20, 1918, be, and the same is, hereby extended until such time as a new contract and new lease is entered into between said City of Blue Island and said Sanitary District, or until some other arrangement is made by said City of Blue Island to secure electric power.

EDWARD N. STEIN,
Mayor.

Corporate Seal.
City of Blue Island,
Cook County, Ill.

GEO. J. LANDGRAF.

Approved by the City Council of Blue Island, Illinois, the 16th day of December, 1918.

Referred to the Committee on Electrical Development.

The Clerk presented a communication from the Nash-Dowdle Company, stating that said company was about to request the final inspection and estimate on its contract for the Evanston Intercepting Sewer, Conract No. 1, and extending invitation to the Board of Trustees to inspect said sewer.

Referred to the Committee on Engineering.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Clark presented the following resolution:

WHEREAS, The Board on January 3, 1918, authorized Trustee Wallace G. Clark to appoint a committee to confer with the officials of the United States and other parties in interest, with reference to the withdrawal of the ultimate maximum quantiy of 12,000 cubic feet of water per second from Lake Michigan, and

WHEREAS, Trustee Clark, on January 31, 1918 (page 117 of the Proceedings), reported that in accordance with such authority he appointed as such Committee Trustees Clark, Paullin, Dailey and Carr and Mr. Adcock, the then attorney of the Board, and

WHEREAS, Trustee James M. Dailey is no longer a member of said Board, and

WHEREAS, Trustee Clark now reports that he has appointed William J. Healy as a member of such Committee in place of Mr. Dailey; therefore, be it

Resolved, That the appointment by Trustee Clark of the Committee as above named and the substitution of Mr. William J. Healy as a member of said Committee in place of Mr. Dailey be, and the same is, hereby ratified and confirmed.

Mr. Clark moved that the resolution be adopted.

The motion prevailed.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillen,
Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, JANUARY 16, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

MINUTES.

Mr. Lawley moved that the minutes of the proceedings of the special meeting of December 31, 1918, be approved, as printed, without being read.

Mr. Nance moved, as a substitute, that the minutes of the special meeting of December 31, 1918, as printed in the proceedings, be amended by adding on page 1605, left hand column, thirtieth line, after the words, "I object to it," the following:

"I believe that if this item is passed today, it is passed with undue haste, and I am opposed to it at this time, but I want an opportunity to investigate it, to look into it; that is all I am asking."

On roll call the substitute motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley moved that the minutes of the Proceedings of the special meeting of December 31, 1918, as amended, be approved.

The motion prevailed.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 16, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Electrical Engineer in which he states that one of the large transformers at the Terminal Station recently burned out and that some of the coils and other equipment must be replaced.

He further states that the General Electric Company was the manufacturer of said transformers and it is advisable to order said coils and other equipment from said Company at an estimated cost of $750.00

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered. That the Electrical Engineer be, and he is, hereby authorized and directed to purchase from the General Electric Company said coils and other equipment, provided the cost of same will not exceed the sum of $750.00.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 16, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Electrical Engineer in which he states that the Nelson & LeMoon auto truck of the Sanitary District was considerably damaged on January 9, 1919, by colliding with a street railway car as it was coming out of the driveway at the Terminal Station, and as said auto truck is now out of service it is necessary to repair the same.

He further states that Nelson & LeMoon have offered to furnish a new motor for said truck for the sum of $400.00, and agreed to allow the sum of $25.00 for the scrap value of the damaged motor, making a net price for said new motor of $375.00, and to furnish the necessary material and labor to install said new motor and make other necessary repairs for the additional sum of $163.00.

Your Committee, having considered the matter, is of the opinion that said auto truck should be repaired, and recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is, hereby authorized and directed to purchase from Nelson & LeMoon a new motor for said auto truck for the sum of $400.00 less the sum of $25.00 allowed for the scrap value of said damaged motor, and to

deliver said damaged motor to said Company, and to accept the offer of said Company to make the repairs above specified for the additional sum of $163.00.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 16, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of January payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

GEORGE M. REYNOLDS,
Treasurer.

By J. R. WASHBURN,
Asst. Treasurer.

Chicago, January 22, 1919.

The Clerk presented the report of the Chief Engineer for the month of October, 1918, which was ordered published and filed, as follows:

CHICAGO, November 1, 1918.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of October, 1918, giving the detailed operation of same.

CONSTRUCTION.

Chicago River, Main Outlet, South Branch and Its Forks.

The Brennan Construction Company, employed by the Northwestern Elevated Railway Company on the construction of a new dock on the cut-off line in front of the Union Loop Power House, continued operations throughout the month. The work consisted in plastering the wall of the power house and placing window frames and windows and painting same.

NORTH SHORE CHANNEL.

Spoil Banks.

The National Brick Company removed no material from the spoil banks of this channel during the month.

CALUMET-SAG CHANNEL.

Section 1.

James O. Heyworth, Contractor for the construction of this section, continued operations throughout the month. The work was carried on as follows: Excavating glacial drift by dragline in connection and turning basin between stations 969+00 and 974+25, Main Channel, from the 1st to 31st, working one 10-hour shift per day. Drilling rock in turning basin between stations 970+50 and 974+00 from the 1st to 31st, working one 10-hour shift per day. Blasting rock in turning basin between stations 970+00 and 974+50 from the 1st to 14th and on the 31st, working one 10-hour shift per day. Backfilling was done by locomotive crane No. 2, to level off lie-by between stations 60+00 and 65+00 from the 1st to 11th, working one 10-hour shift per day. Concreting standard retaining wall and turning basin wall between stations 3+50 and 2+50 on the 17th and from the 22nd to 31st, working one 10-hour shift per day. Pumping channel was carried on at station 28+00 throughout the month, working two 12-hour shifts per day. Miscellaneous work was carried on as follows: Excavating by hand and cleaning off walls between stations 968+00 and 973+00, Main Channel, from the 11th to 25th. Backfilling behind south wall by hand between stations 53+00 and 61+00 from the 25th to 31st. Force account work was carried on as follows: Building temporary dam at 48th avenue bridge on the 12th, 14th and 25th to 29th: Pumping channel for sections 2 to 12, inclusive, was carried on at section 1 by the contractor working under supplemental agreements, throughout the month. An average daily force of 78.5 men was employed. At the end of the month 92.7 per cent of the total estimated value of the contract was completed.

Section 13.

A. Guthrie & Co., Contractors, continued operations throughout the month. Hauling spoil from the cylinders of the Rock Island bridge with dinky engine and two dump cars from the 3rd to 25th, working one 5-hour shift per day; hauling concrete with same dinky engine and two dump cars from the mixer to the same bridge cylinders on the 26th, working one 10-hour shift. Team was engaged in hauling cinders to Western avenue

and Chicago street bridges from the 1st to 5th, and two teams hauling cinders to Chicago street bridge from the 7th to 11th, and to the Gregory street foot bridge on the 30th and 31st. An average daily force of seven men was engaged in spreading cinders for foot path on north approach to the Gregory street foot bridge on the 30th and 31st, working one 10-hour shift per day. An average daily force of one man was employed. At the end of the month 57.4 per cent of the total estimated value of the contract was completed.

Section 14.

A. Guthrie & Co., contractors for the construction of this section, continued operations throughout the month. Steam shovel No. 5 and four dinky engines and 18 dump cars were employed in excavating spoil from spoil bank and backfilling behind the north wall between stations 850+00 and 823+50 on the 1st, 2nd, 5th to 23rd and 28th to 31st, working one 10-hour shift per day. Team was engaged in grading the controlling works road from the 2nd to 4th, 11th, 12th and 28th, working one 10-hour shift per day. Pumping channel was carried on at station 846+00 from the 3rd to 5th, working one 8-hour shift per day, and at station 837+00 on the 4th and 5th, working one 5-hour shift per day. Hand work was carried on as follows: Backfilling behind north wall between stations 852+00 and 838+00 from the 1st to 23rd and 29th to 31st, working one 10-hour shift per day. Cleaning channel bottom between stations 837+00 and 842+00 from the 7th to 21st, working one 10-hour shift per day. An average daily force of 51.9 men was employed. At the end of the month 99.8 per cent of the total estimated value of the contract was completed.

BRIDGES.

Western Avenue Bridge.

An average daily force of 9 men was employed by A. Guthrie & Co. in laying temporary pavement at the north approach of this bridge from the 1st to 4th, working one 10-hour shift per day.

Chicago Street Bridge.

An average daily force of 9 men was employed by A. Guthrie & Co. in building temporary road bridge across the channel at this point from the 1st to 8th, working one 10-hour shift per day.

Division Street Bridge.

An average daily force of 8 men was employed by A. Guthrie & Co. in removing concrete forms from the north abutment of this bridge from the 10th to 12th, working one 10-hour shift per day.

C. R. I. & P. Ry. Bridge.

A. Guthrie & Co. employed an average daily force of 6 men, working one 10-hour shift per day, in excavating south cylinders for east half of bridge from the 3rd to 10th and 14th to 25th; concreting same on the 26th. Shoring the northeast bank at the north abutment on the 13th. Building tower for concreting bridge piers from the 28th to 31st.

B. & O. and G. T. W. Ry. Bridges.

A. Guthrie & Co., Contractors, continued operations throughout the month. Steam shovel No. 3 and two dinky engines and 6 dump cars were engaged in excavating rock from channel between stations 747+25 and 746+75 from the 3rd to 12th, working one 10-hour shift per day. Jackhammer drills were engaged in drilling 9-foot holes in rock between stations 746+75 and 747+75 from the 1st to 10th, working one 10-hour

shift per day. Pumping channel was carried on at station 749+00 from the 1st to 31st, working one 8-hour shift per day. Hand work was carried on as follows: Building concrete tower for concreting the west half of the B. & O. bridge form the 23rd to 26th; building forms for concreting west half of the B. & O. bridge north abutment from the 28th to 31st, working one 10-hour shift per day. An average daily force of 14.9 men was employed.

The B. & O. Railway Company employed an average daily force of 13 men installing new interlocking system on the new diversion of the B. & O. (McCook Line) from the 1st to 31st; grading new B. & O. (C. C. Division) tracks between the channel and Stony Creek from the 5th to 7th and 10th and 11th, working one 10-hour shift per day.

C. R. I. & P. Ry. Connecting Track Bridge.

The Strobel Steel Construction Company employed a force of 6 men and derrick car No. 1 in unloading steel for the C. R. I. & P. connecting track bridge on the 7th, working one 10-hour shift per day.

Controlling Works.

A. Guthrie & Co. employed a force of 6 men cancreting lamp post bases on the north wall on the 3rd and 4th and removing concrete floor from recesses at the sector gates from the 17th to 24th, working one 10-hour shift per day.

G. P. Nichols, electrical contractor, employed an average daily force of 3 men setting machinery for the sector gates from the 1st to the 31st, working one 10-hour shift per day.

The Kelly-Atkinson Construction Company employed a force of 5 men placing ice cutters on the sectors gates from the 1st to 24th and 30th and 31st; placing screens on the northeast sector gate from the 25th to 29th, working one 10-hour shift per day on all work.

The Sanitary District organization employed an average daily force of 3 men in building machinery houses at the sector gates from the 1st to 31st, working one 8-hour shift per day.

The Colver Roofing Company was engaged in roofing the sewage discharge chamber on the 9th and 10th, and the northeast and southeast sector gates on the 12th, working one 8-hour shift per day.

SEWERS.

CALUMET INTERCEPTING SEWER.

Contract Section No. 4.

Nash Brothers, Contractors, continued regular operations on the 16½-foot sewer on the 2nd and then suspended this part of the work until sewer section was placed under the Illinois Central R. R. The work progressed from station 181+76 to station 182+23. Work of excavating under the Illinois Central Railroad tracks by steam shovel was continued. The placing of the concrete section under the railroad was begun on the 5th and continued intermittently throughout the month, the concrete section being placed from station 185+25 to station 183+25. The disposal of earth by teams under the railroad was completed on the 21st, the balance of the earth being removed by dragline. An average daily force of 58 men and 12 teams was employed throughout the month. The work was 99.1 per cent completed at the end of the month.

Contract Section No. 5.

Byrne Brothers Dredging and Engineering Company, Contractors, started work on this section on the 31st, the work being the continuation of the regular operations on section

6. The sewer section was placed from station 84+95 to 85+35. The work was suspended at the end of the month. An average daily force of 56 men and 5 teams was employed on the 31st. The work was 0.4 per cent completed at the end of the month.

Contract Section No. 6.

Byrne Brothers Dredging and Engineering Company, Contractors, continued operations throughout the month, the sewer being constructed from station 80+64 to station 84+95, the latter station, being the northerly end of the contract section, was reached on the 30th. The crossing at 115th street was placed during the month, the tracks being cut to accommodate the construction of the sewer. An average daily force of 56.5 men and 5 teams was employed throughout the month. The work was 99 per cent completed at the end of the month.

Contract Section No. 7.

T. J. Forschner Construction Company, Contractors, continued operations until the 19th, on which date all work on this section was completed.

The work during the month consisted of cleaning up, grading, assembling weir gaging chamber and completing brick bulkhead at the east end of the work. An average daily force of 3 men was employed.

EVANSTON INTERCEPTING SEWER.

Nash-Dowdle Company, Contractors, continued operations throughout the month. The work of constructing piers for shore protection on the lake front near Lee street was continued until the 7th, on which date the pile driving was completed. This work was then suspended until the 28th, on which date the framing of the timber work was commenced. The work on the 3½ foot sewer on the lake front was completed on the 10th. The work consisted of excavation by hand and by a Moore machine and placing of concrete. The work progressing from station 89+09 to station 92+99, the latter station being the south limit of the contract.

The work on the 6-foot sewer in Elmwood avenue, in tunnel, was continued to the 9th, when it was completed. The sewer being placed from station 15+88 to station 14+98.5. The tunnel work was continued from the shaft at Elmwood avenue near Lee street, on the 4½-foot sewer until the 28th, when it was completed. The work progressing from station 36+32 to station 39+56.

The work on the 4½-foot sewer in Custer avenue, in tunnel, was continued to the 30th, the work being completed on this date. The work progressed from station 42+49 to station 39+56, and from station 55+71 to station 58+30.

The work on the 4-foot sewer in Custer avenue, open cut, was continued until the 29th, when it was completed, the sewer being placed from station 62+10 to station 69+80.

The work on the 3½-foot sewer in Custer avenue was begun on the 29th and continued throughout the month, the sewer being placed from station 69+80 to station 70+12.

The work on the 6-foot sewer in Lake street, in open cut, was continued throughout the month, the work progressing from station 96+78 to station 99+76. This section of the sewer was completed on the 31st.

The placing of the 18-inch tile sewer in Washington street under the C. & N. W. Ry. was commenced on the 28th and continued throughout the month, the work being done in tunnel and consisted of drifting and timbering preparatory to place the tile sewer.

The work of constructing a special manhole in Lake street, just east of Elmwood avenue, to serve as a pumping shaft for temporary pumping service pending the completion of the Evanston pumping station, was begun on the 17th and suspended on the 28th. The work done consisted of excavating and timbering of the shaft. An average daily force of 197 men and 0.5 teams was employed. The work was 94 per cent completed at the end of the month.

DES PLAINES RIVER INTERCEPTING SEWER.

Nash Brothers, contractors, continued preliminary operation on this contract until the 3rd, on which date work was suspended due to the lack of priority certificates under which to proceed with the work. Minor work such as cleaning up and watching was continued until the 17th on which date all work was suspended. An average daily force of 7 men was employed.

Pumping Stations.

CALUMET SEWAGE PUMPING STATION.

T. J. Forschner Contracting Company, contractors, continued operation throughout the month. The month. The excavation of the substructure was carried on throughout the month, the material being excavated by dragline and rehandled and placed in spoil banks by a second dragline. The first concrete on the work was placed on the 19th, on which date a portion of the bottom of the suction chamber was placed. The placing of concrete was carried on intermittently from the 19th to the end of the month. An average daily force of 47 men was employed throughout the month.

Maintenance and Operation.

MAIN CHANNEL.

Walls.

The Sanitary Distrinct organization employed a force of 18 men operating the "cement gun" throughout the month plastering about 16,250 square feet of the west wall between Romeo and the controlling works, a length of 2300 feet, with a mixture of one part cement to three parts sand.

BRIDGES.

Minor repairs were made to the floors of the bridges at Summit and Lemont by the Sanitary District organization during the month.

CONTROLLING WORKS.

In order to maintain the flow required by law the bear trap dam at the controlling works was open some part of two days or a total of eight hours and twenty-five minutes; an average of twenty-three minutes for each day of the month.

MAIN CHANNEL EXTENSION.

Walls.

The Sanitary District organization employed a force of 36 men throughout the month, cutting out disintegrating concrete and replacing same with portland cement concrete. About 190 cubic yards of concrete was replaced on the east wall just south of 16th street, Lockport.

BRIDGES.

Ninth and Sixteenth Street Bridges.

A heater was made for the 16th street bridge, the motors were repaired on the 27th and the heater was repaired on the 29th. Two men were on duty on these bridges, working form 7 A. M. to 3 P. M., and from 3 P. M. to 11 P. M. Each man caring for both bridges.

BUTTERFLY DAM.

This dam was operated on the 6th, 13th, 20th and 27th. The spot lights were repaired on the 8th. The heaters were repaired on the 9th. A heater was made on the 31st.

DAMS AT THE POWER HOUSE.

On order to maintain the flow of water required by law the forty-eight foot dam at the power house was open some part of twelve days or a total of forty-seven hours and forty minutes; an average of one hour and thirty-two minutes for each day of the month. The twelve foot dam was open some part of one day or a total of two hours and fifty-five minutes; an average of five minutes for each day of the month.

Samples of canal water were taken every 8 hours for the Sanitary Division. Three men were on duty working shifts of 8-hours throughout the month.

I. & M. CANAL LOCK AT THE POWER HOUSE.

Fifteen boats passed through the lock during the month. The boats were locked through by the dam tender. The folowing repairs were made during the month: Key sockets were intalled in the lock house, gages were painted on the 8th and 22nd; the lock circuit was repaired on the 13th and cleaned of grounds on the 14th.

POWER HOUSE (ELECTRICAL DEPARTMENT).

The Sanitary District organization continued the work of repairing the head gates at the power house until the 10th, when the bulkhead was removed.

NORTH SHORE CHANNEL.

Outfalls and Ditches.

The Sanitary District organization employed a force of 17 men and one team throughout the month cutting weeds and cleaning out the ditches west of the channel between Howard and Touhy avenues, and filling in a gully east of the channel about 500 feet south of Oakton avenue. Also a force of 10 men and a foreman was engaged form the 21st to the 29th on the work of completing the ditching on the north side of Oakton avenue west of the channel, which was left unfinished by the contractor for the Niles Center sewer outfall. This work was done at a cost of $370.75.

BRIDGES.

The Sanitary District organization completed the painting of the steel work and laying the new sidewalk of the Peterson avenue bridge on the 7th. All usable material from the old floor and new material left over stored at Irmiter's yard on Lincoln and Peterson avenues. The water pipes on the Hill street and Lincoln avenue bridges were repaired. The steel work of the Lincoln avenue bridge was partly painted. Minor repairs were made to the bridges at Lincoln, Bryn Mawr, Devon, and Howard avenues during the month.

PUMPING STATION.

Thirty-ninth Street Pumping Station.

This station was operated, pumping sewage, throughout the month. The pumps were operated as follows: Sewer pump No. 1 was operated some part of one day or a total of twenty hours. Pump No. 4 some part of thirty-one days or a total of seven hundred and forty-two hours and fifty minutes. The two pumps were operated for a grand average of eight hours and twenty-six minutes for each day of the month and pumped an average of 6551 cubic feet of sewage for each minute of the month. The sewer pump No. 2 was shut down the entire month.

The fresh water pumps Nos. 5 and 6 were each operated for some part of three days or a total of forty-eight hours and fifty minutes, an average of 5830 cubic feet of water for each minute of the month.

The steam turbine and generator were not operated. Sewage pumping engine No. 3 was not operated all month, being overhauled. Painting

of the steel framework supporting the runway for the overhead coal crane was begun on the 16th and continued throughout the month. The construction of the housing for the coal crane was completed on the 14th. The coal crane out of service for a general overhauling the last two weeks of the month.

The Great Lakes Dredge and Dock Company, contractors for repairing the breakwater at this station, continued operations throughout the month. The work consisted of redriving the four seven pile clumps at the intake entrance, sawing off breakwater piles and putting in wales, excavating for and placing back logs and anchor rods.

Lawrence Avenue Pumping Station.

This station was operated pumping sewage throughout the month. The pumps were operated as follows: Sewer pump No. 2 was operated some part of fourteen days or a total of two hundred and seventeen hours and twenty minutes. Pump No. 3 some some part of twenty-five days or a total of five hundred and forty hours. The two pumps were operated for a grand average of twelve hours and thirteen minutes for each day of the month and pumped an average of 2924 cubic feet of sewage for each minute of the month. Sewer pump No. 1 was shut down the entire month. Fresh water pump No. 4 was operated some part of seventeen days or a total of two hundred and ninety-six hours and forty-five minutes; an average of nine hours and thirty-four minutes for each day of the month, and pumped an average of 7555 cubic feet of water for each minute of the month. The coal conveyor was out of service for repairs from the 20th to the end of the month. One of the sewage screens was out of service after the 24th, due to the twisting of some steel angles.

Wilmette Pumping Station.

This station was operated, pumping fresh water, throughout the month. The operation of the pumps was as follows: Pump No. 1 was operated some part of twenty-four days or a total of four hundred and seventy-four hours and eighteen minutes. Pump No. 2 some part of twenty-three days or a total of six hundred and seven hours and thirty-one minutes.

Pump No. 3 some part of thirty days or a total of six hundred and ninety-six hours and forty-eight minutes. Pump No. 4 some part of twenty-six days or a total of five hundred and fifteen hours and twenty-six minutes. All of the four pumps were operated for a grand average of eighteen hours and thirty minutes for each day of the month and pumped an average of 39296 cubic feet of water for each minute of the month. The brick pavement in the roadway at this station was repaired during the month.

STRUCTURES AND EQUIPMENT FOR SANITARY IMPROVEMENTS AND SPECIAL INVESTIGATIONS.

Morton Grove Sedimentation Plant.

This plant was operated throughout the month and the regular maintenance and operation supervised by the Sanitary Division.

Laboratory at Thirty-ninth Street.

Chemical analyses were made weekly of samples collected from the Main Channel and the Illinois River at Morris, Ottawa, Peru, and Chillicothe. Special analyses were made on samples shipped from Lockport. Special analyses were made of samples collected from a 24-hour test of the sewage disposal plant at Fort Sheridan and samples collected from a special trip down the Main Channel.

Stock Yards Testing Station.

The dismantling of this station was begun and continued throughout the month.

Sewer and Rain Gauges.

Rain gages were operated at the 39th street pumping station, Stock Yards Testing Station, Lockport, Kensington, and at 31st street and Western avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport. Weekly samples from Main Channel at Lockport and the Illinois River at Morris, Ottawa, Peru and Chillicothe.

A special investigation was made of the sewage treatment plant at Fort Sheridan extending over 24 hours on the 17th and 18th.

A trip was made down the Main Channel on October 24th in company with Prof. Earle B. Phelps, (U. S. Public Health Service) and Col. I. C. Mehaffey, (U. S. Engineers). On the 23rd and 25th inspection was made of the north shore and Calumet districts.

ENGINEERING.

Drafting Division.

The work done during the month consisted of the sollowing: Revising negative of the real estate wall map; preparing Chicago River notes; preparing Calumet sewer atlas; indexing data at warehouse; compiling Calumen-Sag atlas; indexing and filing maps and plans; copying section corner notes for permanent files; printing index cards; copying records at the County Building for Calumet-Sag atlas; writing monthly reports of Calumet-Sag construction; revising index system; proofreading monthly reports of the Engineering Department; coloring maps for Law Department on the Will County Tax Case; preparing an ordinance map for the Calumet sewer; compiling Chicago River atlas started; preparing maps and negatives for the Zuidema Case on Calumet-Sag overflow.

Bridge Division.

Work was continued on the design and details of the reinforced concrete work for the Calumet Sewage Pumping Station. The design for the temporary dam at 48th avenue bridge across the Calumet-Sag Channel was completed and a bill of material was made.

Sanitary Division.

The preparation of a report on the testing station work at the Stock Yards was continued. The preparation of plans and specifications for the Calumet sewer was continued. Conferences were held with officials of the City of Chicago. Preparation of plans of the Des Plaines River treatment works was continued. Conferences were held with village officials. The preparation of supplementary plans for the Calumet Sewage Pumping Station was continued. Correspondence was carried on with Consulting Engineer A. B. Wood on all pumping stations. Studies were made of the proposed re-arrangement of the 95th Street Pumping Station and a report was made on same. Conferences with Mr. A. B. Wood on Evanston Pumping Station bids, 95th Street Pumping Station and Calumet and Des Plaines Pumping Stations. Estimates prepared on temporary pumping at Evanston. Prices were obtained on standard and special pumps. Specifications were prepared for temporary pumping at Evanston.

Hydraulic Measurement Division.

The self-registering gages in the Main Channel at Willow Springs and Lemont and on the Lake front at the

U. S. Coast Guard Station were operated and periodically inspected. The records for these gages were worked up in the office.

FIELD PARTIES.

Party was employed on Chicago River dredging and docking, Union Loop Power House inspection, re-running base lines and painting stations on dock. Outfall repairs and office work on sloping on the North Shore Channel. Crib repairs at the 39th Street Pumping Station. Spoil bank measurements on Section 8 of the Main Channel.

The Calumet-Sag field parties per formed the usual routine construction duties as follows: The Sag Division on Section 1. The Blue Island Division on Sections 13 and 14.

The general engineering force and other employees continued superintending engineering, construction costs of the Evanston and Calumet sewers and of the Calumet-Sag Channel sections, keeping the accounts of the department, preparing vouchers, furnishing information for other departments and other necessary duties, etc.

Respectfully submited,

G. M. WISNER,
Chief Engineer.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 23, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance begs to report that bonds numbered 29371 to 29398, both inclusive, of the nineteenth issue of The Sanitary District of Chicago to the amount of twenty-eight thousand ($28,000.00) dollars will mature February 1, 1919.

Your Committee further reports that the semi-annual interest on the nineteenth issue of bonds of The Sanitary District of Chicago, amounting to the sum of four thousand four hundred ($4,400.00) dollars, will also fall due February 1, 1919, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are, hereby instructed to draw a warrant, payable to the order of the Treasurer of The Sanitary District of Chicago, for the sum of thirty-two thousand four hundred ($32,400.00) dollars, to pay the principal and semi-annual interest due February 1, 1919, on the bonds of The Sanitary District of Chicago as follows:

The principal of 28 bonds numbered 29371 to 29398, both inclusive, of the Nineteenth issue	$28,000.00
Six months' interest on $220,000.00 of the Nineteenth issue at 4%	4,400.00
Total	$32,400.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 23, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has received a communication from the Chief Engineer in which he states that Patrick A. Nash and Richard J. Nash, co-partners doing business as Nash Brothers, Contractors for Section 1 of the Desplaines River Intercepting Sewer, have delivered at the site of said work 101,660 pounds of cast iron pipe, for which they paid the sum of $3,464.95, which pipe cannot be placed in said work for some time, and they have requested the Sanitary District to advance to them the actual cost of said pipe. He further states that the contract specifies that the sum of six cents per pound shall be paid to said Contractors for said cast iron pipe when placed in said work, and recommends that said Contractors be advanced the sum of three cents per pound on said pipe, or a total of $3,049.80.

Your Committee, having considered the matter, is of the opinion that the foregoing request of Nash Brothers should be granted on the condition that they execute and deliver to the Sanitary District a bill of sale of said pipe, and agree to safeguard the same against breakage, theft or other loss, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be, and they are hereby, authorized and directed to pay to Patrick A. Nash and Richard J. Nash, co-partners doing business as Nash Brothers, the sum of $3,049.80 upon the execution by them and delivery to the Sanitary District of a bill of sale of said pipe, and an agreement in connection therewith that they will safeguard the said pipe against breakage, theft or other loss, and also upon their furnishing the Sanitary District a consent in writing by the surety on their bond that said payment may be made and said bill of sale may be executed.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Healy, Lawley, Littler, Mueller, Nance and Paullin—Six.

Nays—Mr. Sergel—One.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 23, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of January payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Construction Account.

Burr-Vack Co. (transfer cases)	$ 65.00	
Public Service Co, of Northern Illinois (installing light connections)	60.00	
J. Korte (coal)	34.25	
Chicago Towel Co. (towel service)	24.75

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE.
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, January 23, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents contract with the National Conveying Equipment Corporation, 1750 Kolmar avenue, wherein said corporation agrees to take and the Sanitary District agrees to furnish electrical energy for the period therein mentioned and upon the terms and conditions therein set forth. Said contract has been approved by the Electrical Engineer.

Your Committee, therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the attached contract, which has been properly executed by said corporation.

Respectfully submitted,

H. E. LITTLER,
Chairman.
MATT. A. MUELLER,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, January 23, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a

communication from the Chief Engineer in which he states that the work covered by the contract of Richard J. Nash and Patrick A. Nash, co-partners doing business as Nash Bros., dated June 29, 1916, (page 779 of the Proceedings) for the construction of contract Section 4 of the Calumet Intercepting sewer has been completed in accordance with all the terms and conditions of the contract and to his satisfaction, except as to the time of completion. It appears from said final certificate that there was a default of 192 days in the completion of said work due to a delay on the part of the Illinois Central Railroad Company in constructing a temporary bridge for its tracks at the sewer crossing on 104th street and to delays due to war conditions, and the Chief Engineer extended the time for the completion of said work for a period of time equal to the delays in question.

The Chief Engineer further states that he has deducted the sum of $1,000.00 from the amount due the contractors to be paid them when the question as to whether additional compensation should be paid said Contractor for the increased cost of said work due to war conditions is settled.

Your Committee having read said final certificate of the Chief Engineer hereto attached is of the opinion that the sum of $5,383.66, found to be due the contractor after deducting said sum of $1,000.00, should be paid and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago and the Clerk be, and they are hereby authorized and directed to pay to Richard J. Nash and Patrick A. Nash, co-partners doing business as Nash Bros. upon the voucher of the Chief Engineer said sum of $5,383.66 upon the execution by them of a receipt in full of all claims and demands arising out of or resulting from the performance of the work under said contract, except as to said sum of $1,000.00 withheld by the Sanitary District as above stated, and as to all unsettled bills for extra work, and also upon the execution of an affidavit by them that all materialmen, mechanics and workmen employed by them under said contract, have been paid in full and also upon their furnishing the Sanitary District with a consent in writing by the surety on their bond that said payment may be made, said payment, however, to be made subject to any unaccrued obligations imposed by said contract.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

JAS. H. LAWLEY,
H. E. LITTLER,
MATT A. MUELLER.
Committee on Engineering.

FINAL CERTIFICATE.

CHICAGO, January 21, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I hereby certify that Patrick A. Nash and Richard J. Nash, co-partners doing business as Nash Brothers, have completed all work under their contract dated June 20, 1916 (pages 779-824 of the Proceedings for the construction of contract section 4 of the Calumet Intercepting Sewer in accordance with all the terms and conditions of said contract, and to my satisfaction, except as to the time of completion.

Under the terms of said contract, the Contractor agreed to begin the work within thirty days from the date of the approval by the Board of their bond, and to entirely complete said work on or before May 1, 1918.

There was a delay of 192 days in the performance of said work due to the fact that the Illinois Central Railroad Company had not completed a temporary bridge at the crossing of said sewer with the right-of-way of said railroad on the line of 104th street, and there were also delays due to war conditions. The delay on the part of the Railroad Company amounted to 65 days, and the delays due to war conditions amounted to 173 days, or a total of 238 days. I have allowed said Contractor an extension of time in which to complete said work of 192 days, which is less than the total days delay which was occasioned by the causes mentioned.

I have deducted from the total sum due said Contractor the sum of One Thousand ($1,000.00) Dollars, to be withheld by the Sanitary District until the question of whether or not additional compensation shall be paid to said Contractor for the increased prices of labor and material which entered into said intercepting sewer due to war conditions has been settled.

I recommend that the sum of Five Thousand Three Hundred Eighty-Three and Sixty-Six One Hundredths ($5,383.66) Dollars be paid to said Contractor at this time.

Respectfully submitted,

G. M. WISNER,
Chief Engineer.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, January 23, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it is advised that on May 27, 1903 (page 9335 of the Proceedings) the Board authorized the President and Clerk to execute a certain agreement between the Sanitary District and Ernst Heldmaier by the terms of which the dock line on the Chicago river in front of his property adjacent to Throop street was established. A small triangular strip of land was to be excavated and become part of the Chicago river, another small triangular strip of land was to be filled in and a dock constructed by the Sanitary District along the new dock line. It appears that said agreement was executed by Mr. Heldmaier and his wife Mina (who is now deceased) and all the work specified in said agreement was performed in the year 1902 or 1903 but said agreement has been lost or mislaid and Mr. Heldmaier now requests that a duplicate of said agreement be executed and delivered to him.

Your Committee having considered the matter, is of the opinion that the request of said Ernst Heldmaier above set forth should be granted, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be and they are hereby authorized and directed to execute a duplicate of said agreement when the same has been duly executed by said Ernst Heldmaier.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

JAS. H. LAWLEY,
H. E. LITTLER,
MATT A. MUELLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillon,

Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, JANUARY 30, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

The roll call being called there were:

Present—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Absent—Messrs. Clark and Sergel—Two.

President Sergel being absent, Mr. Lawley moved that Mr. Paullin act as temporary chairman of the meeting.

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the proceedings of the regular meetings of January 16, 1919, and January 23, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk presented the report of the Chief Engineer for the month of November, 1918, which was ordered published and filed, as follows:

CHICAGO, December 1, 1918.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of November, 1918, giving the detailed operation of the same:

CONSTRUCTION.

CHICAGO RIVER, MAIN OUTLET, SOUTH BRANCH AND ITS FORKS.

The Brennan Construction Company, contractors employed by the Northwestern Elevated Railroad Company on the construction of a new dock in front of the Union Loop Power House, carried on the construction of the new wall of the power house east of the new cut-off line. The work done during the month consisted of painting windows and general cleaning. All work was completed on the 14th.

NORTH SHORE CHANNEL.

Removal of Spoil Banks.

The National Brick Company removed no materials from the banks of the channel during the month.

CALUMET-SAG CHANNEL.

Section No. 1.

J. O. Heyworth, contractor for the construction of this section, continued operations throughout the month. Dragline was engaged in excavating glacial drift in the connection and turning basin at station 975+00 (M. C.) on the 1st and 2nd, and in backfilling behind north and south walls between stations 3+00 and 19+25 from the 8th to 30th, working one 10-hour shift per day. Drilling rock in turning basin was caried on between stations 973+00 and 974+00 (M. C.) from the 1st to 5th and at station 975+00 (M. C.) on the 23rd, working one 10-hour shift per day. Blasting rock was carried on at station 975+00 (M. C.) on the 24th, working one 5-hour shift. Concreting the standard retaining wall between stations 3+00 and 3+50 and the turning basin walls between stations 0+00 and 5+75 from the 1st to 30th. Pumping channel was carried on at station 28+00, working two 12-hour shifts per day throughout the month. Miscellaneous work consisting of the following was carried on: Digging test holes in basin from the 1st to 7th; excavating by hand in the turning basin on the 2nd and 18th to 30th; finishing off on walls from the 3rd to 30th; open dam at Archer Road, on the 8th and 10th. Force account work was carried on as follows: Building temporary dam between abutments of 48th avenue bridge from the 10th to 29th. Pumping channel for sections 2 to 12, inclusive, was carried on at this section by the contractor under supplementary agreements, throughout the month. An average daily force of 77.4 was employed. At the end of the month 95.5 per cent of the total estimated value of the contract was completed.

Section 13.

A. Guthrie & Co., Inc., contractors, carried on operations as follows: Mixing concrete for Rock Island bridge pier on the 25th and 26th and hauling same to bridge with dinky engine and two dump cars; team was engaged in hauling cinders for foot path at Gregory street on the 1st, 2nd, 10th and 15th. The following hand work was carried on by a force of 13 men: Spreading cinders for foot path at north approach of Gregory street on the 1st and 2nd, building foot bridge across Stony Creek diversion (Gregory street) from the 4th to the 6th; building foot bridge across channel at Gregory street on the 9th, 10th, 12th, 13th, 15th, 26th, 27th, 29th and 30th; all the aforementioned work was carried on in one 10-hour shift per day. At the end of the month 58 per cent of the total estimated value of the contract was completed.

Section 14.

A. Guthrie & Co. Inc., contractors, continued operations throughout the month. Steam shovel No. 5 was engaged in excavating spoil from spoil bank between stations 823+50 and 834+50, to be used for backfilling behind north wall, from the 1st to 16th and 20th to 30th, working one 10-hour shift per day. Four dinky engines and 18 dump cars were engaged in hauling spoil from shovel No. 5 to north wall between stations 839+00 and 845+00 from the 1st to 16th and 20th to 30th, working one 10-hour shift per day. Pumping channel was carried on at station 846+00 on the 1st, 4th, 12th, 18th, 19th, 28th and 29th, and at station 837+00 on the 1st, 4th, 12th, 18th to 20th, 28th and 29th, working one 5-hour shift per day. Two teams were engaged in grading the Controlling Works road from the 6th to the 16th, 19th, 20th, and 23rd to 25th, working one 10-hour shift per day. An average daily force of 56.6 men was employed. At the end of the month 99.8 per cent of the total estimated value of the contract was completed.

BRIDGES.

C. R. I. & P. Ry. Bridges.

A. Guthrie & Co., Inc., contractors, employed an average daily force of 8 men building forms for south cylinder east half of bridge from the 1st to 4th and 6th working one 10-hour shift per day, concreting same on the 5th and 7th, working one 5-hour shift per day. Building forms for the south pier from the 18th to 22nd; placing reinforcing metal on the 23rd and 24th; concreting same on the 25th and 26th, working one 10-hour shift per day. An average daily force of 6 men was employed in excavating for the north abutment on the 23nd, 26th, 27th, 29th and 30th, working one 10-hour shift per day.

The C. R. I. & P. Ry. Company employed an average daily force of 8 men and derrick car and locomotive in moving slabs for the bridge from Lambrechts coal yard to the Rock Island right of way on the 12th and 13th, working one 10-hour shift per day, and an average force of 6 men covering 12-inch water main with burlap at the north abutment on the 29th and 30th, working one 10-hour shift per day.

The Schillinger Construction Co., employed an average daily force of 9.5 men building forms for concrete floor slabs for east bound track bridge at Lambrecht's coal yard at 123rd street, Blue Island, from the 18th to 30th, and concreting floor slabs from the 22nd to the 30th, working one 10-hour shift per day.

Division Street Bridge.

The Kelly-Atkinson Construction Company employed an average daily force of 9 men unloading steel for and erecting derrick from the 18th to 27th, cleaning and painting I-beams, connections, and railing on the 29th and 30th, working one 8-hour shift per day.

B. & O. and G. T. W. Ry. Bridge.

A. Guthrie & Co. Inc., contractors, employed an average daily force of 11.8 men concreting west half of north abutment of the B. & O. bridge from the 4th to 6th, working one 10-hour shift per day and from the 11th to 16th working one 6-hour shift per day. Pumping channel was carried on at station 749+00 from the 1st to 17th working one 8-hour shift per day. Building forms for concreting the west half of the north abutment of the B. & O. bridge was carried on (hand work) on the 2nd and from the 6th to 18th.

The B. & O. Ry. Company employed an average daily force of 8 men placing guard rails on new B.

& O. (C. C. Division) bridge on the 1st and 2nd; installing interlocking system on the new B. & O. (McCook Line) diversion from the 1st to 30th, working one 10-hour shift per day.

CONTROLLING WORKS.

A. Guthrie & Co., contractors, carried on the following work: Drilling concrete on sector gate recesses from the 18th to 24th and removing same from the 16th to 24th, working one 10-hour shift per day. Cleaning channel bottom between stations 841+00 and 848+00 from the 18th to 27th, working one 10-hour shift per day.

G. P. Nichols, electrical contractor, employed an average daily force of 3 men setting machinery for the southeast sector gate from the 1st to 4th, working one 10-hour shift per day.

The Kelly-Atkinson Construction Company, employed an average daily force of 6 men, working one 10-hour shift per day, placing ice cutters on the northwest and southeast sector gates from the 1st to 13th; painting steel northeast sector gate from the 14th to 16th and 21st to 24th; on the southeast sector gate from the 25th to 30th; placing angle bars on the southeast sector gate from the 17th to 20th.

The Sanitary District organization employed an average daily force of 6.5 men building machinery houses for the southwest, northwest and northeast sector gates from the 1st to 30th, working one 8-hour shift per day.

SEWERS.

CALUMET INTERCEPTING SEWER.

Contract Section No. 4.

Nash Brothers, contractors, continued the placing of concrete section until the 9th, when all concrete work under this contract was completed. Work of dismantling the plant and placing backfill, etc., was carried on for the balance of the month. An average daily force of 35.5 men and 6 teams was employed.

Contract Section No. 5.

Byrne Brothers Dredging and Engineering Company, contractors, performed the work of backfilling until the 7th on which the work was suspended for the balance of the month. The work remaining 0.4 per cent complete. An average daily force of 27 men and 3 teams was employed from the 1st to the 7th.

Contract Section No. 6.

Byrne Brothers Dredging and Engineering Company, continued operations throughout the month. The work of grading and cleaning the streets was carried on intermittently through the month. The work of repairing the 54-inch sewer in Indiana avenue near 123rd street was begun on the 12th and continued throughout the month. An average daily force of 24.5 men and 2 teams was employed. The work remained as reported 99 per cent complete.

EVANSTON INTERCEPTING SEWER.

Nash-Dowdle Company, contractors, continued operations throughout the month. The work of constructing piers as a shore protection on the lake front near Lee street was continued and completed at the end of the month. On the 4½-foot sewer, in tunnel, on Custer avenue, the work of cleaning and removing of spoil bank at the shaft was continued throughout the month. The work of constructing the 3½-foot sewer in Custer avenue in open cut, consisting of excavation of top cut by Parson's machine and bottom cut by a Moore machine and the placing of concrete section, was continued throughout the month and progressed from station 70+12 to 77+67. The work of constructing the 5-ft.x5.75-ft. sewer in Lake street was begun on the 1st and completed on the 20th, the work consisting of excavation by

a Moore machine and placing of concrete section, and progressed from station 99+76 to station 102+40. The placing of the 18-inch tile sewer in Washington street under the C. & N. W. Ry. was continued to the 12th, the work consisting of tunnelling and placing of tile pipe with concrete backfill around same. During the month 272 lineal feet of sewer was placed.

The work on the 18-inch tile sewer in Lake street east of Sherman avenue was begun on the 19th and continued throughout the month, the work progressing from station 0 to station 1+28.

The construction of a special manhole at Davis street and Orrington avenue was begun on the 20th and continued throughout the month. An average daily force of 85 men and 0.5 teams was employed throughout the month. The work was 95 per cent complete at the end of the month.

DESPLAINES RIVER INTERCEPTING SEWER.

Nash Brothers, contractors, resumed work on the 25th and continued throughout the month. The work consisted of excavating shaft for tunnel work on First avenue north of West 12th street. An average daily force of 16 men was employed from the 25th to 30th.

PUMPING STATIONS.

Calumet Sewage Pumping Station.

T. J. Forschner Contracting Company, contractors, continued operations throughout the month. The excavation of the sub-structure was carried on by dragline and the spoil was re-handled by a second dragline. The placing of concrete in the floor and walls of the suction chamber was carried on intermittently throughout the month. An average daily force of 45 men was employed throughout the month.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

Walls.

The Sanitary District organization employed a force of 19 men operating the cement gun on the work of repairs to walls from the 1st to 15th, plastering 12,600 square feet of the west wall between Romeo and the Controlling Works with a mixture of one part cement and three parts sand. A force of 5 men was engaged from the 16th to 30th overhauling the cement gun plant and housing it for the winter.

BRIDGES.

The Sanitary District organization employed a force of men in making temporary repairs to the Romeo Road and Willow Springs Road bridges. The work of re-flooring the Summit-Lyons Road bridge was begun on the 19th and continued throughout the month.

CONTROLLING WORKS.

The bear trap dam was shut down the entire month.

MAIN CHANNEL EXTENSION.

Walls.

The Sanitary District organization employed a force of 25 men throughout the month cutting out disintegrating concrete and replacing same with portland cement concrete. About 190 cubic yards of concrete was replaced in the east wall just south of 16th street, Lockport.

BRIDGES.

Ninth and Sixteenth St. Bridges.

Two men were on duty on these bridges, working shifts from 7 A. M. to 3 P. M., and 3. P. M. to 11 P. M. throughout the month. A new heater was installed on the 2nd.

BUTTERFLY DAM.

This dam was operated on the 3rd, 10th and 17th. The heaters were repaired on the 18th.

DAMS AT THE POWER HOUSE.

The forty-eight foot dam was open some part of two days or a total of six hours and fifteen minutes, an average of twelve minutes for each day of the month. The twelve foot dam was shut down the entire month.

Samples of canal water were taken every eight hours for the Sanitary Division. Three men were on duty, working shifts of 8 hours each throughout the month.

I. & M. CANAL LOCK AT THE POWER HOUSE.

During the month 12 boats passed through the lock; these were locked through by the dam tender. Repairs were made to the gates. The lock circuit was cleaned of grounds on the 4th and 12th. The heater was repaired on the 25th. The motor and switch were repaired on the 30th.

DESPLAINES RIVER DIVERSION.

The Sanitary District organization employed a force of 10 men in removing trees and underbush from the bed of the Des Plaines River south of the Lyons-Summit road bridge from the 16th to 30th.

NORTH SHORE CHANNEL.

The Sanitary District organization employed a force of 11 men and one team throughout the month in filling in a culvert across Dempster street and in filling in a gully east of the channel just north of Main street.

BRIDGES.

Linden Avenue Bridge.

The Sanitary District organization employed a force of men on the work preparatory to re-flooring and painting this bridge. The bridge was closed to traffic on the 15th and the steel work was cleaned and partly painted and the timber sub-floor was nearly ready for placing the creosoted paving blocks at the end of the month.

The creosoted timber and paving blocks for the re-flooring of the bridges at Kenilworth avenue, Emerson street and Linden avenue were received, unloaded and stored.

PUMPING STATIONS.

Thirty-ninth St. Pumping Station.

The Great Lakes Dredge and Dock Company, contractors for repairing the breakwater at this station, continued operations to the 9th when all work was completed. The work done during the month consisted of delivering and placing 605.5 tons of stone as fill in the breakwater cribs. This station was operated, pumping sewage, throughout the month. The pumps were operated as follows:

Sewer pump No. 1 was operated some part of two days or a total of eleven hours and thirty minutes. Pump No. 2 some part of three days or a total of eleven hours and thirty-five minutes. Pump No. 4 some part of each day or a total of seven hundred and twenty hours. The three pumps were operated for a grand average of eight hours and fifteen minutes for each day of the month and pumped an average of 6647 cubic feet of sewage for each minute of the month. Fresh water pumps Nos. 5 and 6 were shut down the entire month.

Sewage pump No. 3 was down all month for repairs. The steam turbine and generator were operated five evenings from the 13th to 18th for the Electrical Department. Painting of the steel frame work supporting the coal crane runway was continued intermittently throughout the month by a force of two painters. The gate

lift mechanism was out of service after the 18th on account of a broken bearing and beam. Repairs on same were practically completed by the end of the month. Overhauling of the steam turbine was begun on the 30th. The storing of lump coal in a pile in front of the station was completed during the month. Some 5,000 tons have been stored as a reserve supply for the winter.

Lawrence Ave. Pumping Station.

This station was operated, pumping sewage, throughout the month. The pumps were operated as follows:

Sewer pump No. 2 was operated some part of twenty-four days or a total of five hundred and forty-two hours and forty-five minutes. Pump No. 3 some part of twelve days or a total of one hundred and eighty-five hours and forty minutes. The two pumps were operated for a grand average of twelve hours and eight minutes for each day of the month and pumped an average of 2540 cubic feet of sewage for each minute of the month. Sewer pump No. 1 and the fresh water pump were shut down the entire month.

Repairs to the coal conveyer and the sewage screen were completed and both were back in service on the 23rd. The storing of some 150 tons of coal as a reserve supply for the coming winter months was completed during the month.

Wilmette Pumping Station.

This station was operated, pumping fresh water throughout the month. The pumps were operated as follows: Pump No. 1 was operated some part of twenty-nine days or a total of six hundred and sixty-four hours and twenty-three minutes. Pump No. 2 some part of twenty-seven days or a total of five hundred and ninety hours and thirteen minutes. Pump No. 3 some part of thirty days or a total of six hundred and eighty-four hours and thirty-three minutes. Pump No. 4 some part of thirty days or a total of six-hundred and fifty-three hours and seventeen minutes. All of the four pumps were operated for a grand average of twenty-one hours and thirty-six minutes for each day of the month and pumped an average of 45722 cubic feet of water for each minute of the month.

STRUCTURES AND EQUIPMENT FOR SANITARY IMPROVEMENTS, SEWAGE AND SPECIAL INVESTIGATIONS.

Morton Grove Sedimentation Plant.

This plant was operated as usual throughout the month and the regular maintenance and operation supervised by the Sanitary Division.

Laboratory at Thirty-ninth Street.

Chemical analyses were made weekly of samples collected from the Main Channel and the Illinois River at Morris, Ottawa, Peru, and Chillicothe. Special analyses were made on samples shipped in from Lockport. An inventory was made of the laboratory, and glassware and apparatus thoroughly inspected and cleaned.

Stock Yards Testing Station.

The dismantling of this station was continued throughout the month.

Tannery Station.

A site for this station was selected adjacent to the Monarch Leather Company on the North Branch of the Chicago River at Division Street.

Sewer and Rain Gauges.

Rain gauges were operated at the 39th Street Pumping Station, Stock Yards Testing Station, Lockport, Kensington, and at 31st street and Western avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport. Weekly samples from the Main Channel at Lockport and the Illinois River at Morris, Ottawa, Peru and Chillicothe.

ENGINEERING.

Drafting Division.

The work carried on during the month consisted of the following: Preparing profile of the Sag feeder and preparing negatives and maps for the Zuidema overflow case. Revising the indexing system. Compiling the Calumet-Sag atlas and the Calumet Sewer atlas was continued. Compiling the Chicago River atlas was carried on intermittently throughout the month. Writing monthly reports of the Calumet-Sag construction work and filing reports. The Chief Engineer's annual report was proofread. Indexing warehouse data. Writing monthly reports of the Engineering Department for 1918. Printing index cards and indexing maps.

Bridge Division.

Work was continued on the design and details of the reinforced concrete work for the Calumet Sewage Pumping Station. A list was made of hardware required for the re-flooring of the bridges across the North Shore Channel at Linden avenue, Emerson street, and Kenilworth. Part of the final estimate of concrete on sections 13 and 14 of the Calumet-Sag Channel was checked. Lumber was ordered for re-flooring the Main Channel bridge at Summit Road. Data was compiled for suit *in re* the Mallers Building at Jackson street bridge.

Sanitary Division.

The preparation of a report on the testing station work at the Stock Yards was continued. The preparation of plans and specifications for the Calumet intercepting sewer was continued. Preparation of plans for the Des Plaines River treatment works was continued. The preparation of supplementary plans for the Calumet Sewage Pumping Station was continued. The prearation of supplementary plans for the Evanston Pumping Station was begun. Studies were made of the proposed re-arrangement of the 95th Street Pumping Station. Data was prepared for officials of the United States Engineer's Office and Public Health service. A brief investigation was made of the North Branch from Chicago avenue to Diversey Boulevard together with a number of tanneries. Conferences were held with various parties from the Calumet region in Indiana over proposed schemes for sewage diversion and treatment.

Hydraulic Measurement Division.

The self-recording gages at the Main Channel at Willow Springs and Lemont and on the lake front at the U. S. Coast Guard Station were operated and periodically inspected. The records from these gages were worked up in the office.

FIELD PARTIES.

Party was employed on the following work: Chicago River dredging and docking, Union Loop Power House inspection, re-running base line and painting stations on docks North Shore Channel office and field work.

Crib repairs at the 39th Street Pumping Station. Spoil bank measurement, Section 8, Main Channel.

The Calumet-Sag field parties performed the usual routine construction duties as follows: The Sag Division on Section 1. The Blue Island Division on Section 13 and 14.

The general engineering force and

other employees continued superintending engineering, construction and maintenance work, checking estimates, compiling unit construction costs of the Evanston and Calumet sewers and of the Calumet-Sag Channel section, keeping the accounts of the department, preparing vouchers, furnishing information to other departments and performing other duties, etc.

Respectfully submitted,
G. M. WISNER,
Chief Engineer.

The Clerk presented the report of the Chief Engineer for the month of December, 1918, which was ordered published and filed, as follows:

CHICAGO, January 1, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I herewith present the report of the Engineering Department for the month of December, 1918, giving the detailed operation of same:

CONSTRUCTION.

NORTH SHORE CHANNEL.

Spoil Banks.

The National Brick Company removed no material from the spoil banks of the channel during the month. A summary of the spoil removed under this agreement is shown herewith:

	Cubic Yards
Total amount to Dec. 31, 1917, ...	477,032
Amount removed during 1918, ...	22,974
Total amount to Dec. 31, 1918, ...	500,006

CALUMET-SAG CHANNEL.

Section No. 1.

James O. Heyworth, contractor, continued operations throughout the month. Dargline No. 2 was engaged in backfilling between station 11+50 and 21+50 from the 9th to 11th, 16th to 19th and on the 23rd. Tripod drills were engaged in drilling rock in the turning basin at station 968+00, Main Channel, from the 2nd to 4th, working one 10-hour shift per day, and at station 2+50 on the 15th and 16th, working one 5-hour shift per day. Blasting rock was carried on at station 968+00 on the 12th and at station 2+50 on the 16th and 30th, working one 5-hour shift per day. Pumping channel was carried on at station 28+00, working two 12-hour shifts per day throughout the month. Concreting the turning basin wall between stations 0+50 and 6+00 was carried on throughout the month, working one 10-hour shift per day. Miscellaneous work was carried on as follows: Drilling four holes on the 2nd; excavating ditch at Archer Road on the 4th, 6th, 13th and 14th; watching dam at Archer Road on the 15th and 16th; wrecked dam at Archer Road on the 24th; cleaning ditch on the 30th and 31st. Force account work was carried on as follows: Building temporary dam at 48th avenue bridge, (Section 10) throughout the month. Pumping channel for Sections 2 to 12, inclusive, was carried on at Section 1 by the contractor, working under supplementary agreements, throughout the month. An average daily force of 62.4 men was employed. At the end of the month 97 per cent of the total estimated value of the contract was completed.

Section No. 13.

A. Guthrie & Company, contractors, carried on the following work during the month: Steam shovel No. 2 was engaged in excavating glacial drift from channel between stations 756+50 and 757+50 from the 7th to 11th and 16th to 21st, working one

10-hour shift per day. Two dinky engines and 8 dump cars were engaged in hauling spoil from steam shovel No. 2 to south berm from the 7th to 11th and 16th to 21st, working one 10-hour shift per day. An average daily force of 7 men was employed in building a foot bridge across the channel at Gregory street on the 2nd and 3rd, working one 10-hour shift per day. An average daily force of 15.7 men was employed. At the end of the month 58.4 per cent of the total estimated value of the contract was completed.

Section No. 14.

A. Guthrie & Company, contractors, carried on the following work during the month: Steam shovel No. 5 was engaged in excavating spoil from the spoil bank bank between stations 828+00 and 834+00 from the 1st to the 18th, spoil used to backfill behind north wall. Four dinky engines and 18 dump cars were engaged in hauling spoil from shovel No. 5 to backfill behind north wall between station 842+00 and 837+00, working one 10-hour shift per day. Pumping channel was carried on at station 846+00 on the 3rd and 4th, working one 10-hour shift per day, from the 8th to 26th working one 5-hour shift per day, and at station 837+00 from the 3rd to 31st working an average of 8 hours per day. Cleaning up channel bottom by hand was carried on between stations 836+00 and 835+25 from the 5th to 9th, working one 10-hour shift per day.

BRIDGES.

C. R. I. & P. Ry. Bridge.

A. Guthrie & Company employed an average daily force of 8.5 men excavating for the north abutment of this bridge from the 1st to the 4th and 12th to 19th, working one 10-hour shift per day. On account of danger from slides during weather when work could not be continued, the excavation was sheeted, the tracks were supported and the work was suspended for the winter.

The C. R. I. & P. Ry. Company employed a force of 6 men covering 12-inch water main with burlap at the north abutment, working one 10-hour shift per day.

The Schillinger Construction Company employed an average daily force of 8.5 men building forms for and concreting floor slabs for the center track of this bridge at Lambrecht's coal yard at 123rd street in Blue Island, from the 2nd to 9th, on which date this work was completed.

Division Street Bridge.

The Kelly-Atkinson Construction Company employed an average daily force of 11.5 men placing and riveting steel for this bridge from the 2nd to the 17th, working one 8-hour shift per day.

B. & O. and G. T. W. Ry. Bridges.

The B. & O. Ry. Company employed an average daily force of 4.5 men installing interlocking system on the new B. & O. (McCook Line) diversion throughout the month.

The Strobel Steel Construction Company employed an average daily force of 3 men covering rivets and steel with tar paper on the B. & O. right of way near new bridge on the 13th and 14th, working one 8-hour shift per day.

CONTROLLING WORKS.

The Kelly-Atkinson Construction Company employed an average daily force of 7 men painting steel on the sector gates from the 2nd to the 22nd, working one 10-hour shift per day.

The Sanitary District organization employed an average daily force of 6 men building machinery house at the northeast sector gate from the 2nd

to the 18th; cleaning and oiling sector gate machinery from the 19th to 31st, working one 8-hour shift per day.

PROPOSED SPECIAL CONSTRUCTION WORK, SEWAGE DISPOSAL PLANT FOR THE NORTH BRANCH OF CHICAGO RIVER.

A brief inspection was made of the north branch by boat from Kinzie street to the north branch dam above Argyle street.

SEWERS.

CALUMET INTERCEPTING SEWER.

Contract Section No. 4.

Nash Brothers, contractors, continued operations throughout the month. The work consisting of dismantling the plant and minor items such as backfilling, grading, setting electric pump at Pullman Company's intake, etc. The work was practically completed at the end of the month. An average daily force of 16 men and 2 teams was employed.

Contract Section No. 5.

Byrne Brothers Dredging and Engineering Company, resumed operations on the 20th and suspended same on the 29th. The work consisted of excavation, backfilling and placing 35 feet of the 17½-foot sewer section. An average daily force of 20 men and 2 teams was employed from the 20th to the 29th. The work was 0.7 per cent complete at the end of the month.

Contract Section No. 6.

Byrne Brothers, Dredging and Engineering Company, contractors, continued operations throughout the month. Repairs were made to the 54-inch sewer from the 1st to the 16th, when this was completed. General work of cleaning up and grading was carried on intermittently throughout the month. An average daily force of 21 men and 2 teams was employed throughout the month. The work was practically completed at the end of the month.

EVANSTON INTERCEPTING SEWER.

Nash-Dowdle Company, contractors, continued operations throughout the month. On the 4½ foot sewer, in tunnel, in Custer avenue, the work of cleaning up and removing spoil bank at the shaft was continued on the 21st, on which date the work was suspended. On the 3½-foot sewer in Custer avenue, open cut, the same was completed during the month. The work consisting of excavation of top cut with a Parsons' machine and the bottom cut by a Moore machine and the placing of the concrete sewer section. This sewer was completed from station 77+67 to 83+81, reaching the latter station on the 18th, and from station 58+34 to station 58+75 was completed on the 31st.

The work on the 18-inch and 15-inch tile sewer in Lake street, Chicago avenue, and Dempster street was continued throughout the month. The work progressing from station 1+28 to station 14+87. Excavation for the sewer was performed in part by a Parsons machine and in part by hand. The backfilling was placed by steam shovel.

The 18-inch tile sewer in Chicago avenue, from Washington street to Main street was started on the 18th and continued throughout the month. This is a continuation of the sewer placed in tunnel in Washington street under the railroad track. The work progressed from station 2+86 to station 6+48.

The 18-inch tile sewer in Cook street west of Sheridan Road was begun on the 12th and completed on the 19th, 427 lineal feet being placed. The excavation for the sewer was done by a Parsons machine.

The placing of the 24-inch tile sewer

inside the old sewer in Davis street was begun on the 5th and completed on the 27th. The work was continued from this date to the end of the month on the 18-inch sewer in the same location.

The special manhole at Davis street and Orrington avenue was completed on the 5th. Work was carried on intermittently throughout the month on manholes at various locations. The work of constructing a special manhole to serve as a pumping shaft for temporary pumping station at Lake street and Elmwood avenue was resumed on the 14th and completed on the 20th. An average daily force of 85.5 men and 5 teams was employed throughout the month. The work was 99 percent completed at the end of the month.

TEMPORARY PUMPING PLANT AT EVANSTON.

Nash-Dowdle Company, contractors, began the installation of pumps in the special manhole constructed for this purpose, on the 21st and continued preliminary operations throughout the month. Pumping service was not started during the month.

DESPLAINES RIVER INTERCEPTING SEWER.

Nash Brothers, contractors, continued operations throughout the month. The work consisting of excavating and concreting on the 4½-foot sewer, in tunnel, in First avenue north of West 12th street. An average daily force of 50 men was employed throughout the month. The work was 2.6 per cent completed at the end of the month.

PUMPING STATIONS.

Calumet Pumping Station.

T. J. Forschner Contracting Company, contractors, continued operations throughout the month. Excavation for the substructure was carried on by dragline, the spoil being re-handled by a second dragline. The placing of concrete in the floor and walls of the section and discharge chambers was carried on intermittently throughout the month. An average daily force of 62 men was employed throughout the month. The work was about 11 per cent complete at the end of the month.

MAINTENANCE AND OPERATION.

MAIN CHANNEL.

Walls.

The Sanitary District organization employed a force of 5 men at Romeo, Illinois, housing in the cement gun plant from the 1st to the 7th. The plant was transferred to 31st street and Western avenue on the 8th and a force of two men worked from the 9th to the 31st overhauling the machinery.

BRIDGES.

The Sanitary District organization employed a force of men reflooring the Summit Road bridge throughout the month. Minor repairs were made to the Lemont and Romeo Road bridges.

CONTROLLING WORKS.

The bear trap dam was open some part of three days or a total of seven hours and fifty-seven minutes, an average of fifteen minutes for each day of the month.

MAIN CHANNEL EXTENSION.

Walls.

The Sanitary District organization employed a force of 23 men on the work of repairs to the walls of this Channel from the 1st to the 7th, and a force of 7 men storing material and tools from the 8th to the 19th. Work was discontinued for the season on the 19th.

BRIDGES.

Ninth and Sixteenth St. Bridges.

The lamps on the 16th Street bridge were repaired on the 29th. Two men were on duty on the bridges, working from 7 A. M. to 3 P. M., and from 3 P. M. to 11 P. M. throughout the month. Each man caring for both bridges.

BUTTERFLY DAM.

This dam was not operated during the month. Heater was installed on the 4th. Fuses were made for the Controlling Works on the 14th.

DAMS AT THE POWER HOUSE.

The forty-eight foot dam was open some part of four days or a total of eighteen hours and fifty-five minutes, an average of thirty-six minutes for each day of the month. The twelve foot dam was shut down the entire month. The dam house circuit was repaired on the 22nd. Samples of canal water were taken every 8 hours for the Sanitary Division. Three men were on duty, working shifts of 8 hours each throughout the month.

I. & M. CANAL LOCK AT THE POWER HOUSE.

No boats passed through the lock during the month. The heater was repaired on the 7th. No one was on duty during the month.

DESPLAINES RIVER DIVERSION.

The Sanitary District organization employed a force of 9 men removing trees and underbrush from the bed of this channel south of the Lyons-Summit Road bridge. This work was completed at the end of the month.

NORTH SHORE CHANNEL.

The Sanitary District organization employed a force of seven men and one team on the work of repairs to outfalls and ditches along this channel, working from the 1st to 11th cleaning out the ditch east of the channel on the north side of Devon avenue.

BRIDGES.

Linden Avenue Bridge.

The Sanitary District organization force completed the painting and re-flooring of this bridge. The creosoted paving blocks were laid by the James A. Sackley Co. A few yards of brick pavement at each end of the bridge were taken up and relaid on account of the change in the grade of the bridge.

Hill Street Bridge.

The Sanitary District organization force was engaged in painting this bridge and made minor repairs to the sidewalks and roadway floor.

Peterson Avenue Bridge.

A small amount of asphalt pavement at each end of this bridge was removed and replaced with brick pavement to bring the same up to the grade of the bridge.

Minor repairs were made to the following bridges: Devon avenue, Kenilworth avenue, Foster avenue, Main and Dempster streets.

A temporary walk was laid along the east side of the channel from Linden avenue to Laurel street.

PUMPING STATIONS.

Thirty-ninth St. Pumping Station.

This station was operated, pumping sewage, throughout the month. The pumps were operated as follows:

Sewer pump No. 1 was operated some part of thirteen days or a total of one hundred and twenty-six hours and thirty minutes. Pump No. 2 some part of ten days or a total of one hundred and sixteen hours and fifty-five minutes. Pump No. 4 some part of twenty-eight days or a total of five

hundred and sixty-five hours and thirty-five minutes. The three pumps were operated for a grand average of eight hours and forty-two minutes for each day of the month and pumped an average of 8248 cubic feet of sewage for each minute of the month. Fresh water pumps Nos. 5 and 6 were shut down the entire month.

Sewer pump No. 3 was down all the month for repairs. The thrust bearing on sewage pump No. 2 became overheated on the 9th and this pump was out of service for one week while repairs were being made to the bearing. Repairs on the gate lift mechanism, which was out of service after November 18th on account of a broken bearing and beam, were completed on the 11th. Overhauling of the steam turbine, which was begun on November 30th, was practically completed on the 7th, but work was done on it intermittently until the end of the month. Repairs to the track scales were begun on the 27th and continued through the month.

Lawrence Ave. Pumping Station.

This station was operated, pumping sewage and fresh water, throughout the month. The pumps were operated as follows:

Sewer pump No. 2 was operated some part of twenty-four days or a total of five hundred and twenty-seven hours and fifteen minutes. Pump No. 3 some part of eleven days or a total of two hundred and ten hours and twenty minutes. The two pumps were operated for a grand average of eleven hours and fifty-four minutes for each day of the month and pumped an average of 2297 cubic feet of sewage for each minute of the month. Sewer pump No. 1 and the fresh water pump were shut down the entire month.

The house pump and the two circulating pumps for the condensers were overhauled during the first part of the month. Repairs were made on sewage pump No. 3.

Wilmette Pumping Station.

This station was operated, pumping fresh water, throughout the month. The pumps were operated as follows:

Pump No. 1 was operated some part of twenty-eight days or a total of six hundred and twenty-three hours and seventeen minutes. Pump No. 2 some part of fifteen days or a total of three hundred and ten hours and thirty-eight minutes. Pump No. 3 some part of twenty-eight days or a total of six hundred and four hours and thirty-three minutes. Pump No. 4 some part of nineteen days or a total of three hundred and seventy-eight hours and thirty-six minutes. All of the four pumps were operated for a grand average of fifteen hours and twenty-eight minutes for each day of the month, and pumped an average of 32962 cubic feet of water for each minute of the month.

STRUCTURES AND EQUIPMENT FOR SANITARY AND SPECIAL INVESTIGATIONS.

Morton Grove Sedimentation Plant.

This plant was operated throughout the month and the regular maintenance and operation supervised by the Sanitary Division.

Laboratory at Thirty-ninth Street.

Chemical analyses were made weekly of samples collected from the Main Channel and the Illinois River at Morris, Ottawa, Peru, and Chillicothe. Special analyses were made on samples shipped in from Lockport.

Stock Yards Testing Station.

The dismantling of this station was continued throughout the month.

Sewer and Rain Gauges.

Rain gages were operated at the 39th Street pumping station, Stock

Yards testing station, Lockport, Kensington, and at 31st street and Western avenue. The records collected were worked up as time permitted.

Investigation of Water Pollution.

Daily samples were collected from Lake Michigan at 39th street and from the Main Channel at Lockport. Weekly samples from the Main Channel at Lockport and the Illinois River at Morris, Ottawa, Peru, and Chillicothe.

ENGINEERING DEPARTMENT.

Drafting Division.

The following work was carried on during the month: Compiling the Calumet-Sag atlas. The work on the Calumet sewer atlas was completed. Indexing and filing maps and plans. Work on the Chicago River atlas was continued intermittently throughout the month. Reading proof on the 1917 annual report of the Engineering Department. Printing index cards. Work was started on the plotting of the permanent map of the Stock Yards District. Writing monthly reports on the Calumet-Sag construction and filing reports. Inspecting rip-rap on Section 11 of the Calumet-Sag Channel. Looking up permits for the Heldmaier Dock on the South Branch of the Chicago River. Writing monthly reports of the Engineering Department. Copying records at the City Hall for the North Branch Waste Investigation. Indexing data at warehouse. Indexing field books. Checking tabulation of Calumet-Sag right of way for tax investigation. A new "Order of Business" card was made for the Board Room. Checking tabulations of the Main Channel right of way for the Real Estate Department. Checking tabulations of the North Shore Channel real estate for the Real Estate Department and copying records for same at the City Hall and County Building for same purpose. Revising index system.

Sanitary Division.

The following work was carried on: The preparation of a report on the testing station work at the Stock Yards was continued. The preparation of plans and specifications for the Calumet intercepting sewer was continued. Conferences were held with officials of the City of Chicago. The preparation of plans of the Des Plaines River treatment works was continued and the preparation of specifications for the same was begun. The preparation of supplementary plans for the Calumet and Evanston sewage pumping stations were continued. Correspondence was carried on with Consulting Engineer A. B. Wood on all pumping stations. Studies were made of the proposed rearrangement of the 95th Street Pumping Station. Conferences were held with various parties from the Calumet region in Indiana over proposed schemes for sewage diversion and treatment. An exhibit was prepared for the annual convention of the American Public Health Association at the Hotel Morrison. The two meetings of the Sanitary Engineering Sessions were attended. A brief report was prepared. Statistics were compiled on sewage treatment in the United States.

Hydraulic Measurement Division.

The self-recording gages on the Main Channel at Willow Springs and Lemont and on the Lake Front at the U. S. Coast Guard Station were operated and periodically inspected. The records obtained from these gages were worked up in the office.

Bridge Division.

The following work was carried on during the month: Checking detail

drawings for the structural steel work; designing and detailing reinforcing for concrete walls and floors and investigation of different designs for sluice gates for the Calumet sewage pumping station. A report of conditions existing during the construction of the Jackson Street bridge was made for the Law Department for use in defending the damage suit brought by the owners of the Mallers Building.

Channel Maintenance Division.

Party was employed on Chicago River dredging and docking, re-running base line and painting stations on docks; North Shore Channel sloping, office and field work; Main Channel Section No. 7 right of way survey; setting gage at Willow Springs on the Des Plaines River; Proposed survey of the North Branch of the Chicago River; office work on reports.

The Calumet-Sag Channel field parties performed the usual routine construction duties as follows: The Sag Division on Section 1 and the Blue Island Division on Sections 13 and 14.

The general engineering force and other employees continued superintending engineering, construction and maintenance work, checking estimates, compiling unit construction costs of the Evanston and Calumet sewers and of the Calumet-Sag Channel sections; keeping the accounts of the department, preparing vouchers, furnishing information for other departments and performing other necessary duties, etc.

Respectfully submitted,
G. M. WISNER,
Chief Engineer.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 30, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that in accordance with the terms of a contract dated May 17, 1917 (page 774 of the Proceedings), between The Schillinger Construction Company and the Sanitary District for the construction and delivery of concrete floor slabs for the Chicago, Rock Island & Pacific main line bridge, and for the C. R. I. & P. and B. & O. C. T. connecting track bridge across the Calumet Sag Channel of the Sanitary District in the City of Blue Island, the Sanitary District has retained from time to time, as a reserve percentage, 10 per cent of the sums due for furnishing said slabs for bridges designated as Nos. 1 and 3, which amounts to $850.75, which sum cannot be paid said Contractor until the slabs for all of the bridges covered by said contract have been delivered.

Your Committee further reports that said Contractor has requested that it be paid said sum of $850.75, and the Chief Engineer has recommended that said request be granted inasmuch as a large part of said contract is completed.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be, and they are hereby, authorized and directed to pay upon the voucher of the Chief Engineer to The Schillinger Construction Company the sum of $850.75 above referred to, upon the execution by an officer of said Company of an affidavit that all materialmen, mechanics and workmen employed by said Contractor under said contract in the work of furnishing the concrete slabs for said bridges Nos. 1 and 3 have been paid in full; and also

upon said Contractor furnishing the Sanitary District with a consent in writing by the surety on its bond that said payment may be made, said payment, however, to be made subject to any unaccrued obligation imposed by said contract.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Lawley, Littler, Mueller, Nance and Paullin—Six.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 30, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance herewith transmits bills for special assessments levied against certain real estate of the Sanitary District therein described, situated in the City of Joliet, Will County, Illinois, to-wit:

Special assessment for constructing sewer in McDonough street	$316.84
Interest thereon from August 5, 1918, to January 31, 1919	7.78
Special assessment for paving McDonough street	3,887.88
Interest thereon from August 5, 1918, to January 31, 1919	95.04
Special assessment for paving Jackson street	260.40
Interest thereon from January 2, 1918, to January 31, 1919	14.07
Total	$4,582.01

Your Committee further reports that it has examined said bills, and in its opinion same are correct and should be paid to the City Collector of the City of Joliet, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be, and they are hereby, authorized and directed to draw a warrant in the sum of $4,582.01 payable to J. F. Parson, City Collector of the City of Joliet, and deliver the same to him in full payment of said special assessments.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 30, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance herewith transmits to the Board grant of easement whereby Charles E. Stannard and Ora Stannard, his wife, for the nominal consideration of $1.00 grant to The Sanitary District of Chicago a perpetual easement to construct, reconstruct, maintain and operate an intercepting sewer, with appurtenances thereto, in the Des Plaines River Dis-

trict in, under and through certain real estate owned by said parties. Said grant of easement permits the Sanitary District to transport material, equipment, excavated soil and debris over and across said property. The Sanitary District agrees to provide two twelve-inch connections in said sewer for drainage purposes and other connections for sewage purposes, which may be approved by the Chief Engineer. Otherwise the grant of easement is in the usual form in use by the Sanitary District in such cases.

Your Committee further reports that it has examined said grant of easement, which has been approved by the Chief Engineer and Attorney, and, therefore, recommends the passage of the following order.

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be, and they are hereby, authorized and directed to execute in duplicate said form of easement which is hereto attached, same having been duly executed by said grantors.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, January 30, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of January payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Respectfully submitted,
JAS. H. LAWLEY,
Chairman
MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the following report be adopted and that vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance (*except as to voucher to the Commonwealth Edison Company, for electricity furnished the Sanitary District during the month of December, 1918, as per contract, for $6,596.46, on which Mr. Nance voted "nay"*), and Paullin—Seven.

Nays—None (*except as above stated*).

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, January 30, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents a contract for renewal with Fred Siegel, 46th avenue and West 12th street, wherein he agrees to take and the Sanitary District agrees to furnish electrical energy for temporary service upon the terms and conditions therein set forth. Said contract has been approved by the Electrical Engineer.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk, be, and they are hereby, authorized and directed to execute in duplicate the attached contract, which has been properly executed by said Fred Siegel.

Respectfully submitted,
H. E. LITTLER,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, January 30, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development reports that The Sanitary District of Chicago entered into a contract with the Star Cereal Company to furnish said Company with electrical energy at its new building, located at Western and Austin avenues. That at the time said contract was entered into, the consumer requested that power be transmitted to it as quickly as possible, and the Sanitary District was ready to supply said power on December 4, 1918, but owing to the incompletion of said building the consumer was unable to utilize said power.

Under the terms of said contract, the consumer agreed to pay $334.00 per month, and the minimum charge for the period from December 4, 1918, to December 31, 1918, is $312.45. The Electrical Engineer states that the consumer was billed for said amount for the month of December, 1918, and has requested that said amount be remitted for the reason that the building was not finished, and, therefore, said power could not be utilized.

The Electrical Engineer further states that said contract provides for an extension of time of six months beyond the date of the beginning of said contract by either party giving written notice to the other that the service could not be supplied or used at the time specified in the contract, but that no such written notice was given to the Sanitary District by the consumer that it would be unable to use the power at the time contemplated.

Your Committee, having considered the matter, is of the opinion that under the facts in the case the charge of $312.45 for the month of December, 1918, should be remitted, and, therefore, recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby, authorized and directed to cancel and remit the charge of $312.45 against the Star Cereal Company above referred to; and that the amounts due the Sanitary District for electrical energy supplied to said Company be determined from and after January 4, 1919, the date on which the service connection was actually completed.

Respectfully submitted,

H. E. LITTLER,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Nance and Paullin—Six.

Nays—None.

Employment.

Mr. Lawley presented the following report from the Committee on Employment:

CHICAGO, January 30, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Employment reports that it has received the resignation of Mr. Edward Keeley, Manager of the Real Estate Department of The Sanitary District of Chicago, which is herewith transmitted to the Board.

Your Committee further reports that inasmuch as Mr. Keeley is desirous of severing his connection with The Sanitary District of Chicago that the resignation be accepted to take effect January 31st, 1919.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
JAS. H. LAWLEY,
MATT. A. MUELLER,
H. E. LITTLER,
Committee on Employment.

Mr. Lawley moved that the report be adopted and that the resignation of Mr. Edward Keeley, Manager of the Real Estate Department, be accepted.

The motion prevailed.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Lawley presented the following ordinance:

Be it Ordained by the Board of Trustees of The Sanitary District of Chicago:

SECTION 1. That the Treasurer of The Sanitary District of Chicago be, and he is hereby, authorized and directed to pay to the several officers and employes of The Sanitary District of Chicago as salaries and compensation for the month of January, 1919, the amount per month authorized to be paid for the fiscal year ending December 31, 1918, subject, however, to such changes as may be made in said salaries and compensation by the general appropriation ordinance for the fiscal year 1919; and subject also to such reductions unqualified or contingent as may be made in said salaries and compensation by said general appropriation ordinance. All reductions which shall be made by said general appropriation ordinance which are not deducted as required by said general appropriation ordinance from said salaries and compensation for the month of January, 1919, shall be charged against the salaries or compensation of the respective persons for the month of February, 1919.

The heads of the several departments of The Sanitary District of Chicago are also hereby authorized and empowered to incur the necessary expenses for the month of January, 1919, on such requisitions as may be approved by the Committee on Finance, and the Treasurer of The Sanitary District of Chicago is further authorized and directed to pay for such necessary current expenses so approved.

SECTION 2. This ordinance shall be in force and effect from and after its passage.

Mr. Lawley moved that the ordinance be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healey, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillson,
Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, FEBRUARY 6, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Absent—Mr. Clark—One.

MINUTES.

Mr. Lawley moved that the minutes of the proceedings of the regular meeting of January 30, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The President presented the following message:

CHICAGO, February 6, 1919.

To the Honorable, the Board of Trustees, Sanitary District of Chicago.

GENTLEMEN—On last Friday afternoon, January 31, I received the following communication from the Chairman of the Committee on Finance of the City Council of the City of Chicago.

Hon. Charles H. Sergel,
President, Sanitary District,
900 South Michigan Ave., City.

Dear Sir:

In accordance with a notice heretofore sent you by the City Clerk

notifying you that you have been appointed by the Chicago City Council as a member of the Committee to give consideration to the subject of employment during the period of transition from a war to a peace basis and to outline a plan of action and co-operation for submission to Federal, State and local taxing bodies, with a view to arrange for an early prosecution of public works and encouragement to private construction work, I beg to inform you that there will be a meeting of this committee held in the Finance Committee room, 3rd floor, City Hall, Chicago, on Saturday February 1, at 11 o'clock A. M., for the purpose of organizing.

Yours very truly,
JOHN A. RICHERT,
Chairman, Committe on Finance.

The communication from the City Clerk mentioned by Mr. Richert, enclosed the order of the City Council providing for the organization of the Committee and was received by me on Friday morning. There being no meeting of the Board scheduled until today at which action could be taken on the communication, I appointed Trustee Harry E. Litt'er, to represent the Sanitary District at the meeting, and he accepted the appointment. I ask your concurrence in my action.

Very truly,
CHARLES H. SERGEL,
President the Sanitary District.

Mr. Nance moved that the action of the President in appointing Trustee Harry E. Littler be concurred in.

The motion prevailed.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 6, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance in accordance with Rule 46 of the Rules and Regulations of the Board herewith presents weekly reports made to your Committee by the Clerk of all purchases made by him for and on account of the Sanitary District of Chicago from November 4, to December 28, 1918, inclusive.

Your Committee further reports that it has examined said reports, found them to be correct, has approved same and recommends that they be accepted and placed on file.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman,
WILLIS O. NANCE,
MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be received and placed on file.

The motion prevailed.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 6, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of February payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT A. MUELLER,
GEORGE W. PAULLIN,
Commitee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley requested unanimous consent to defer action on other matters of the Committee on Finance until the reports of all other Committees had been presented to the Board.

There being no objection, it was so ordered.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, February 6, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken upon recommendation of the heads of the various departments, effective January 1, 1919:

Respectfully submitted,
GEORGE W. PAULLIN,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAMES H. LAWLEY,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

Mr. Nance moved that the report of the Committee on Employment be amended by striking out the figures "$100.00" as the salaries per month for patrolmen for the first six months' service and substituting in lieu thereof the figures "$115.00."

On roll call the motion was lost by the following vote:

Yeas—Messrs. Sergel and Nance—Two.

Nays—Messrs. Carr, Healy, Lawley, Littler, Mueller and Paullin—Six.

The question recurring on the original motion to receive, approve and place the report on file was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Unanimous consent first having been obtained, President Sergel made the following remarks:

"The Chair approves this report as a whole. A few of the larger salaries he would not vote for if they were alone, but he feels inclined to vote for the entire report, however.

"The Chair does not by voting "aye" concede that the Committee on Employment or the Board has the right to fix, increase or decrease the salary of the Secretary to the President. Before the Committee on Employment took action in the matter the Chair had taken ac-

tion and had increased, in accordance with the statute, the salary of his Secretary, and had so notified the Committees on Finance and Employment, but he feels highly gratified that the Committees on Finance and Employment have approved of his action in increasing the salary of his Private Secretary."

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, February 6, 1919.

To the Honorable, the President and the Board of Trustees of the Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development presents herewith a renewal of contract, in duplicate with the Acme Steel Goods Company, a corporation, 2834 Archer Avenue, wherein said company agrees to take and the Sanitary District agrees to furnish, electric power for a period of sixteen months from January 1, 1919, upon the terms and conditions set forth in said contract which is in the usual form and has been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and Clerk be, and they are hereby, authorized and directed to execute, in duplicate, the attached contract, which has been duly executed by said Company.

Respectfully submitted,
H. E. LITTLER,
Chairman,
GEORGE W. PAULLIN,
WM. J. HEALY,
MATT A. MUELLER,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, February 6, 1919.

To the Honorable, the President, and the Board of Trustees of the Sanitary District of Chicago.

GENTLEMEN—Your Committee on Electrical Development presents herewith a renewal of contract, in duplicate with The Industrial Home for the Blind, a municipal corporation, 1901 Marshall Boulevard, Chicago, wherein said corporation agrees to take and the Sanitary District agrees to furnish, electric power for a period of one year, upon the terms and conditions set forth in said contract which is in the usual form and has been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and Clerk be, and they are hereby, authorized and directed to execute, in duplicate, the attached contract, when the same has been executed by said Industrial Home for the Blind.

Respectfully submitted,
H. E. LITTLER,
Chairman,
GEORGE W. PAULLIN,
WM. J. HEALY,
MATT A. MUELLER,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 6, 1919.

To the Honorable, the President and the Board of Trustees of the Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has had under consideration the question of the expenditures of The Sanitary District of Chicago for its various corporate purposes for the fiscal year beginning January 1, 1919 and ending December 31, 1919, and has also considered the draft of ordinance to be passed and adopted by the Board of Trustees termed the "Annual Appropriation Bill," therefore, makes the following report:

Your Committee duly considered the estimates of expenditures for the fiscal year 1919 submitted by the heads of departments to the Clerk, and thereafter transmitted by him to your Committee, and amended same in certain particulars, which estimates as amended were and are approved by your Committee.

The "Departmental Expenditure Estimates" for the fiscal year 1919, prepared by the heads of departments and submitted as aforesaid, the details of which are contained in form of "Appropriation Bill, for the fiscal year 1919, are presented herewith, as amended by your Committee on Finance, and your Committee recommends that said "Departmental Expenditure Estimates" for the fiscal year 1919, be printed in the Proceedings of the Board, or in pamphlet form, or both, as the Committee on Finance may direct, for easy reference and examination, and as a guide for controlling expenditures by the Board of Trustees during the fiscal year 1919.

Your Committee further reports that the Clerk of The Sanitary District of Chicago submitted to your Committee "Estimate of the Revenues of The Sanitary District of Chicago for the Fiscal Year 1919," which was duly considered by your Committee. Your Committee finds that the estimated revenues of The Sanitary District of Chicago for the fiscal year 1919 available for expenditures exclusive of the tax levy for the fiscal year 1919 (arranged according to Budgetary Revenue Accounts of the Sanitary District) are as follows:

Balance in hands of Treasurer and Clerk of The Sanitary District of Chicago, January 1, 1919		$1,173,830.74
1. GENERAL REVENUES.		
11 Taxes levied by the Sanitary District of Chicago for the years 1917 and 1918 and not expended or collected prior to January 1, 1919		$3,394,603.61
12 Revenues from Fees		25.00
14 Revenues from Forfeits		50.00
2. CONTRACTUAL REVENUES. *Commercial.*		
21 Revenues from Construction Work	$	23,596.10
23 Revenues from Electrical Department Service		995,000.00
24 Revenues from Water Service		16,500.00
25 Revenues from Sundry Sales		20,800.00
27 Revenues from Rentals and Easements		60,030.00
3. CONTRACTUAL REVENUES. *Non-Commercial.*		
31 Revenues from Interest	$	38,810.64
33 Revenues from Discounts		200.00
34 Revenues from Unsold Bonds, 30th and 31st Issues		100,985.00
Revenues from Proposed 32nd Issue Bonds		3,000,000.00
Total		$8,824,431.09

Your Committee further finds that the difference between the necessary expenditures of The Sanitary District of Chicago for its corporate purposes for the fiscal year beginning January 1, 1919, and ending December 31, 1919, and the available revenues of The Sanitary District of Chicago for said year, exclusive of the tax levy for said year is $6,575,-

458.15; and therefore your Committee finds that it will be necessary for The Sanitary District of Chicago to levy a tax in the total sum of $6,575,458.15 for the fiscal year 1919.

Your Committee recommends that a tax for said amount be levied for the year 1919, itemized as follows:

For the payment of bonds maturing during the year beginning January 1, 1919 and ending December 31, 1919	$1,526,000.00
To provide for the payment of interest upon bonds accruing during the year beginning January 1, 1919 and ending December 31, 1919	668,620.00
For other corporate purposes of The Sanitary District of Chicago the sum of	4,380,838.15
Total	$6,575,458.15

Your Committee further reports that it has prepared and herewith transmits an ordinance entitled "An Ordinance of the Board of Trustees of The Sanitary District of Chicago, appropriating moneys for its corporate purposes to be expended during the fiscal year beginning January 1, 1919, and ending December 31, 1919," and recommends that the Board of Trustees do pass and adopt said ordinance.

Your Committee, therefore, recommends the passage of the following orders:

Ordered, That the foregoing report, findings and recommendations of your Committee be, and the same are hereby approved and adopted; and it is further

Ordered, That the "Departmental Estimates for the Fiscal Year 1919" submitted by the heads of departments, and as amended by your Committee mentioned in the foregoing report of your Committee, be printed in the Proceedings of the Board, or in pamphlet form, or both, as and when directed by the Committee on Finance; and it is further

Ordered, That the report of your Committee and the ordinance entitled "An Ordinance of the Board of Trustees of The Sanitary District of Chicago, appropriating moneys for its corporate purposes to be expended during the fiscal year beginning January 1, 1919 and ending December 31, 1919," submitted by your Committee, upon the passage, adoption and approval of said ordinance, be immediately published at least once in a newspaper published within the territorial limits of The Sanitary District of Chicago, and the Clerk of The Sanitary District of Chicago is hereby authorized and directed to carry out said orders and to incur the necessary expense therefor.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman,
MATT A. MUELLER,
GEORGE W. PAULLIN,

Committee on Finance of the Board of Trustees of the Sanitary District of Chicago.

H. E. LITTLER,
PATRICK J. CARR,
WM. J. HEALY,

Members of the Board of Trustees of The Sanitary District of Chicago Participating in the Deliberations of Said Committee on Finance Above Mentioned and Approving the Foregoing Report.

Approved as to form:

C. ARCH WILLIAMS,
Attorney.

Mr. Lawley moved that the report be adopted and the accompanying orders passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—None.

TEMPORARY CHAIRMAN.

President Sergel called Mr. Healy to the Chair and took a place on the floor.

Mr. Lawley presented and the Clerk read the annual appropriation ordinance of The Sanitary District of Chicago for the fiscal year 1919.

AN ORDINANCE

Of the Board of Trustees of The Sanitary District of Chicago Appropriating Moneys for Its Corporate Purposes to be Expended During the Fiscal Year Beginning January 1, 1919, and Ending December 31, 1919.

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago:

SECTION 1. That this ordinance be, and the same is hereby, termed the "Annual Appropriation Bill of The Sanitary District of Chicago for the Fiscal Year Beginning January 1, 1919, and Ending December 31, 1919."

SECTION 2. That the following amounts, or so much thereof as may be authorized by law, and as may be needed, are hereby appropriated for the corporate purposes of The Sanitary District of Chicago for the fiscal year beginning January 1, 1919, and ending December 31, 1919. The departments and the purposes for which appropriations are made, and the amounts appropriated for the various purposes, are as follows:

1—DEPARTMENT OF ENGINEERING

1—Personal Service

11—SALARIES AND WAGES OF REGULAR EMPLOYES

General Administration

General Engineering Division

Chief Engineer, 1 at $11,000.00	$ 11,000.00
Assistant Chief Engineer, 1 at $9,000.00	9,000.00
Division Engineers, 2 at $5,000.00	10,000.00
Hydraulic Engineer, 1 at $3,300.00	3,300.00
Resident Engineers, 2 at $2,400.00	4,800.00
Draftsmen, 4 at $2,100.00	8,400.00
Photographer, 1 at $1,920.00	1,920.00
Draftsman, 1 at $1,680.00	1,680.00
Sub-Instrument Man, 1 at $1,560.00	1,560.00
Stenographer, 1 at $1,500.00	1,500.00
Tracer, 1 at $1,200.00	1,200.00
Chauffeur, 1 at $1,500.00	1,500.00
	$ 55,860.00

Accounting and Records

Record Division

Record Clerk, 1 at $2,400.00	2,400.00
Junior Engineer, 1 at $2,100.00	2,100.00
Cost Clerk, 1 at $2,100.00	2,100.00

Sub-Instrument Man, 1 at $1,560.00	1,560.00
Computers, 4 at $1,440.00	5,760.00
Assistant Record Clerk, 1 at $1,560.00	1,560.00
Stenographers, 2 at $1,320.00	2,640.00
	$ 18,120.00

Experimentation and Investigation

Sanitary Division

Sanitary Engineer, 1 at $6,600.00	6,600.00
Division Engineer, 1 at $4,500.00	4,500.00
Assistant Sanitary Engineer, 1 at $3,300.00	3,300.00
Chemist, 1 at $3,000.00	3,000.00
Assistant Engineer, 1 at $3,000.00	3,000.00
Assistant Engineers, 3 at $2,700.00	8,100.00
Resident Engineers, 2 at $2,400.00	4,800.00
Principal Assistant Chemists, 2 at $1,800.00	3,600.00
Draftsmen, 2 at $1,800.00	3,600.00
Assistant Chemists, 2 at $1,500.00	3,000.00
Laboratory Assistants, 2 at $1,320.00	2,640.00
Filter Attendants, 3 at $1,320.00	3,960.00
Sub-Instrument Men, 2 at $1,560.00	3,120.00
Stenographer, 1 at $1,320.00	1,320.00
	$ 54,540.00

Gauge Reading

Gauge Reader, 1 at $123.00	123.00
Gauge Reader, 1 at $120.00	120.00
Gauge Readers, 2 at $63.00	126.00
Gauge Reader, 1 at $60.00	60.00
	$ 429.00

Construction and Design

Bridge Division

Chief Bridge Engineer, 1 at $7,200.00	7,200.00
Assistant Bridge Engineer, 1 at $4,000.00	4,000.00
Assistant Engineer, 1 at $3,000.00	3,000.00
Bridge Designers, 4 at $2,700.00	10,800.00
Bridge Draftsman, 1 at $2,400.00	2,400.00
Bridge Tracers, 2 at $1,800.00	3,600.00
Superintendent, 1 at $1,980.00	1,980.00
Sub-Instrument Man, 1 at $1,560.00	1,560.00
	$ 34,540.00

Channel Construction Division

Assistant Engineers, 2 at $2,700.00	5,400.00
Resident Engineer, 1 at $2,400.00	2,400.00
Junior Engineer, 1 at $2,100.00	2,100.00
Sub-Instrument Men, 5 at $1,560.00	7,800.00
Inspector, 1 at $1,500.00	1,500.00
Rodmen, 6 at $1,380.00	8,280.00
(For the first 6 months' service receive $100 per month after 6 months they are to receive $115.00 per month.)	
Inspector, 1 at $1,380.00	1,380.00
Watchman, 2 at $1,152,00	2,304.00
	$ 31,164.00

Outlet and Intercepting Sewer Construction Division

Division Engineer, 1 at $5,000.00	5,000.00
Assistant Engineer, 3 at $2,700.00	8,100.00
Resident Engineers, 1 at $2,400.00	2,400.00
Junior Engineers, 2 at $2,100.00	4,200.00
Instrument Men, 4 at $1,800.00	7,200.00
Sub-Instrument Men, 4 at $1,560.00	6,240.00
Computers, 4 at $1,440.00	5,760.00
Inspectors, 2 at $1,380.00	2,760.00
Rodmen, 28 at $1,380.00	38,640.00
(For the first 6 months' service receive $100.00 per month, after 6 months' service $115.00 per month.)	
Watchman, 1 at $1,152.00	1,152.00
	$ 81,452.00

Mechanical Division

Mechanical Designing Engineer, 1 at $3,300.00	3,300.00
Assistant Mechanical Designing Engineer, 1 at $2,400.00	2,400.00
Assistant Operating Engineer, 1 at $1,800.00	1,800.00
Mechanical Draftsman, 1 at $1,800	1,800.00
	$ 9,300.00

Maintenance

Channel Maintenance Division

Division Engineer, 1 at $4,000.00	4,000.00
Instrument Man, 1 at $1,800.00	1,800.00
Sub-Instrument Man, 1 at $1,560.00	1,560.00
Rodmen, 4 at $1,380.00	5,520.00

(For the first 6 months' service $100.00 per month, after 6 months' service $115.00 per month.)

Inspector, 1 at $1,380.00	1,380.00
Launch Engineer, 1 at $1,500.00	1,500.00
	$ 15,760.00

Operation of Pumping Stations

Thirty-ninth Street Pumping Station

Engineer in Charge, 1 at $3,000.00	$ 3,000.00
Machinist (at union scale), 1	1,800.00
Stationary Engineers, 5 at $1,800.00	9,000.00
Millwright, 1 at $1,680.00	1,680.00
Craneman (at union scale), 1	2,100.00

	3—Total Supplies		**$ 138,605.00**

4—Materials and Parts for Repairs and Replacements

40—MATERIALS FOR REPAIRS AND REPLACEMENTS			
401	Raw materials. Includes such items as cinders, clay, granite, gravel, marble, sand, slag, soil and stone.	$ 19,500.00	
402	Metallic materials (exclusive of steel conduit and steel conduit fittings)	13,550.00	
4021	Metal in pigs and scraps	$ 300.00	
4022	Mill metals, structural iron and steel	3,300.00	
4023	Cable and wire	1,100.00	
4024	Chain	350.00	
4025	Pipe and pipe fittings	5,300.00	
4026	Hardware	3,200.00	
403	Building and street surfacing materials	40,000.00	
404	Lumber	24,750.00	
405	Fibre products and insulation materials	500.00	
406	Paints, varnishes, glass, saps, gums and dyes	5,150.00	
407	Leather products	300.00	
408	Conduit and conduit fittings	275.00	
40	Total		$ 104,025.00
45—PARTS FOR REPAIRS AND REPLACEMENTS			
451	Building and cabinet making parts	250.00	
452	Motor vehicle and motor boat parts	750.00	
453	Castings and forgings	3,500.00	
454	Engine and machine parts and protection attachments	4,025.00	
455	Electrical parts	1,575.00	
456	Valves and valve parts	2,800.00	
459	Parts, N. O. C.	2,500.00	

45	Total		$ 15,400.00
	4—Total Materials and Parts		**$ 119,425.00**

5—Equipment

51—FIXED PLANT EQUIPMENT

511	Prime movers, pumping and steam plant equipment		$ 12,300.00
	Ash tank Thirty-ninth street pumping station	$ 3,000.00	
	Non-return valves for six old boilers.	2,000.00	
	Gallery back of Edgemoore boilers..	500.00	
	Drainage system for sewage pumping pits	800.00	
	Ash conveyor Lawrence ave. pumping station	1,500.00	
	Damper regulators	3,000.00	
	Blower and pump activated sludge plant	1,000.00	
	Pumping and steam plant equipment, N. O. C.	500.00	
512	Machines and machine shop equipment		$ 100.00
516	Heating and ventilating equipment		200.00
517	Lifting equipment (mechanical hoist for screens in sewage chamber)		1,500.00
518	Electrical equipment		1,250.00
519	Fixed plant equipment, N. O. C.		600.00
51	Total		$ 15,950.00

52—PORTABLE PLANT EQUIPMENT

521	Dredging and excavating equipment		$ 50.00
522	Dragging and hoisting equipment		50.00
523	Road surfacing equipment		75.00
525	Digging and agricultural implements		625.00
526	Tools		875.00
527	Transporting and conveying equipment		2,550.00
5271	Motor vehicle equipment	$ 500.00	
5273	Floating equipment	1,800.00	
5274	Locomotives and cars	250.00	
529	Portable plant equipment, N. O. C.		$ 2,000.00
52	Total		6,225.00
53	FURNITURE, OFFICE AND HOUSEHOLD EQUIPMENT		2,500.00

54—EQUIPMENT FOR PRESERVING LIFE AND PROPERTY

541	Fire prevention and fire fighting equipment	$ 150.00
542	Life saving equipment	100.00

54	Total		250.00
55—LABORATORY, PHOTOGRAPHIC, TESTING, ENGINEERING EQUIPMENT AND BOOKS			
551	Laboratory equipment	$ 500.00	
552	Photographic equipment	100.00	
553	Testing equipment	2,000.00	
554	Engineering and drafting equipment	500.00	
555	Books, maps and charts	100.00	
55	Total		3,200.00
57—UNIFORMS, WEARING APPAREL AND OTHER PERSONAL EQUIPMENT			500.00
58—EQUIPMENT, N. O. C.			2,500.00
	5—Total Equipment		**$ 31,125.00**

6—Structures and Non-Structural Improvements

61—BUILDINGS			
61-A—Covering coal bins, Lawrence avenue pumping station		$ 2,500.00	
61-B—Covering coal pile, Lawrence avenue, pumping station		1,000.00	
61-C—Wilmette pumping station addition		500.00	
61-D—Evanston pumping plant		215,000.00	
61-F—Des Plaines river pumping plant and treatment plant		500,000.00	
61-G—Calumet pumping plant		1,000,000.00	
61-H—Ninety-fifth street pumping plant		150,000.00	
61-I—Controlling Works, lighting, Blue Island		6,000.00	
61-J—Controlling Works, house, Blue Island		10,000.00	
61-K—Wrecking Union Loop power house		10,000.00	
61-L—Calumet Power Plant		250,000.00	
61	Total		$ 2,145,000.00
62—BRIDGES AND VIADUCTS			
62A—Twelfth street bridge, Chicago river		$ 100,000.00	
62C1—California avenue bridge, Main channel		175,000.00	
62C2—Crawford avenue bridge, Main channel		175,000.00	
62C3—Cicero avenue bridge, Main channel		175,000.00	
62C4—Seventy-second avenue bridge, Main channel		175,000.00	
62C5—Eight Track bridge, interlocking system, Main channel		40,000.00	
62H1—Ann street bridge, Calumet Sag channel		11,500.00	
62H2—Chicago street bridge, Calumet Sag channel		13,500.00	
62H3—Division street bridge, Calumet Sag channel		15,000.00	
62H4—B. & O. C. T. bridge, Calumet Sag channel		11,000.00	
62H5—B. & O. (Stony Creek) bridge, Calumet Sag channel		10,000.00	

62H6—Grand Trunk Western bridge, Calumet Sag channel	15,000.00	
62H7—Rock Island connecting track bridge, Calumet Sag channel	4,500.00	
62H8—Rock Island main line bridge, Calumet Sag channel	20,000.00	
62H9—B. & O. R. R. interlocking system, Calumet Sag channel	25,000.00	
62 Total		965,500.00

64—CHANNELS, DITCHES, RESERVOIRS AND DOCKS

64A2—Widening Chicago river	$ 30,000.00	
642A3—Repairing Laflin street dock, Chicago river	20,000.00	
642C4—Dredging at Butterfly and Bear Trap dams	25,000.00	
64G2—Constructing liebys, North Shore channel	2,000.00	
642G2—Flattening slopes, North Shore channel	5,000.00	
642G2a—Protecting slopes, North Shore channel	25,000.00	
64H21—Calumet Sag channel, section 1	145,000.00	
64H213—Calumet Sag channel, section 13	700,000.00	
64H214—Calumet Sag channel, section 14	88,500.00	
641H22—Pumping section 2, Calumet Sag channel	2,200.00	
641H23—Pumping section 3, Calumet Sag channel	1,900.00	
641H24—Pumping sections 4 and 12, Calumet Sag channel	8,000.00	
641H29—Byrne Bros claim, section 9, Calumet Sag channel	7,000.00	
641H210—Pumping sections 10, 11 and 12, Calumet Sag channel (3 months additional)	2,500.00	
641H410—Temporary dam, section 10, Calumet Sag channel	12,000.00	
64J6—Main channel storage basin	300,000.00	
64J7—Dredging Little Calumet river	250,000.00	
64 Total		$ 1,624,100.00

65—OUTLETS AND INTERCEPTING SEWERS, TUNNELS AND PLANTS TO REMOVE SOLIDS AND OTHER REFUSE FROM SEWAGE

65M2156—Calumet intercepting sewer, contract No. 1	$225,000.00	
65M2456—Calumet intercepting sewer, contract No. 4	5,000.00	
65M2556—Calumet intercepting sewer, contract No. 5	600,000.00	
65M2656—Calumet intercepting sewer, contract No. 6	105,000.00	
65M2756—Calumet intercepting sewer, contract No. 7	20,000.00	
65M2056—Overflow conduit from Calumet pumping station	125,000.00	
65M2060—Evanston intercepting sewer	10,000.00	
651M2060—Rip-rap Evanston intercepting sewer	15,000.00	
651M2060—Pumping Evanston intercepting sewer	10,000.00	
651M2060—Flushing intake for Evanston intercepting sewer	15,000.00	
65M2062—Des Plaines river intercepting sewer and outlet	568,000.00	
65M2059—Stockyards intercepting sewer	250,000.00	
65M2056A—Outfall sewer and adjunct and addition to Calumet Sag channel	75,000.00	

65M2057—Niles Center sewer outlet		4,000.00	
65J162—Stockyards activated sludge plant		300,000.00	
65S102—Morton Grove addition to plant to remove solids.		35,000.00	
652M1551—Remodeling sewage chamber, Thirty-ninth street		10,000.00	
652M1551a—Vent for sewage chamber, Thirty-ninth street		1,000.00	
652N154—Dredging Thirty-ninth street intake		4,000.00	
65S3a—Tannery testing station		5,000.00	
65S3b—Corn Products Testing station		5,000.00	
65	Total		2,387,000..00
66—PAVEMENTS, SIDEWALKS AND RAILROAD TRACK WORK AND TRESTLES TO CARRY RAILROADS OVER CHANNELS, DITCHES AND INTERCEPTING AND OUTLET SEWERS			
661	Track Work and trestles		
6611	B. and O.—C. T. R. R., Blue Island	$60,000.00	
6612	Grand Trunk Western, Blue Island	32,000.00	
6613	Rock Island connecting track, Blue Island	9,000.00	
6614	Rock Island main line, Blue Island	5,000.00	
662	Railroad Crossings, Calumet intercepting sewer		
6621	I. C. R. R. One hundred and fourth street	22,000.00	
6622	I. C. R. R. One hundred and twenty-first street	4,000.00

GRAND TOTAL—APPROPRIATIONS FOR CORPORATE PURPOSES OF THE SANITARY DISTRICT OF CHICAGO FOR FISCAL YEAR 1919 ..... $15,399,889.24

SECTION 3. The appropriation herein of the amounts for the payments of contract liabilities, or to defray the expense of any project or purpose, shall not be construed as an approval by this Board of any of said contract liabilities, or of any project or purpose mentioned herein, but shall be regarded only as the provision of a fund, or funds, for the payment thereof when said contract liabilities have been found to be valid and legal obligations against The Sanitary District of Chicago, and when properly vouchered, audited and approved by the Board of Trustees, or when any project or purpose is approved and authorized by the Board of Trustees of The Sanitary District of Chicago, as the case may be.

SECTION 4. This ordinance shall take effect and be in full force from and after its passage and publication in accordance with the law.

Approved as to Form:

C. ARCH WILLIAMS,
Attorney.

Mr. Sergel moved that item under "Engineering Department," and subdivision entitled "Outlets and Intercepting Sewers, Tunnels and Plants to Remove Solids and other Refuse from Sewage," "65M2059, Stockyards Intercepting Sewer, $250,000.00," on page 124 of the Proceedings, be stricken out.

On roll call the motion was lost by the following vote:

Yeas—Mr. Sergel—One.

Nays—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Mr. Sergel moved that item under "Engineering Department," and subdivision entitled "Outlets and Intercepting Sewers, Tunnels and Plants to Remove Solids and other Refuse from Sewage," "65J162. Stockyards Activated Sludge Plant, $300,000.00," on page 125 of the Proceedings, be stricken out.

On roll call the motion was lost by the following vote:

Yeas—Mr. Sergel—One.

Nays—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Mr. Sergel moved that item under "Engineering Department" and subdivision entitled "Acquirement of Land," "75, Stockyards Activated Sludge Plant Site, $400,000.00," on page 125 of the Proceedings, be stricken out.

On roll call the motion was lost by the following vote:

Yeas—Mr. Sergel—One.

Nays—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Mr. Nance moved that item under "Department of Law" entitled "11, Salaries and wages of regular employes, $89,760.00," on page 131 of the Proceedings, be reduced twenty per cent, and that the remainder be apportioned according to plans to be formulated by the head of the Law Department.

Mr. Sergel: I arise to a point of order. That motion, if passed, will violate the rules of the Board in reference to the Committee on Employment. The rules provide that the Employment Committee shall fix the compensation of employes, and while I do not think that the rule in regard to the Employment Committee is legal, still it is the rule of the Board, and I think on that account that Trustee Nance's motion is out of order.

The Chairman: The Chair sustains the point of order.

Mr. Nance: I appeal from the decision of the Chair.

On roll call the decision of the Chair was sustained by the following vote:

Yeas—Messrs. Sergel, Carr Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Mr. Nance—One.

Mr. Sergel moved that item under "Department of Law" entitled "11, Salaries and wages of regular employes, $89,760.00," on page 131 of the Proceedings, be amended by striking out "Assistant Attorneys, 3 at $4,800.00, $14,400.00," and substituting in lieu thereof "Assistant Attorney, 1 at $4,800.00, $4,800.00," and by striking out "Assistant Attorneys, 4 at $3,000.00, $12,000.00," and substituting in lieu thereof "Assistant Attorneys, 3 at $3,000.00, $9,000.00," making a total of $77,160.00 instead of $89,760.00."

On roll call the motion was lost by the following vote:

Yeas—Messrs. Sergel and Nance—Two.

Nays—Messrs. Carr, Healy, Lawley, Littler, Mueller and Paullin—Six.

Mr. Nance moved that item 13, "Compensation for personal service, other than salaries and wages," under "Department of Law," on page 132 of the Proceedings, be amended by striking out the following item: "Special representative at Washington, D. C., pertaining to Federal matters, $2,100.00."

On roll call the motion was lost by the following vote:

Yeas—Messrs. Sergel and Nance—Two.

Nays—Messrs. Carr, Healy, Lawley, Littler, Mueller and Paullin—Six.

Mr. Nance moved that item 99, "Contingencies, $3,000.00," under "Department of Law," on page 134 of the Proceedings, be stricken out.

On roll call the motion was lost by the following vote:

Yeas—Mr. Nance—One.

Nays—Messrs. Carr, Healy Lawley, Littler, Mueller and Paullin—Six.

Mr. Nance moved that item under "Department of Real Estate," entitled "13, Compensation for personal services other than salaries and wages; Real Estate Experts, in connection with contemplated purchase of land for account of Engineering and Electrical Department, $5,000.00," on page 139 of the Proceedings, be reduced to $2,500.00.

On roll call the motion was lost by the following vote:

Yeas—Mr. Nance—One.

Nays—Messrs. Carr, Healy, Lawley, Littler and Mueller—Five.

Mr. Nance moved that item under "Department of Police," "11, Salaries and wages of regular employes, $69,540.00," page 141 of the Proceedings, be reduced twenty per cent.

The Chairman ruled that the motion was out of order.

Mr. Nance moved that the item under "Department of Police" entitled "12, Salaries and wages of temporary employes. For vacation periods and emergencies, $6,000.00," on page 141 of the Proceedings, be reduced to $4,000.00.

On roll call the motion was lost by the following vote:

Yeas—Messrs. Sergel and Nance—Two.

Nays—Messrs. Carr, Healy, Lawley, Littler, Mueller and Paullin—Six.

Mr. Nance moved that the item under "Department of Police" entitled "13, Compensation for personal services other than salaries and wages, $5,000.00," on page 141 of the Proceedings, be stricken out.

On roll call the motion was lost by the following vote:

Yeas—Mr. Nance—One.

Nays—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Mr. Lawley moved that the ordinance be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel (except as to certain items hereinbefore specifically referred to on which he voted "nay"), Carr, Healy, Lawley, Littler, Mueller, Nance (except as to certain items hereinbefore specifically referred to, on which he voted "nay") and Paullin—Six (on all items, and eight on all items not excepted).

Nays—None (except as above stated).

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillen,

Clerk.

APR 12 1919

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO

REGULAR MEETING

THURSDAY, FEBRUARY 13, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Absent—Mr. Clark—One.

REPORTS OF OFFICERS.

The Clerk presented his report of money received and deposited with the Treasurer during the month of January, 1919, which was ordered published and filed, as follows:

CHICAGO, February 13, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I beg to report the receipt of One Hundred Forty-two Thousand, One Hundred Ninety-five and Ninety-one Hundredths ($142,195.91) Dollars, during the month of January, 1919, from the following sources:

Continental & Commercial National Bank, through George M. Reynolds, Treasurer, being interest on $41,000.00 of Sanitary District bonds of the 31st issue, dated July 1, 1918, unsold and in his hands at 4½% interest from July 1, 1918, to January 1, 1919		$ 922.50
Chicago & Alton R. R. Company, being annual rental for water service under lease No. 252, dated September 26, 1911, for period covering year 1919		575.00
George M. Reynolds, Treasurer, being proceeds from 40 coupons clipped from 40 Berwyn electric light bonds, dated October 1, 1915, and coupons maturing February 1, 1919,		
40 coupons at $6.25 each	$ 250.00	
Less collection charges	.35	
		249.65
Moore, Case, Lyman & Hubbard, being refund on policy No. AP-56138 on Packard car		86.08
American Steel & Wire Company, being annual rental for years 1918 and 1919 for pipe line service to Rockdale, under lease dated January 15, 1914		70.00
Nessen Warehousing Company, being annual rental for land under lease dated November 28, 1906, for period covering from June 30, 1918, to June 30, 1919		5,162.50
International Harvester Company, being semi-annual rental for land under leases dated June 18, 1902, and July 18, 1902, for period covering from January 1 to June 30, 1919		4,500.00
Buchanan-Daley Company, being semi-annual rental of land under leases dated January 9, 1913, July 14, 1909, and June 24, 1908, for period covering from January 1, 1919, to June 30, 1919		415.27
Corn Products Refining Company, being annual rental of land under lease dated February 19, 1908, for period covering from June 30, 1918, to June 30, 1919		1,752.50
Chicago Transfer & Clearing Company, being semi-annual rental for land under lease dated January 13, 1909, for period covering from January 1 to June 30, 1919		414.38
Thomas Le Grand, being balance of annual rental for land under lease dated April 9, 1914, for year 1918—total rental	$ 350.00	
Paid on account December 28, 1917	50.00	
		300.00
Van Fleet Woodworking Company, being monthly rental for premises located at No. 1 Jefferson street, Joliet, Ill., for month of February, 1918		75.00
City of Chicago, being monthly rental of land under lease No. 306, and		
Amount carried forward		$ 14,522,88

Amount brought forward		$ 14,522.88
agreement dated February 28, 1918, for months of November and December, 1918		250.00
Alex P. Karres, being monthly rental for premises at No. 1026 Central street, Evanston, Ill., dated June 11, 1914, for the month of July, 1918		40.00
Sundry consumers, for electric light and power	$ 50,691.37	
City of Chicago, for power and light from December, 1917, to December, 1918	65,566.64	
South Park Commissioners, for power and light for month of November, 1918	2,853.94	
Commissioners of Lincoln Park—

Grand Total			$142,195.91

Respectfully submitted,

JOHN MCGILLEN,
Clerk of the District.

CHICAGO, February 13, 1919.

$142,195.91.

Received from John McGillen, Clerk, the sum of One Hundred Forty-two Thousand, One Hundred Ninety-five and Ninety-one Hundredths ($142,195.91) Dollars, on the dates and in amounts, as follows:

January 2	$ 751.38
January 3	1,603.14
January 4	4,881.35
January 6	109.94
January 7	1,226.03
January 8	601.80
January 9	544.54
January 10	882.39
January 11	2,642.28
January 13	6,733.10
January 14	3,285.04
January 15	1,490.45
January 16	7,777.53
January 17	4,022.23
January 18	3,478.35
January 20	8,842.89

January 21	8,569.51
January 22	6,696.60
January 23	2,440.14
January 24	255.65
January 25	174.56
January 27	77.28
January 28	1,762.19
January 29	155.31
January 30	67,287.51
January 31	5,904.72
Total	$142,195.91

to be deposited to the credit of The Sanitary District of Chicago, and of the following accounts:

Electrical Department	$127,383.03
Land Revenue	12,909.65
Interest and Premium of Bonds	922.50
Water Service	645.00
Interest on Deposits	249.65
Miscellaneous Structures, etc., and Equipment, Maintenance and Operation	86.08
Total	$142,195.91

GEORGE M. REYNOLDS,
Treasurer, The Sanitary District of Chicago.

The President presented the following message:

To the Honorable, the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I return herewith without my approval the following items in the Annual Appropriation Bill:

65M2059. Stockyards Intercepting Sewer—$250,000.

65J162. Stockyards Activated Sludge Plant—$300,000.

76. Stockyards Activated Sludge Plant Site—$400,000.

These items, aggregating $950,000, are intended as first expenditures for an Activated Sludge Plant, and for the nesessary land and intercepting sewer, the whole to constitute a plant for the treatment of stockyards trade wastes and a comparatively small amount of human sewage. For many years the Sanitary Board has been negotiating with the Stockyards companies to induce them to stop the polluting of the river and the canal by the trade waste coming from the packing houses. For nine years the Board has conducted an experimental plant and proved conclusively that the pollution can be stopped by activated sludge treatment. Finally the majority of the Trustees offered to divide the costs of treatment of the trade waste and sewage by assuming about thirteen per cent of the expense, to the Stockyards companies' eighty-seven percent. The answer of the packers was an offer to assume forty percent of the financial burden if the Sanitary District would pay sixty percent. There the matter stands, and yet the Board now appropriates $950,000 without any agreement whatever.

The engineers have estimated the cost of the treatment plant at about $4,000,000. The packers propose to saddle on the people sixty percent of this sum, $2,400,000. The amount of human sewage is insignificant compared with the volume of trade waste, and if the packers will do what other property owners do, connect their buildings with the public sewers in the surrounding streets, the human sewage will be taken care of by the Sanitary District. Objection has been made to this plan on the ground of expense to the packers. Certainly whatever the cost

of sewer connections may be, it will be no greater proportionately than other property owners must pay. The mere fact that the packers prefer to empty the human sewage into their trade waste outlet is no reason why the Sanitary District should use the taxpayers' money to pay thirteen percent or sixty percent or any other part of the cost of treatment.

For nineteen years since the Sanitary canal was opened, to say nothing of the many decades before, the packers have been pouring their filth into the river and the canal, much to the distress of the people of the city. While thus ignoring their duty to avoid making public nuisances of themselves they have been rolling up riches beyond the dreams of avarice. One of these companies in 1916 declared a stock dividend of $80,000,000 out of the accumulated surplus, and in that same year showed a net profit of $20,000,000. If the packers should bear the entire expense of the proposed treatment plant, the share of this company would equal only six percent of the net profits of a single year. Of course, 1917 and 1918 have shown similar profits.

Another company, after paying ample dividends, passed to surplus account more than $51,000,000 in the three years 1916, 1917 and 1918. Less than three percent would pay this company's share!

If the packers, after making such profits, remain unwilling to take care of their trade waste we can only conclude that they lack civic consciences, and, if further effort to induce them to do their duty be unavailing, we have our only remedy in the courts. If this Board should attempt to spend the people's money for the benefit of the packers I am informed that taxpayers will attempt to prevent such action by injunction.

The people are entitled to have such an offense as "Bubbly Creek" abolished, and we should leave no means untried to make the creators of that nuisance stop their offensive practices. Fortunately the same neighborhood affords an opportunity for the Sanitary Trustees to abate another great nuisance. Into the Stockyards slip at Thirty-ninth and Halsted streets empties the sewage from the greater part of the South Side from Thirty-fifth street to Seventy-fifth street, comprising some twenty-two square miles of territory. At this place land is available for a treatment plant. If this plant should be built an opportunty will be given if the laws and government regulations permit, to fill up the Stockyards slip and extend Thirty-ninth street, as has long been desired by residents and business men of that region. Certainly the closing of this slip will materially reduce the offensive odors, and the treatment of the sewage will provide an effluent which will greatly improve the water in the canal.

Another crying need is the improvement of conditions in the North Branch of the Chicago river. In the neighborhood of Lawrence avenue the people have held indignation meetings protesting against the filthiness of the water in the river, and throughout the length of the North Branch south of Lawrence avenue, the condition is even more disgraceful. One or more treatment plants are needed here without further delay.

I have less hesitancy in advocating the building of sewage treatment plants at Thirty-ninth street and the North Branch for the reason that in 1916, less than two weeks before I was inaugurated into office, the Sanitary Board formerly adopted the policy of sewage treatment and ordered the engineer to prepare plans for works at these and other places.

Not only are these plants needed to abate appalling nuisances in our city, which will not wait further delay, but the building of them will afford labor for returning soldiers and other men out of work.

Therefore I return without my approval these three appropriations for

$950,000, and urge the Board not to spend the taxpayers' money on work which should be done by the packers themselves, but to make appropriations for treatment plants at Thirty-ninth street and on the North Branch to relieve foul conditions in those regions and to reduce the impurity of the water flowing down the canal to the Desplaines and Illinois rivers.

CHARLES H. SERGEL,
President the Sanitary District of Chicago.

Mr. Lawley moved that the vote by which items "65M2059, Stockyards Intercepting Sewer, $250,000.00," "65J162, Stockyards Activated Sludge Plant, $300,000.00" and "76, Stockyards Activated Sludge Plant Site, $400,000.00," (the same being the only subjects referred to in veto message), were passed in the annual appropriation ordinance for the year 1919, be reconsidered.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley moved that items "65M2059, Stockyards Intercepting Sewer, $250,000.00," "65J162, Stockyards Activated Sludge Plant, $300,000.00" and "76, Stockyards Activated Sludge Plant Site, $400,000.00," in the annual appropriation ordinance for the year 1919, be passed, the veto of the President to the contrary notwithstanding.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—Mr. Sergel—One.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 13, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has had under consideration the question of supplying the 39th Street and Lawrence Avenue pumping stations with coal for a period of ninety days from April 1, 1919.

Your Committee further reports, that owing to the conditions placed by the Fuel Administration of the State of Illinois and the Government on the purchase and delivery of coal, the Sanitary District, on December 13, 1917 (page 1564 of the Proceedings), accepted a proposal of the Edwards & Bradford Lumber Company to furnish two carloads of coal screenings per day until March 31, 1919, for the 39th Street pumping station at the current existent mine mouth maximum price in effect at the time of shipments, plus 15 cents per ton as a commission, the Sanitary District to pay all freight charges. All coal furnished the Lawrence Avenue pumping station has been purchased in the open market under authority of the Board, passed May 31, 1917 (page 771 of the proceedings).

Your committee is of the opinion that it is now advisable that the Chief Engineer prepare specifications for the purchase on the British Thermal Unit basis of coal to supply said pumping stations for the period stated so that only the actual value of heat units may be paid for.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to prepare specifications for the purchase of coal to supply the 39th street and Lawrence avenue pumping stations for ninety days, from April 1, 1919, on the British Thermal Unit basis, and that the Clerk advertise for bids in accordance

with the specifications so prepared by the Chief Engineer; and it is further

Ordered, That the authority of the Board passed May 31, 1917 (page 771 of the Proceedings), to purchase coal in the open market for the 39th Street and Lawrence Avenue pumping stations be, and the same is hereby repealed.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 13, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance herewith transmits to the Board grant of easement whereby Paul B. Harris and Lena Harris, his wife, for the nominal consideration of $1.00, grant to the Sanitary District of Chicago a perpetual easement to construct, reconstruct, maintain and operate an intercepting sewer, with appurtenances thereto, in the Desplaines River District, in, under and through certain real estate owned by said parties. Said grant of easement permits the Sanitary District to transport material, equipment, excavated soil and debris over and across said property. The Sanitary District agrees to provide one twelve inch connection in said sewer for drainage purposes, which may be approved by the Chief Engineer, otherwise the grant of easement is in the usual form in use by the Sanitary District in such cases.

Your Committee further reports that it has examined said grant of easement, which has been approved by the Chief Engineer and Attorney, and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District of Chicago, and the Clerk, be, and they are hereby authorized and directed to execute in duplicate said form of easement which is hereto attached, same having been duly executed by said grantors.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE.
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 13, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of February payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

General Payroll for First Half of February.

John McGillen, Clerk (general payroll)		$ 27,525.43

Construction Account.

John McGillen, Clerk (expenses of employes)	$ 146.18	
John McGillen, Clerk (expenses of employes)	104.20	
James O. Heyworth (labor and material, construction of timber dam, 48th ave. bridge, Calumet-Sag Channel)	3,434.92	
A. Guthrie & Co. (labor)	68.18	
A. Guthrie & Co. (labor)	7.79	
A. Guthrie & Co. (labor and material)	3.29	
Nagle Bros. (coal)	24.10	
Kirby Motor Trucking Company (cartage charges)	18.00	
Public Service Company of Northern Illinois (lighting expenses)	.50	
Wisconsin Lime & Cement Company (anthracite coal)	16.68	
Nagle Bros. (coal)	9.85	
Kueffel & Esser Company (1 protractor)	.40	
		3,754.83

Maintenance and Operation Account.

John McGillen, Clerk (special roll, 39th street pumping station)	$ 240.00	
John McGillen, Clerk (special roll, 39th street pumping station)	126.50	
John McGillen, Clerk (freight charges paid I. C. R. R. for hauling fuel to 39th street pumping station)	166.24	
John McGillen, Clerk (freight charges paid C. B. & Q. R. R. for hauling fuel to 39th street pumping station)	78.89	
John McGillen, Clerk (freight charges paid N. Y. C. R. R. for hauling fuel to Lawrence avenue pumping station)	76.05	
John McGillen, Clerk (freight charges paid C. & E. I. R. R. for hauling fuel to Lawrence avenue pumping station)	74.41	
John McGillen, Clerk (freight charges paid C. & A. R. R. for hauling fuel to Lawrence avenue pumping station)	63.92	
John McGillen, Clerk (freight charges paid I. C. R. R. for hauling fuel to Lawrence avenue pumping station)	59.80	
John McGillen, Clerk (freight charges paid P. C. C. & St. L. R. R. for hauling fuel to Lawrence avenue pumping station)	7.93	
Bickett Coal Company (coal)	215.97

Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Engineering.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, February 13, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on October 24, 1918 (pages 1211-1212 of the Proceedings), the Board passed an ordinance for laying out and establishing a right of way for providing for the building therein of an intercepting sewer, drain and outlet, with appurtenances thereto, as an adjunct to the Calumet-Sag Channel of the Sanitary District. This intercepting sewer was to be constructed for the purpose of taking care of the domestic sewage arising in the territory lying between 95th street and 114th street on the east side of the Calumet river.

Your Committee further reports that the right of way of said intercepting sewer has been materially changed by the Engineering Department, and it is necessary that said ordinance be repealed and a new ordinance for said improvement passed.

Your Committee herewith transmits to the Board an ordinance repealing the ordinance above referred to, and recommends the passage of said repealing ordinance.

Respectfully submitted,
H. E. LITTLER,
Vice-Chairman.
PATRICK J. CARR,
JAS. H. LAWLEY,
MATT. A. MUELLER,
Committee on Engineering.

The following is the ordinance:

AN ORDINANCE

Repealing an Ordinance, Entitled, "An Ordinance for Laying out and Establishing a Right of Way for and Providing for the Building of an Intercepting Sewer, Drain and Outlet, the Same to be an Adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago."

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago:

SECTION 1. That the ordinance entitled "An Ordinance for Laying Out

and Establishing a Right of Way for and Providing for the Building of an Intercepting Sewer, Drain and Outlet, the Same to be an Adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago," passed by the Board of Trustees of The Sanitary District of Chicago at its regular meeting held October 24, 1918, and appearing on pages 1211 and 1212 of the Proceedings of the Board for the year 1918, be, and the same is hereby, repealed.

SECTION 2. This ordinance shall be in force and effect from and after its passage.

Mr. Littler moved that the report be adopted and that the ordinance be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, February 13, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering herewith transmits to the Board three ordinances for laying out and establishing rights of way for and providing for the building therein of intercepting sewers, drains and outlets with appurtenances thereto, as adjuncts of the Calumet-Sag Channel of the Sanitary District.

The intercepting sewers are briefly described as follows:

(A)—This intercepting sewer is to be built for the purpose of taking care of the domestic sewage arising in the territory lying between Ninety-fifth street and 114th street on the east side of the Calumet river.

(B)—This intercepting sewer is to be built for the purpose of caring for the sewage arising in certain territory lying northeasterly of Harbor avenue and extending from the east line of The Strand to the north line of East Ninety-fifth street and an overflow sewage extending from the east line of Ninety-fifth street to the Calumet river.

(C)—This intercepting sewer is to be built in Edbrooke avenue and Edbrooke avenue produced from the Calumet sewage pumping station to the center thread of the Calumet river and is desiged as an outlet for the excess water coming into said pumping station in times of flood.

Your Committee further reports that it has examined said ordinances and approved the same and therefore recommends the passage of said ordinances.

Respectfully submitted,

H. E. LITTLER,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Littler moved that the report be adopted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

The following ordinance was transmitted with said report:

AN ORDINANCE

An Ordinance for Laying out and Establishing a Right of Way For and Providing for the Building of an Intercepting Sewer, Drain and Outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago.

Be it ordained by the Board of Trustees of The Sanitary District of Chicago.

SECTION 1. That there be and is hereby laid out, located and established a right of way for an intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, together with all necessary appurtenances thereto, upon, under and through the following described real estate situated in the City of Chicago, County of Cook and State of Illinois, to-wit:

That part of East 97th street lying west of the west line of Avenue N and east of the Calumet river; also a strip of land sixty (60) feet in width extending from a line one hundred twenty-four (124) feet west of the west line of said Avenue N to the south line of East 96th street, the center line of said strip being described as follows:

Beginning at a point in the center line of East 97th street one hundred twenty-four (124) feet west of the west line of Avenue N, thence westerly to a point twenty-five (25) feet southwesterly measured at right angles from the southwesterly boundary of the right of way of the Pittsburgh, Fort Wayne and Chicago Railroad Company and forty (40) feet easterly measured at right angles from the easterly channel line of the Calumet river as established by the United States Government; thence westerly approximately three hundred twenty (320) feet along a line at right angles to said easterly channel line to a point in a line thirty (30) feet northeasterly of and parallel to the southwesterly line of Block 113, in South Chicago Subdivision; thence northwesterly along a line thirty (30) feet northeasterly of and parallel to the southwesterly line of said Block 113 to an intersection with a line four hundred twenty-five (425) feet east of and parallel to the east line of Baltimore avenue; thence north along a line four hundred twenty-five (425) feet east of and parallel to the east line of Baltimore avenue to the south line of east 96th street; also that part of East 96th street lying between the east line of Baltimore avenue and a line four hundred fifty-five (455) feet east of and parallel to said east line of Baltimore avenue; also that part of Baltimore avenue lying between the south line of East 96th street and the north line of east 95th street, all of said right of way being situated in Sections five (5) and six (6), Township thirty-seven (37) North, Range fifteen (15) East of the Third Principal Meridian in the City of Chicago, County of Cook and State of Illinois.

SECTION 2. Attached hereto, and made a part of this ordinance is a plat or map entitled "Ordinance Map For an Intercepting Sewer, Drain and Outlet, the same to be an Adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago" dated February 13, 1919, on which said plat or map the boundary lines of said right of way are indicated in red.

SECTION 3. That the making of the improvement above described is hereby provided for, and there shall be constructed, maintained and operated within the lines of said right of way a covered sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of the Sanitary District of Chicago, together with all appurtenances thereto, to be built either of brick, concrete or reinforced concrete.

SECTION 4. The City of Chicago shall have the right to connect, in a manner to be approved by the Chief Engineer of The Sanitary District of Chicago, any new sewer (not including, however, house drains) or system of sewers hereafter installed by the City of Chicago, with the intercepting sewer, drain and outlet to be constructed hereunder by The Sanitary District of Chicago.

SECTION 5. The Committee on Finance of the Board of Trustees of The

Sanitary District of Chicago is hereby authorized and directed to acquire for and on behalf of The Sanitary District of Chicago, upon such terms as said Committee on Finance may deem just and reasonable, the perpetual and temporary easements, privileges, right and authority to construct, reconstruct, repair, maintain and operate the said intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, upon, under and through the pieces or parcels of land described in Section 1 of this ordinance; and in the event that said Committee on Finance is unable to agree with any owners or parties in interest for or in respect to the compensation to be paid by any such owners or parties in interest for said easements, privileges, right and authority as above set forth, then the Attorney of The Sanitary District of Chicago shall institute proceedings in such court as he may deem proper and acquire said easements, privileges, right and authority to construct, reconstruct, repair, maintain and operate the said intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, upon, under and through the pieces or parcels of land described in Section 1 of this ordinance by virtue of the Eminent Domain Law of the State of Illinois.

SECTION 6. This ordinance shall be in force and effect from and after its passage.

Mr. Littler moved that the ordinance be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

The following ordinance was transmitted with said report:

AN ORDINANCE

For Laying out and Establishing a Right of Way for and Providing for the Building of an Intercepting Sewer, Drain and Outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago.

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago.

SECTION 1. That there be and is hereby laid out, located and established a right of way for an intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, together with all necessary appurtenances thereto, upon, under and through the following described real estate situated in the City of Chicago, County of Cook and State of Illinois, to-wit:

That part of East Ninety-Fifth street lying between the west line of Baltimore avenue produced and the Calumet river, also a strip of land sixty (60) feet in width lying northwesterly of and adjacent to the Indian boundary line and extending from the north line of east Ninety-fifth street to the southwesterly line of South Chicago avenue; also that part of Harbor avenue, extending from the southwesterly line of South Chicago avenue to the east line of The Strand including all street and alley intersections between said limits.

SECTION 2. Attached hereto and made a part of this ordinance is a plat or map entitled "Ordinance Map For an Intercepting Sewer, Drain and Outlet, the same to be an Adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago" dated February 13, 1919, on which said plat or map the boundary lines of said right of way are indicated in red.

SECTION 3. That the making of the improvement above described is hereby provided for and there shall be constructed, maintained and operated within the lines of said right of way a covered sewer, drain and outlet, the same to be

an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, together with all appurtenances thereto, to be built either of brick, concrete or reinforced concrete.

SECTION 4. The City of Chicago shall have the right to connect, in a manner to be approved by the Chief Engineer of The Sanitary District of Chicago, any new sewer (not including, however, house drains) or system of sewers hereinafter installed by the City of Chicago, with the intercepting sewer, drain and outlet to be constructed hereunder by The Sanitary District of Chicago.

SECTION 5. The Committee on Finance of the Board of Trustees of The Sanitary District of Chicago is hereby authorized and directed to acquire for and on behalf of The Sanitary District of Chicago upon such terms as said Committee on Finance may deem just and reasonable, the perpetual and temporary easements, privileges, right and authority to construct, reconstruct, repair, maintain and operate said intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, upon, under and through the pieces or parcels of land described in section 1 of this ordinance; and in the event that said Committee on Finance is unable to agree with any owners or parties in interest for or in respect to the compensation to be paid to such owners or parties in interest for such easements, privileges, right and authority as above set forth, then the Attorney of The Sanitary District of Chicago shall institute proceedings in such court as he may deem proper and acquire said easements, privileges, right and authority to construct, reconstruct, repair, maintain and operate the said intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago upon, under and through the pieces or parcels of land described in section 1 of this ordinance by virtue of the Eminent Domain law of the State of Illinois.

SECTION 6. This ordinance shall be in force and effect from and after its passage.

Mr. Littler moved that the ordinance be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

The following ordinance was transmitted with said report:

AN ORDINANCE

An Ordinance for Laying out and Establishing a Right of Way For and Providing for the Building of an Intercepting Sewer, Drain and Outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago.

Be it ordained by the Board of Trustees of The Sanitary District of Chicago.

SECTION 1. That, there be and is hereby laid out, located and established a right of way for an intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, together with all necessary appurtenances thereto, upon, under and through the following described real estate situated in the City of Chicago, County of Cook and State of Illinois, to-wit:

A strip of land sixty-six (66) feet in width across lot three (3) in Warren's Addition to Wildwood, the center line of said strip of land being the center line of Edbrooke avenue produced northward; also Edbrooke avenue from the south line of said lot three (3) to the south line of 127th street including all street and alley intersections; also a strip of land sixty-six (66) feet in width extending from said south line of 127th street to the center line of the Little Calumet river, the center line of said strip

of land being a line extending from the intersection of the center line of Edbrooke avenue with the south line of 127th street southwesterly parallel with the westerly line of Indiana avenue; all of said land being located in Section twenty-eight (28), township thirty-seven (37) north, range fourteen (14) east of the third principal meridian south of the Indian Boundary line, in the City of Chicago, County of Cook, State of Illinois.

SECTION 2. Attached hereto, and made a part of this ordinance is a plat or map entitled, "Ordinance Map for an Intercepting Sewer, Drain and Outlet, the same to be an Adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago" dated February 13, 1919, on which said plat or map the boundary lines of said right of way are indicated in red.

SECTION 3. That the making of the improvement above described is hereby provided for, and there shall be constructed, maintained and operated within the lines of said right of way a covered sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, together with all appurtenances thereto to be built either of brick, concrete or reinforced concrete.

SECTION 4. The Committee on Finance of the Board of Trustees of The Sanitary District of Chicago is hereby authorized and directed to acquire for and on behalf of The Sanitary District of Chicago, upon such terms as said Committee on Finance may deem just and reasonable, the perpetual and temporary easements, privileges, right and authority to construct, reconstruct, repair, maintain and operate the said intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago, upon, under and through the pieces or parcels of land described in Section 1 of this ordinance; and in the event that said Committee on Finance is unable to agree with any owners or parties in interest for or in respect to the compensation to be paid to any such owners or parties in interest for the said easements, privileges, right and authority as above set forth, then the Attorney of The Sanitary District of Chicago shall institute proceedings in such court as he may deem proper and acquire said easements, privileges, right and authority to construct, reconstruct, repair, maintain and operate the said intercepting sewer, drain and outlet, the same to be an adjunct of the Calumet-Sag Channel of The Sanitary District of Chicago upon, under and through the pieces or parcels of land described in Section 1 of this ordinance, by virtue of the Eminent Domain Law of the State of Illinois.

SECTION 6. This ordinance shall be in force and effect from and after its passage.

Mr. Littler moved that the ordinance be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, February 13, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Electrical Development herewith presents contracts for renewal with the Triner Scale & Mfg. Co., a corporation, 2714 West Twenty-first street, and with P. J. King, 1740 North Crawford avenue, wherein said parties agree to take and the Sanitary District agrees to furnish electrical energy for the

periods of time and upon the terms and conditions therein set forth, and said contracts have been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate the attached contracts which have heretofore been executed by said parties.

Respectfully submitted,

H. E. LITTLER,
Chairman.

MATT A. MUELLER,
WM. J. HEALEY,

Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawler, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, February 13, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

REINSTATEMENTS

Due to honorable discharge from the United States Army or Navy service

Engineering Deparment—

O. L. Eltinge, Assistant Engineer, $225.00 per mo.

Electrical Department—

Henry Lawson, Operator $145.00 per month.

George E. Long, Operator, $125.00 per month.

Edw. J. Schneider, Assistant Repairman, $130.00 per month.

INCREASES

Omitted from report of February 6.

Electrical Department—

R. Hardell, Engineer and Repairman, from $140.00 to $155.00 per mo.

Albert Stange, Operator, from $110.00 to $125.00 per mo.

Wm. D. Cotter, Operator, from $110.00 to $125.00 per mo.

J. McConkey, Lineman, from $150.00 to $165.00 per mo.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman,

JAS. H. LAWLEY,
H. E. LITTLER,
MATT A. MUELLER,

Committee on Employment.

Mr. Paullin moved that the report be approved, published and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from Mr. George D. Webb in regard to dispute over lake levels as affected by the Sanitary Canal and to road construction and public work.

Referred to the Committee on Engineering.

Payroll of The Sanitary District of Chicago for the Month of October, 1918.

THURSDAY, FEBRUARY 20, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.
Published by Authority of the Board of Trustees of the Sanitary District of Chicago.

President Sergel took the Chair and, the roll being called there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

REPORTS OF OFFICERS.

The Clerk presented the following communication from the Attorney:

February, 17, 1919

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I transmit herewith stenographic copy of the hearing held April 18, 1917 before the Committee on Waterways of the Lower House of the General Assembly, relative to house bills No. 661 and No. 662, pertaining to the development of water power by the Sanitary District at Brandons Road.

I would recommend that this copy be filed in the Clerk's office so as to be accessible for ready reference.

Respectfully submitted,

C. ARCH WILLIAMS,
Attorney.

Ordered published and filed.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance to which was referred bill for unpaid taxes for Lockport and DuPage townships in Will County for the year 1915, reports that a bill for an injunction to restrain the County Collector from collecting the said taxes was brought in the year 1916; that this case after being passed on in the lower court was passed on by the Supreme Court of Illinois and after considering the matter finds that the amount of taxes herein included, namely $51,611.49 is the amount due to the County Collector of Will County, in accordance with the decisions of the Supreme Court for the year 1915 and that in addition to this, there is due interest for each of the years 1916, 1917 and 1918, making the total amount due to the County Collector of Will County as shown by a bill prepared by the County Collector of Will County, hereto attached, to be $67,094.96.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chairman of the Committee of Finance of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to draw a warrant in the sum of $67,094.96 in favor of Benjamin Jones, County Collector of Will County, in payment of taxes and interest for the township of Lockport and DuPage in Will County for the year 1915.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February, 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance, to which was referred bill for unpaid taxes for Lockport and DuPage townships in Will County for the year 1916, reports that a bill for an injunction to restrain the County Collector from collecting the said taxes was brought in the year 1916; that this case after being passed on in the lower court was passed on by the Supreme Court of Illinois and after considering the matter finds that the amount of taxes herein included namely $60,712.20 is the amount due to the County Collector of Will County in accordance with the decisions of the Supreme Court for the year 1916 and that in addition to this there is due interest for each of the years 1917 and 1918 making the total amount due to the County Collector of Will County as shown by a bill prepared by the County Collector of Will County hereto attached to be $72,854.64.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chairman of the Committee of Finance of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw a warrant in the sum of $72,854.64 in favor of Benjamin Jones, County Collector of Will County, in payment of taxes and interest for the townships of Lockport and DuPage County for the year 1916.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy Lawley, Littler, Mueller, Nance, and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 20, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance, to which was referred bill for unpaid taxes for the year 1917 for Lockport and DuPage townships in Will County report, that the taxes for the years 1915, 1916 and 1917 for these townships was contested and that the Supreme Court passed on the liability of the Sanitary District for the taxes for the years 1915 and 1916. The bill hereto attached is in accordance with the decisions of the Supreme Court on the liability of the Sanitary District. Your Committee finds that there is due to the County Collector of Will County for taxes for the year 1917 for the townships of Lockport and DuPage, the sum of $62,639.87 plus interest addition in accordance with the bill made out by the County Collector of Will County hereto attached, making the total sum of $68,903.86.

Your Committee further finds that the Circuit Court of Will County in the proceeding that was brought to test the validity of the assessment of taxes for the year 1917 has entered a decree finding the amount of taxes due in accordance with the decisions of the Supreme Court on the tax appeal for the years 1915 and 1916 to be such sum above shown.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Sanitary District and the Clerk be, and they are hereby authorized and directed to draw a warrant in the sum of $68,903.86 in favor of Benjamin Jones, County Collector of Will County, in payment of taxes and interest for the townships of Lockport and DuPage for the year 1917.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Engineering.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, February 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that in order to improve the efficiency of the electric service of the Sanitary District now supplied from the West 12th Street substation and to supply electricity for power purposes for the operation of the Evanston Sewage Disposal station and Calumet Sewage Pumping Station, it will be necessary to install new underground transmission cables and also it will be necessary to obtain certain additional cables to be held in stock to be used as needed. He further says that the price of copper at the present time is lower than it has been for several months and that in his opinion a better price can be obtained at the present time than will be the case later, when general business revives, and he requests that he be granted authority to prepare plans and specifications for furnishing said cable and the necessary cable ducts.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to prepare plans and specifications for the work above specified and when said plans and specifications are prepared that the Electrical Engineer present the same together with a report containing a statement of the time for the completion of such work and a tabulated estimate of the cost thereof, to the Committee on Engineering for its approval.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
JAS. H. LAWLEY,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from Samuel K. Markman, Attorney for the City of West Hammond, Ill., in which he states that at the regular meeting of the City Council of said city, held on January 23, 1919, he was directed to request the Board of Trustees of the Sanitary District to supply electric current to said city for lighting and to operate the sewage pumping station.

Referred to the Committee on Electrical Development.

The Clerk presented a communication from Daniel Sullivan, Commissioner of Highways, Township of Palos, Cook County, Ill., calling attention to an alleged dangerous condition of the floors of bridges constructed by the Sanitary District in said township, and requesting that they be repaired.

Mr. Littler moved that the Chief Engineer be directed to report on the condition of the bridges referred to, that the Attorney render an opinion on the liability of the Sanitary District to make said repairs, and that the matter be referred to the Committee on Engineering.

The motion prevailed.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Nance presented the following order:

CHICAGO, February 20, 1919.

WHEREAS, The Sanitary District of Chicago, in the operation of its various pumping stations, power houses, substations and automobiles requires large quantities of lubricating oils and gasoline yearly, the amounts expended for such oils and gasoline for the year 1918 having reached approximately the following figures: Oil, $7,577.86 and Gasoline, $7,928.49, and

WHEREAS, These oils and gasoline have been purchased on the open market at prevailing market prices, as the requirements of the District demanded, and

WHEREAS, it is probable that a considerable economy could be effected in such purchases by the District entering into a contract with the lowest bidder if bids were sought for the supplying of such oils and gasoline, therefore be it

Ordered, That the Clerk be, and he is hereby authorized and directed to prepare specifications for the purchase of lubricating oils and gasoline to supply the needs of the District for the remainder of the year 1919, to be delivered as required, and that he advertise for bids in accordance with the specifications so prepared.

Mr. Nance moved that the order be passed.

Mr. Lawley moved, as a substitute, that the order be referred to the Committee on Finance.

On roll call the substitute motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler Mueller, and Paullin—Eight.

Nays—Mr. Nance—One.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillen,
Clerk.

GEORGE M. REYNOLDS,
Treasurer.
By J. R. WASHBURN,
Assistant Treasurer.

Chicago, February 19, 1919.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that in accordance with the terms of the contract dated September 7, 1916 (page 1146 of the Proceedings) between the Nash-Dowdle Company and the Sanitary District for the construction of the Evanston Intercepting Sewer Contract No. 1, the Sanitary District has retained from time to time as a reserve percentage 12½% of the sums due said contractor which on February 15, 1919, amounted to $79,586.04, which sum, by the terms of said contract was not to be paid said contractor until thirty (30) days after the completion of the entire work.

Your Committee further reports that said contractor has requested that it be paid from said reserve percentage the sum of $70,000.00 for the reason that the work under said contract has been practically completed and it also requests said payment to be made at this time in order to obviate the necessity of paying an additional premium on its bond and further requests that said bond be cancelled.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that he has thoroughly considered the condition of the work with the Engineers in the field in direct charge of the same; that said work is practically completed as stated by said contractor and that the interests of the Sanitary District will be completely safeguarded if the sum of $25,000.00 is retained by the Sanitary District as security for the full completion of said work and the bond given by said contractor for the faithful performance of said work is cancelled.

Your Committee having considered the matter is of the opinion that the request of said contractor should be granted in part and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to pay upon the voucher of the Chief Engineer to Nash-Dowdle Company, the sum of $54,586.04 out of the reserve percentage retained by the Sanitary District under the terms of said contract provided the surety on the bond of said contractor consents in writing that said payment is made, and it is further

Ordered, That the sum of $25,000.00 be retained by the Sanitary District from said reserve percentage as security for the faithful performance by said contractor of all the terms and conditions of said contract in lieu of said bond, provided, however, that the Nash-Dowdle Company furnish the Sanitary District with an affidavit by its proper officer that all materialmen, mechanics and workmen employed by said Company in performance of work under said contract have been paid in full and provided further that said Nash-Dowdle Company consents in writing to the retention by the Sanitary District of said sum of $25,000.00 in lieu of and in place of said bond, and it is further

Ordered, That when said affidavit and the consents in writing above referred to are furnished the Sanitary District by said Nash-Dowdle Company that then the bond heretofore furnished by said Company for the faithful performance of said work under said contract shall be considered cancelled and the Clerk of the District is hereby instructed to notify the surety on said bond to that effect.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT. A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—Mr. Sergel—One.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finace begs to report that the semi-annual interest on the twentieth and twenty-eighth issues of bonds of The Sanitary

District of Chicago, amounting to the sum of twenty-one thousand, eight hundred ($21,800.00) dollars falls due March 1, 1919, as follows:

$440,000.00 of the twentieth issue at four per cent	$ 8,800.00
$650,000.00 of the twenty-eighth issue at four per cent	13,000.00
	$21,800.00

Your Committee also reports that bonds of the sixteenth issue and semi-annual interest on the sixteenth issue of bonds of the Sanitary District of Chicago amounting to the sum of one hundred and twenty-five thousand, one hundred and twenty ($125,120.00) dollars falls due March 15, 1919, as follows:

Principal of 112 bonds numbered 26323 to 26434, both inclusive, of the sixteenth issue	$112,000.00
Six months interest on $656,000.00 of the sixteenth issue at four per cent	13,120.00
	$125,120.00

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, instructed to draw a warrant, payable to the order of the Treasurer of The Sanitary District of Chicago for the sum of one hundred and forty-six thousand, nine hundred twenty ($146,920.00) dollars, to pay the semi-annual interest due March 1, 1919, and the principal and semi-annual interest due March 15, 1919, on bonds of The Sanitary District of Chicago as follows:

Six months' interest on $440,000.00 of the twentieth issue at four per cent, due March 1, 1919	$ 8,800.00
Six months' interest on $650,000.00 of the twenty-eighth issue at four per cent, due March 1, 1919	13,000.00
The principal of 112 bonds numbered 26323 to 26434 both inclusive of the sixteenth issue, due March 15, 1919	112,000.00
Six months' interest on $656,000.00 of the sixteenth issue at four per cent, due March 15, 1919	13,120.00
Total bonds and interest	$146,920.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT. A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance herewith transmits to the Board the following grants of easements:

(a) From William B Greene and Anna Greene, his wife.

(b) From Anna Greene, widow, William B. Greene and Anna Greene, his wife, Franklin Greene and Emma D. Smith and John H. Smith, her husband.

(c) From Emma D. Smith and

John H. Smith her husband.
whereby said grantors, for the nominal consideration of $1.00 each grant to The Sanitary District of Chicago a perpetual easement to construct, reconstruct, maintain and operate an intercepting sewer, with appurtenances thereto, in the Desplaines River District, in, under and through certain real estate owned by said grantors. Said grants of easement permit the Sanitary District to transport material, equipment, excavated soil and debris over and across said property. The Sanitary District agrees to provide certain connections in said sewer for drainage purposes, subject to the approval of the Chief Engineer, otherwise the grants of easement are in the usual form in use by the Sanitary District in such cases.

Your Committee further reports that it has examined said grants of easement which have been approved by the Chief Engineer and Attorney, and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago and the Clerk, be, and they are hereby authorized and directed to execute in duplicate said forms of easement which are hereto attached, same having been duly executed by said grantors.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
WILLIS O. NANCE,
MATT. A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, February 27, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of February payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

General Payroll Last Half of February, 1919.

John McGillen, Clerk (general payroll)		$ 26,951.54

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance (*except as to voucher of the Commonwealth Edison Company, for electrical energy as per contract, $10,238.33, on which Mr. Nance voted "nay"*) and Paullin—Seven (on all vouchers, and eight on all vouchers not excepted).

Nays—None (*except as above stated*).

Passed and not voting—Mr. Sergel—One.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on November 14, 1915 (page 1476 of the Proceedings) James O. Heyworth entered into a contract with the Sanitary District for the excavation and collateral work on contract section 13 of the Calumet-Sag Channel which contract, was on December 2, 1915 (page 1741 of the Proceedings) with the consent of the Sanitary District and the surety on the bond of said James O Heyworth assigned to A. Guthrie & Co. Inc.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that the work of excavating and constructing said section 13 was delayed by war conditions and also because the Sanitary District was unable for a long time after said contract was awarded to come to an agreement with the various railroads for the construction of bridges across the Calumet-Sag Channel so that said contractor could not proceed with its work in the manner it had planned. Because of said delays this section cannot be fully completed before the end of 1920 unless some arrangements can be made with said contractor to complete said work in a different and more expeditious manner.

The Chief Engineer further states that there remains to be excavated between the right of way of said railroads and the east end of section 12 of said Calumet-Sag Channel about 64,000 cubic yards of glacial drift and rock, a large portion of which will be needed to backfill behind the channel walls east of the right of way of said railroads; that it is entirely feasible to place a plant west of the right of way of said railroads, excavate the material in said strip and store the same upon the spoil area and then, after the channel walls have been completed to transport this material by cars underneath the railroad bridges and place said material back of the walls.

He further states that by the terms of said contract, said contractor has the right to perform said work by the method it is now using and if this method is changed the contractor will be put to a large extra expense in installing an additional plant for the excavation work and placing concrete and backfilling, but by changing the work in the manner above suggested, there will be at least a years time saved to the public in the opening of the Calumet-Sag Channel. He further states that said contractor has offered to do all the necessary work by the new method suggested at an additional cost to the Sanitary District of fifty-five cents per cubic yard for excavating the material in said strip of land lying west of the right of way of said railroads and backfilling which he estimates will total the sum of about $35,000.00 and he strongly recommends that he be authorized to accept said offer of A. Guthrie & Co. Inc. to perform said work on the basis specified as an extra under the extra work clause

of its contract for the excavation and collateral work on section 13 of the Calumet-Sag Channel.

Your Committee, having considered the matter, is of the opinion that in view of the fact, the delay in the completion of the Calumet-Sag Channel is costing the taxpayers of the Sanitary District the interest on the money already invested in said work which is at least $1,000.00 per day, it is advisable that said work should be done in the manner suggested by the Chief Engineer and recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to accept the offer of A. Guthrie & Co. Inc. to perform the work above specified by the method suggested by the Chief Engineer at the price stated as an extra under the extra work clause of its contract for the excavation and collateral work on section 13 of the Calumet-Sag Channel.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Clark, Healy, Lawley, Littler, Mueller and Paullin—Six.

Nays—Messrs. Sergel and Nance—Two.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it will be necessary, during the ensuing year, to repair and renew the floors and to paint the bridges across the North Shore Channel, in some cases to reinforce the foundation of said bridges and to maintain and repair other miscellaneous structures along said channel.

Your Committee further reports that it is advised that said work will be done from time to time by purchasing in the open market, small quantities of lumber, paint, crushed stone or gravel, cement and other material and supplies in no instance, at a cost to exceed $500.00 and the labor in performing said work will be furnished by the employees of the Sanitary District or by the employment of labor on a per diem basis, at a total estimated cost of $15,000.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to perform the work above specified on the basis stated, provided the cost of the same shall not exceed the sum of $15,000.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it will be necessary, during the ensuing year, to repair and renew the floors and to paint the bridges across the Main Channel, in some cases to reinforce the foundations of said bridges and to maintain and repair other miscellaneous structures along said channel.

Your Committee further reports that it is advised that said work will be done from time to time by purchasing in the open market, small quantities of lumber, paint, crushed stone or gravel, cement and other materials and supplies, in no instance, at a cost to exceed $500.00 and the labor in performing said work will be furnished by the employees of the Sanitary District or by the employment of labor on a per diem basis, at a total estimated cost of $20,000.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to perform the work above specified on the basis stated, provided the cost of the same shall not exceed the sum of $20,000.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it will be necessary, during the ensuing year, to repair the roadway approaches to various highway bridges across the Calumet-Sag Channel.

Your Committee further reports that it is advised that said work will be done from time to time by purchasing in the open market, small quantities of crushed stone or gravel at a cost in no instance in excess of $500.00, and the necessary labor will be performed by the employees of the Sanitary District or by other parties on a per diem basis, at a total estimated cost for labor and material of $3,000.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to perform the work above specified on the basis stated, provided the cost of the same shall not exceed the sum of $3,000.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it will be necessary to overhaul and repair two of the large scows now used by the Sanitary District in repair work on the walls of the main channel. He further states that the amount of work to be done on said scows cannot be ascertained until said scows are placed in dry dock or hauled upon the banks of some ship yard equipped to do marine repair work. He further states that it will be difficult to obtain bids for doing said work except on a force account basis and he requests that he may prepare specifications for doing said work on the basis of paying the actual cost of the labor and material entering into said work.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to prepare specifications to do the work above specified and when said specifications are prepared that the Chief Engineer present same to your Committee on Engineering for its approval.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on November 14, 1918 (page 1243 of the Proceedings) entered into a contract with the Nash-Dowdle Company for furnishing, delivering and erecting the building, pumping machinery, electric equipment, switch board, conduit and wiring of the Evanston Sewage Pumping Station as specified under Divisions A, B, C and D of said contract.

Your committee further reports that it has received a communication from the Chief Engineer in which he states that the specifications under Division B provide that "the pumps will be built at New Orleans, La., in the shops of the Dibert, Bancroft & Ross Co.", and the contractor requests that the specifications be changed so as to read "the pumps will built at Aurora, Ill., in the shops of the American Well Works",

and the Chief Engineer states that he does not object to said change in the specifications.

Your Committee further reports that the Attorney is of the opinion that from an examination of the correspondence heretofore had between said contractor and the Dibert, Bancroft & Ross Co. said Nash-Dowdle Company is not obligated in any way to award said contract to the said Dibert, Bancroft & Ross Co. and your Committee is of the opinion that the request of said contractor to make said change in the specifications be granted, and therefore recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to change said contract between The Sanitary District of Chicago and the Nash-Dowdle Company in the particular above specified, provided said contractor and the surety on its bond consent in writing to such change.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that the work of excavation and construction of section 1 of the Calumet-Sag Channel is so far advanced that the connection between said channel and the Main Channel of the Sanitary District, will be made within the next month, thereby admitting the water from the Main Channel into the west 12 miles of the Calumet-Sag Channel. He further states that when said connection is made, it will be necessary to connect certain farm drainage ditches with the Calumet-Sag Channel, to remove two flumes, construct about 800 cubic yards of rip-rapping, and perform certain minor work at an estimated cost of $15,000.00 to be expended for the necessary teams and labor, on a per diem basis.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to perform the work above specified on the basis stated, provided the cost of the same shall not exceed the sum of $15,000.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that it is necessary to construct a scow to be used in connection with dredging the forebay at the Power House at Lockport, at an estimated cost of $650.00 for lumber and other material, and $550.00 for labor.

He further states that the work of constructing said scow will be done by the regular employees of the Sanitary District, and the necessary lumber and material which is of several grades will be purchased in the open market, from time to time, as needed for the lowest prices obtainable.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby authorized and directed to have the work above specified performed on the basis stated, provided the total cost of the same shall not exceed the sum of $1,200.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on December 31, 1918 (page 1606 of the Proceedings) ratified the action of the Chief Engineer in employing Modjeski and Angier to inspect the structural steel for the Calumet Sewage Pumping Station at a cost of not to exceed $200.

Your Committee further reports that said sum has not been expended and therefore recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized to pay Modjeski and Angier the sum of not to exceed $200.00 for performing the work above specified.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on August 1, 1918, authorized the Chief

Engineer to build four pressed brick houses in which to install the machinery for operating of the gates of the Controlling Works on the east end of the Calumet-Sag Channel, at a cost of not to exceed the sum of $5,000.00.

Your Committee further reports that it received a communication from the Chief Engineer in which he states that he has expended the sum of $4,000.00 from said appropriation and that it will be necessary in the ensuing year, to expend the sum of $500.00 to complete said work and he requests that he may be authorized to perform the balance of said work at a cost of not to exceed $500.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to complete the construction of said machinery houses at a cost of not to exceed $500.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it is necessary to purchase piles to be used for temporary trestles for carrying certain railroad tacks of the Chicago, Rock Island, & Pacific Railway Company in connection with the new bridges to be constructed by the Sanitary District across the Calumet-Sag Channel in the City of Blue Island, at an estimated cost of $500.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to purchase in the open market for the best price obtainable, the piles above specified, provided the cost of the same shall not exceed the sum of $500.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board of February 20, 1919 (page 196 of the Proceedings) authorized the Electrical Engineer to prepare specifications for furnishing and delivering lead covered cable to be used in improving the efficiency of the electric service of the

Sanitary District now supplied from the West 12th street substation and for other purposes.

Your Committee further reports that the Electrical Engineer has prepared specifications for the purchase of such cable, and has presented the same to your Committee for its approval.

Your Committee further reports that it has considered said specifications prepared by the Electrical Engineer, has approved same, and, therefore, recommends the passage of the following order:

Ordered, That the specifications prepared by the Electrical Engineer for furnishing and delivering lead covered cable be, and the same are hereby approved, and it is further

Ordered, That the Clerk be, and he is hereby authorized and directed to advertise for bids for furnishing and delivering said cable in accordance with the specifications so prepared by the Electrical Engineer.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on April 25, 1918 (page 277 of the Proceedings) authorized the Chief Engineer to purchase in the open market for the lowest price obtainable, certain bridge stringers, cap ties and other trestle timbers for the approaches of bridges to be constructed by the Sanitary District for certain railroad companies across the Calumet-Sag Channel provided the cost of the same should not exceed the sum of $4,000.00 which sum was afterwards, on September 5, 1918 (page 1052 of the Proceedings) increased to $6,000.00.

Your Committee further reports that it is advised that under the terms of the contract, dated November 2, 1916 (page 1442 of the Proceedings) between the Sanitary District and the railroad companies, the Baltimore & Ohio Chicago Terminal R. R. Co. agreed to furnish said material for said bridges but the Sanitary District reserved the right to furnish such material at less cost, which can be done by purchasing second hand material.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that he has expended during the year 1918, the sum of $2,500.00 from said appropriation and he requests that he may be authorized to expend from time to time during the ensuing year as the occasion arises, the sum of $3,000.00 in the purchase of the various kinds of material, provided no purchase at any one time shall be in excess of $500.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized to purchase in the open market, for the lowest price obtainable in the manner specified, the second hand material above described,

provided the total cost of the same shall not exceed the sum of $3,000.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER.
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

New Appointments—Provided for in 1919 Budget.

Electrical Department —

Walter E. Jones, Meter Inspector, $140.00 monthly.

Sam Fleik, Cement Finisher, temporary, 57½c per hour.

John Deitch, Cement Finisher, temporary, 57½c per hour.

Engineering Department—

A. M. Finkel, Bridge Tracer, $150.00 monthly.

Increases—Provided for in 1919 Budget.

Electrical Department—

J. Rodighiero, from Laborer Foreman at 60c per hour, to General Utility Man at Power House, 70c per hour.

Reinstatements Due to honorable discharge from the U. S. Army or Navy Service.

Electrical Department—

R. L. Walsh, Electrician, $155.00 monthly.

H. C. Peterson, Assistant Repairman, $130.00 monthly.

Engineering Department—

Murray Blanchard, Assistant Engineer, $250.00 monthly.

E. R. Richards, Draftsman, $150.00 monthly.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
H. E. LITTLER.
MATT. A. MUELLER,
JAS. H. LAWLEY,
WALLACE G. CLARK,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Illinois Valley.

Mr. Mueller presented the following report from the Committee on Illinois Valley:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Illinois Valley reports that on January 14, 1905, Henry J. Kiner brought suit for $7,000.00 against The Sanitary District of Chicago in the Circuit Court of La Salle County for permanent damages to 102 acres of land situated in said County about two miles east of the City of Marseilles by reason of overflow caused by the turning of water

from Lake Michigan into the Main Channel and thence into the Des Plaines and Illinois Rivers.

Your Committee further reports that it has been negotiating with Mr. Andrew J. O'Conor, Attorney for the said plaintiff, and with the said plaintiff, and has reached an agreement with them that the said case might be settled for the sum of $1,000.00.

Your Committee having considered the matter, is of the opinion that the above is a fair and reasonable settlement, and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be, and they are hereby authorized and directed to draw a warrant in the sum of $1,000.00 payable to Henry J. Kiner, and deliver the same to him upon the execution and delivery by him of a release satisfactory to the Attorney of the Sanitary District releasing The Sanitary District of Chicago from all past, present and future damages to the land described in the declaration filed in said suit, and upon the dismissal of said suit, without costs, including Attorney's fees.

Respectfully submitted,

MATT. A. MUELLER,
Chairman.
WILLIS O. NANCE,
H. E. LITTLER.
GEORGE W. PAULLIN,
Committee on Illinois Valley.

Mr. Mueller moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Mueller presented the following report from the Committee on Illinois Valley:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Illinois Valley reports that on January 14, 1905, Norman McFarran brought suit for $4,000.00 against The Sanitary District of Chicago in the Circuit Court of La Salle County, for permanent damages to 53.83 acres of land situated in said County opposite the City of La Salle, by reason of overflow caused by the turning of water from Lake Michigan into the Main Channel, and thence into the Des Plaines and Illinois Rivers.

Your Committee further reports that it has been negotiating with Mr. Andrew J. O'Conor, Attorney for said plaintiff, and has reached an agreement with him that said case might be settled for the sum of $1,383.00.

Your Committee having considered the matter is of the opinion that the above is a fair and reasonable settlement, and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be, and they are hereby authorized and directed to draw a warrant in the sum of $1,383.00 payable to Norman McFarran, and deliver the same to him upon the execution and delivery by him of a release satisfactory to the Attorney of the Sanitary District releasing The Sanitary District of Chicago from all past, present and future damages to the land described in the declaration filed in said suit, and upon the dismissal of said

suit without costs, including attorney's fees.

Respectfully submitted,

MATT. A. MUELLER,
Chairman.
WILLIS O. NANCE,
H. E. LITTLER.
GEORGE W. PAULLIN,
Committee on Illinois Valley.

Mr. Mueller moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Mueller presented the following report from the Committee on Illinois Valley:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Illinois Valley reports that on January 14, 1905, Emma C. McCaleb brought suit for $10,000.00 against The Sanitary District of Chicago in the Circuit Court of La Salle County, for permanent damages to eighty acres of land situated in said County opposite the City of Peru, by reason of overflow caused by the turning of water from Lake Michigan into the Main Channel and thence into the Illinois and Des Plaines Rivers.

Your Committee further reports that said plaintiff, through her attorney, has offered to settle said suit for the sum of $1,200.00, which, in the opinion of Committee, is a fair and reasonable settlement.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be and they are hereby, authorized and directed to draw a warrant in the sum of $1,200.00 payable to Emma C. McCaleb, and deliver the same to her upon the execution and delivery by her, of a release satisfactory to the Attorney of the Sanitary District, releasing The Sanitary District of Chicago, from all past, present and future damages to the land described in the declaration filed in said suit, and upon the dismissal of said suit, without costs, including attorney's fees.

Respectfully submitted,

MATT. A. MUELLER,
Chairman.
WILLIS O. NANCE,
H. E. LITTLER.
GEORGE W. PAULLIN,
Committee on Illinois Valley.

Mr. Mueller moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Mueller presented the following report from the Committee on Illinois Valley:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Illinois Valley reports that on January 14, 1905, Adele Ellingen, Administratrix of the estate of Peter Ellingen brought suit for $3,000.00 against The Sanitary District of Chicago in the Circuit Court of La Salle County for permanent damages to 22.9 acres of land situated in said County opposite the City of La

Salle, by reason of overflow caused by the turning of water from Lake Michigan into the Main Channel and thence into the Des Plaines and Illinois Rivers.

Your Committee further reports that Adele Ellingen the plaintiff, since bringing the said suit has died and that the sole reversioner and party in interest in the said suit under the last Will and Testament of Peter Ellingen, deceased, is William J. Parks.

Your Committee further reports that it has been negotiating with Andrew J. O'Conor, Attorney for the party in interest in said suit, and has reached an agreement with him that said case might be settled for $687.00, which, in the opinion of your Committee is a fair and reasonable settlement. Your Committee therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago and the Clerk, be, and they are hereby authorized and directed to draw a warrant in the sum of $687.00 payable to Duncan & O'Conor, Attorneys for William J. Parks, and deliver the same to them upon the execution and delivery by William J. Parks of a release, satisfactory to the Attorney for The Sanitary District, releasing The Sanitary District of Chicago from all past, present and future damages to the land described in the declaration filed in said suit and upon the dismissal of said suit without costs, including Attorneys fees.

Respectfully submitted,

MATT. A. MUELLER,
Chairman.

H. E. LITTLER.
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Illinois Valley.

Mr. Mueller moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Mueller presented the following report from the Committee on Illinois Valley:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Illinois Valley reports that on January 14, 1905, Catherine S. Gilbert brought suit for $4,000.00 against The Sanitary District of Chicago in the Circuit Court of La Salle County, for permanent damages to forty acres of land situated in said County about one mile above the City of La Salle, by reason of overflow caused by the turning of water from Lake Michigan into the Main Channel and thence into the Des Plaines and Illinois Rivers.

Your Committee further reports that it has been negotiating with Mr. Andrew J. O'Conor, Attorney for the said plaintiff, and with the said plaintiff, who have appeared before this Committee, and that it has reached an agreement with them that said case might be settled for the sum of $1,600.00.

Your Committee having considered the matter, is of the opinion that the above is a fair and reasonable settlement and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be, and they

are hereby, authorized and directed to draw a warrant in the sum of $1,600.00, payable to Catherine S. Gilbert, and deliver same to her upon the execution and delivery by her of a release satisfactory to the Attorney of The Sanitary District releasing The Sanitary District of Chicago, from all past, present and future damages to the land described in the declaration filed in said suit, and upon the dismissal of said suit without costs, including attorney's fees.

Respectfully submitted,

Mr. Mueller moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Mueller presented the following report from the Committee on Illinois Valley:

CHICAGO, February 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Illinois Valley reports that on January 16, 1905, Jane Skelly brought suit for $15,000.00 against The Sanitary District of Chicago in the Circuit Court of La Salle County, for permanent damages to about 106 acres of land situated in said County opposite the City of La Salle, by reason of overflow caused by the turning of water from Lake Michigan into the Main Channel and thence into the Des Plaines and Illinois Rivers.

Your Committee further reports that it has been negotiating with Mr. Andrew J. O'Conor, Attorney for the said plaintiff, and with the said plaintiff, and has reached an agreement with them that the said case might be settled for $3,701.95.

Your Committee having considered the matter is of the opinion that the above is a fair and reasonable settlement and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago and the Clerk, be, and they are hereby, authorized and directed to draw a warrant in the sum of $3,701.95 payable to Jane E. Skelly, and deliver the same to her upon the execution and delivery by her of a release satisfactory to the Attorney of The Sanitary District, releasing The Sanitary District from all past, present and future damages to the land described in the declaration filed in said suit, and upon the dismissal of said suit without costs, including attorney's fees.

Respectfully submitted.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, MARCH 20, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Absent—Mr. Clark—One.

BIDS.

The Clerk opened and read the bids received for 5,000 and 12,000-volt multiple conductor cable, as shown in the schedule appearing on page 262 of the Proceedings.

Mr. Lawley moved that the bids be referred to the Electrical Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the proceedings of the regular meetings of February 27, March 6 and 13, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The President presented the following message:

CHICAGO, March 20, 1919.

To the Honorable, the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I return without my approval the order passed by the Board of Trustees of The Sanitary District of Chicago on February 27, 1919, by which A. Guthrie & Co., Inc., contractors with the Sanitary District for the construction of Sections 13 and 14 of the Calumet-Sag channel, are authorized to change the method of doing the work on Section 13 at an additional expense to the Sanitary District of $35,000, under the extra work clause of the contract.

This contract was entered into near the end of 1915, and was to be completed by January 1, 1918, thus providing two working seasons. The failure to perform all the work by the specified time was due undoubtedly to complications concerning the railroad bridges and to war conditions. Section 14, however, had no railroad bridges and war conditions did not begin to have material effect until the men under the first draft began to assemble in September, 1917. By August, 1917, the work on Section 14 was nearly finished, for according to the engineer's report 86.7 per cent had been done. At the same time 19.5 per cent of Section 13 had been performed. By the beginning of this year, 1919, 58.4 per cent of Section 13 had been accomplished and 99.8 per cent of Section 14. In other words, counting the two sections together, as they are combined in the contract, only about 21 per cent of the entire work remains to be done.

The contract price for excavating glacial drift is 28.4 cents per cubic yard, and 80 cents for rock. Altogether 1,274,729 cubic yards have been excavated, at an average price of about 43 cents. This order would now provide an additional price of 55 cents per cubic yard chiefly for rehandling 64,000 cubic yards remaining between the railroads and Section 12.

By the terms of the contract 40 per cent of the entire work was to be done the first year, and the remaining 60 per cent the second year. Although the contractor entered into a contract to do 60 per cent of the work in a single year, it is now stated that it will take two years to do 21 per cent, and it is proposed to pay $35,000 extra to have the work finished in one year! Such a payment would appear to be the equivalent of a gift.

If the opening date of the Calumet-Sag Canal could be advanced a year by the payment of this sum, and if that were the only possible way, I would be glad to accept the terms, for even the partial keeping of the sewage out of the lake would be cheap at the price. While the Calumet river in ordinary weather will no doubt reverse its flow, at least in part, flood times will find the sewage-saturated stream still discharging in Lake Michigan. Not until the Calumet intercepting sewer is finished and the pumping plant is built, and this will not be for nearly two years to come, will the Calumet-Sag canal be fully effective in its purpose of keeping the sewage out of the lake. Certainly it is our duty to expedite the work as much as possible.

In this case the most effective and the most equitable way to get Section 13 finished in a year is to compel the contractor to fulfill his contract. The completion of the work is already one year behind and, if accomplished this year, will be two years behind the contract

date. An allowance of two years' delay on account of adverse circumstances certainly seems ample. Bridge complications seem to be at an end. War conditions are rapidly ameliorating. Labor is becoming plentiful. The contractor certainly can perform the small remaining work within the year. If he can, he should. No bonus should be necessary to induce him to do his duty.

CHARLES H. SERGEL,
President The Sanitary District of Chicago.

Mr. Lawley moved that the vote by which the report was adopted and the order passed, at the regular meeting of February 27, 1919 (page 207 of the Proceedings), authorizing and directing the Chief Engineer to order A. Guthrie & Co., Inc., contractor for the excavation and collateral work on contract section 13 of the Calumet-Sag Channel, to perform certain work specified in said report under the extra work clause of said contract, be reconsidered.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—Mr. Carr—One.

Mr. Lawley moved that said report and order be referred to the Committee on Engineering for further report.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—Mr. Carr—One.

The Clerk presented his report of money received and deposited with the Treasurer during the month of February, 1919, which was ordered published and filed, as follows:

CHICAGO, March 13, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I beg to report the receipt of Seventy-nine Thousand, Five Hundred Twenty-nine and Thirty-six Hundredths ($79,529.36) Dollars, during the month of February, 1919, from the following sources:

The Stock Yards Industries (C. A. Alling, Chairman Stock Yards Committee), being part payment on account of our bill dated December 31, 1918	$ 6,613.13
The Standard Paint Company, being annual rental from April 1, 1918, to March 31, 1919, for two pipe lines used for condensing purposes	500.00
United States Crushed Stone Company, being payment of judgment note due February 1, 1919	333.33
The Crane Company, being amount of their credit memorandum for return of material	164.44
The Consolidation Company, being refund on carload of sand not received by The Sanitary District of Chicago	60.94
Chicago Steel Foundry Company, being amount received for return of defective casting	13.68
Wm. T. Lynch, Record Clerk, being amount received from sundry persons for personal telephone calls	7.20
The Peoples Gas Light & Coke Company, being semi-annual rental from February 1 to June 30, 1919, for land under lease dated February 1, 1916, along the Main Channel	2,738.00
Amount carried forward	$ 10,430.72

Amount brought forward		$ 10,430.72
Van Fleet Shops, being monthly rental for month of March, 1918, as per lease dated July 1, 1917		75.00
N. Cordano, being annual rental of land for pasturage purposes for the year 1918		20.00
Sundry Consumers, for electric power and light	$ 57,112.45	
South Park Commissioners, for power and light for the month of December, 1918	2,668.96	
West Chicago Park Commissioners—		
For power and light for months of November and December, 1918	$2,377.81	
Interest and depreciation for months of November and December, 1918	224.28

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Committee on Finance reports that it has duly considered the resolution referred to it by the Board on February 20, 1919 (page 197 of the Proceedings), which directed the preparation of specifications for the purchase of lubricating oils and gasoline to supply the needs of the Sanitary District for the remainder of the year 1919, and that said supplies should be advertised for.

Your Committee further reports that it is of the opinion that it is advisable that specifications for the purchase of said supplies be prepared by the Chief Engineer and Electrical Engineer of the Sanitary District, and when prepared transmitted to your Committee for its approval, and therefore recommends the passage of the following order:

Ordered, That the Chief Engineer and Electrical Engineer be and they are hereby authorized and directed to prepare specifications for the purchase of lubricating oils and gasoline required to supply the needs of the Sanitary District for the remainder of the year 1919, and when prepared to transmit the same to your Committee for its approval.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

WILLIS O. NANCE,
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was lost by the following vote:

Yeas—Messrs. Sergel, Healy, Mueller and Nance—Four.

Nays—Messrs. Carr, Lawley, Littler and Paullin—Four.

Mr. Lawley moved that the report and order be referred to the Committee on Finance.

The motion prevailed.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Committee on Finance herewith transmits warrant No. 46692 of Charles J. Forsberg, City Collector of the City of Chicago, for five installments of a special assessment for paving Ainslie street, on the right of way of the North Shore Channel levied against certain real estate of the Sani-

tary District therein described, situated in the City of Chicago, to-wit:

First installment	$ 534.53
Second installment	347.68
Third installment	347.68
Fourth installment	347.68
Fifth installment	347.68
	$1,925.25
Interest at 5% from September 24, 1918 to March 24, 1919...	38.14
Total	$1,963.39

Your Committee further reports that it has examined said bill, is of the opinion that same is correct and should be paid, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk be, and they are hereby, authorized and directed to draw a warrant in the sum of $1,963.39, payable to Charles J. Forsberg, City Collector of the City of Chicago, and deliver the same to him in full payment of said special assessment.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

WILLIS O. NANCE,
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—Mr. Carr—One.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Committee on Finance begs to report that the semi-annual interest on the eleventh, seventeenth and twenty-sixth issues of the bonds of The Sanitary District of Chicago, amounting to the sum of twenty-one thousand five hundred and sixty ($21,560) dollars, falls due April 1, 1919, as follows:

On $250,000 of the 11th issue at 4 per cent	$ 5,000.00
On $192,000 of the 17th issue at 4 per cent	3,840.00
On $636,000 of the 26th issue at 4 per cent	12,720.00

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby, authorized and directed to draw a warrant payable to the Treasurer of The Sanitary District of Chicago, for the sum of $21,560, to pay the semi-annual interest due April 1, 1919, on the eleventh, seventeenth and twenty-sixth issues of bonds of The Sanitary District of Chicago.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

WILLIS O. NANCE,
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Committee on Finance reports that on October 24, 1918, in accordance with the order of the Board, the Clerk of the Sanitary District issued warrant No. 97966 for $8.00 on the Treasurer of the Sanitary District, payable at the Continental and Commercial National Bank, to the order of Sweet, Wallach & Company, in payment for merchandise sold and delivered to said Sanitary District. Said company reports that said warrant was lost and that said bank was notified not to pay same. Said company now requests that a duplicate warrant for said amount be issued.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Clerk of The Sanitary District of Chicago be, and he is hereby, authorized and directed to issue a duplicate warrant in the sum of $8.00 payable to the order of Sweet, Wallach & Company and deliver the same to it in lieu of said lost warrant above specified when said company executes a bond to indemnify the Sanitary District against loss because of the issuance of said new warrant.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

WILLIS O. NANCE,
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 13, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of March payrolls, for payment on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

MATT. A. MUELLER,
GEO. W. PAULLIN.
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Engineering.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Commtitee on Engineering reports that it has received a communication from the Chief Engineer in which he states that the reinforcing steel to be used in the Evanston Sewage Pumping Station has been ordered, and that it will be necessary to test said material at the mill where it is rolled.

He further states that in order not to delay the work, he directed Modjeski and Angier to perform the inspection work at a cost of not to exceed $50.00, and requests that his action in the premises be ratified and confirmed.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the action of the Chief Engineer in employing Modjeski and Angier to test the material above specified, at a cost of not to exceed $50.00, be and the same is hereby ratified and confirmed.

Respectfully submitted,

H. E. LITTLER,
Vice Chairman.
JAS. H. LAWLEY,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering.

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Assistant Chief Engineer in which he states that it is necessary to remove the invert of approximately 272 feet of the Desplaines River Intercepting Sewer, Contract No. 1, on First avenue in Maywood, and rebuild the same to a grade two feet lower than originally constructed, and he requests that he may be authorized to order Nash Bros., the contractors for said intercepting sewer, to perform said work under the extra work clause of their contract at an estimated cost of $4,000.00.

Your Committee, having considered the matter, recommends the passage of the following order.

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to order Nash Bros. to perform the work above specified under the extra work clause of their contract for the construction of the Desplaines River Intercepting Sewer, Contract No. 1, provided the cost of the same shall not exceed the sum of $4,000.00.

Respectfully submitted,

H. E. LITTLER,
Vice Chairman.
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering.

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Assistant Chief Engineer in which he states that on November 2, 1916 (page 1443 of the Proceedings), the Sanitary District entered into an agreement with the Baltimore & Ohio, Chicago Terminal Railroad Company, the Grand Trunk Western Railway Company and Jacob M. Dickinson, receiver of the Chicago, Rock Island & Pacific Railway Company, by the terms of which certain filling, tracklaying and ballasting made necessary by the removal and relocation of certain tracks of said railroad companies at the crossing of said railroads and the Calumet-Sag Channel of the Sanitary District was to be done at the expense of the Sanitary District.

He further states that the Baltimore & Ohio, Chicago Terminal Railroad Company, which was designated to perform said work, has informed him that it has been unable to obtain the money to do said work and until it can obtain funds from the Sanitary District on bills rendered or from other sources, it will be unable to proceed.

He further states that during the winter 1917-1918 and the entire year of 1918, similar work has been performed by A. Guthrie & Co., Inc., under the extra work clause of its contract with the Sanitary District, for the excavation and construction of Section 13 of the Calumet-Sag Channel, under authority passed by the Board, November 8, 1917 (page 1491 of the Proceedings), because the railroad company was unable to obtain sufficient labor to do the work and had requested the Sanitary District to have the same done, and pay the cost of same directly to said contractor.

He further states that said contractor resumed work at the site in question during the present month, in excavating for the substructure of said company's bridge, which work necessitates the care and support of the existing tracks of said Baltimore & Ohio, Chicago Terminal Railroad Company, immediately adjoining the excavation, and unless the work is performed by said railroad or the Sanitary District, A. Guthrie & Co., Inc., must suspend work at said site and the completion of said channel will be delayed for the length of time that such work is suspended.

He further states that said work will cost less if performed for the Sanitary District than if done by the railroad company itself and recommends that he be authorized to direct A. Guthrie & Co., Inc., to perform said work under the extra work clause of its contract, for the excavation and collateral work on Section 13, of the Calumet-Sag Channel.

Your Committee having considered the matter, is of the opinion that said work should be done in the manner suggested by the Chief Engineer, and therefore recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to direct A. Guthrie & Co., Inc., to perform the work above specified under the extra work clause of its contract, for the excavation and collateral work on Section 13 of the Calumet-Sag

Channel, provided the cost of the same shall not exceed the sum of $10,000.00.

Respectfully submitted,

H. E. Littler,
Vice Chairman.

Jas. H. Lawley,
Matt. A. Mueller,
Patrick J. Carr,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering.

Chicago, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

Gentlemen—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that in order to make an exhaustive study of the proper method of caring for the sewage entering the North Branch of the Chicago River, it is necessary to install weirs at the outlets of sewers entering the river, to measure the flow of sewage.

Your Committee further reports that it is advised that said work will be done from time to time by purchasing in the open market small quantities of timber, bolts, nails, oakum and other material, in no instance at a cost to exceed $500.00 and the labor in performing said work will be furnished by the employees of the Sanitary District on a per diem basis at a total estimated cost of $3,500.00.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to perform the work above specified on the basis stated, provided the cost of the same shall not exceed the sum of $3,500.00.

Respectfully submitted,

H. E. Littler,
Vice Chairman.

Jas. H. Lawley,
Matt. A. Mueller,
Patrick J. Carr,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering.

Chicago, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

Gentlemen—Your Committee on Engineering reports that it has received a communication from the Acting Chief Engineer in which he states that the recent heavy rain has caused considerable damage to the following outfalls on the North Shore Channel:

A—The outfall northwest of the Church street bridge was entirely washed out.

B—The culvert under Church street, west of the bridge has also been washed out.

C—The outfall on the northwest side of Dempster street bridge has likewise been washed out, and the north end of the west bridge abutment has been undermined and a gully about 25 feet wide cut back into the west bank of the channel at said point.

D—Also some damage has been done to ditches at Browne avenue.

As there is urgent necessity for the replacement and repair of the outfalls, ditches and banks of said channel, he requests that he be authorized to expend a sum not to exceed $10,000.00 in making the necessary replacements and repairs.

Your Committee is advised that the work will be done by the purchase of the necessary material for the concrete, no purchase at any one time to exceed the sum of $500.00, and the labor will be furnished by the employees of the Sanitary District on a per diem basis.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to perform the work above specified, on the basis stated, provided the total cost of the same shall not exceed the sum of $10,000.00.

Respectfully submitted,
H. E. Littler,
Vice Chairman.
Matt. A. Mueller,
Jas. H. Lawley,
Patrick J. Carr,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering.

Chicago, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

Gentlemen—Your Committee on Engineering reports that the Board on February 27, 1919 (page 210 of the Proceedings), authorized the Chief Engineer to prepare specifications for the repair of two large scows now used by the Sanitary District in repair work on the walls of the Main Channel.

Your Committee further reports that the Chief Engineer has prepared specifications for doing the work above stated and has presented the same to your Committee for its approval.

Your Committee further reports that it has considered said specifications, approved the same, and therefore recommends the passage of the following order:

Ordered, That the specifications prepared by the Chief Engineer for the repair of the scows above specified be, and the same are hereby, approved, and it is further

Ordered, That the Clerk be, and he is hereby, authorized to advertise for bids for the repair of said scows in accordance with the specifications so prepared by the Chief Engineer.

Respectfully submitted,
H. E. Littler,
Vice Chairman.
Jas. H. Lawley,
Matt. A. Mueller,
Patrick J. Carr,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering.

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Acting Chief Engineer in which he states that the customary yearly work of repairing the walls of the Main Channel should again be proceeded with.

He further states that the repairs necessary during the ensuing year will be somewhat greater than heretofore, owing to the fact that the unprecedented flood which lately came down through said Main Channel has developed numerous new weak spots in the said walls, and the Acting Chief Engineer estimates the cost of said repairs at the sum of $50,000.00.

Your Committee is advised that said work should be done by the purchase of the necessary material, consisting of ingredients of concrete, lumber and miscellaneous hardware, no purchase at any one time to exceed the sum of $500.00, and that the necessary labor to perform said work will be furnished by the regular employees of the Sanitary District.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to perform the work above specified, provided the total cost of the same shall not exceed the sum of $50,000.00.

Respectfully submitted,
H. E. LITTLER,
Vice Chairman.
MATT. A. MUELLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering.

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Acting Chief Engineer in which he states that it is advisable to raise the east levee of the Desplaines river two feet for a distance of twelve hundred feet between Jackson street and the Atchison, Topeka & Santa Fe Railroad embankment in Joliet to prevent the flooding of said city during any period of very high water, and he estimates the cost at $5,000.00.

Your Committee is advised that it will be necessary to obtain stone and other material and a small quantity of timber in order to raise said levee. No purchase of material in excess of $500.00 will be made at any one time. The work may also require the hiring of teams, scows and tugs on a per diem basis, and the necessary labor will be performed by the regular employees of the Sanitary District.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to perform the work above specified on the basis stated, provided the total cost of the same shall not exceed the sum of $5,000.00.

Respectfully submitted,
H. E. LITTLER,
Vice Chairman.
JAS. H. LAWLEY,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering.

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Acting Chief Engineer in which he states that due to the extraordinary flood of water passing through the Desplaines River diversion a leak has developed in the northwest levee of the Desplaines River, built for the protection of adjacent and adjoining property owners at a point about 1,500 feet northwest of the Lyons-Summit Road bridge.

He further states that it is necessary to immediately repair said levee in order to prevent floods of adjoining land with consequent damages and to remove from the Desplaines River channel between Riverside and Willow Springs, brush, trees and other obstructions which may impede the flow of water through said river.

Your Committee further reports that it is advised that said repairs will be made by procuring the necessary materials in order to stop said leak by purchasing the same in the open market for a price which at no time will exceed the sum of $500.00, and the labor to perform said work will be done by the employees of the Sanitary District.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to perform the work above specified on the basis stated, provided the total cost of the same shall not exceed the sum of $5,000.00.

Respectfully submitted,

H. E. LITTLER,
Vice Chairman.
JAS. H. LAWLEY,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents contract with the Mahon Company, a corporation, 2120 S. Kedzie avenue, wherein said company agrees to take and the Sanitary District agrees to furnish 25 K. W. of electrical energy for power purposes for the time and upon the terms and conditions therein set forth which contract has been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk, be, and they are hereby, authorized and directed to execute in duplicate the attached contract, which has

heretofore been executed by said Mahon Company.

Respectfully submitted,

H. E. LITTLER,
Chairman.

MATT. A. MUELLER,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote.

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, March 20, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken.

NEW APPOINTMENT.

Provided for in 1919 Budget.

Engineering Department.

Ray C. Brown, Bridge Draftsman, $200.00 per month.

REINSTATEMENTS.

Due to Honorable Discharge from the U. S. Army or Navy Service.

Engineering Department.

N. J. Gothard, Assistant Chemist, $150.00 per month.

Louis E. Legner, Instrument Man, $150.00 per month.

J. J. O'Reilly, Rodman, $115.00 per month.

Thos. J. Mooney, Rodman, $115.00 per month.

P. J. Whalen, Rodman, $115.00 per month.

TRANSFER.

Electrical Department.

P. B. Simonton, transferred from position of Lineman at $165.00 per month, to position of Lineman Foreman at $190.00 per month. Temporary.

Respectfully submitted,

GEO. W. PAULLIN,
Chairman.

MATT. A. MUELLER,
H E. LITTLER,
JAS. H. LAWLEY,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Passed and not voting—Mr. Sergel—One.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Lawley called up the report and order adopted and passed on February 27, 1919 (page 210 of the Proceedings), in reference to a proposed change of manufacturers of the pumps to be furnished by Nash-Dowdle Company under the terms of its contract with the Sanitary District for furnishing, delivering and erecting the building, pumping machinery, electric equipment, switchboard, conduit and wiring of the Evanston Sewage Pumping Station, and moved that the vote by which said report was adopted and said order passed be reconsidered.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—Mr. Carr—One.

Mr. Lawley moved that said report and order be referred to the Committee on Engineering.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—Mr. Carr—One.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillon,
Clerk.

28.09 773
C43S

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, MARCH 27, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Absent—Messrs. Clark and Paullin—Two.

BIDS.

The Clerk opened and read the bids for printing the biennial report for 1916-1917 of The Sanitary District of Chicago to the Governor and to the two branches of the Legislature of the State of Illinois, as shown in the schedule appearing on page 286 of the Proceedings.

THE SANITARY DISTRICT OF CHICAGO.
PROPOSALS FOR PRINTING BIENNIAL REPORT FOR 1916-1917.
Bids Received March 27, 1919.

NAME	Address	Price for Printing, Binding and Delivering 500 Books of 172 Pages Each	For Extra Pages Price per Page	Remarks
John F. Higgins	Chicago	$3,000.00	$18.00	
F. J. Koch Co	Chicago	6,256.50	37.50	
The Fred. J. Ringley Co	Chicago	5,983.75	35.75	
Rogers & Hall Company	Chicago	3,415.00	4 pages, $ 47.50 8 pages, 85.00 16 pages, 160.00	Allow or add for pages more or less than 344.
Bentley, Murray & Company	Chicago	4,500.00	40.00	

RECESS.

Mr. Lawley moved that the Board take a recess for five minutes to allow the Committee on Finance to consider the bids received, at the expiration of which time the Board reconvened.

MINUTES.

Mr. Lawley moved that the minutes of the proceedings of the regular meeting of March 20, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF COMMITTEES.

Judiciary.

Mr. Healy presented the following report from the Committee on Judiciary.

CHICAGO, March 27, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Judiciary reports that it has under consideration the settlement of the case of Charles H. Richards and William Lundren, surviving partners of Halvorson, Richards & Company, for the use, etc., vs. the Sanitary District, Gen. No. 258659, now pending in the Circuit Court of Cook County.

This suit was begun December 21, 1904, to recover damages aggregating the sum of $125,000.00 which said firm claims arose from the failure of the Sanitary District to perform a certain contract between Angus, Gindele & Co. and the Sanitary District dated September 19, 1904, (page 2206 of the Proceedings) for the excavation of Section "E" of the Main channel, which contract was afterwards assigned with the consent of the Sanitary District to Halvorson Richards & Co.

Your Committee further reports that said plaintiffs have agreed to accept the sum of $2,258.64 in settlement of all their claim for damages in said suit, and the Attorney for the District is of the opinion that said offer should be accepted.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to draw a warrant in the sum of $2,258.64, payable to such persons as the Circuit Court of Cook County may determine may be entitled thereto, and deliver the same to them upon receipt of a release in due form executed by them, to be approved by the Attorney, releasing and discharging the Sanitary District from all claims and demands for damages involved in said suit, and also upon receipt of a stipulation signed by said persons and by their Attorneys of record in said suit to dismiss said suit without costs to the Sanitary District.

Respectfully submitted,

WM. J. HEALY,
Chairman.

PATRICK J. CARR,
H. E. LITTLER,
Committee on Judiciary.

Mr. Healy moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 27, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance, in accordance with Rule 46 of the Rules and Regulations of the Board,

herewith presents weekly reports made to your Committee by the Clerk of all purchases made by him for and on account of The Sanitary District of Chicago from December 30, 1918, to February 28, 1919, inclusive.

Your Committee further reports that it has examined said reports, found them to be correct, has approved same and recommends that they be accepted and placed on file.

Respectfully submitted,

JAMES H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and placed on file.

The motion prevailed.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 27, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports it has had under consideration the acquirement by The Sanitary District of Chicago of certain real estate, containing approximately 15,419.68 square feet, located on the east side of the Chicago river, near 16th street, Chicago, known as Tracts 163, 164, 165, 166 and 167, which is now owned by the Chicago, Rock Island and Pacific Railway and the New York Central Railroad Company, and which property is now involved in the condemnation proceeding now pending in the Circuit Court of Cook County, Illinois, known as Gen. No. 217030, instituted by the Sanitary District and to which suit said railroad companies are parties defendant.

Since the institution of said condemnation suit numerous attempts have been made to adjust and compromise the same so that the Sanitary District might acquire said real estate by the payment of a fair and reasonable price therefor, and thereby avoid the expense of a trial of the issues involved in said suit. During the year 1918 Wiliam A. Bond, a real estate expert of the highest standing, was employed by the Board to place a valuation on said real estate, and his report, which is herewith transmitted, fixed the value of said real estate at the sum of $4.75 per square foot, which valuation, after numerous conferences, has been finally accepted by said railroad companies as fair and reasonable, and is the basis of the settlement hereinafter outlined.

An opinion of the Chicago Title & Trust Company as to the title of said real estate shows that there are several trust deeds of record covering said real estate given to secure a number of bond issues. After conferences between the attorneys for the Sanitary District, officials of the Chicago Title & Trust Company and the attorneys for said railroads, the Chicago Title & Trust Company offered to issue a guaranty policy to the Sanitary District guaranteeing the title to said real estate in the Sanitary District, upon said railroads executing a quitclaim deed conveying said real estate to the Sanitary District, and upon said railroad companies executing and delivering a letter to the Chicago Title & Trust Company, wherein they agree to furnish to the Chicago Title & Trust Company releases of all outstanding trust deeds from the Trustees named therein, within one year from the date of said letter; and upon judgment being entered in said condemnation suit fixing the just compensation to be paid for said real estate at the sum of $73,243.48, calculated on the basis of a valuation of $4.75 per square foot.

Your Committee further reports that said railroad companies have agreed, if this proposed settlement is approved by the Sanitary District, to incorporate in said quitclaim deed a clause releasing and waiving all damages and all claims

for damages to the remaining property of the grantors, or either of them, adjoining or adjacent to said real estate so to be conveyed, that may be caused by reason of the taking of said real estate by the district, and by reason of any excavation by the Sanitary District in or upon the real estate aforesaid to be conveyed for the purpose of widening and deepening the South Branch of the Chicago river; provided that the Sanitary District will give to said railroads a letter assuring the latter that when they or either of them shall hereafter desire to construct a dock upon and along that portion of the property of said railroads contiguous to the Chicago river, and lying along the present easterly line of the real estate to be conveyed to the Sanitary District, then, so far as it has any jurisdiction over the subject matter, the Sanitary District will not at such time require the said railroad companies, or either of them, to build any other or more expensive type of dock than that described in the present dock specifications used by the Sanitary District, being the standard dock specifications for use along the South Branch of the Chicago river.

Your Committee further reports that the total expense of procuring the necessary opinions of title and said guaranty policy will be the sum of $810.00, which expense is to be borne by the Sanitary District as a part of this settlement.

Your Committee further reports that the proposed settlement has been approved by the Chief Engineer as to the engineering questions involved, and the attorney has recommended that said real estate be acquired on the basis of $4.75 per square foot, and he approves the method and procedure of settlement as stated.

Your Committee, after considering the entire subject matter, is of the opinion that it is advantageous to the Sanitary District to settle said condemnation suit and acquire said tracts of real estate for the consideration stated in the manner set forth, and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to draw a warrant in the sum of $73,243.48, payable to the Chicago Title & Trust Company, and deliver the same to said company, to be delivered by said company to the Chicago, Rock Island & Pacific Railway Company and the New York Central Railroad Company, the owners of said tracts of real estate, upon the delivery to the Sanitary District of a quitclaim deed from said railroad companies, conveying to the Sanitary District all right, title and interest which said railroad companies have in and to the real estate located on the east bank of the South Branch of the Chicago river near 16th street, and known as Tracts 163, 164, 165, 166 and 167, containing approximately 15,419.68 square feet, which deed shall contain a clause releasing and waiving all damages and all claims for damages to the remaining property of said railroad companies, or either of them, adjoining or adjacent to said real estate to be conveyed as aforesaid, that may be caused by reason of the taking of said property by the District, and by reason of any excavation by the Sanitary District in or upon the land to be conveyed to it for the purpose of widening and deepening the South Branch of the Chicago river; and, further, upon the Chicago Title & Trust Company furnishing and delivering to the Sanitary District its guaranty policy, guaranteeing the title to said tracts of land in fee simple in the Sanitary District; provided, that if for any reason said settlement is not consummated and said deed and guaranty policy are not delivered as aforesaid within thirty days from the date of delivery of said warrant to the Chicago Title & Trust Company, then said warrant, after being properly en-

dorsed, shall be returned by the Chicago Title & Trust Company to the Sanitary District; and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District, and the Clerk, be, and they are hereby, authorized and directed when said settlement is fully consummated to draw a warrant in the sum of $810.00, payable to the Chicago Title & Trust Company, and deliver the same to said company in full payment of its charges for furnishing and delivering the necessary opinions of title and guaranty policy above specified; and it is further

Ordered, That the Chief Engineer of the Sanitary District be, and he is hereby, authorized to sign and deliver to said railroad companies on behalf of the Sanitary District a letter agreeing that when the said railroad companies, or either of them, desire to construct a dock upon and along that portion of the property of said railroad companies contiguous to the Chicago river and lying along the present easterly line of the property to be conveyed as aforesaid to the Sanitary District, then, so far as the Sanitary District has any jurisdiction in connection with the subject matter, it will not at such time require the railroad companies, or either of them, to build any other or more expensive type of dock than that described in the present dock specifications used by the Sanitary District, being the standard dock specifications for use in the South Branch of the Chicago river; and it is further

Ordered, That the Attorney of the District be, and he is hereby, given leave to waive a jury in said condemnation suit and submit the same to the Court without a jury.

Respectfully submitted,

JAMES H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller and Nance—Six.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 27, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of March payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

General Payroll for Last Half of March, 1919.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
WILLIS O. NANCE.
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, March 27, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that Section 1 of the Act of the Legislature of the State of Illinois, under which The Sanitary District of Chicago is organized, provides that the Board of Trustees shall on November 30, 1906, and biennially there-

after, report to the Governor of the State of Illinois and to the two branches of the Legislature thereof, all items of moneys received from all sources and payments made therefrom, and it is necessary that 500 copies of said report be printed for the use above stated and for general distribution.

Your Committee further reports that it has received and canvassed competitive bids for doing said work, which were this day referred to your committee, and finds that the lowest bid received was that of John F. Higgins, in the sum of $3,000.00 for printing said report as specified, it being understood that the 172 pages composing said book are double pages and that the sum of $18.00 is to be added for each additional double page of said report over 172 double pages.

Your Committee, having considered the matter, is of the opinion that said bid should be accepted on the terms proposed, and therefore recommends the passage of the following order:

Ordered, That the bid of John F. Higgins, on the basis above stated, be, and the same is hereby, accepted, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago is hereby authorized to approve the bond given by John F. Higgins for the faithful performance of said work; and it is further

Ordered, That the form of said agreement and bond be printed in the Proceedings of the Board.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

WILLIS O. NANCE,
MATT A MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Engineering.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, March 27, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago

GENTLEMEN—Your Committee on Engineering reports that the Chief Engineer has prepared plans and specifications for a portion of the work of constructing the Desplaines river sewage treatment works and for certain equipment to be furnished therefor, and has presented the same to your Committee for approval.

Your Committee further reports that it has considered said plans and specifications and approved the same, and therefore recommends the passage of the following order.

Ordered, That the plans and specifications prepared by the Chief Engineer for the work above specified be, and the same are hereby, approved; and it is further

Ordered, That the Clerk be, and he is hereby, authorized and directed to advertise for bids for the performance of the work above specified in accordance with the plans and specifications so prepared by the Chief Engineer.

Respectfully submitted,

H. E. LITTLER,
Vice-Chairman.

MATT A MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, March 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, to which was referred at the meeting of March 20, 1919, page 262 of the Proceedings, bids for furnishing and delivering 60,000 feet of 12,000 volt 3 conductor lead covered cable and 2,000 feet of 5,000 volt 4 conductor lead covered cable, having considered all of the proposals presented and the qualification of each bidder, together with the report submitted by the Electrical Engineer, finds that the lowest responsible bidder is the General Electric Company.

Your Committee further reports that it is of the opinion that said company is competent to comply satisfactorily with the terms and conditions of the contract for furnishing and delivering said cable, and having had the matter under consideration, recommends the passage of hte following order:

Ordered, That the contract for furnishing and delivering said cable be and the same is hereby, awarded to the General Electric Company for the sum stated in the schedule of its bid for each lineal foot of cable of the sizes mentioned therein, being $1.59 per foot for said 12,000 volt 3 conductor lead covered cable and $1.09 per foot for each foot of 5,000 volt 4 conductor lead covered cable, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and Clerk be, and they are hereby, authorized and directed to execute in duplicate the said contract in accordance with the specifications of the Sanitary District when the same shall have been executed by the said General Electric Company and a bond for the faithful performance of said contract shall have been furnished to and approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,

H. E. LITTLER,
Vice-Chairman.

MATT A MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, March 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Acting Chief Engineer in which he states that the excavation for the foundation of the Evanston Pumping Station has reached the elevation shown by the plans; that the underlying material on the west side of the station is not suitable on which to rest the foundation for said station and there is danger of an uneven settle-

ment unless the base of the foundation is increased, which will necessitate additional excavation and the placing of additional concrete. He further states that the contract provides, in the event unsatisfactory material is encountered at the designated elevation, that the contractor shall perform such additional work under the unit prices specified in the contract, and estimates that the additional work necessary to prepare a proper base for said foundation will cost approximately $7,500.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to order Nash-Dowdle Company, contractor for the construction of said station, to do the necessary work above specified at the unit prices specified in said contract, provided the cost thereof shall not exceed the sum of $7,500.00.

Respectfully submitted,
H. E. Littler,
Vice-Chairman.
Matt. A. Mueller.
Jas. H. Lawley,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller and Nance—Six.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

Chicago, March 27, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Electrical Development reports that in the year 1918, the Sanitary District entered into a contract with the Dryden Rubber Company to supply said Company with electrical energy at certain rates, provided said Company did not consume said electricity during the peak period.

Your Committee further reports that it has received a communication from the Electrical Engineer in which he states that the Company violated the terms of its contract and used electricity during the peak period in the belief that the terms of the contract in this respect would not be enforced; that said Company was charged the sum of $764.52 in excess of the original charge by reason of the fact that the Company had consumed electricity during such period and said Company has requested that it be relieved from the payment of said excess charges under the circumstances and the Electrical Engineer recommends that an allowance be made, which would amount to the difference between the bills as rendered and the charge that would have resulted if the old contract with the Company had been continued in force, namely $334.43.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby, authorized and directed to allow the Dryden Rubber Company the sum of $334.43 for the reasons above stated.

Respectfully submitted,
H. E. Littler,
Chairman.
Wm. J. Healy,
Matt A Mueller,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler and Mueller—Five.

Nays—Messrs. Sergel and Nance—Two.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, March 27, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents contract with Pronger Brothers, 380 Western avenue, with the American Wrench Specialties Company, 297 New street, both located in Blue Island, Ill., and with the Great Western Smelting & Refining Company, 4100 Wallace street, Chicago, the latter contract being a renewal, wherein they agree to take and the Sanitary District agrees to furnish electrical energy for the periods and upon the terms and conditions therein set forth. Said contracts have been approved by the Electrical Engineer.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the attached contracts, which have been properly executed by Pronger Brothers, the American Wrench Specialties Company and the Great Western Smelting & Refining Company.

Respectfully submitted,

H. E. LITTLER,
Chairman.

MATT A MUELLER,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Employment.

Mr. Lawley presented the following report from the Committee on Employment:

CHICAGO, March 27, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

New Appointments—Provided for in 1919 Budget:

Electrical Department—

A. J. Peck, Cable Splicer (temporary), 87½c per hour.

William Kamberg, Material and Tool Clerk, $125.00 mo.

Engineering Department—

C. M. Hopfer, Laborer, 45c per hour.
Julius Berman, Laborer, 45c per hour.
Angelo Camero, Laborer, 45c per hour.

Reinstatement—Due to honorable discharge from the U. S. Army Service:

Clerk's Division—

James J. Kropacek, Stenographer and Index Clerk, $140.00 mo.

Respectfully submitted,

JAS. H. LAWLEY,
Acting Chairman.

H. E. LITTLER,
MATT. A. MUELLER,
Committee on Employment.

Mr. Lawley moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy,

Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Illinois Valley.

Mr. Mueller presented the following report from the Committee on Illinois Valley:

CHICAGO, March 27, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Illinois Valley reports that on January 31, 1901, Patrick R. Bannon brought suit in the sum of Forty Thousand ($40,000.00) Dollars, against The Sanitary District of Chicago in the Circuit Court of Will County, Illinois, to recover damages to about twenty-four (24) acres of land situated in said county, by reason of overflow caused by turning the water into the Main Channel of the Sanitary District. Such land being known as Edgewater, and being situated just north of the city limits of Joliet, on the west bank of the Des Plaines river opposite the Illinois Steel Company's plant.

Your Committee further reports that it has been negotiating with Mr. E. Meers, the attorney for said plaintiff, for a settlement of said suit and that the said plaintiff, together with a number of witnesses appeared before this Committee, and that it has reached an agreement with the said plaintiff and his attorney that the said suit may be settled for the sum of Twelve Thousand Five Hundred ($12,500.00) Dollars, such amount to include all damages caused by the construction and use of the works of the Sanitary District.

Your Committee is of the opinion that the above is a fair and reasonable settlement and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and the Clerk, be and they are hereby authorized and directed to draw a warrant in the sum of Twelve Thousand Five Hundred ($12,500.00) Dollars, payable to Patrick R. Bannon, and to deliver the same to him upon the execution and delivery by him of a release satisfactory to the Attorney of the Sanitary District, dismissing the said suit without costs, including Attorney's fees, and releasing the Sanitary District from all past, present and future damage to the land described in the declaration filed in the said suit.

Respectfully submitted,

MATT. A. MUELLER,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
WILLIS O. NANCE,
Committee on Illinois Valley.

Mr. Mueller moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Healy, Lawley, Littler, Mueller and Nance—Six.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from the Evanston Railway Company in which it asked permission to do landscape work on the property of the Sanitary District adjacent to its car station in Evanston.

Referred to the Committee on North Shore Channel.

ADJOURNMENT.

Mr. Mueller moved that the Board adjourn.

The motion prevailed.

John W. Gillen,
Clerk.

GEORGE M. REYNOLDS,
Treasurer, The Sanitary District of Chicago.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Electrical Engineer in which he states that at the present time the Sanitary District has one Nelson-Le Moon two ton truck, one White three-ton truck and two International one-ton trucks which are constantly in use. He further states that the needs of his department require a five-ton truck which can carry heavy

transformers and other equipment, and he recommends that such a truck be purchased at an estimated cost of $5,500.00.

Your Committee having considered the matter is of the opinion that such a truck should be purchased and therefore recommends the passage of the following order:

Ordered, That the Attorney prepare a form of advertisement for bids for the purchase by the Sanitary District of the truck above specified and that the Clerk advertise for bids therefor.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Chief Engineer in which he states that it is necessary to purchase miscellaneous bolts, washers and spikes to be used by employees of the Sanitary District in constructing temporary supports for the tracks of the Grand Trunk Western Railway Company across and adjacent to the Calumet-Sag Channel in the City of Blue Island until the new through plate girder bridge to be built by the Sanitary District for said company is completed, at an estimated cost of $500.00.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to purchase in the open market for the best price obtainable, the bolts, washers and spikes above specified, provided that the cost of the same shall not exceed the sum of $500.00.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a request from the Marshal to make a transfer of funds from one unexpended account to another account which was not appropriated for in the appropriation bill for 1919, the amount of said fund so transferred to be expended in the keeping, care and cleaning of motor vehicles.

Your Committee, having considered said request, is of the opinion that same should be granted, and therefore recom-

mends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to make a transfer in the appropriation of the Department of Police of $360.00 from account 8-99 "Contingencies" to account 8-262 "Keeping, Care and Cleaning of Motor Vehicles."

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance herewith transmits to the Board a grant of easement from the Aurora, Elgin & Chicago Railroad Company, whereby said Company for the nominal consideration of $1.00 grants to the Sanitary District a perpetual easement to construct, reconstruct, maintain and operate an intercepting sewer and appurtenances thereto in the Desplaines River district, in, under and through certain real estate owned by said Railroad Company. Said easement is in the usual form in use by the Sanitary District in such cases.

Your Committee further reports that it has examined said grant of easement which has been approved by the Chief Engineer and Attorney, and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate said form of easement, which is hereto attached, the same having been duly executed by said Railroad Company.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that on February 13, 1919, (page 165 of the Proceedings) the Board authorized the Chief Engineer to prepare specifications for the purchase of coal to supply the 39th street and Lawrence avenue pumping stations for ninety days from April 1, 1919, on the British thermal unit basis, and directed the Clerk to advertise for bids therefor in accordance with the specifications so prepared by the Chief Engineer.

Your Committee further reports that it has received another communication from the Chief Engineer in which he

states that there is sufficient coal on hand at the 39th Street Pumping Station to supply its needs until May 21, 1919, but that approximately 14,000 additional tons will be needed to operate the station for the balance of the year, and that at the Lawrence Avenue Pumping Station there is approximately 500 tons on hand or in transit to supply its needs until May 14, 1919, but that 3,500 additional tons will be needed to operate the station for the balance of the year.

Your Committee, having considered the matter, is of the opinion that contracts should be entered into to supply said stations with coal for a period of one year from May 1, 1919, and therefore recommends the passage of the following order:

Ordered, That the order passed by the Board on February 13, 1919, above referred to, which limits the supply of coal to be purchased to a period of ninety days be, and the same is hereby, repealed, and it is further

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to prepare specifications for the purchase of coal to supply the 39th Street and Lawrence Avenue Pumping Stations for a period of one year from May 1, 1919, on the British thermal unit basis, and that the Clerk advertise for bids therefor in accordance with the specifications to be prepared by the Chief Engineer.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report as Chairman of the Committee on Finance:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—On March 27th, 1919, (page 295 of the Proceedings) the Board accepted the bid of John F. Higgins to print the biennial report of the Sanitary District of Chicago to the Governor of the State of Illinois, and to the two branches of the Legislature, for the sum of $3,000.00, for 172 double pages, and $18.00 for each additional double page, and authorized the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District to approve the bond given by said John F. Higgins for the faithful performance of the work.

The Chairman of said Committee reports that he examined and approved the bond of said John F. Higgins in the penal sum of $2,000.00 with the Hartford Accident & Indemnity Company thereon as surety for the faithful performance of the contract for doing said work and herewith transmits said contract and bond for publication in the Proceedings of the Board.

Respectfully submitted

JAS. H. LAWLEY,
Chairman, Committee on Finance.

Mr. Lawley moved that the report be adopted and that the contract and bond of John F. Higgins be printed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract and bond of John D. Higgins:

CHICAGO, March 27, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—The undersigned hereby offers to print and bind five hundred (500) books, being the biennial report of The Sanitary District of Chicago to the Governor and the two branches of the State Legislature of the State of Illinois for the years 1916 and 1917; said books to be fourteen (14) inches by eleven (11) inches in size and printed on paper to be approved by the Clerk of The Sanitary District of Chicago. Said work of printing shall follow sample, and said offer is made on the following terms and conditions:

(1) Four (4) copies of said book are to be bound with cloth sides, leather backs and corners, and the balance of said books are to be bound with paper and cloth backs as per sample on file in the office of the Clerk of The Sanitary District of Chicago, Room 700, 910 South Michigan avenue, Chicago, Illinois.

(2) Said work is to be entirely completed and all of said books are to be delivered to the Clerk of said The Sanitary District of Chicago on or before the 10th day of May, 1919.

(3) The undersigned will furnish a bond in the sum of Two Thousand ($2,000.00) Dollars for the faithful performance of said work with sureties thereon to be approved by the Board of Trustees of The Sanitary District of Chicago.

(4) The undersigned will save and keep harmless The Sanitary District of Chicago from any and all claims for compensation for personal injuries suffered by any of his employees, and will pay such compensation and other legal charges to such employees or their beneficiaries as is provided for in the Acts of the General Assembly of the State of Illinois relating to Workmen's Compensation.

(5) The price to be paid for printing, binding and delivering said five hundred (500) books is the sum of $3,000.00.

(6) If the number of double pages contained in said report is more than one hundred seventy-two (172) then the undersigned agrees to print and furnish extra double pages to be included in said report for the sum of $18.00 for each double page.

(7) The undersigned also agrees to furnish to the Clerk of The Sanitary District of Chicago two (2) broad margin galley proofs of each page of said report as the work progresses, one of which shall be returned with the corrections thereon to the undersigned, and the undersigned will then furnish to said Clerk two (2) broad margin galley corrected proofs of each page of said report.

(8) It is understood that the manuscript for the first year of said report will be ready for delivery to the undersigned on the 27th day of March, 1919, at 10:00 A. M., and the manuscript for the second year of said report will be ready for delivery to the undersigned within twenty (20) days thereafter.

(9) It is understood that the undersigned will furnish said Clerk of The Sanitary District of Chicago all proofs required by this proposal within a reasonable time after receiving said manuscript, and said The Sanitary District of Chicago agrees on its part to use due diligence in correcting said proofs as soon as is practicable after the receipt of the same; it being understood that the undersigned will deliver to said The Sanitary District of Chicago the galley proofs of said work from day to day, as the composition for said work is made up.

(10) The above bid is made with the distinct understanding that no compensation will be made for any corrections

in the composition of said work by the undersigned.

Respectfully submitted,
JOHN F. HIGGINS,
376 W. Monroe St.

Accepted:
JAS. H. LAWLEY,
Chairman, Committee on Finance, The Sanitary District of Chicago.

BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, John F. Higgins, as principal, and Hartford Accident and Indemnity Company, as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Two Thousand ($2,000.00) Dollars lawful money of the United States for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors, administrators, successors and assigns, jointly and severally firmly by these presents.

Sealed with our hands and seals and dated this 31st day of March A. D., 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That whereas, the above bounden, John F. Higgins has entered into a certain contract with The Sanitary District of Chicago bearing date March 27, 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for printing and delivering five hundred (500) printed copies of the biennial report for the years 1916 and 1917 of the Trustees of The Sanitary District of Chicago, to the Governor of the State of Illinois and the two branches of the Legislature of the State of Illinois.

Now, if the said John F Higgins shall in all respects well and truly keep and perform said contract on his part in accordance with the terms thereof, and in the time and manner therein prescribed, and further, shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages and expenses and attorneys fees, which may in any wise come against The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said John F. Higgins, his agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and, moreover, shall pay all valid claims and demands for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An act to promote the general welfare of the people of this State by providing compensation for accidental injuries or deaths suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, as amended by an act of the General Assembly of the State of Illinois, in force July 1, 1915, which may accrue to each and every person who shall be employed by said John F. Higgins, in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, and made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said John F. Higgins, or his

agents, employes or workmen in the premises, and also that any judgment or award of any Board of Arbitrators, or of the State Industrial Board of the State of Illinois, rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Acts of the General Assembly of the State of Illinois, in force July 1, 1915, relating to compensation for accidental injuries or deaths suffered by employes, in the course of their employment, when notice of the pendency of such suit or arbitration shall have been given said John F. Higgins shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

JOHN F. HIGGINS, (Seal)

HARTFORD ACCIDENT AND INDEMNITY COMPANY, (Seal)

By THOMAS W. THOMPSON, and
Attorney.

G. W. MOLONEY, (Seal)
Resident Assistant Secretary.

Approved:

JAS. H. LAWLEY,
Chairman, Committee on Finance, The Sanitary District of Chicago.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 10, 1919.

To the Honorable, the President, and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of April and March payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Construction Account.

Nash-Dowdle Company (work on Evanston sewage pumping station)	$ 29,601.25
Nash Bros. (work on Contract No. 1, Desplaines river intercepting sewer)	27,967.94
Nash-Dowdle Company (labor operating pumping plant)	775.00
T. J. Forschner Contracting Company (work on Calumet-Sag pumping station)	2,122.65
A. Guthrie & Co., Inc. (work on Section 13, Calumet-Sag Channel)	1,532.01
A. Guthrie & Co., Inc. (work on Section 14, Calumet-Sag Channel)	875.00
Jas. O. Heyworth (labor and material on Section 1, extra work, Calumet-Sag Channel)	1,305.04
Yeoman Bros. Company (repairs to bilge pump)	75.00
Adam Schilo Lumber Company (lumber)	34.85
Peth & Goeler (repairs)	17.50
Baltimore & Ohio Chicago Terminal Railroad (labor and material furnished on account of B. & O. C. T. R. R. crossing)	22,230.00
Baltimore & Ohio Chicago Terminal Railroad (labor and material furnished on account of B. & O. C. T. R. R. crossing)	11,500.00
Jas. O. Heyworth (labor for operating pumping plant)	1,032.26
Jas. O. Heyworth (labor for operating pumping plant)	283.87
Jas. O. Heyworth (labor for operating pumping plant)	245.16
The Connersville Blower Company (repairs to blowers)	245.00
Nagel Bros. (chestnut coal)	12.00
United States Rubber Company (hip boots)	10.64
Amount carried forward	$ 99,865.17

Amount brought forward	$ 99,865.17	
Goodyear Rubber Company (rubber boots)	6.50	
Standard Oil Company (installing lights)	6.14	
Burr-Vack Company (1 telephone bracket)	3.50	
		$ 99,881.31

Maintenance and Operation Account.

John McGillen, Clerk (payroll repairs to Main Channel bridges)	$ 182.00	
John McGillen, Clerk (payroll Lawrence avenue pumping station)	153.40	
John McGillen, Clerk (freight charges on fuel to Lawrence avenue pumping station)	87.41	
Commonwealth Edison Company (Mazda lamps)	135.48	
John McGillen, Clerk (gas service)	21.82	
Sullivan Oil Company (cylinder oil)	66.65	
American Blue Print Paper Company (black ink)	34.35	
Burr-Vack Company (stationery)	34.05	
L. Gould & Co. (Star mops)	22.34	
Auto Trimming & Painting Company (painting)	28.00	
The Texas Company (gasoline and oil)	17.28	
Stebbins Hardware Company (padlocks)	14.00	
Link-Belt Company (sprocket wheel)	12.11	
L. Gould & Co. (mops)	5.59	
Chas. Novak & Son (sheet and settings)	4.60	
Auto Parts Company of America (complete set of tools)	4.54	
The Oil & Waste Saving Machine Company (turbine nozzle)	3.10	
Henry Stuckart (scythe snaths)	2.60	
John McGillen, Clerk (freight charges paid I. C. R. R. for fuel to 39th St.)	87.57	
H. W. Johns-Manville Company (cement)	80.33	
Power Coal Company (freight charges)	54.10	
American Supply Company (white waste)	14.42	
Jos. T. Ryerson & Son (shackle and bolts)	8.25	
Jos. T. Ryerson & Son (bar steel)	8.17	
Parker's Towel Supply Company (towel service)	8.00	
Commonwealth Edison Company (electrical supplies)	7.31	
Consumers Company (coal)	4.70	
The Berkshire Company (typewriter paper)	2.00	
		1,104.17

Electrical Department.

John McGillen, Clerk (expenses of employes)	$ 481.44	
John McGillen, Clerk (weekly payroll)	216.10	
John McGillen, Clerk (postage stamps)	112.18	
John McGillen, Clerk (freight charges on insulators)	10.92	
Rhodes Metallic Packing Company (15 sets packing)	352.80	
Monarch Electric & Wire Company (repair parts)	326.82	
The Ohio Brass Company (porcelain insulators)	301.00	
Western Electric Company (magneto testing set, etc.)	280.07	
Western Electric Company (trip oil switches)	267.30	
Chicago Telephone Company (telephone service)	257.94	
Chicago Telephone Company (telephone service)	13.20	
Conroy Boiler & Tank Works (galvanized nuts and bolts)	223.87	
Central Electric Company (washing brushes, etc.)	223.85	
Pittsburgh Transformer Company (1 impedance coil with taps)	202.78	
Chicago Telephone Company (cover cost of 20 empty carboys deducted from their invoice)	100.00	
Commonwealth Edison Company (conduits, etc.)	156.06	
Commonwealth Edison Company (reverse current relays)	144.00	
Delta Star Electric Company (disconnecting switches)	120.58	
Amounts carried forward	$ 3,790.91	$100,985.48

Amounts brought forward	$ 3,790.91	$100,985.48
Chicago Pneumatic Tool Company (universal drill)	116.00	
The Lombard Governor Company (1 hand wheel bracket)	112.03	
Litzinger, Davis Oil Company (gasoline)	109.68	
Ledgerwood Mfg. Company (connecting rod, etc.)	99.33	
The Garden City Sand Company (cement, etc.)	96.25	
Delta Star Electric Company (disconnecting switches)	90.00	
International Harvester Company (bushings, etc.)	64.58	
Patrick Brennan (personal injuries)	60.00	
G. J. Cushing (personal injuries)	52.00	
Crane Company (gate valve, etc.)	51.96	
Aurilla Scully, Admx. (compensation for death of husband)	50.00	
Westinghouse Electric & Mfg. Company (gaskets, etc.)	38.94	
Wm. Heggie (repairing auto, etc.)	91.26	
Wilbur J. Connell (machine bolts, etc.)	66.97	
American Supply Company (cheese cloth)	49.95	
Weston Electrical Instrument Company (volt meter)	45.22	
A. Sharp (axle, etc.)	44.50	
The Fred J. Ringley Company (printing)	41.25	
H. P. Reger & Co. (installing new grates, etc.)	40.30	
Schweitzer Conrad, Inc. (high voltage detector)	39.80	
R. Hanisch Sons Company (protection for electrical apparatus)	39.16	
Monarch Electric & Wire Company (galvanized clamps)	38.47	
Chicago Engineer Supply Company (oil pumps)	36.00	
Yates Bros. Transfer & Express (hauling charges)	35.52	
General Electric Company (controlling switches)	32.76	
Patterson & Schroeder Supply Company (drills, etc.)	29.47	
American Supply Company (sanitary wipers)	25.87	
Standard Oil Company (gasoline, etc.)	25.67	
James Carmichael (connecting hot water heater)	25.00	
The Texas Company (kerosene and gasoline)	24.00	
Farrell, Kemp & Gushe Company (tube for water gauge)	23.75	
Habisch Bros. (repairs)	23.10	
Inter-State Brass Company (round brass rod, etc.)	19.85	
Pittsburgh Transformer Company (freight charges)	19.24	
Stebbins Hardware Company (flat head screws, etc.)	17.54	
DeVoe & Raynolds Company (painting)	16.07	
The Lord & Bushnell Company (lumber)	14.53	
Theo. B. Robertson Products Company, Inc. (soap powder)	13.73	
Stewart-Warner Speedometer Corporation (swivel joints, etc.)	13.44	
L. Gould & Co. (toilet paper, etc.)	12.98	
L. Gould & Co. (toilet paper)	8.33	
Parker's Towel Supply Company (towel service)	12.25	
Henry Stuckart (nails, etc.)	11.54	
M. W. Powell Company (asphalt compound)	10.20	
Monarch Electric & Wire Company (elbows)	10.02	
The Lord & Bushnell Company (lumber)	9.70	
Western Electric Company (wire)	122.26	
Western Electric Company (friction tape, etc.)	80.36	
Western Electric Company (stranded cable)	77.31	
The Texas Company (oil)	109.45	
Delta Star Electric Company (clamp bases and terminal lugs)	76.48	
Commonwealth Edison Company (solid wire)	54.19	
Monarch Electric & Wire Company (fibre polished tubing)	44.10	
Wilbur J. Connell (galvanized lag screws)	38.66	
The Carl Anderson Company (repairing low pressure valve)	32.50	
Wilbur J. Connell (blow torches, etc.)	27.74	
Armstrong Bros. Tool Company (high speed cutters)	13.94	
Amounts carried forward	$ 6,376.11	$100,985.48

Amounts brought forward	$ 6,376.11	$100,985.48
Geo. L. Hammons, Inc. (indicator, etc.)	13.15	
United States Rubber Company (hip boots)	10.77	
Jos. T. Ryerson & Son (6 angles)	9.36	
Central Electric Company (cutter steel service box)	9.02	
Central Electric Company (lamp changer, etc.)	6.45	
John McGillen, Clerk (charges on shipment)	.75	
Exide Battery Depots, Inc. (shoe pegs for seps.)	.20	
John McGillen, Clerk (weekly payroll)	79.20	
General Electric Company (motors, etc.)	612.00	
H. P. Reger & Co. (cast iron boiler section)	436.00	
Wilbur J. Connell (machine bolts, etc.)	167.48	
Commonwealth Edison Company (refillable fuses, etc.)	151.73	
J. P. Kearns & Co. (gunny sacks)	7.97	
Mrs. Geo. Bedell (cleaning and repairing 2 rugs)	7.50	
The Joliet Welding & Repair Shop (1 cylinder)	7.50	
E. B. Bronson (1 set skid chains, etc.)	7.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEO. W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that early in the year 1918 plans and specifications were prepared for the construction of the Morton Grove sprinkling filter plant; that bids for said work were received by the Board but the Board on August 1, 1918 (page 866 of the Proceedings), rejected all bids for the reason that the cost of said work was excessive.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that it is advisable to readvertise for bids for doing said work, and he requests that the Clerk be authorized so to do, in accordance with the original plans and specifications except that the article of the General Conditions relating to extra work has been changed to conform to the latest specifications relating thereto.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Clerk be, and he is hereby, authorized and directed to advertise for bids for the construction of the Morton Grove sprinkling and filter plant in accordance with the specifications above specified.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
PATRICK J. CARR,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering to which were referred at the meeting of April 3, 1919, (page 301 of the Proceedings) bids for repairing two scows of the Sanitary District, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer, finds that the lowest responsible bidder is Abraham Burrell.

Your Committee further reports that it is of the opinion that said bidder is competent to comply satisfactorily with the terms and conditions of said contract, and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for repairing two scows of the Sanitary District be, and the same is hereby, awarded to Abraham Burrell for the actual cost of labor and material entering into said work, and it is further

Ordered, That the Chairman of the Committee on Finance of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the said contract in accordance with the specifications of the Sanitary District when the same shall have been executed by said Abraham Burrell.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on August 8, 1918 (page 892 of the Proceedings), the T. J. Forschner Contracting Company entered into a contract with the Sanitary District for constructing the Calumet sewage pumping station and furnishing and installing certain equipment therein; that certain pumps designed by Mr. A. B. Wood, Consulting Engineer, are a part of said equipment, and are to be built by the Southwark Foundry and Machine Company.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that the question has arisen as to whether thrust collars, which are not provided in the specifications and plans, should be placed on the shafts of said pumps in order to prevent the runners from wearing on the casings, and he gives it as his opinion that said thrust collars should be installed by the manufacturer of said pumps and that the estimated cost of the same, $1,000.00, be allowed said T. J. Forschner Contracting Co. as an extra under its said contract.

Your Committee, having had the matter under consideration, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to order the T. J. Forschner Contracting Co. to perform the work above specified under the extra work clause of its said contract, provided the cost thereof shall not exceed the sum of $1,000.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Electrical Engineer has prepared specifications and drawings for a conduit line from Fifty-sixth street and Western avenue to the Calumet Sewage and Pumping Station, in which conduit line will be installed the necessary cables to supply said station with electrical energy for its operation.

Your Committee further reports that it has considered said specifications and drawings and has approved the same, and therefore recommends the passage of the following order:

Ordered, That the specifications and drawings prepared by the Electrical Engineer for the work above specified be,

and the same are hereby approved, and it is further

Ordered, That the Clerk be, and he is hereby, authorized and directed to advertise for bids for the performance of the work above specified in accordance with the specifications and drawings so prepared by the Electrical Engineer.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it is necessary to furnish and place certain cast iron drain pipes in the concrete floors of the Calumet Sewage Pumping Station. This work is part of the plumbing to be done on said station, bids for which have not yet been asked for because of the present high cost of that character of work, and he requests that he may be authorized to direct the T. J. Forschner Contracting Co., which is now constructing the said pumping station, to perform said work under the extra work clause of its contract with the Sanitary District, dated June 20, 1918 (page 893 of the Proceedings), at a cost of not to exceed $302.00.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized to direct the T. J. Forschner Contracting Co. to perform the work above specified under the extra work clause of said contract, provided the cost of the same shall not exceed the sum of $302.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that he has received informal bids from different inspection firms for the sampling and testing 150,000 barrels of cement to be used during the coming season on the work of the Sanitary District; that the lowest bid received was from Walter H. Flood of 1.2 cents per barrel, amounting to

$1,800.00 for each physical test and $3.00 each for seventy-five chemical tests, amounting to $225.00, a total of $2,025.00, and he recommends that said bid be accepted.

Your Committee, having canvassed said bid, is of the opinion that the recommendation of the Chief Engineer be concurred in, and therefore recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to accept the bid of Walter H. Flood for doing the work above specified, provided the cost of the same shall not exceed the sum of $2,025.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that under Section 14 of the agreement dated November 2, 1916, (page 442 of the Proceedings), between the Sanitary District and certain railroad companies, relating to the crossing of the rights-of-way of said railroad companies by the Calumet-Sag Channel, the Sanitary District agreed to construct a new through plate girder bridge to carry four tracks of the Grand Trunk Western Railway Company. In order to perform this work, it is necessary to divert the existing tracks of said company, and in so doing to furnish about 120,000 feet B. M. trestle timber for the construction of temporary supports of said tracks across and adjacent to said channel. He further states that said Railway Company has requested the Sanitary District to furnish said trestle timber at an estimated cost of about $7,000.00. The Chief Engineer requests that he be authorized to prepare specifications for the purchase of said material, and that the Clerk be directed to advertise for bids therefor.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized to prepare specifications for the purchase of the trestle timber above specified, and the Clerk be, and he is hereby, authorized and directed to advertise for bids therefor in accordance with the specifications so to be prepared by the Chief Engineer.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

RECESS.

Mr. Clark moved that the Board take a recess for five minutes to allow the Committee on Engineering to consider a matter and report to the Board, at the expiration of which time the Board reconvened.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on February 27, 1919, (page 210 of the Proceedings) authorized and directed the Chief Engineer to change the contract entered into between the Sanitary District and Nash-Dowdle Co., dated November 14, 1918 (page 1243 of the Proceedings), to provide that the pumps to be furnished under said contract should be constructed at Aurora, Illinois, in the shops of the American Well Works, instead of at New Orleans, La., in the shops of the Dibert, Bancroft & Ross Co.

Your Committee further reports that the Board on March 20, 1919, (page 282 of the Proceedings) reconsidered the vote by which the report relating thereto and the order above specified was passed and referred said report and order to your Committee on Engineering.

Your Committee further reports that it has again considered the subject matter of said report and order of February 27, 1919, and is of the opinion that said report should be adopted and said order be passed as originally presented to the Board, and herewith presents to the Board said original report and order with recommendation that the same be adopted and passed.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel Carr, Clark, Healy, Lawley, Littler and Paullin—Seven.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering, referred to in the foregoing report:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on November 14, 1918 (page 1243 of the Proceedings) entered into a contract with the Nash-Dowdle Company for furnishing, delivering and erecting the building, pumping machinery, electric equipment, switch board, conduit and wiring of the Evanston Sewage Pumping Station as specified under Divisions A, B, C and D of said contract.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that the specifications under Division B provide that "the pumps will be built in New Orleans, La., in the shops of the Dibert, Bancroft & Ross Co.," and the contractor requests that the specifications be changed so as to read "the pumps will be built at Aurora, Ill., in the shops of the American Well Works," and the Chief Engineer states that he does not object to said change in the specifications.

Your Committee further reports that the Attorney is of the opinion that from an examination of the correspondence heretofore had between said contractor and the Dibert, Bancroft & Ross Co.

said Nash-Dowdle Company is not obligated in any way to award said contract to the said Dibert, Bancroft & Ross Co. and your Committee is of the opinion that the request of said contractor to make said change in the specifications be granted, and therefore recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to change said contract between The Sanitary District of Chicago and the Nash-Dowdle Company in the particular above specified, provided said contractor and the surety on its bond consent in writing to such a change.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT. A. MUELLER,
H. E. LITTLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler and Paullin—Seven.

Nays—Mr. Nance—One.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents two renewal contracts with the Boss Nut Company, 1732 N. Kolmar avenue, and the Fearon-Tillotson Foundry Company, 1743 North Kenton avenue, and a new contract with the Garden City Upholstering Company, 2420 W. 22nd street, wherein said companies agree to take, and the Sanitary District agrees to furnish, electrical energy upon the terms and conditions set forth in said contracts, which have been approved by the Electrical Engineer.

Your Committee, having considered the contracts, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the attached contracts which have been properly executed by said companies.

Respectfully submitted,
H. E. LITTLER,
Chairman.
MATT. A. MUELLER,
WM. J. HEALY,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, April 10, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 budget:

Engineering Department—

Wm. A. Dundas, Asst. Mechanical Engineer, $175.00 mo.

D. P. Fleming, Asst. Mechanical Engineer, $175.00 mo.

P. J. Erickson, Laborer, 45c per hour.

REINSTATEMENTS.

Due to honorable discharge from the U. S. Army or Navy service.

Electrical Department—

P. B. Brown, Operator, $180.00 mo.

Chas. Kaiser, Lineman, $165.00 mo.

C. D. Case, Electrician, $155.00 mo.

T. J. Considine, Relief Operator, $155.00 mo.

Michael Tyrrell, Operator, $125.00 mo.

Stuart E. Ward, Groundman, $115.00 mo.

DROPPED FROM SERVICE.

Electrical Department—

C. R. Lyons, Carpenter, 80c per hour.

Respectfully submitted,

GEORGE W. PAULLIN,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
JAS. H. LAWLEY,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from William Kramer, Engineer, Stock Exchange Building, Chicago, dated April 2, 1919, submitting a claim of $617.99 for services rendered P. R. Bannon, who has a suit against the Sanitary District for overflow of land in Will County, Ill.

Referred to the Committee on Illinois Valley.

MISCELLANEOUS AND NEW BUSINESS.

The subject of purchasing a boat for the Police Department of the Sanitary District was considered.

Mr. Lawley moved that the Marshal be authorized to purchase a boat for the use of the Police Department, at a cost not to exceed $1,450.00.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillen,
Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, APRIL 17, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of the Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Absent—Mr. Paullin—One.

MINUTES.

Mr. Lawley moved that the minutes of the proceedings of the regular meeting of April 10, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

Mr. Lawley, chairman of the Committee on Finance, presented the following communication:

CHICAGO, April 17, 1919.

To the Honorable, the President and Members of the Board of Trustees of the Sanitary District of Chicago.

GENTLEMEN—On April 10, 1919 (page 317 of the Proceedings) the Board authorized the Chairman of the Committe on Finance of the Board of Trustees of the Sanitary District and the Clerk to execute in duplicate a contract between the Sanitary District and Abraham Burrell, for the repair of two scows of the Sanitary District.

The Chairman of said committee reports that he has executed said contract in accordance with said order and that the Clerk has attested same and affixed the seal of the District thereto.

The Chairman of said committee herewith transmits said contract to the Board for publication in its Proceedings.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman, Committee on Finance.

Mr. Lawley moved that the communication and contract with Abraham Burrell be printed in the proceedings.

The motion prevailed.

The following is the contract:

THE SANITARY DISTRICT OF CHICAGO.
CONTRACT FOR THE REPAIRS TO TWO SCOWS.

THIS AGREEMENT, Made and entered into this 10th day of April A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and Abraham Burrell of the City of Chicago, County of Cook and State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as herein provided to the Contractor by the said Sanitary District, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all plant, appliances and appurtenances called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter specified, that are necessary for the Repairs to Two Scows of The Sanitary District of Chicago.

The work to be done consists of replacing any boards in the sides, bottom and deck and any timber or metal in the interior framing and bracing of the two scows, which may, upon inspection, be found necessary in order to restore the scows to first-class condition. It also consists of any recaulking and painting which may be ordered by the Engineer.

Materials furnished shall be of acceptable quality and shall be subject at all times to the approval of the Engineer. Any material which has been rejected by the Engineer shall be immediately removed from the site of the work.

The Contractor shall employ competent foremen and workmen. None but men expert in their respective branches of work shall be employed where special skill is required.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized assistants, by whose measurements and calculations the quantities and amounts of the several kinds of work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Sanitary District shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirits and to the terms and conditions herein expressed.

To prevent all disputes and litigation it is further agreed by and between said Sanitary District and said Contractor, that said Engineer shall determine all questions in relation to said work and the performance thereof, and he shall in all cases decide every question which may arise relative to the execution of the work under the contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision in case any question shall arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Sanitary District" are used in this agreement, they shall be understood to mean the Sanitary District of Chicago.

Wherever the words "Chief Engineer" or "Engineer" are used in this agreement, they shall be understood to mean respectively the Chief En-

gineer of the Sanitary District of Chicago or other designated Engineer in charge of the work or of any portion thereof.

Wherever the word "Contractor" is used in this agreement, it shall be understood to mean the person or persons, co-partnership or corporation entering into this contract as the party of the second part.

Wherever the words "the work" are used herein, they shall be interpreted to mean the work, including all material, labor, tools and all plant, appliances and appurtenances, necessary to perform and complete everything specified in this contract in full compliance with all of the terms and conditions hereof.

Wherever under the provisions hereof an order from the Engineer to the Contractor is required, such an order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of the Sanitary District of Chicago.

In estimating the cost of the work, the cost of material shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amounts paid for same as shown by the payrolls of the Contractor, with cost of insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by the per cent bid for superintendence, use of tools and profit. The Contractor shall if requested by the Chief Engineer verify by his affidavit the correctness of the amounts paid for material and labor.

All books and accounts, kept by the Contractor in connection with this contract, shall be open to the inspection of the Chief Engineer of the Sanitary District, or his properly accredited representative.

The Contractor shall furnish the Engineer reasonable facilities for obtaining such information as he may desire respecting the progress and execution of the work, including all information necessary to determine the cost of the work, such as the number of men employed, their pay, the time during which they have worked, the cost of materials and other information required by the Engineer. The Contractor shall, on request furnish the Engineer with copies of expense bills for transportation charges on all material and supplies shipped to or from the work under this contract.

The Contractor further agrees to insure to his employes or their beneficiaries the necessary first aid, medical, surgical and hospital services and the compensation provided for in the Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled " An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, "approved June 10, 1911, in force May 1, 1912", approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplemental thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or deaths suffered by any of his employes in and about the performance of this contract.

It is further agreed by and between the parties hereto that if said Contractor abandons this contract or fails financially, or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for finishing the repair work herein specified and award a contract therefor to the lowest responsible bidder, or the Sanitary District may itself complete the work provided for hereunder, by employing such men and by purchasing or otherwise obtaining such material, supplies, machinery, implements, tools and plant as may be necessary to complete the work herein specified, or any part thereof, and in completing the said work by contract or by itself doing the work herein specified, said Sanitary District may remove the

said scows from the premises of said Contractor, or may have access to the premises of said Contractor and may use such material, supplies machinery, implements, tools and plant as may be the property of said Contractor, and all costs and expenses incurred by the Sanitary District in completing such work in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

The Contractor agrees to begin the work covered by this contract within ten (10) days for the date of the execution of the contract and to prosecute the same with all due diligence and to entirely complete the work within sixty calendar days thereafter.

And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the material, and for doing all the work contemplated and specified in this contract, also for all loss or damage arising out of the nature of the work aforesaid or from the action of the elements or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every discription connected with the work; and for well and faithfully completing the work, and the whole hereof, in full compliance with the contract and the requirements of the Engineer under it, to-wit:

For Hauling Upon Bank, Scow No. 1.

The sum of eighty (80) cents per hour for wages of mechanics and carpenters, and $8.00 per day wages of foreman and actual cost of material.

For Hauling Upon Bank, Scow No. 2.

The sum of eighty (80) cents per hour for wages of mechanics and carpenters, and $8.00 per day wages of foreman and actual cost of material.

For Repair Work on Scows.

The actual cost of labor calculated as follows:

Eighty (80) cents per hour for wages of mechanics and carpenters, and $8.00 per day wages of foreman and the actual cost of material.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents, and patented material, appliances and processes used in the work described in the contract. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses, upon bills presented by said Contractor and approved by said Engineer. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half per cent (87½%) of the value of the work properly performed under this contract, and that the remaining twelve and one-half per cent (12½%) shall be reserved by the said Sanitary District as part security for the faithful performance hereof, and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificate of said Engineer, and after the payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials, except in the manner set forth in this contract, nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificate, pay, and it hereby binds itself to pay the said Contractor in cash, the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

IN WITNESS WHEREOF, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has hereunto set his hand and seal.

THE SANITARY DISTRICT OF CHICAGO.
By JAS. H. LAWLEY,
Chairman of Its Committee on Finance.

Attorney.

REPORTS OF COMMITTEES.

Judiciary.

Mr. Healy presented the following report from the Committee on Judiciary:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Judiciary reports that on August 27, 1916, Della Thieverage, brought suit against the Sanitary District in the Superior Court of Cook County, General Number 319,974, to recover damages in the sum of $10,000.00, for personal injuries claimed to have been sustained by her on July 30th, 1915, by falling into an excavation made by the Sanitary District, on Washington street near State street.

Your Committee further reports that the attorney has given it as his opinion that while there is some doubt about the liability of the Sanitary District, yet it is advisable to accept her offer to settle said suit for the sum of $150.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw a warrant in the sum of $150.00, payable to Della Thieverage and deliver the same to her on a voucher to be approved by the attorney upon her furnishing a release in full of all claims or demands for damages against the Sanitary District because of said action and upon her furnishing such other releases as the attorney may deem necessary and also on the receipt of a stipulation signed by her attorneys of record to dismiss said suit without costs to the Sanitary District.

Respectfully submitted,
WM. J. HEALY,
Chairman.
H. E. LITTLER,
PATRICK J. CARR,
Committee on Judiciary.

Mr. Healy moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Healy presented the following report from the Committee on Judiciary:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Judiciary respectfully represents that it is advised by the attorney of the District that on August 2, 1918, Ransom E. Walker, administrator of the estate of Richard J. Ahrendt, deceased, began

suit in the Superior Court of Cook County, General Number 337,790, against the Sanitary District and the United States Brewing Company to recover the sum of $10,000 damages, alleged to have been caused by negligence on the part of said defendants, causing the death of said decedent. The Sanitary District was insured against actions of this character by the United States Fidelity & Guaranty Company, Policy No. M-22, 583, dated January 15, 1918, and notified said company that it would be held responsible for any damages occasioned by said accident. The said insurance company undertook the defense of said suit and has filed certain pleas therein on behalf of the Sanitary District, and as far as the record shows has assumed the defense of said suit, collaborating with the attorney of the District. The insurance company now claims that under a strict interpretation of said contract for insurance as applied to the particular facts in the case it is not liable to respond in damages under said policy of insurance, but has performed considerable work in investigating the facts and circumstances of the case and the law pertaining thereto, and is willing to proceed with this work if such action on its part will not be construed as a waiver on the part of either the said insurance company or the Sanitary District to insist upon their legal rights under said policy of insurance.

Your Committee herewith transmits to the Board a stipulation in accordance with the statement hereinabove set forth, and requests that the attorney may be granted authority to enter into said stipulation on behalf of the Sanitary District when the same is duly executed by said Insurance Company's attorneys.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Attorney of the District be and he is hereby authorized and directed to enter into the stipulation above set forth when the same has been duly signed by the Attorneys for said Insurance Company.

Respectfully submitted,
WM. J. HEALY,
Chairman.
H. E. LITTLER,
PATRICK J. CARR,
Committee on Judiciary.

Mr. Healy moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that in accordance with the terms of the contract dated November 4, 1915 (page 1547 of the Proceedings), between A. Guthrie & Co., Inc., and the Sanitary District, for the excavation and collateral work on contract section 14 of the Calumet-Sag Channel, the Sanitary District has retained from time to time as a reserve percentage 12½ per cent of the sums earned by said contractor which on March 31, 1919, amounted to $51,395.34, which sum under the terms of said contract was not to be paid said Contractor until thirty days after the completion of all work specified in said contract, but said contractor has requested the Sanitary District to pay it $40,000.00 of said reserve percentage.

Your Committee further reports that it is advised by the Chief Engineer that the work covered by said contract is 99.63 per cent completed; that said contractor

has furnished the Sanitary District with a written statement of its resources and liabilities from which it appears that the net resources of said company on December 31, 1918, were $1,955,233.77.

Your Committee having considered the matter is of the opinion that the request of said contractor should be granted, and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to pay upon the voucher of the Chief Engineer to A. Guthrie & Co., Inc., the sum of $40,000.00, out of the reserve percentage retained by the Sanitary District on said contract for the excavation and collateral work on contract section 14 of the Calumet-Sag Channel, provided that said contractor obtains the consent in writing of the surety on its bond that said payment be made and that all conditions and terms of said contract shall remain in full force and effect.

Respectfully submitted,
JAMES H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs leave to report that one hundred and fifty bonds of the thirtieth issue of The Sanitary District of Chicago in the amount of $150,000.00, will mature April 25, 1919.

Your Committee further reports that the semiannual interest on the thirtieth issue of bonds of The Sanitary District of Chicago amounting to the sum of $57,000.00 will also fall due April 25, 1919, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby instructed to draw a warrant payable to the order of the Treasurer of the Sanitary District for the sum of $207,000.00 to pay the principal and semiannual interest due April 25, 1919, on bonds of the Sanitary District as follows:

The principal of one hundred fifty bonds, numbered 42,039 to 42,188 inclusive, for $1,000.00 each of the thirtieth issue	$150,000.00
Six months interest on $2,850,000.00 of the thirtieth issue at 4 per cent per annum	57,000.00
Total	$207,000.00

Respectfully submitted,
JAMES H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and approved the bond of the General Electric Company with the Fidelity and Deposit Company of Maryland thereon as surety, for the faithful performance of its contract for furnishing and delivering lead covered cable to The Sanitary District of Chicago, and therefore, recommends the passage of the following order:

Ordered, That the bond of the General Electric Company for the faithful performance of its contract for the furnishing and delivering of lead covered cable to The Sanitary District of Chicago, said bond being in the penal sum of $48,790.00, be and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
JAMES H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

The following is the contract and bond of the General Electric Company:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR LEAD-COVERED CABLE.

THIS AGREEMENT, Made and entered into this 27th day of March A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the General Electric Company, a corporation organized under the laws of the State of New York, party of the second part hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement (free from all claims, liens and charges whatsoever), in the manner and under the conditions hereinafter specified, that are necessary for furnishing and delivering lead-covered cable as called for under the attached specifications, complete, as specified.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Electrical Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose measurements and calculations the quantities and amounts (including extras) of the several kinds of work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Electrical Engineer or other Engineer designated by the Electrical Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor, that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide every question which may arise relative to the execution of the work under this contract on the part of the

said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question shall arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Electrical Engineer" or "Engineer" are used herein, they shall be understood to mean the Electrical Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever under the provisions hereof an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Electrical Engineer of The Sanitary District of Chicago.

SPECIFICATIONS FOR LEAD-COVERED CABLE. THESE SPECIFICATIONS MUST NOT BE ALTERED.

General.

1. The cable required under these specifications will be used for underground transmission and distribution of electrical energy in the form of three phase, alternating current at a frequency of sixty (60) cycles per second. The transmission cables shall be designed for a working pressure of 12,000 volts and the distribution cables for a working pressure of 5,000 volts. Three conductor cable is required for the 12,000 volt service and four conductor for the 5,000 volt service.

Conductors.

2. Each conductor shall be composed of a nineteen (19) strand, concentric lay cable, each strand being of tinned annealed copper wire having a conductivity as specified in Section 675 of the Standardization Rules of The American Institute of Electrical Engineers. The aggregate cross sectional area of all of the individual strands of each conductor shall be equivalent to the cross sectional area of a solid conductor of the sizes specified.

Insulation.

3. Each conductor shall be insulated with the required wall of black varnished cambric tape or of black varnished cambric tape and thirty (30) per cent new, unused Para rubber. If rubber is used, same shall be placed between the conductor and the varnished cambric tape and the thickness of the wall of rubber shall be not greater than five sixty-fourths (5/64ths) of an inch for the 12,000 volt cable and two sixty-fourths (2/64ths) of an inch for the 5,000 volt cable. Only the best grade of black varnished cambric tape shall be used. A thin layer of plastic, non-hardening, insulating compound shall be applied between the layers of varnished cambric tape during manufacture of the cable.

4. The separate conductors after being insulated, shall be twisted together and the interstices filled with jute treated with an insulating compound, making a firm, round cable which shall then be covered with the required wall of black varnished cambric tape applied in the same manner as for the individual conductors.

The following table shows the thickness of insulation in inches required for the 12,000 volt and the 5,000 volt cable:

Working Voltage	Insulation around each Conductor	Insulation around all Conductors
12,000	6/32 inch	6/32 inch
5,000	3/32 inch	3/32 inch

Sheath.

5. After insulating, as specified, the built-up cable shall be encased in a continuous lead sheath one-eighth inch (⅛") thick, composed of commercially pure lead alloyed with two (2) to three (3) per cent of pure tin and evenly distributed. The sheath must fit the cable closely and care must be exercised to prevent the damaging of the varnished cambric jacket when applying the lead sheath.

Quantity.

6. Approximately sixty thousand (60,000) feet of No. 0000, three (3) conductor, 12,000 volt and two thousand (2,000) feet of No. 0000, four (4) conductor, 5,000 volt cable will be ordered within sixty (60) days after the contract is awarded. These quantities are approximate and ten (10) per cent, more or less, of each class of cable, may be ordered under this contract. Orders will, so far as possible, be placed so that the manufacture of the cable can be continuous and carload shipments can be made as fast as cable is completed.

Lengths.

7. The cable must be delivered in lengths as specified in each order, each

length to be shipped on a separate reel which shall be plainly marked showing the number of the reel, number of feet on the reel, size of conductor, number of conductors, working voltage, weight of reel only, weight of reel and cable, order number and section number.

Reels.

8. The District will deliver empty reels to the railroad company consigned to the Contractor and have same shipped freight collect and will forward bill of lading to Contractor covering each shipment.

Tests.

9. The three-conductor, 12,000 volt cable shall withstand a dielectric test of 30,000 volts alternating current and the 5,000 volt, four-conductor cable shall withstand a dielectric test of 14,000 volts alternating current. Tests to be applied for a period of five minutes at operating frequency after installation and in each case the test voltage shall be applied between all conductors and the lead sheath and between individual conductors.

Guarantees.

10. All cable shall be guaranteed free from mechanical and electrical defects in materials and workmanship for a period of two years from date of shipment, and any cable proving defective within said period shall be replaced at the expense of the Contractor.

Delivery.

11. All cable shall be delivered, freight prepaid, at railroad team tracks in the City of Chicago to be designated by the Engineer. All cable called for on each order must be delivered within forty (40) days from date of said order. The Contractor shall notify the Engineer, in writing, as soon as cars are loaded for shipment, giving car number, order number, reel and section numbers, size and quantity of cable, and shall forward with such statement bill of lading covering the shipment.

GENERAL CONDITIONS.

Sanitary District Law.

Art. 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove Obstructions from the Desplaines and Illinois Rivers," approved May 29, 1889, in force July 1, 1889, and all acts amendatory thereof and supplemental thereto.

Investigations.

Art. 2. The Contractor shall make all necessary investigations in order to become thoroughly informed as to the facilities for delivering the material or completing the work as specified. No plea of ignorance of conditions that exist, or that may hereafter exist, or of difficulties that will be encountered in making such deliveries as a result of a failure to make the necessary investigations, will be accepted as a sufficient excuse for a failure or omission on the part of the Contractor to fulfill in every detail all the requirements of this contract, or will be accepted as a basis for any claims whatsoever for extra compensation.

Additions and Alterations.

Art. 3. It is further agreed that the said Sanitary District may, at any time during the life of this contract, make any minor additions to, or alterations in, or deviations from these specifications without invalidating this contract, and a fair value of the same shall be added to or deducted from, as the case may be, the moneys herein agreed to be paid by the Sanitary District, provided that nothing shall be considered an extra charge in excess of the amount herein agreed to be paid unless a proper estimate in writing of the cost of the same before its commencement shall have been submitted to and signed by said Engineer.

The written approval hereinabove required on the part of the said Engineer shall be a condition precedent to any recovery by the Contractor for extra compensation.

Extras.

Art. 4. Whenever work is required to be done, which is not now contemplated and covered by the prices herein stipulated, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided he enters upon such work with a knowledge of the prices so fixed by the said Engineer; but if the Contractor declines to execute said

work at the prices fixed by the said Engineer, then the Sanitary District may contract with any person or persons for its execution the same as if this contract had never existed; and if extra work, or work not provided for in this contract, is performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall deem just and reasonable, and his decision shall be final and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if the extra work done under this contract is of such a nature, being distinct from other work being done by said Contractor, that, in the opinion of the Engineer, the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay, in full satisfaction for the same, the actual cost of the work, as determined by the Engineer, with fifteen per cent (15%) added for superintendence, use of tools and profit, provided that nothing shall be deemed extra work which can be measured or estimated under the provisions of this contract.

Estimating Extras.

Art. 5. It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of delay or of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto. In estimating the cost of extras, the cost of material shall be the actual price for same delivered as herein specified. The cost of labor shall be taken as the amounts paid for same as shown by the payrolls of the Contractor, with cost of insurance added, when such can be shown to have been paid. No charge for cost of administration will be allowed.

Supervision.

Art. 6. All deliveries of material under this contract shall be made under the direction and supervision of the Engineer and his properly authorized assistants.

Materials, Workmanship and Inspection.

Art. 7. All materials shall be of the specified quality, and will be subject to rigid inspection. If, in the opinion of the Engineer, said materials are not in accordance with the specifications, the same shall be made to conform therewith.

Progress Certificates.

Art. 8. It is further expressly provided that the granting of any progress certificate or the payment of any moneys hereunder shall in no way lessen the liability of the Contractor to replace any defective material, although the defect in the same may not have been detected at the time such certificate was given, or acted upon.

Patents.

Art. 9. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expense that may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any materials, machinery, devices, apparatus or process furnished or used in the performance of this contract, and in the event of any claim, suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the said Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Damages.

Art. 10. It is further agreed that if any damage shall be done by the Contractor or by any person or persons in his employ to any personal property, the Engineer shall have the right to estimate the amount of said damage, and to cause the Sanitary District to pay the same to the owner of said property and the amount so paid for said damages shall be deducted from the money due said Contractor under this Contract. Said Contractor covenants and agrees to pay all damages for any personal injury or death sustained by any person, growing out of any act or doing of said Contractor, or of the Contractor's employes that is in the nature of a legal liability, and the Contractor hereby agrees to indemnify and save the Sanitary Dis-

trict harmless against all suits or actions of every name and description brought against said Sanitary District to recover damages for or on account of any such injuries or death sustained by any person or persons from said Contractor or his agents or employes, in the performance of this contract; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, or his agents or employes; and it is further agreed that so much of the money due to the Contractor under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of said Board of Trustees.

Employers' Liability Act.

Art. 11. The Contractor further agrees to insure to his employes or their beneficiaries the necessary first aid, medical, surgical and hospital attendance and the compensation provided for in the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplemental thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District will not recognize any cidental injuries or death suffered by any of his employes in and about the performance of this contract.

Responsibility of Contractor.

Art. 12. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor will be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employes.

The Contractor shall not assign, by power of attorney or otherwise, any portion of the moneys that may become due through the performance of the work under this contract.

Liens.

Art. 13. If at any time during the performance of this contract, the said Contractor shall fail or neglect to pay for any labor performed, material or equipment furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon or on account of said work for thirty (30) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor or for materials, equipment, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make the payments hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporations, for labor, materials, equipment, tools, machinery, appliances, fuel, provisions, or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time.

Art. 14. The Contractor agrees to begin the work covered by this contract immediately upon approval by the Board of Trustees of said Sanitary District of the bond of said Contractor, and to complete the delivery of cable called for on each order within forty (40) days after the date of such order.

It is understood and agreed that

Time is of the essence of this contract, and that a failure on the part of any Contractor to complete the work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 15. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete delivery of cable called for on each order within the time specified in Article 14, then said Contractor shall pay to said Sanitary District the sum of ten dollars ($10.00) for each and every day that said Contractor shall be in default in the delivery of cable on each order.

Said sum of ten dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not deliver the cable covered by this contract on or before the time specified herein for the delivery of same, the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to time and liquidated damages for delays.

Extensions or Additions.

Art. 16. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time, but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to liquidated damages, and the said contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 17. The Contractor shall delay or suspend the progress of the work or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, providing, that in the event of such delay or delays or of such suspension or suspensions of the progress of the work, or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Forfeiture of Contract.

Art. 18. It is further agreed by and between the parties hereto that if said Contractor abandons this contract or fails financially, or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same, or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for furnishing and delivering the balance of the cable herein specified and award a contract therefor to the lowest responsible bidder, or the Sanitary District may purchase on the open market at the lowest price then obtainable, such quantity or quantities of cable as the said Contractor shall

fail to furnish and deliver as herein specified, notwithstanding such forfeiture, the cost of obtaining said cable, if the same is obtained by awarding a new contract therefor or if so purchased on the open market, and all costs and expenses incurred by the Sanitary District in purchasing and delivering such cable in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

Unavoidable Delay.

Art. 19. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States government, if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 19), in the opinion of the Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless the Contractor notify the Engineer in writing within four (4) days after the commencement of such delay.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 19), except for extra premiums on his bond, actually paid by said Contractor on account of said additional times so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Contractor's Bond.

Art. 20. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then, in that case, the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Prices.

Art. 21. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the materials, and for doing all the work contemplated and specified in this contract, also for all loss or damage, arising out of the nature of the work aforesaid or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work, and the whole thereof, in full compliance with the specifications, and the requirements of the Engineer under them and to allow the credits as shown, to-wit:

LEAD-COVERED CABLE.

Size of Conductors	Number of Conductors	Working Voltage	Price Per Foot
No. 0000 B. & S.	3	12,000	$1.59
No. 0000 B. & S.	4	5,000	$1.09

CABLE REELS.

Size	Price Each Delivered	Credit Each F. O. B. Cars Chicago
60"x24"	$30.00	$30.00
60"x41"	$30.00	$30.00

Payment.

Art. 22. The Contractor shall render bills, in duplicate, for the material furnished immediately upon delivery of same. The Sanitary District agrees to pay said Contractor at the prices stipulated herein for such material delivered on each order upon certificates signed by the Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amount to be paid on each order shall in no case exceed eighty-seven and one-half (87½) per cent of the contract price for the cable furnished on said order, the remaining twelve and one-half (12½) per cent being reserved by the said Sanitary District as part security for the faithful performance of this contract and shall not be paid until the expiration of thirty (30) days after the completion of this contract and the delivery of the final certificate of said Engineer.

Final Payment.

Art. 23. It is further agreed that the Contractor shall not be entitled to demand or receive final payment for any cable except in the manner set forth in this contract, nor until all of the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificate, pay and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid and as may be lawfully retained under the provisions of this contract hereinbefore set forth.

This contract shall be binding upon the legal representatives of said Contractor.

In Witness Whereof: On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Committee on Finance, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be duly executed in duplicate by its duly authorized officers, to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

Know All Men By These Presents, That we the General Electric Company, a corporation organized under the laws of the State of New York as principal and Fidelity and Deposit Company of Maryland as surety are held and firmly bound unto The Sanitary District of Chicago in the penal sum of forty-eight thousand seven hundred and ninety ($48,790.00) dollars, lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 27th day of March 1919.

The Condition of the Above Obligation Is Such, That whereas the above bounden General Electric Company has entered into a certain contract with the Sanitary District of Chicago, bearing date the 27th day of March 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for furnishing lead-covered cable.

Now, If the said General Electric Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and in the time and manner therein prescribed, and, further, shall

protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments costs, damages and expenses, and attorney's fees, which may in any wise come against The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said General Electric Company, its agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, process, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims and demands for necessary first aid medical, surgical and hospital services and compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said General Electric Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, and made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suit for damages occasioned by carelessness or neglect of said General Electric Company or its agents, employes or workmen in the premises, and also that any judgment or award or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois, rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28, 1913, in force July 1, 1913, as amended by an act of the General Assembly, in force July 1, 1915, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employes, in the course of their employment, when notice of the pendency of such suit or arbitration shall have been given said General Electric Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

General Electric Company, (Seal)

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen—Your Committee on Finance herewith transmits to the Board a grant of easement from Forrest Anderson, whereby, for the nominal consideration of $1.00 he grants to the Sani-

tary District a perpetual easement to construct by the tunnel method and to reconstruct, maintain and operate an intercepting sewer and appurtenances thereto in the Desplaines River district, in, under and through certain real estate owned by him. Said grant of easement permits the Sanitary District to transport material, equipment, excavated soil and debris across said property. The Sanitary District agrees to provide certain connections in said sewer for drainage purposes. Otherwise, said grant of easement is in the usual form used by the Sanitary District in such cases.

Your Committee further reports that it has examined said grant of easement which has been approved by the Chief Engineer and Attorney and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate said grant of easement which is hereto attached, the same having been duly executed by said Forrest Anderson.

Respectfully submitted,

JAMES H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 17, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of April payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
CHAS. H. SERGEL,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it is necessary to have two offices for the field party now employed on the Desplaines River intercepting sewer and the Desplaines River sewage treatment works to be located near the north end of said sewer in Maywood and the other at the site of said works.

He further states that the Sanitary District owns two sheet iron offices, now located in Maywood, which can be mounted on skids and moved to the sites designated above and he requests that he be authorized to have said work performed at a cost of approximately $250.00.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to have performed the work above specified provided the cost of the same shall not exceed the sum of $250.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
PATRICK J. CARR,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that the Board on April 10, 1919, (page 318 of the Proceedings) approved the specifications and drawings for a conduit line from 56th street and Western avenue to the Calumet Sewage Pumping Station and directed the Clerk to advertise for bids for the work to be performed in accordance with said specifications and drawings.

Your Committee on Engineering further reports that it has received a communication from the Electrical Engineer, in which he states that since said specifications and drawings were prepared he has been informed by the Department of Gas and Electricity of the City of Chicago, that said city proposes to install a conduit line in 103rd street, from Wood to Halsted streets, and that satisfactory arrangements might be made whereby the Sanitary District could use two ducts of said conduit line and be relieved from building about 6,600 feet of conduit in 103rd street.

He further states that the City of Chicago has planned to build a duct line from its substation at 103rd street and Halsted street to 120th street and Wentworth avenue and the Sanitary District, by changing the route of its proposed conduit line to conform to the new route of said city and building a line jointly with the City of Chicago could save a large sum of money and he recommends that the present specifications be changed to provide only for a conduit line from 56th street and Western avenue to 103rd and Wood streets.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the report of the Committee on Engineering adopted by the Board on April 10, 1919, be and the same is hereby amended by substituting in the first paragraph thereof, for the words "for a conduit line from 56th street and Western avenue to the Calumet Sewage Pumping Station," the words "for a conduit line from 56th street and Western avenue to 103rd and Wood streets.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
PATRICK J. CARR,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that about six hundred (600) feet of curbing on Prairie avenue south of 119th street, has settled to such an extent that it is necessary to reset the same at the proper elevation in order to leave said street in a good condition, and he requests that he be authorized to have said work performed at an estimated cost of $300.00.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to have the work above specified per-

formed, provided the cost of the same shall not exceed the sum of $300.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that it will be necessary to remove and replace a portion of the concrete curb and gutter along the east side of First avenue, just north of Madison street, in Maywood, in order to provide a manhole and sewer connection for the Desplaines River intercepting sewer.

He further states that said curb and gutter were built by the Village of Maywood after Nash Brothers entered into its contract dated July 8, 1918 (page 802 of the Proceedings) with the Sanitary District for the construction of said sewer and said work is not covered by the specifications therefor and he requests that he be authorized to order Nash Bros. to perform said work under the extra work clause of its contract, at an estimated cost of $50.00.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized to order Nash Bros. to perform the work above specified under the extra work clause of said contract, provided the cost of the same shall not exceed the sum of $50.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that the Chief Engineer has prepared specifications and plans for the pumping and pipework on the Calumet Sewage Pumping Station and the Evanston Sewage Pumping Station, which have been presented to your Committee for approval.

Your Committee further reports that it has considered said specifications and plans and has approved the same and therefore recommends the passage of the following order:

Ordered, That the specifications and plans prepared by the Chief Engineer for the work above specified be and the same are hereby approved, and be it further

Ordered, That the Clerk be, and he is

hereby authorized and directed to advertise for bids for the performance of said work, in accordance with the specifications and plans so prepared by the Chief Engineer.

Respectfully submitted,

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Nance—Eight.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Chief Engineer, in which he states that it is necessary to furnish and install two extra metal doors with steel frames, the necessary cut stone for lintels and sills and appurtenances thereto for the Calumet Pumping Station. He further states that said work was not specified in the plans for the construction of said pumping station, but the Building Commissioner of the City of Chicago refuses to approve said plans and issue a permit to construct said station until said work is specified and he requests that he may be authorized to order the T. J. Forschner Contracting Company to perform said work under the extra work clause of its contract at a cost not to exceed $350.00.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to order the T. J. Forschner Contracting Company to perform the work above specified under the extra work clause of said contract, provided the cost of the same shall not exceed the the sum of $350.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs, Sergel, Clark, Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN —Your Committee on Electrical Development herewith presents a renewal of contract with the Beverly Country Club, 87th and Western avenue, wherein said Beverly Country Club agrees to take and the Sanitary District agrees to furnish electrical energy for the time and upon the terms and conditions set forth in said contract, which contract has been approved by the Electrical Engineer.

Your Committee, having considered

said contract recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the attached contract which has been properly executed by said Beverly Country Club.

Respectfully submitted,
H. E. LITTLER,
Chairman.
WM. J. HEALY,
MATT A. MUELLER,
WALLACE G. CLARK,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, April 17, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Electrical Development reports that it has received a communication from the Electrical Engineer, transmitting an application from the Chairman of Decorations of the Architects Committee for the War Loan Organization for electrical energy for decorative lighting east of Michigan avenue, from Randolph to Twelfth streets, during the Victory Loan Drive from April 25th to May 10th, 1919.

The Electrical Engineer further states that the Sanitary District is now supplying service to the Kahki and Blue Club from a transformer, which was installed at Van Buren street, east of the Illinois Central Railroad tracks, from which service for said lighting could be supplied, and that if service was supplied said organization would have to make all extensions and pay all expenses of installation.

Your Committee having considered said matter is of the opinion that said service should be furnished upon the terms set forth in the communication of the Electrical Engineer above referred to at three quarters of a cent per kilowatt hour, which is the rate paid for service by said Khaki and Blue Club, and, therefore, recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby authorized and directed to enter into a contract with said War Loan Organization to furnish it with electrical service at the rate of three quarters of a cent per kilowatt hour, providing said organization makes all extensions and pays all expenses of installation.

Respectfully submitted,
H. E. LITTLER,
Chairman.
WM. J. HEALY,
MATT A. MUELLER,
WALLACE G. CLARK,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Clark Healy, Lawley, Littler, Mueller and Nance—Seven.

Nays—None.

ADJOURNMENT.

Mr. Mueller moved that the Board adjourn.

The motion prevailed.

John W. Gillen,
Clerk

JUN 6 - 1919

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, APRIL 24, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Lawley, Littler, Mueller and Nance—Seven.

Absent—Messrs. Healy and Paullin—Two.

BIDS.

The Clerk opened and read the bids received for furnishing and delivering timber for trestles at the Grand Trunk Western Railway Company's bridge over the Calumet-Sag Channel, as shown in the schedule appearing on page 351-A of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

The Clerk opened and read the bids received for furnishing, delivering and installing sewage treatment plant, pumping, electrical and miscellaneous equipment for the Des Plaines River Sewage Treatment Works, as shown in the

schedule appearing on pages 352A and 352 of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

GEORGE M. REYNOLDS,
Treasurer.

By J. R. WASHBURN,
Asst. Treasurer.

Chicago, April 23, 1919.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance submits herewith an ordinance for the levy of taxes for the fiscal year ending December 31, 1919, and recommends its passage.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

AN ORDINANCE

For the Levy of Taxes for the Fiscal Year Ending December 31, A. D. 1919.

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago.

SECTION 1. That there be and is hereby levied upon all taxable property within the territorial limits of The Sanitary District of Chicago for the fiscal year ending December 31, A. D. 1919, the amount of money hereinafter stated, as follows:

For the payment of the principal on maturing bonds the sum of one million, five hundred twenty-six thousand dollars ($1,526,000.00).

For the payment of accruing interest on bonds the sum of six hundred sixty-eight thousand, six hundred twenty dollars ($668,620.00).

For all other corporate purposes of said The Sanitary District of Chicago the sum of four million, three hundred eighty thousand, eight hundred thirty-eight and fifteen one-hundredths dollars ($4,380,838.15).

SEC. 2. That the Clerk of The Sanitary District of Chicago be, and he is hereby, directed to file with the County Clerk of Cook County a certified copy of this ordinance, and said County Clerk of Cook County aforesaid is hereby directed to cause the aforesaid amount of money to be extended upon and against the taxable property within the territorial limits of The Sanitary District of Chicago in accordance with the laws and statutes of the State of Illinois in such case made and provided; and the Clerk of The Sanitary District of Chicago is hereby directed to cause this ordinance to be immediately published at least once in a newspaper published within the territorial limits of The Sanitary District of Chicago and to incur the necessary expense therefor.

SEC. 3. This ordinance shall take effect and be in full force from and after its passage.

Approved:

CHARLES H. SERGEL,
President of the Board of Trustees of The Sanitary District of Chicago.

Approved as to Form:
C. ARCH WILLIAMS,
Attorney.

Mr. Lawley moved that the report be adopted and that the ordinance be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley, Littler and Nance—Six.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has had under consideration the subject of the removal and disposal of ashes from the Thirty-

ninth Street and Lawrence Avenue pumping stations and is of the opinion that said work should be done by contract, and, therefore, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to prepare specifications for the work of removing and disposing of ashes from said pumping stations, said specifications to be submitted to the Committee on Finance for approval.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley, Littler and Nance—Six.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has received a communication from the Attorney transmitting bills for taxes for the year 1918 in the sum of $9,521.28, which taxes have been assessed against lands owned by the Sanitary District in Cook County which are under lease to various tenants.

The Attorney further states said leases provide (except as to the lease with the Western Stone Co.) that the taxes are to be paid by said tenants and upon their failure so to do, the Sanitary District may pay same and charge the amount so paid to said tenants but that it is advisable for the Sanitary District to pay said taxes at this time as interest charges will accrue thereon beginning May 1, 1919.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw a warrant in the sum of $9,521.28 payable to Harry R. Gibbons, Treasurer of Cook County, but in case any of said tenants pay said taxes before May 1, 1919, to draw a warrant in a sum which shall be less than the sum above stated by the amounts so paid by said tenants, and deliver said warrant to said Treasurer in full payment of said taxes.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has received a communication from the Electrical Engineer in which he states that the Western Union Telegraph Co. owns eight poles on Ashland avenue, between Thirty-ninth street and the south fork of the south branch of the Chicago River, on which the Sanitary District has for some years been operating one

of its circuits under an agreement with said company, which provides that the Sanitary District may purchase said poles in the event that said Company discontinues the use of the same. He further states that said Company has notified him it intends to discontinue said use and has offered to sell said poles to the Sanitary District for the sum of $7.31 each, making a total of $58.50 and he recommends that the offer of said Company be accepted.

Your Committee, having considered the matter, is of the opinion that said poles should be purchased and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw a warrant in the sum of $58.50, payable to the Western Union Telegraph Co., and deliver the same to said Company on the receipt of a bill of sale for said poles.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has received a communication from the Attorney in which he states that he caused a Bill in Chancery to be filed in the Circuit Court of Will County to enjoin the County Treasurer of said County from collecting interest in the amount of two per cent over and above the ten percent heretofore paid by the Sanitary District for accrued interest on taxes assessed against the Sanitary District for the years 1915, 1916 and 1917, which taxes were in litigation, and also to exclude from taxation for the year 1918 certain personal property which had been taxed in the township of Lockport and in various school districts in said County. He further states that a hearing was had before Judge Dibell on said bill, who entered a decree on April 7, 1919, holding that the Sanitary District was liable for the payment of said additional two per cent interest, which amounts to the sum of $3,449.24, to be paid for taxes for the years 1915, 1916 and 1917. Said judge, however, reduced the amount of taxes assessed against the Sanitary District for the year 1918 by the sum of $1,966.61, making the total amount due for taxes for said year $43,871.61.

The Attorney also states that the taxes due for the year 1918 for property of the Sanitary District situated in the townships of Troy, Channahon and Joliet amounts to the sum of $4,880.70 and he recommends that the taxes in the amounts above stated be paid.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw warrants on the vouchers of the Real Estate Agent payable to Benjamin Jones, County Collector of Will County, in the following sums:

To balance due for interest on taxes on property of the Sanitary District situated in Lockport and DuPage townships for the years 1915, 1916 and 1917 ..... $3,449.24

To taxes for the year 1918 on property of the Sanitary District situated in Lockport and DuPage townships..... 43,871.61

To taxes for the year 1918 on property of the Sanitary District situated in the townships of Troy, Channahon and Joliet 4,880.70

and deliver said warrants to said County Collector in full payment of the taxes specified.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.
Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, April 24, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of April payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that the Board on February 27, 1919 (page 211 of the Proceedings) authorized the Chief Engineer to expend $15,000, in connecting certain farm drainage ditches with the Calumet-Sag Channel, to remove two flumes, construct about 800 yards of rip-rapping and do certain minor work.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that the work in question is really several small jobs, along twelve miles of the channel, none of which will cost more than $500.00, and for this reason he has taken informal bids from four contractors to do said work on a unit price basis, which he transmitted to your Committee.

Your Committee further reports that it has considered said bids and finds that the lowest was from E. A. Hanrahan of $1.00 per cubic yard for excavation, $1.00 per cubic yard for filling and $1.00 per square yard for rip-rapping, making a total cost of said work calculated on the estimated quantities $9,250.00, and

he also agrees to remove said flumes for the material therein.

The Chief Engineer recommends that said bid be accepted.

Your Committee is of the opinion that the recommendation of the Chief Engineer should be concurred in and therefore recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to accept the bid of E. A. Hanrahan for doing the work above specified for the unit prices specified, provided the cost of the same shall not exceed $9,250.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that in order to provide storage facilities for transformers and oil, it is necessary to extend the platform at the west end of the warehouse building to the garage building and enclose the existing and new platforms with sheet iron at an estimated cost of $330.00 for material and $240.00 for labor, a total of $570.00. He further states that the work of constructing said platform will be done by the regular employes of the Sanitary District and that the necessary material will be purchased in the open market for the lowest prices obtainable.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to have the work above specified performed on the basis stated, provided the total cost of the same shall not exceed the sum of $570.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that it is necessary to have one corner of the garage building partitioned off to be used as a small office, in which the Superintendent of Utility Equipment can make and keep his records; that the Architect has prepared an estimate of the cost of said improvement which shows that the

work can be done for approximately $90.00, $50.00 of which is for material and $40.00 for labor, which can be performed by the regular employes of the Sanitary District.

Your Committee, having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to have the work above specified performed, provided the cost of the same shall not exceed the sum of $90.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents contract with the Standard Sausage Company, a corporation, 957 West 37th street, wherein said company agrees to take and the Sanitary District agrees to furnish 75 K. W. of electrical energy for power purposes for the time and upon the terms and conditions therein set forth, which contract has been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate the attached contract which has heretofore been executed by said Standard Sausage Company.

Respectfully submitted,

H. E. LITTLER,
Chairman.

WALLACE G. CLARK,
MATT A. MUELLER,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed:

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.

Nays—None.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from Lagger & Blatt, attorneys, Joliet, Ill., making application for Albert Mutter of Joliet, for the right to collect and remove all oils, greases and other materials on the Main Channel between Chicago and the Controlling Works at Lockport, Ill.

Referred to the Committee on Engineering.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Lawley presented the following communication:

CHICAGO, April 24, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—On April 10, 1919 (page 323 of the Proceedings) the Board authorized the Marshal to purchase a

boat named the White Flyer for use of the Police Department at a cost not to exceed $1,450.00.

Said purchase has been consummated, and it is necessary under the regulations of the Federal authorities to appoint an agent to assume charge of said boat, and to authorize said agent to sign all documents and to subscribe to all oaths necessary for the documenting of the same.

I desire to recommend the passage of the following order:

Ordered, That W. E. Carter, Marshal, be and he is hereby appointed agent of the Sanitary District in charge of said boat, the White Flyer, and authorized to sign all documents and to subscribe to all oaths necessary for the documenting of said boat.

Respectfully submitted,
JAS. H. LAWLEY,

Approved:
CHARLES H. SERGEL,
President of the Board of Trustees of The Sanitary District of Chicago.

Mr. Lawley moved that the order be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley and Littler—Five.

Nays—None.

RECESS.

Mr. Clark called up the subject of a bill pending in the Legislature of the State of Illinois for the formation of "The Skokie Drainage District," and stated that it had been reported to him that the boundaries of said district embraced territory included in The Sanitary District of Chicago, and moved that the Board take a recess of five minutes to discuss the subject with a view of ascertaining what is necessary to be done in the premises. At the expiration of said time the Board reconvened.

Mr. Clark moved that the subject matter be considered at the meeting of the Committee on State and Municipal Relations, called for Monday, April 28, 1919, at 10:20 o'clock A. M., and that the Clerk be instructed to send notices of said meeting to all parties interested in said bill.

The motion prevailed.

ADJOURNMENT.

Mr. Clark moved that the Board adjourn.

The motion prevailed.

John W. Gillen,
Clerk.

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, MAY 1, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Absent—Mr. Clark—One.

BIDS.

The Clerk opened and read the bids received for furnishing coal screenings for the Thirty-ninth Street and Lawrence Avenue Pumping Stations, as shown in the schedules on pages 365-A and 365-B of the Proceedings.

Mr. Lawley moved that the bids be referred to the Chief Engineer for tabulation and to the Committee on Finance for report.

The motion prevailed.

The Clerk opened and read the bids received for underground conduit construction, as shown in the schedule on page 366-A of the Proceedings.

Mr. Littler moved that the bids be referred to the Electrical Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the regular meeting of April 17, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance herewith transmits to the Board a grant of easement from the Board of Education of Proviso Township High School District, whereby said Board of Education for the nominal consideration of $1.00 grants to the Sanitary District a perpetual easement to construct, reconstruct, maintain and operate an intercepting sewer and appurtenances thereto in the Desplaines River district, in, under and through certain real estate owned by said Board of Education. Said easement is in the usual form in use by the Sanitary District in such cases.

Your Committee further reports that it has examined said grant of easement which has been approved by the Chief Engineer and Attorney, and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the said form of easement, which is hereto attached, the same having been duly executed by said Board of Education of Proviso Township High School District.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

WILLIS O. NANCE,
MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it is advised by the Attorney that the annual appropriation ordinance of the Sanitary District for the year 1919, passed February 6, 1919 (page 131 of the Proceedings) for "Department of Law," Item No. 6, appropriates the sum of $2,000.00 for an "Assistant Attorney, four months at

MATT A. MUELLER,
GEORGE W. PAULLIN.
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Engineering.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering, to which were referred at the meeting held April 24, 1919 (page 352 of the Proceedings), bids for furnishing and delivering the sluice gates for the Desplaines River Sewage Treatment Works, designated as Division "V" of the specifications, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer, finds that the lowest responsible bidder is the Coffin Valve Company.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work and, having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing and delivering the sluice gates for the Desplaines River Sewage Treatment Works, designated as Division "V" of the contract, be and the same is hereby awarded to the Coffin Valve Company for the lump sum price of $6,250.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by the said Coffin Valve Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
H. E. LITTLER,
Vice-Chairman.
MATT A. MUELLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering to which were referred at the meeting held April 24, 1919 (page 352 of the Proceedings), bids for furnishing and delivering the electrical equipment for the Desplaines River Sewage Treatment Works, designated as Division "P" of the specifications, hav-

ing considered all the proposals presented and the qualifications of each bidder together with the report submitted by the Chief Engineer finds that the lowest responsible bidder is the W. A. Jackson Company of Chicago, Illinois.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work and having had the matter under consideration recommends the passage of the following order:

Ordered, That the contract for furnishing and delivering the electrical equipment for the Desplaines River Sewage Treatment Works, designated as division "P" of the contract, be and the same is hereby awarded to the W. A. Jackson Company for the lump sum price of $22,375.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by the said W. A. Jackson Company, and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
H. E. LITTLER,
Vice-Chairman.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following re-

port from the Committee on Engineering:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that the Board, on March 20, 1919 (page 277 of the Proceedings) authorized the Chief Engineer to direct A. Guthrie & Co., Inc., to care for and support the existing tracks of the Baltimore & Ohio Chicago Terminal Railroad Co. immediately adjoining the excavation of the Calumet-Sag Channel under the extra work clause of its contract, for the excavation and collateral work of contract Section 13 of the Calumet-Sag Channel, at a cost of not to exceed $10,000.00.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that he is advised by the officials of said railroad company that on January 1, 1918, the United States Government took over said railroad and all material on hand was inventoried and became the property of the Railroad Administration and, owing to the fact that the Congress failed to pass an appropriation for repairs and betterments and for work to be done under contracts, said railroad is not allowed to expend any money for anything but for operating expenses and therefore cannot proceed with the work specified in the agreement dated November 2, 1916 (page 443 of the Proceedings) between The Sanitary District and certain railroad companies for the crossing of the right of way of said companies with said Calumet-Sag Channel.

He further states that it is necessary to purchase material and to pay for the labor necessary to construct trestles and lay tracks ready to connect up with the existing tracks when traffic is diverted and that this work will cost about $15,000.00, which work, in addition to the sum of $10,000.00 authorized by said order of the Board of March 20, 1919, whether performed by the railroad company or by The Sanitary District through one of its contractors, must ultimately be paid by The Sanitary District.

The Chief Engineer recommends that he be authorized to direct A. Guthrie & Co., Inc., to perform the work above stated under the extra work clause of its contract for the construction of contract Section 13 of the Calumet-Sag Channel.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized to direct A. Guthrie & Co., Inc., to perform the work of constructing trestles and laying the tracks above specified under the extra work clause of its contract, for the construction of Section 13 of the Calumet-Sag Channel provided the cost of the entire work shall not exceed the sum of $25,000.00.

Respectfully submitted,

H. E. LITTLER,
Vice-Chairman.

MATT A. MUELLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that the Board, on October 11, 1911 (page 1200 of the Proceedings), accepted a grant of easement from John Gunzenhauser to construct and maintain what is known as the north diversion ditch of the Calumet-Sag Channel across certain real estate owned by him until August 30, 1917, and this grant was extended on September 11, 1917 (page 1255 of the Proceedings) to run until December 31, 1919.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that said grant of easement provides that the Sanitary District shall construct and maintain during the term of said grant a farm bridge over said north diversion ditch and that said bridge is in need of immediate repairs.

He further states that A. Guthrie & Co., Inc., offer to make the necessary repairs to said bridge at a cost of not to exceed $400.00, and recommends that said offer be accepted.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized and directed to accept the offer of A. Guthrie & Co., Inc., to perform the work above specified, provided the cost of the same shall not exceed the sum of $400.00.

Respectfully submitted,

H. E. LITTLER,
Vice-Chairman.

MATT A. MUELLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Mr. Littler presented the following report from the Committee on Engineering:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that the Board, on September 19, 1918 (page 1062 of the Proceedings) authorized the Chief Engineer to direct A. Guthrie & Co., Inc., to concrete the floors of the Baltimore & Ohio Chicago Terminal Railroad Company and the Grand Trunk Western Railway Company bridges across the Calumet-Sag Channel at a cost of $3,500.00 and $4,800.00, respectively, under the extra work clause of its contract for the excavation and collateral work of contract Section 13 of the Calumet-Sag Channel, which authority was never exercised by the Chief Engineer because of war conditions.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that the amounts above stated are insufficient for the performance of said work, and that it will cost the additional sums of $300.00 and $200.00 to concrete the floors of said respective bridges.

The Chief Engineer further states that the concrete floors in question are to be covered with a waterproofing material which is to be protected by three inches of concrete, and that said Baltimore & Ohio Chicago Terminal

Railroad Company, which agreed to perform said work at the cost of The Sanitary District, is not equipped to perform the same, and he requests that he may be authorized to direct A. Guthrie & Co., Inc., to perform said work under the extra work clause of its contract for the excavation and collateral work of said Section 13 at a cost of not to exceed $900.00, and to increase the amounts to be paid A. Guthrie & Co., Inc., under said order of September 19, 1918, for concreting said bridges in the respective amounts above stated.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby, authorized to direct A. Guthrie & Co., Inc., to perform the work of concreting the floors of the bridges of the Baltimore & Ohio Chicago Terminal Railroad Company and the Grand Trunk Western Railway Company herein specified under the extra work clause of its contract for the excavation and collateral work of Section 13 of the Calumet-Sag Channel, provided the cost of said work shall not exceed the sums of $3,800.00 and $5,000.00 for said respective bridges; and it is further

Ordered, That the Chief Engineer be, and he is hereby, authorized to direct A. Guthrie & Co., Inc., to perform the work of placing three inches of concrete over the waterproofing on the floors of said bridges under the extra work clauses of its said contract, provided the cost of same shall not exceed the sum of $900.00.

Respectfully submitted,
H. E. Littler,
Vice-Chairman.

Matt A. Mueller,
Patrick J. Carr,
Jas. H. Lawley,
Committee on Engineering.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Finance reports that it has examined and approved the bond of the Kenwood Bridge Company with the Fidelity and Deposit Company of Maryland, thereon as surety on its contract for furnishing and delivering the structural steel for the Desplaines River Sewage Treatment Works, designated as Division "C" of the specifications, for The Sanitary District of Chicago, and, therefore, recommends the passage of the following order:

Ordered, That the bond of the Kenwood Bridge Company for the faithful performance of the contract above specified, said bond being in the penal sum of $2,400.00, and the same is hereby approved; and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
H. E. Littler,
Vice-Chairman.

Matt A. Mueller,
Patrick J. Carr,
Jas. H. Lawley,
Committee on Engineering.

Mr. Lawley moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Faullin—Eight.

Nays—None.

The following is the contract and bond of the Kenwood Bridge Company:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR DES PLAINES RIVER SEWAGE TREATMENT WORKS.

THIS AGREEMENT, Made and entered into this first day of May, A. D. 1919, by and between the Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated The Sanitary District, and the Kenwood Bridge Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified that are necessary for furnishing and delivering the Structural Steel as called for under Division C of the attached specifications, complete, as specified, freight prepaid, on board cars, the Chicago and North-Western Railway in the Village of Maywood, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to cooperate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Division C, of the Des Plaines River Sewage Treatment Works.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the structural steel and all other fittings and appurtenances, including all material, labor,

tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each division of the entire sewage treatment works are numbered, A1, A2, etc., B1, B2, etc., C1, C2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

GENERAL SPECIFICATIONS.

Location of Work.

(1) The Des Plaines River Sewage Treatment Works are to be erected on property owned by the Sanitary District situated between 12th and 22nd streets, just west of the Des Plaines River and east of First avenue extended, in the Village of Broadview, County of Cook, State of Illinois.

Description.

(2) The work included under this contract and specifications consists in furnishing and delivering f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., the following: Division C, structural steel, including steel columns, roof trusses, purlins, lentels, crane girders, crane rails, floor beams, wall plates, anchors, bolts, washers, etc., shop painted.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Contract Drawings.

(4) Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the equipment included under this contract and the foundations for same, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as The Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment to make the same conform to the drawings as finally approved.

For the Contractor under Division C, The Sanitary District will prepare sheets of plans supplementary to the plans numbered C-1 to C-3, inclusive, in sufficient detail to serve as shop drawings, to cover any structural steel required and not already detailed on said sheets. These will be furnished to the Contractor by the Sanitary District within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by The Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Foundations.

(6) The foundations for all equipment included under Division C of this contract will be furnished by the contractor for Division A. These foundations will be brought up to within about one (1) inch of their final elevation.

After placing equipment thereon, the contractor erecting said equipment shall shim the same to the final elevation, using for this purpose approved metal wedges, and complete the foundation by grouting under and around the bases of the equipment.

Shipment.

(9) Unless otherwise notified, as specified in Article 27, the Contractor (under Division C) shall ship the material and equipment included under this contract, when ready, to the Chicago and Northwestern Railway, Maywood, Illinois, freight prepaid, consigned to the contractor named as the consignee by the Chief Engineer of the Sanitary District. All equipment shall be carefully crated, as required, and protected from dust, dirt and weather.

SPECIFICATIONS.

DIVISION C, STRUCTURAL STEEL.

Description of Work Included.

(C1) This contract covers the furnishing, fabrication and delivery of all structural steel work, field rivets, anchor bolts, crane rail clip bolts, washers, and all other metal work, complete, as shown on the plans or specified herein, required for the substructure, superstructure and miscellaneous appurtenances of the Desplaines River Sewage Treatment Works. Included are steel columns, roof framing including purlins, trusses, bracing, etc., built-up girders, floor beams, guides in openings to boiler room, crane runways, crane runway rails, lintels over windows and doors, trolley I-beams and supports in basement of pump room, eye bolts, foundation bolts, anchor bolts, all bearing and wall plates, anchors, all rivets, bolts, washers, clips, spacers and other structural steel work, complete, delivered f. o. b. cars, the Chicago and Northwestern Railway, Maywood, Ill., including shop painting, as specified and as shown on the plans or ordered by the Engineer, except as hereinafter provided.

The number of turned bolts of each size furnished by the Contractor shall be fifteen (15) per cent in excess of the number nominally required and the number of field rivets of each size shall be fifteen (15) per cent plus ten (10) rivets in excess of the number nominally required.

Framing.

(C2) The sizes of the principal members are shown on the plans numbered C-1 to C-3, inclusive. Additional details will be shown on the supplementary plans specified in Section 4. Before the execution of the work in the shop, the Contractor shall check the shop drawings furnished by the Sanitary District as specified in Section 4 and shall adjust all errors, omissions or differences with the Engineer before commencing the work. Six (6) sets of blue prints will be furnished by The Sanitary District from the plans forming a part of this contract. The Contractor shall furnish the Engineer in triplicate blue prints of any and all erection drawings. All connections and fastenings between the different members shall be of ample strength and all details shall be in accordance with the best accepted practice, subject to the approval of the Engineer.

MATERIAL.

Structural Steel.

(C3) All structural steel shall conform in every respect to the requirements of the "Standard Specifications for Structural Steel for Buildings," Serial Designation A 9-16, of the American Society for Testing Materials.

Stock material shall be used for any or all parts of the work hereunder for which material cannot be rolled so that the work can be completed within the time herein specified. In case the records of the chemical analyses and physical tests of such stock material are not available, a reasonable and sufficient number of tests of same to satisfy the Engineer as to its quality shall be furnished free of charge.

FABRICATION.

Workmanship.

(C4) All workmanship must be first-class in every respect and must conform to the latest and best practice. All material must be thoroughly straightened in the shop by methods that will not injure it before templates are placed on same for laying off and before any work is done upon it. Finished members must be absolutely straight and free from open joints and distortions of any kind. All shearing shall be neatly and accurately done and parts exposed to view shall be neatly finished. All necessary fillers, connections, and other minor details, not shown on the plans, but necessary for the work, shall be furnished without extra charge. All ma-

terial shall be kept clean and protected from the weather.

Rivets.

(C5) The size of rivets, called for on the plans, shall be the actual size of the rivets before heating.

Rivet Holes.

(C6) The diameter of the finished rivet hole shall not be more than one-sixteenth (1/16) inch greater than the diameter of the cold rivet. For unreamed holes, the diameter of the die shall in no case exceed the nominal diameter of the rivet called for on the plans by more than one-eighth (⅛) inch, and for reamed holes the diameter of the die shall be at least one-eighth (⅛) inch less than the nominal diameter of the rivet. All holes must be clean cut without torn or ragged edges.

Punching must be accurately done. Drifting to enlarge unfair holes will not be permitted. If holes must be enlarged to admit rivets they must be reamed. Poor matching of holes will be cause for rejection.

Reaming.

(C7) Reaming of rivet holes will not be required under this contract except in case of mismatched or misplaced holes and holes where turned bolts are placed, and except where expressly called for on the plans.

Milling.

(C8) All milling called for on the plans shall be done with suitable tools and the milled surface shall be smooth and true.

Milling of columns shall be done after the columns are riveted up complete except sole plates.

The entire ends of all stiffener angles must be carefully milled or ground to fit surfaces on which they are to bear.

Assembling.

(C9) All built-up members must be well pinned up and all parts drawn thoroughly together for riveting. No chipping or burrs will be allowed between the surfaces, and a sufficient number of bolts must be used to keep the parts in absolute contact. Before assembling the pieces shall be cleaned. The surfaces in contact shall then be painted one (1) heavy coat of the specified red lead paint before assembling for riveting. All pieces in the assembled member must be straight and true to line before riveting.

Riveting.

(C10) Rivets shall be uniformly heated to a light cherry red in a gas or oil furnace so constructed that it can be adjusted to the proper temperature. All rivets must be machine driven wherever possible, otherwise they must be driven with pneumatic hammers. The machines must be direct acting and capable of retaining the applied pressure after the upsetting is completed.

All rivets when driven must be absolutely tight and must completely fill the holes. The rivet heads must be round and of uniform size for the same size rivets throughout the work. They must be full and neatly made, concentric with the rivet holes, with the under side of the heads in close contact with the metal, and shall thoroughly pinch the connected pieces together. No calking or recupping of cold or loose rivets will be allowed. Loose, burned or defective rivets shall be cut out and replaced without injuring adjacent metal. If necessary in order to avoid injury to the surrounding metal, they shall be drilled out. Bolts shall not be substituted for rivets except by special permission of the Engineer, in which case the bolts shall be turned and the number shall be increased as the Engineer may direct. All heads of countersunk rivets shall be chipped smooth unless otherwise noted on the plans.

Annealing.

(C11) Steel which has been partially heated shall be properly annealed except where used in minor details. Steel shall not be welded.

Bolts.

(C12) All turned bolts shall be made of structural steel and shall be turned to a driving fit unless otherwise specified or shown on plans. The diameter of the thread must be one-sixteenth (1/16) inch less than the diameter of the finished bolt to prevent injury in driving. The bolt must fit tight the entire length of the hole and all threads must be outside of the hole. Washers not less than one-quarter (¼) inch thick shall be used under nuts, and steel beveled washers shall be used under heads and nuts on all inclined surfaces. Holes for turned bolts must be reamed parallel and square with the members, with all parts assembled.

Rough bolts used for bolting connections of purlins and crane girders as

shown on the plans shall be structural steel.

Nuts.

(C13) All nuts shall be hexagonal in shape and all threads shall be close fitting, truncated "V" threads. United States Standard.

Plate Girders.

(C14) When web plates are spliced not more than one-quarter (¼) inch clearance between ends of plates will be allowed.

The web stiffeners of plate girders shall have a full close bearing against the flange angles. Filler and splice plates between stiffeners or connecting angles and web shall fit within one-eighth (⅛) inch of flange angles.

Fillets.

(C15) All re-entrant cuts shall be filleted and both fillet and cut finished. No unfilleted cuts will be allowed.

PAINTING.

Painting in Shop.

(C16) All metal work furnished hereunder by the Contractor shall be painted in the shop after fabrication and before exposing to the weather, unless otherwise directed by the Engineer.

No metal work shall be painted until it has been accepted by the inspector. In riveted work all surfaces in contact shall be cleaned and shall receive one (1) heavy coat of red lead paint, hereinafter specified, before assembling for riveting. Surfaces between angles or other shapes riveted closely together in pairs and other surfaces not in contact, but inaccessible after riveting, shall receive two (2) coats of the specified red lead paint. All of the work shall be thoroughly scraped and brushed on all surfaces, and all mill scale, rust and dirt removed, using approved stiff scrapers and wire brushes. All greasy surfaces shall be carefully cleaned with benzine. Before taking out of the shop, all structural work and castings shall receive one (1) good coat of the specified red lead paint, well brushed in. No painting with air will be allowed. All erection marks shall be on painted surfaces. All paint must be dry when the material is loaded on cars. Painting on cars is positively prohibited.

No painting shall be performed upon damp or frosty metal, or in wet, foggy or freezing weather, or if such weather is indicated, except by the express permission of the Engineer and in the manner the Engineer may direct. Any painting found defective shall be scraped off and repainted as the Engineer may direct. Before final acceptance of the work hereunder all damaged surfaces of paint shall be cleaned and repainted or touched up to the satisfaction of the Engineer. The manufacturer of any paint used shall have the authority at all times to inspect the storage, handling and application of same.

All brushes used in painting shall not be larger than 8/0 oval or four (4) inch heavy flat, all-bristle brushes, well bridled. Oval brushes are preferred.

Paint.

(C17) The shop coat of paint herein specified and the paint for rivet heads and for spotting or repainting damaged surfaces of the shop coat of paint shall consist of the red lead and raw linseed oil mixed in the proportions of twenty-five (25) pounds of dry red lead, or thirty-five (35) pounds of red lead paste, to each gallon of linseed oil with the addition of not more than one-half (½) pint of pure turpentine or pure turpentine Japan dryer, or a total of not more than one-half (½) pint of both of the same, as the Engineer may permit.

The mixing of dry red lead shall be performed with a proper churn or other device approved by the Engineer, unless a small quantity is mixed, and it must be kept stirred and used immediately after mixing. The pigments shall be thoroughly incorporated with the oil.

All linseed oil shall be pure, clear, well settled raw linseed oil conforming to "Standard Specifications for Purity of Raw Linseed Oil from North American Seed," Serial Designation D1-15, adopted in 1913, revised in 1915, by the American Society for Testing Materials.

All red lead paste shall be manufactured from red lead and the specified linseed oil, and shall contain not less than ninety-two (92) per cent by weight of red lead. The red lead shall have a true red lead content (Pb_3O_4) of not less than ninety-five (95) per cent and shall be of such fineness that not less than ninety-nine and one-half (99½) per cent will pass through a two hundred (200) mesh screen. All red lead paste shall be capable of standing until used without perceptible hardening. All hardened paste will be rejected.

The brands of oil, red lead and red lead paste, shall be submitted to and shall be approved by the Engineer before delivery at the shop or at the work.

Any material delivered not of the brand or quality approved by the Engineer will be rejected.

All paint, red lead, linseed oil and dryer shall be delivered at the work in the original unbroken containers bearing the manufacturer's brand, and the containers shall be opened only in the presence of the Engineer. All paints shall be thoroughly stirred before being taken from the containers, shall be kept stirred while using, and all ready mixed paint shall be applied exactly as received from the manufacturer without the addition of any kind of a dryer or thinner except as directed by the Engineer.

Ready Mixed Red Lead Paint.

(C18) A ready mixed red lead paint manufactured under inspection from red lead or red lead paste, and linseed oil, all of a purity at least equal to that herein specified and of a brand or formula satisfactory to the Engineer, which paint shall contain not less than eighteen (18) pounds of dry red lead in each gallon of paint, may be used in lieu of the red lead paint hereinbefore specified if the Engineer shall permit, subject to all conditions as to manufacture, proportions of ingredients, analyses, inspection and use and as to time limits for use of such paint, that the Engineer may require. Inspection of the manufacture of ready mixed red lead paint shall be performed by an inspection bureau designated by the Engineer and the cost of such inspection shall be paid by the Contractor.

Analyses.

(C19) Analyses of samples of any paint, oil or pigments, as furnished or as applied, may be made from time to time as the Engineer may direct, and if such samples be found not to comply with these specifications the paint may be rejected and the cost of analyses of such material shall be paid by the Contractor without charge to The Sanitary District.

WEIGHTS.

Measurement.

(C20) The weight of structural steel work to be paid for shall be the actual scale weight of the steel work as delivlivered.

The Contractor shall provide all necessary facilities for the determination of the correct scale weight of all material by the Engineer. The weight stated in the shipping invoices shall be certified by the Engineer, and no uncertified weight in excess of the weight as calculated from the shop plans will be paid for. In no case, however, shall the total weight of metal to be paid for exceed the total weight of such metal as calculated from the shop plans by more than two and one-half (2½) per cent.

DELIVERY OF MATERIAL.

Shipping.

(C21) All parts shall be carefully loaded for shipment so as to avoid injury in transportation and shall be at the Contractor's risk until delivery of all material is completed in accordance with the plans and as herein specified. All rivets, bolts and similar small material shall be securely boxed and the boxes shall be plainly marked with paint, to show their contents and the net weight of the same. Every piece of metal work not boxed shall have its weight plainly marked upon it with paint, unless of a size too small to permit of such marking. Complete shipping invoices shall be made of every shipment and three copies of each invoice shall be sent to The Sanitary District at the time the shipment is made. Such invoices shall state the weight, description and erection mark of each piece that is not boxed and the contents and net weight of same in each box. All weights given shall be the actual net scale weights, certified to as correct by the Engineer, not estimated weights.

Delivery.

(C22) The metal work herein specified shall be delivered free on board cars at Maywood, Illinois, on a team track or side track of the Chicago and North-Western Railway, to be designated by the Engineer, located at or near the Maywood freight station of said railway.

The Contractor may, at his own expense, make delivery by teams, motor trucks or other vehicles at the site of the work, on the land owned by the Sanitary District, Broadview, Illinois, at such point as may be designated by the Engineer.

The Contractor shall complete the metal work included hereunder in sufficient time to deliver same on or before the date hereinafter specified for delivery of such metal work, unless otherwise directed by the Engineer in writing. The Contractor shall notify the Engineer in writing of the date when

said metal work will be ready for shipment to The Sanitary District, such notification to be received by the Engineer at least ten (10) days previous to the date when such metal work will be ready for shipment, and no metal work shall be shipped to The Sanitary District until the Contractor shall have received the written order of the Engineer to ship same, designating the time of delivery of such metal work and the contractor to whom said metal work is to be consigned. The Contractor shall not be required, however, to deliver the metal work previous to the date hereinafter specified for the delivery of same. All of the metal work shall be shipped at one time or in shipments immediately following each other unless otherwise directed or permitted by the Engineer.

Payment.

(C23) The unit price specified to be paid per pound for structural steel work shall include the furnishing, fabrication and delivery of the steel work complete, with bolts, nuts and washers, rivets, and other fastenings, and all specified painting, and shall include the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

GENERAL CONDITIONS.

Sanitary District Law.

ARTICLE 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

Omission on Plans.

ART. 3. The plans furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Enginer, notwithstanding any minor omissions in the specifications or drawings.

Approximate Quantities.

ART. 4. It is expressly understood and agreed by the parties hereto that the quantities of the various classes of work to be done and material to be furnished under this contract, which have been estimated as stated in the "Requirements for Bidding and Instructions to Bidders," attached hereto, are only approximate and are to be used solely for the purpose of comparing on a uniform basis, the proposals offered for the work under this contract; and the Contractor further agrees that The Sanitary District will not be held responsible if any of said quantities shall be found incorrect; and said Contractor will not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done. If any error, omission, or mis-statement shall be discovered in the said estimated quantities, the same shall not invalidate this contract or release the Contractor from the execution and completion of the whole or any part of the work herein specified, to the satisfaction of the Engineer and in accordance with the specifications and the plans herein mentioned and for the prices herein agreed upon and fixed therefor, or excuse him from any of the obligations or liabilities hereunder, or entitle him to any damages or compensation otherwise than may be provided for in this contract, except for such extra work as may be required, for the performance of which written orders must be given and received as herein specified.

Changes in Plans.

ART. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the

amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and The Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

ART. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided, however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Wherever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then The Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against The Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and The Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

ART. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

ART. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All inspection of any and all material furnished for use in work to be performed under Division A, shall be made at the site of the work after delivery of the material; provided that, if requested by the Contractor, the Engineer may at his option perform, or have performed, inspection of material at points other than at the site of the work. In any such case the Contractor shall pay The Sanitary District the extra cost of such inspection, including the necessary expenses of the inspector and the salary of the inspector for the extra time expended in performing any such inspection at such other points.

Under Division C, all structural steel work will be inspected, however, without expense to the Contractor, if all the structural steel is fabricated in one shop.

Under Division O, the fabrication of material will be inspected at the shop or shops where fabricated. The Engineer shall have full access at all times to all parts of the shop where material under his inspection is being manufactured. If ordered by the Chief Engineer, the Engineer shall stamp each piece accepted with a private mark and any piece not so marked may be rejected at any time and at any stage of the work. If the Engineer, through an oversight or otherwise, has accepted material or work which is contrary to the specifications, this material may be rejected, regardless of the stage of completion.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. Provided, however, that for material or equipment furnished under Divisions C, N, O, P, R, V, W, where delivery is specified, f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., any damage done after delivery shall be repaired by the contractor furnishing the material and equipment and shall be paid for by the contractor responsible for the damage. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

(Division A) The Contractor shall be guided by the lines, stakes, marks and grades given by the Engineer and shall carefully preserve the same as far as possible during the progress of the work, and shall furnish all needed facilities, without extra charge therefor, to enable the Engineer to properly give lines and grades and measure the work from time to time.

Progress Certificates.

ART. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Patents.

ART. 20. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by The Sanitary District, and in

the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then The Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Provided, however, that the obligations imposed on said Contractor by this Article 20 shall not apply to claims for infringements of patents on activated sludge processes or machinery or equipment used in connection therewith.

Damages.

ART. 21. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause The Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save The Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by The Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

ART. 22. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State"; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912"; approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

ART. 23. The Contractor shall be responsible for the entire work until completed and accepted by The Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

ART. 24. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that

said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided, shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of The Sanitary District.

Liens.

ART. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time and Progress.

ART. 27. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor for Division C hereby agrees to fabricate and deliver to the railroad, or otherwise ship the structural steel within one hundred (100) calendar days from the said date of approval of the bond.

The words "deliver to the railroad" or "deliver" as used in this article shall be understood to mean delivery f. o. b. cars, The Chicago and North-Western Railway, Maywood, Illinois.

It is understood and agreed that TIME is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

ART. 28. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division C within the respective time specified in Article 27, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of ten dol-

lars ($10.00) for Division C for each and every day that said Contractor shall be in default in the completion of said work ready for operation.

Said sum of ten dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to TIME AND LIQUIDATED DAMAGES FOR DELAYS.

Extensions or Additions.

ART. 29. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to LIQUIDATED DAMAGES, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

ART. 30. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from The Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

ART. 31. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of The Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States Government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 31), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 31) except compensation for

wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by The Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Division C.

ART. 32. It is further agreed by and between the parties hereto that if said Contractor abandons this contract or fails financially, or from any other cause whatsoever is unable to carry out the terms and conditions of this contract, and is unable to complete the same, or if he assigns this contract without the consent of The Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for furnishing and delivering the balance of the material, machinery or equipment herein specified and award a contract therefor to the lowest responsible bidder, or The Sanitary District may purchase on the open market at the lowest price then obtainable, such quantity or quantities of material, machinery or equipment as the said contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The cost of obtaining said material, machinery or equipment, if the same is obtained by awarding a new contract therefor or if so purchased on the open market, and all costs and expenses incurred by The Sanitary District in purchasing and delivering such cable, material, machinery or equipment in excess of the cost hereunder to said Sanitary District, shall be paid to The Sanitary District by said Contractor.

Contractor's Bond.

ART. 33. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of The Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Prices.

ART. 35. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

DIVISION C.

Structural Steel.

For furnishing and delivery, complete, of the structural steel, including columns, roof trusses, purlins, lintels, crane girders, crane rails, floor beams, wall plates, anchors, bolts, washers, etc., with shop painting, all as specified f. o. b. cars, the Chicago and North Western Railway, Maywood, Ill., the sum of no dollars and four cents ($0.04) per pound.

The structural steel will be fabricated at Chicago, Illinois, in the shops of the Kenwood Bridge Company.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work per-

formed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

ART. 36. Division C. It is agreed that in case the Engineer shall not direct or permit the Contractor to deliver said metal work within a period of one (1) month after the date herein specified for the delivery of same or within a period of one (1) month after the time when all of said metal work is actually fully completed satisfactory to the Engineer if completed after said specified date, then said Sanitary District upon the expiration of not more than two (2) months after said date specified for completion of said metal work, or after said time of actual completion of said metal work, if completed after said specified date, shall pay to the Contractor, on account, a sum equal to eighty-five (85) per cent of the value, as estimated by the Engineer, of said metal work. All of said metal work for which said payment is made shall thereupon become the property of said Sanitary District and shall be so marked by the Contractor and shall be stored separate and apart from all other material in the possession of said Contractor, in a manner satisfactory to the Engineer, but shall be stored at the sole risk of the Contractor.

When the entire delivery of said metal work has been completed as herein specified, and when the same has been inspected and found to be complete and in accordance with the specifications and contract, the Engineer will give his certificate to that effect. Whereupon said Sanitary District, at the expiration of thirty (30) days after such complete delivery and the issuance of such certificate, will pay, and it hereby binds itself to pay to the said Contractor the amount shown by said certificate to be due to the said Contractor, excepting such sums as may be lawfully retained under any of the provisions of this contract.

Final Payment.

ART. 37. Upon the completion of all the work included under this contract, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay, the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

IN WITNESS WHEREOF, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President and to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, The Kenwood Bridge Company, a corporation organized under the laws of the State of Illinois, as principal and Fidelity and Deposit Company of Maryland as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Twenty-four Hundred Dollars and no/cents ($2,400.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this first day of May, A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH that, whereas, the above bounden Kenwood Bridge Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the first day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the furnishing and delivering the structural steel as specified under Division "C" of the attached contract, f. o. b. cars, the Chicago and North-Western Railway, in the Village of Maywood, County of Cook, State of Illinois, as specified under Division C of the attached contract.

Now, if the said Kenwood Bridge Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Kenwood Bridge Company, its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, except insofar as all liability on account of claims for infringements of patents on activated sludge processes or machinery, or equipment used in connection therewith, is expressly exempted; and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayments of overpayments and including all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Kenwood Bridge Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, and made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Kenwood Bridge Company or its agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the

course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Kenwood Bridge Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Attorney.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has examined and approved the bond of the Leyden-Ortseifen Company with the New Amsterdam Casualty Company thereon as surety, for the faithful performance of its contract for the construction of the Desplaines River Sewage Treatment Plant designated as Division "A" of the specification for The Sanitary District of Chicago, and, therefore, recommends the passage of the following order:

Ordered, That the bond of the Leyden-Ortseifen Company for the faithful performance of the above specified contract, said bond being in the penal sum of $192,140.63, be, and the same is hereby approved; and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

The following is the contract and bond of the Leyden-Ortseifen Company:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR DES PLAINES RIVER SEWAGE TREATMENT WORKS.

THIS AGREEMENT, Made and entered into this first day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Leyden-Ortseifen Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty erpressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for furnishing, delivering and erecting the

Sewage Treatment Plant and the apparatus, equipment and appurtenances thereto, as called for under Division A of the attached specifications, complete, as specified, at the Des Plaines River Sewage Treatment Works of the Sanitary District in the Village of Broadview, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision, shall be final and conclusive and such estimate and decision in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Division A, of the Des Plaines River Sewage Treatment Works.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the sewage treatment plant with appurtenances, structural steel, pumps, electrical equipment, including motors and accessories, transformers, controlling apparatus, switches, switchboards, blowers, sluice gates, Venturi meters, and all other fittings and appurtenances, including all material, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each division of the entire sewage treatment works are numbered, A1, A2, etc., B1, B2, etc., C1, C2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

GENERAL SPECIFICATIONS.

Location of Work.

(1) The Des Plaines River Sewage Treatment Works are to be erected on property owned by the Sanitary District situated between 12th and 22nd streets, just west of the Des Plaines River and east of First avenue extended, in the Village of Broadview, County of Cook, State of Illinois.

Description.

(2) The work included under this contract and specifications consists in furnishing, delivering and erecting at the site of the Des Plaines River Sewage Treatment Works, the following:

Division A.—Sewage Treatment Plant, including excavation, concrete, reinforcing steel, cast iron piping, gate valves, tile piping and miscellaneous material and equipment to construct an activated sludge plant.

The contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Provisions for Handling Equipment at Site.

(3) The Sanitary District will reserve a right-of-way to the station site, from First Avenue on the west. A hand crane will be installed under Division A and will be available for handling the equipment to be installed in the pump and blower room. The Contractor shall operate this, however, at his own expense, and shall properly oil and maintain it during his use thereof.

The Contractor under Division A shall, at his own expense, provide any temporary blocking, supports or other protection for the pump and blower room floor necessary to prevent injury to the same, and shall make good at his own expense any damages done by him to the station structure or its appurtenances or to the equipment handled in unloading from the cars, hauling, unloading, and installing any of the equipment included under this contract for erection under Division A, or in removing plant or other property or in cleaning up.

It is expected that the superstructure of the station will be sufficiently advanced at the time of installation to afford protection from storms to the equipment included under this contract after the same is within the superstructure walls. The Contractor under Division A shall, however, furnish such protection as may be necessary against temperature, dust, dirt, and humidity, and shall be fully responsible for the protection of such equipment until its final acceptance.

Contract Drawings.

(4) Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the equipment included under this contract and the foundations for same, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use. Under this head plans and information shall be furnished by the Contractor, in part, as follows:

DIVISION A.

Spiral Riveted Steel Pipe.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as the Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment to make the same conform to the drawings as finally approved.

For the Contractor under Division A, the Sanitary District will prepare sheets of plans supplementary to the plans numbered A-1 to A-24, inclusive, in sufficient detail to serve as shop drawing for the iron castings, and for the reinforcing steel. These will be furnished to the Contractor by the Sanitary District within a reasonable time after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, as required for the prosecution of the work. The Sanitary District will also

prepare supplementary drawings of the piping layouts and list the cast-iron pipe and specials.

Of the minor equipment for which drawings may not be required, the Contractor shall furnish to the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalog number and type of equipment proposed, together with such prints, dimensions, specifications, samples, or other data, as may be required to permit intelligent judgment of the acceptability of the equipment proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Prior to the issuance by the Engineer of the final certificate specified in Article 37, the Contractor shall furnish to the Engineer a set of record blue prints of the various equipment, as actually installed, for which drawings are required from the Contractor.

These drawings shall include complete wiring diagrams and such plans and elevations and sectional assemblies as may be necessary to show the size, location and method of assembly of all parts of the equipment, to facilitate the dismantling and reassembling of the same. Each part shown shall be identified by a number and each drawing shall contain a bill of material giving the name, material and number required of each part. Such dimensions shall be given on the drawings as are desirable for the proper erection and adjustment of the equipment.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Foundations.

(6) The foundations for all equipment included under Divisions C, N, O, P, R, V, W, of this contract will be furnished by the contractor for Division A. These foundations will be brought up to within about one (1) inch of their final elevation. After placing equipment thereon, the contractor erecting said equipment shall shim the same to the final elevation, using for this purpose approved metal wedges, and complete the foundation by grouting under and around the bases of the equipment.

Foundation Bolts.

(7) The foundation bolts for the pumps, electrical machinery, blowers, and other equipment furnished by the Sanitary District will be furnished by the Sanitary District and placed by the Contractor under Division A, in accordance with substantial templates constructed by him to dimensions furnished by the contractor for the equipment to be set. Previous to setting any piece of equipment on its foundation the Contractor shall satisfy himself that these bolts are properly placed and shall make no claim against the Sanitary District for any expense incurred in resetting of equipment due to any error in the bolt setting. Should any such error be discovered, the same will be corrected by the Sanitary District, unless the error be due to incorrect dimensions furnished by the contractor for the equipment furnished, in which case expense of making such corrections shall be paid by said contractor furnishing the equipment.

Shop Tests.

(8) Each pump shall be tested in the shop to such an extent as may be necessary to determine the balance of the moving parts and the character of the workmanship.

Each motor shall be tested in the shop for efficiency, insulation and operating characteristics, except as hereinafter specified.

All tests shall be made in the presence of the Engineer. The Contractor, at his own expense, shall supply in place and ready to use, all necessary power, apparatus, wiring, piping and instruments and shall make the tests, and shall provide all facilities for the Engineer to inspect the work previous, during or subsequent to the test and to calibrate and otherwise check all the instruments used in the tests.

Should the above tests and inspections show any failure on the part of any of the equipment to fulfill the requirements of these specifications, the Contractor shall forthwith, at his own expense make such changes and repairs to the equipment as may be necessary to make the same conform to the specifications before shipment to the site of the work, and shall again provide all the necessary equipment and facilities and shall make the tests as outlined herein.

Guarantees.

(10) Before the completion of the work and immediately prior to the issuance of the final certificate, the Contractor shall furnish a maintenance bond or guarantee against all improper workmanship or materials, for the period stated from the date of the completion of the work, as herein specified, under Article 34. This date shall be taken as the date when the Board of Trustees of The Sanitary District of Chicago approves the final voucher of the Contractor.

Cutting, Fitting and Patching.

(11) The Contractor for Division A shall execute all cutting and repairing that may be required in the work under Division A by other contractors. Wherever possible the other contractors shall give in advance definite information to the Engineer so that the Engineer can instruct the Contractor under Division A to leave the required holes and chases, as the work progresses. Should any cutting be required through the neglect of any contractor to give the necessary information to the Engineer, sufficiently in advance, the Engineer will order the work done by the appropriate trade at the expense of the contractor at fault. Excessive cutting will not be allowed. Only sharp tools suitable for the purpose shall be used. The cutting of beams, purlins, joists or other structural features shall be done only at the places directed by the Engineer.

Any cutting of work placed by other contractors and required by the Contractor under Division A to install his work after the work of other contractors is in place, and the patching of the same must be done by the contractor doing that branch of the work. The cost of the same, for any work required by the Contractor under Division A shall be paid by him to the other contractor.

SPECIFICATIONS.

DIVISION A.

SEWAGE TREATMENT PLANT.

General Description.

(A1) The work to be done under Division A of this contract includes building a sewage treatment plant of the type known as activated sludge. The work includes the furnishing and placing of all material necessary to construct the substructure of a pump and blower house, screen house and pipe gallery, together with a grit chamber, aeration tanks, settling tanks, sludge storage tanks, connecting piping for sewage, air piping, coal and ash-pocket, outfall to river, connecting conduits and drainage of ground; and further the performing of all excavation and concrete work, the furnishing and placing of reinforcing steel, cast iron work, etc., the furnishing and laying of a cast iron water pipe, grading, surfacing, building a macadam pavement, gravel walks, and other miscellaneous work and appurtenances as shown on the plans and herein specified.

Underground Structures.

(A2) Various underground and other structures are shown on the plans hereto attached, including water and gas pipes, sewers, telephone and telegraph conduits and poles, hydrants, fire alarm poles and conduits, electric poles and conduits and manholes for various purposes. The location and dimensions of such structures, where given, are believed to be reasonably correct, but do not purport to be absolutely so. All known underground structures are plotted on the plans and profiles of the information of the Contractor, but information so given is not to be construed as a representation that such structures will be found or encountered as plotted. Other structures may also

be encountered not shown on the plans. All structures encountered shall be taken care of by the Contractor at his own expense, except such structures as the owners thereof are required to remove or maintain in accordance with existing ordinances of the Village of Maywood and the Village of Broadview.

ITEM 1—EARTH EXCAVATION.

Description.

(A3) The Contractor shall make, in open cut, to the lines and grades given by the Engineer, all excavation, required for building the structures, laying the pipes, drains, and conduits, building the connection to the inlet sewer, manholes, and appurtenances, and shall excavate any other material which, in the opinion of the Engineer, is desirable, for any purpose appurtenant to the construction of the work.

Excavation shall include clearing the site of the work, the loosening, loading, removing, transporting and disposing of all materials, wet or dry, necessary to be removed for purposes of construction, the furnishing, placing and removing of all sheeting and bracing, the draining, pumping and backfilling of trenches and pits, the supporting of structures above and below the ground, and all other work the cost of which is herein specified to be covered by the unit price to be paid for earth excavation.

Character of Material.

(A4) Contours of the ground are shown on the plans hereto attached. These contours are believed to be reasonably correct but do not purport to be absolutely so, and, together with any schedule of quantities, are presented only as an approximation. It is not expected that rock will be found. Samples of borings made with a four (4) inch hand auger and samples from two test-pits are on file in the Engineer's office. The results are plotted on the plans for the information of the Contractor, but are not guaranteed. The Contractor must satisfy himself regarding the character or amount of loam, peat, clay, sand, quicksand, gravel, glacial drift rock and all other material to be encountered and work to be performed.

Clearing.

(A5) The site of all excavation, embankments and fills shall be first cleared of all trees, buildings, fences, lumber, stumps, brush, weeds, and rubbish, which shall be removed or disposed of in a satisfactory manner.

Stripping Black Soil.

(A6) The black soil shall be removed to such depth as shall be directed from all places where excavations are to be made and where grading is to be done. The loam shall be stored and then used as directed for the surfacing of the finished grading and ground, when the work has been cleaned up. The black soil shall be spread to a depth of 12 inches in surfacing the grading around the pump and blower house, and in the immediate vicinity thereof."

Trenching and Trimming.

(A7) In excavating for the connections to the inlet sewer and for all sewers, conduits, pipe lines, and in similar work, the trenches between the lines of sheeting must be of sufficient width to permit the work to be constructed in the manner and of the size specified.

In all excavation for sewers or other conduits built in place, wherever the nature of the ground will admit, the bottom of the excavation is to have the shape and dimensions of the outside of the invert of the sewer. In order to secure this shape, the Contractor is to provide a pattern or form made with two outlines, one to fit the outside and the other the inside of the invert. This form is to be firmly and securely set to the proper grade as given by the Engineer, and is to remain unmoved in position until after the masonry is laid. The bed for the sewer is to be brought to the required shape, by trimming with suitable tools to a line stretched between the outsides of the masonry and the form.

At and below the spring-line bearings of all sewer arches the masonry is to bear directly on the original ground or sheeting, and, in general, all sheeting in masonry bearing is to be cut off as ordered by the Engineer and left in place.

The excavation for the bottom of the various structures, including the pump and blower house, meter vault, grit chamber, screen chamber, aeration tanks, settling tanks, sludge concentration tanks, pipe gallery, etc., shall be neatly trimmed to the lines

and grades given by the Engineer. In particular, care shall be taken in trimming for the settling tanks.

Where indicated on the plans or ordered by the Engineer the excavation shall be made as far as possible to permit backing the concrete directly against the solid earth.

Unauthorized Excavation.

(A8) Wherever the excavation is carried beyond or below the lines and grades given by the Engineer, the Contractor shall, at his own expense, refill all such excavated space with such material and in such manner as may be directed, in order to insure the stability of the various structures. Beneath all structures, space excavated without authority shall be refilled with concrete by the Contractor at his own expense. In general all space excavated without authority at and below the springline bearing of all sewer arches shall be filled with concrete by the contractor at his own expense.

Additional Excavation.

(A9) It is expected that satisfactory material for foundation will be found at the elevations shown on the plans, but in case the materials encountered are not suitable, or in case it is found desirable or necessary to go to additional depths or widths, the excavation shall be carried to such additional depth or width as the Engineer may direct. Additional excavation so ordered, and concrete ordered for filling such additional excavation will be paid for at the respective unit prices herein specified for excavation and concrete.

Shoring.

(A10) All trenches and other excavations shall be properly sheeted and braced, to furnish working conditions acceptable to the Engineer. The bracing shall be so arranged as not to place any stress on portions of the completed work until the general construction thereof has proceeded far enough to provide ample strength, in the opinion of the Engineer. Any damage to structures occurring through settlements, water or earth pressures, slides, caves, or other causes, due to failure or lack of sheeting or bracing or improper bracing, or through negligence or fault of the Contractor in any other manner shall be repaired by the Contractor at his own expense.

Removal of Timbering.

(A11) Where it is found necessary to sheet at the bottom, the trenches for the concrete sewers, pipes or other structures, the lowest section of sheeting shall be driven, or cut off after driving, in such lengths as the Engineer may direct. Such sheeting shall be left in place and utilized as an outside form for concrete.

Where required, all timbering or other supports shall be removed and upon their removal all voids shall be carefully filled as directed.

No payment will be made to the Contractor for any lumber, sheeting, or shoring left in place, except on the 42-inch outlet sewer, and then only if ordered in writing by the Engineer. If any timbering is ordered in writing by the Engineer to remain in place, such timber shall be cut off as directed, and that remaining in place will be paid for under Item 22 at the unit price of thirty dollars ($30.00) per thousand feet board measure, as specified herein, but no allowance will be made for loss or waste.

Removal of Water.

(A12) The Contractor shall at all times during construction provide and maintain ample means and devices with which to promptly remove and properly dispose of all water or sewage entering the excavations or other parts of the work, and keep said excavations and the structures dry until the structures to be built therein are completed. No masonry shall be laid in water nor shall water be allowed to rise over masonry until the concrete or mortar has set at least 24 hours.

The Contractor shall, when required by the Engineer, pump out and keep free from water the suction chamber, suction and discharge piping and connections, during the erection of the pumps. He shall also remove the water after the suction chamber, pump suction and discharge piping have been tested for tightness. He shall further remove the water, when ordered by the Engineer, so that the suction chamber and all other work under this contract can be inspected before the final acceptance thereof. He shall furnish at his own expense all water used for testing purposes, both of structures and piping and

shall remove the water as required, when the tests are completed.

The Sanitary District will maintain a concrete or brick bulkhead in the existing inlet sewer to which the Contractor is to connect. The Contractor shall maintain at all times and operate, wherever necessary, sufficient pumping plant to promptly remove all water, including seepage from the bulkhead, from the suction chamber of the pumping station, and keep the entire work free from water until the contract is completed. The Contractor shall be liable for all damage by flooding to any machinery, apparatus or material of any kind whatsoever, whether stored, in process of erection, or erected, in the pump and blower room, boiler-room, basements, storeroom, coal pocket, or any other part of the sewage treatment works, or on the property of the Sanitary District, belonging to said Contractor or to any other contractor employed on the Desplaines River Sewage Treatment Works by the Sanitary District, or to the Sanitary District, provided that in case the said bulkhead fails the Contractor shall not be held liable for damage caused by the failure, if said failure causes more than a reasonable amount of leakage through or around the bulkhead.

The Contractor shall dispose of the water from the work in a suitable manner, without damage to adjacent property. No water shall be drained into work built or under construction on other contracts of the Desplaines River intercepting sewer unless the consent of the Engineer is first obtained.

Disposal of Material.

(A13) Material excavated shall be disposed of in backfilling, building embankments, making fills, or grading around the work, as may be directed and to the lines and grades given by the Engineer. No additional payment will be made for any excavated material used in filling or building embankments around structures or roads, or in grading.

No excavated material shall be dumped near enough to the work to cause pressures against newly set masonry, objectionable in the opinion of the Engineer.

All materials excavated and not disposed of as herein specified shall be removed at once by the Contractor at his expense.

Backfilling.

(A14) All lumber, rubbish and braces shall be carefully removed from behind walls or other structures, unless ordered left in place by the Engineer. Unless otherwise specified, all trenches or excavations shall then be backfilled up to the original surface of the ground or to such grades as shall be directed. The backfilling shall be done as completely as possible, and the material shall be moistened and well tamped in such a manner as to prevent after-settlement. Around all structures, the trenches and excavations shall be flooded with water while the backfilling is being placed. The filling shall be made with the best material available, selected especially for the purpose and free from stones over three (3) inches in diameter, particularly immediately in and around pipe sewers.

On the concrete sewer connection, conduits, and other arched structures built in place, after the arching is completed and before the centers are struck, and on vitrified tile pipe sewers, after the sewer has been placed, and the joints have permanently set as approved by the Engineer, the trench is to be carefully filled by depositing without shock and by tamping suitable earth or sand or other selected material at the sides and to a height of not less than two (2) feet above the top of the arch or pipe. This shall be graded evenly across the trench. This amount of backfilling must be done at once, and in particular before any filling is deposited directly from a machine bucket, cars, wagons, or other vehicles. The backfilling shall be brought up evenly and all eccentric loading shall be avoided. In no case will dumping from a bucket be allowed to fall directly upon a sewer arch, conduit, or tile pipe; and in all cases the bucket must be lowered so that the shock of the falling earth will not injure the sewer structure.

The time elapsed before backfilling begins shall be subject to the approval of the Engineer. In all cases the backfilling shall be left with a smooth, even surface and a sufficient crown. All backfilling shall be carried along as speedily as possible, the trench

being filled as soon as the mortar and masonry are sufficiently set.

Where shown on the plans, or ordered by the Engineer backfilling shall done with sand, as specified under Item 23.

Rock.

(A15) For all rock excavation, the Contractor will receive a compensation of three dollars ($3.00) per cubic yard, as herein specified under Item 2.

Protection of Streets and Traffic.

(A16) The Contractor shall not block the free passage of vehicles and foot passengers on First Avenue or Twelfth Street. The sidewalks must not be obstructed, unless it is necessary for the execution of the work. Neither the materials excavated nor the materials or plant used in the construction of the work shall be so placed as to endanger the work or prevent free access to all fire hydrants, water valves, gas valves, manholes on electric, telegraph and telephone conduits, or fire alarm or police call boxes in the vicinity.

Care of Existing Structures.

(A17) All existing poles, trees, fences, sewer, water, gas or other pipes or conduits, electric, telegraph, telephone and other conduits and manholes or other structures in the vicinity of the work shall be supported and protected from injury by the Contractor, during the construction and until the completion of the work, except as hereinafter specified. The Contractor shall be liable for all damages done to such poles, trees, fences, pipes, and structures, as above provided, and shall save and keep the said Sanitary District harmless from any liability or expense for injuries, damages or repairs to the same.

The Sanitary District has placed a brick bulkhead in the sewer connections to which the suction well is to be connected. This bulkhead will be left in until the work under this contract is completed. It shall then be removed by this Contractor at his own expense, when ordered by the Engineer.

Repairing Ditches and Fences.

(A18) All ditches filled or damaged by the Contractor shall be repaired as the Engineer may direct, without delay, as soon as the work immediately adjacent is completed. All fences removed or damaged by the Contractor shall be replaced or repaired as the Engineer may direct, without delay as soon as the work immediately adjacent is completed.

Measurement.

(A19) All excavation will be measured in place inside the lines and grades given by the Engineer. Excavations for the connection to the inlet sewers, substructure of buildings, grit chamber, tanks, including aeration, settling and sludge tanks, pipe gallery screen chamber, outfall conduit, Venturi meter vaults, manholes, miscellaneous structures, etc., will be measured from the surface to the neat lines of the bottom of the structures or to such greater depths as the Engineer may order and between vertical planes starting from the outside neat lines of the base of the structure and extending upward vertically to the ground surface. Where this plane of measurement intersects intermediate benches or foundation elevations, the lines of measurement will follow along the intermediate bench to the outside of the structure at the new elevation and then on a vertical plane to the surface of the ground. A typical line of measurement is indicated on Sheet A-5 of the plans.

Excavations for cast iron pipe lines other than water pipes shall be measured between vertical planes two (2) feet farther apart than the inside diameter of the barrel of the pipe and from the surface of the ground to the elevation of the invert of the pipe. No allowance shall be made for bell holes, gates or other purposes.

All other excavation will be measured within the lines and grades actually given by the Engineer. No excavation shall be measured more than once, within the lines and grades actually given by the Engineer, even if two or more pipes or structures are built in the excavation.

No payment, however, will be made at the unit price for excavation specified to be paid under Item 1, for any excavation required in placing and laying macadam pavement, in laying 8-inch and 12-inch tile pipe, in laying tile underdrains, or in laying 6-inch cast iron water pipes, hydrants or gate valves.

No measurement will be made for excavation not to be paid for at the

unit price per cubic yard. The cost of such excavation shall be included in the prices to be paid under the respective items as above specified.

Payment.

(A20) The unit price specified to be paid per cubic yard for excavation under Item 1 shall include the excavation of all materials in place, other than rock, and shall include all clearing and grubbing, all backfilling to the lines and grades given by the Engineer, the disposal of all surplus material, all sheeting, shoring, and removal of water, and clearing up of the ground and the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 2—ROCK EXCAVATIONS.

Description.

(A21) It is not expected that any rock or large boulders will be encountered in the excavation. If such material is found, it will be paid for at the rate of Three Dollars ($3.00) per cubic yard, in addition to the unit price to be paid under Item 1 for earth excavation.

The Contractor shall excavate within the lines and grades shown on the plans or given by the Engineer and shall satisfactorily dispose of in fills or spoil banks, all ledge rock or boulders which cannot be handled with picks and shovels with reasonable facility. When placed in fills, the pieces of rock and boulders shall be kept separated so that the earth may fill solidly around them and prevent settlement later.

Measurement.

(A22) In estimating the number of cubic yards of rock work, the actual yardage of rock removed will be paid for as determined by the measurements of the Engineer. Boulders four (4) cubic feet and over in size will be measured as rock excavation. Hard pan, small boulders, clay, shale and similar material shall not be classed as rock, although it may be more economical to remove the same by blasting. The term "rock" is to be interpreted to include only large boulders, or solid limestone or sandstone rock in its original bed.

No claim for an amount of money in excess of the contract price of the work will be entertained or allowed on account of the character of the ground in which the trench or other excavations are made, except for the rock work heretofore specified.

Payment.

(A23) For all rock excavation occurring under this contract as herein specified, the unit price of Three Dollars ($3.00) per cubic yard will be paid under Item 2, in addition to the unit price to be paid under Item 1 for earth excavation, which sum is agreed by the Contractor to be full compensation for all labor, materials and appurtenances necessary to complete the work as specified.

ITEM 3—MACADAM PAVEMENT.

Description.

(A24) The Contractor shall construct a macadam roadway and gutter, as shown on the plans or as ordered by the Engineer, and to the lines and grades given by the Engineer.

The Contractor shall construct the macadam road at the beginning of the work, and shall maintain it in good condition to the completion of the work, without charge. He shall arrange his work so that the roadway is kept open and passable at all times, for other contractors.

Item 3 comprises the clearing of the areas to be paved, the preparation of the sub-grade, the construction of the macadam pavement, the maintenance of the work and all other items incidental thereto.

The price specified to be paid per square yard of finished macadam pavement shall include the furnishing of all labor, tools, material and appurtenances necessary to carry out the work as shown on the plans and as herein specified and to fully complete the pavement ready for use and traffic; and shall also include the providing of watchmen, signs, fences, red lights and all other precautionary measures necessary for the protection of persons and property, the clearing of the ground, the excavation and filling required to prepare the areas to be paved and all other work herein specified to be performed under Item 3.

Sub-Grade.

(A25) The Contractor shall clear the areas to be paved of all roots, trees, timbers, fences, pipes, debris or other obstacles and shall remove such materials from the site of the

work. He shall perform all excavations and all filling necessary to bring the sub-grade to the required elevations. All excavated materials shall be disposed of as specified in Section A13. Where filling is required the Contractor may place in the embankment suitable selected materials from the surplus excavation under Item 1.

All soft, spongy and yielding spots, and all vegetable or perishable material shall be entirely removed from the sub-grade and the space refilled with gravel, broken stone or other suitable material.

The sub-grade sixteen (16) feet wide shall be brought to a firm, unyielding surface by thoroughly rolling with a self-propelled roller weighing not less than ten (10) tons, and all portions of the surface of the sub-grade that are accessible to the roller shall be thoroughly tamped with a hand tamper about ten (10) inches in diameter, and weighing not less than fifty (50) pounds.

The sub-grade of the two (2) gutters each two (2) feet wide shall be rolled thoroughly with a hand roller weighing not less than six hundred (600) pounds per lineal foot of roller.

The shoulders for the gutters along both sides of the main sixteen (16) foot roadway constructed hereunder shall be rolled and compacted after the macadam has been placed and rolled as specified in section A26.

After the sub-grade is prepared the surface elevations of the same shall be determined, and if correct, accepted by the Engineer before any stone is deposited on it. If not correct, such alterations shall be made as are ordered to attain the desired grade.

Macadam.

(A26) Upon the sub-grade, sixteen (16) feet wide, prepared as herein specified, shall be spread a sufficient quantity of first-class limestone macadam of uniform size, to make a layer, when thoroughly rolled seven (7) inches thick. The broken stone shall have its diametrical axes as near as possible the same length, of a size to pass through a ring seven (7) inches in diameter, and be retained on a ring two (2) inches in diameter. The crushed stone shall be clean, hard, durable particles of stone free from loam, clay or organic matter, soft or micaceous pebbles or other impurities. Upon this layer of broken stone shall be spread a sufficient quantity of limestone screenings to fill all interstices and thoroughly bond the stone. The entire surface shall be thoroughly flooded with water and rolled with a ten (10) ton steam roller until the material is solidly compacted to a true, even surface.

Medium.

(A27) Upon the macadam specified in Section A26 shall be spread a layer of medium crushed limestone of a size to pass through a two (2) inch ring, but be retained on a one (1) inch ring. A sufficient quantity shall be placed to produce, when thoroughly rolled, a layer five (5) inches thick. Upon this shall be spread a sufficient quantity of limestone screenings to entirely fill all interstices and completely bond the medium crushed stone. The surface of the roadway shall then be kept well sprinkled and rolled with a ten (10) ton roller until the road is thoroughly and solidly compacted and no further settlement takes place.

The broken stone and screenings shall be crushed from hard, durable limestone, screened to the proper size, and free from loam, clay, and other foreign matter. All materials used in the macadam pavement and the methods of placing same shall be subject to the approval of the Engineer.

All surplus gravel, or surplus crushed stone, screenings or other debris shall be cleaned from the surface as ordered by the Engineer.

Upon the sub-grade prepared for the two gutters specified in section A25 shall be spread a layer of medium crushed limestone of a size to pass through a two (2) inch ring, but be retained on a one (1) inch ring. A sufficient quantity shall be placed to produce, when thoroughly rolled, a layer six (6) inches thick. Upon this shall be spread a sufficient quantity of limestone screenings to entirely fill all interstices and completely bond the medium crushed stone. The surface shall be kept well sprinkled and rolled with the hand roller specified under section A25 until thoroughly compacted and no further settlement takes place.

Maintenance.

(A28) The Contractor shall maintain the macadam pavement during the period of this contract, shall re-

pair the roadway embankments and pavements whenever depressions or other defects appear in same by placing and compacting additional filling material and paving material, and by performing other work thereon as the Engineer may direct, and shall leave the pavement in good condition and true to grade upon completion of all work hereunder.

Measurement.

(A29) No extra or customary measurements of any kind will be allowed in measuring the work under these specifications. The actual number of square yards of surface of macadam pavement placed will be measured by the Engineer and used in computing the square yards of macadam pavement to be paid for. Both the gutters and main sixteen (16) foot roadway shall be included for measurement.

No payment will be made at the unit price specified to be paid per cubic yard for excavation under Item 1 for any excavation made to construct the macadam pavement, complete, as specified under this item.

Payment.

(A30) The unit price specified to be paid per square yard for macadam pavement, under Item 3 shall include the excavation, filling and preparation of the sub-grade, furnished and placing of material, the rolling and compacting, disposal of all surplus excavation, cleaning up of ground, care of existing structures, maintenance, etc., as specified, and furnishing of all labor, material, appurtenances, etc., necessary to complete the work as specified.

ITEM 4—STONE WALKS.

Description.

(A31) The Contractor shall construct the crushed stone walks, as shown on the plans or as ordered by the Engineer, and to the lines and grades given by the Engineer.

Item 4 comprises the clearing of the area to be made into walks, the preparation of the sub-grade, the construction of the gravel or crushed stone walks, the maintenance of the work and all other items incidental thereto.

The price specified to be paid per square yard of finished gravel walk shall include the furnishing of all labor, tools, material and appurtenances necessary to carry on the work as shown on the plans and as herein specified, to fully complete the walks ready for use; and shall also include the providing of all precautionary measures necessary for the protection of persons and property, the clearing of the ground, the excavation and filling required to prepare the areas to be paved and all other work herein specified to be performed under Item 4.

Sub-Grade.

(A32) The Contractor shall prepare the sub-grade as specified in Section A25, so far as the same may apply. The roller used shall weigh at least two hundred (200) pounds per lineal foot of roller.

Medium.

(A33) Upon the sub-grade specified in Section A32 shall be spread a layer of medium crushed limestone of a size to pass through a two (2) inch ring but be retained on a one (1) inch ring. A sufficient quantity shall be placed to produce, when thoroughly rolled, a layer six (6) inches thick. Upon this shall be spread a sufficient quantity of limestone screenings to entirely fill all interstices and completely bond the medium crushed stone. The surface shall be kept well sprinkled and rolled with the hand roller specified in Section A32 until thoroughly compacted and no further settlement takes place. All material shall be of the quality specified in Section A27.

If gravel is used, the material shall be a bank gravel graded from fine to coarse and free from stones, which will not pass through a two (2) inch ring, and shall contain sufficient cementing material to make a firm, hard walk. It shall contain not more than 25 per cent of loam, clay, or other fine material which will pass through a screen having a clear mesh of one-quarter (¼) inch.

Maintenance.

(A34) The Contractor shall maintain the walks as specified in Section A28.

Measurement.

(A35) No extra or customary measurements of any kind will be allowed in measuring work under these specifications. The actual number of square yards of surface of stone walk placed will be measured by the Engineer and used in computing the

square yards of stone walk to be paid for.

No payment will be made at the unit price specified to be paid per cubic yard for excavation under Item 1 for any excavation made to construct the macadam pavement, complete, as specified under this item.

Payment.

(A36) The unit price specified to be paid per square yard for stone walks, under Item 4, shall include the excavation, filling and preparation of the sub-grade, furnishing and placing of material, the rolling and compacting, disposal of all surplus excavation, cleaning up of ground, care of existing structures, maintenance, etc., as specified, and furnishing of all labor, material, appurtenances, etc., necessary to complete the work as specified.

ITEMS 5, 6, 7—CONCRETE.

Description.

(A37) All concrete used in the construction of the sewage treatment plant, in the substructure of the buildings, the connection to the sewer inlet, grit chamber, screen foundations, aeration and sludge tanks, outfall to river, conduits, outfall, manholes and appurtenances shall be made and placed in accordance with the following general specifications, supplemented by the specifications under other headings and as shown on the plans or directed by the Engineer.

Proportions.

(A38) Concrete shall be divided into three (3) classes of mixtures, to be used as herein specified.

Class A concrete shall be composed of one (1) volume of cement, one and one-half (1½) volumes of sand, and three (3) volumes of gravel. If broken stone is used, Class A concrete shall be composed of one (1) volume of cement, one and one-half (1½) volumes of sand, and two and one-half (2½) volumes of broken stone. This shall be used in the west wall of the pump room, in the other walls of the pump room below elevation + 37 C. C. D., in the east and west walls of the pipe gallery and elsewhere as noted on the plans or ordered by the Engineer.

Class B concrete shall be composed of one (1) volume of cement, two (2) volumes of sand, and four (4) volumes of gravel. If broken stone is used, Class B concrete shall be composed of one (1) volume of cement, two (2) volumes of sand, and three and one-half (3½) volumes of broken stone. This shall be used in the inlet connection to the sewer, in roof over coal and ash pocket, floors, beams, and struts, galleries in pump room, basement and floor of blower room, grit chamber, aeration tanks, settling tanks, sludge tanks, conduits, and elsewhere as noted on the plans or ordered by the Engineer, except where Class A or C concrete is specified or ordered by the Engineer.

Class C concrete shall be composed of one (1) volume of cement, three (3) volumes of sand and six (6) volumes of gravel or broken stone. The filling around the 24-inch air pipe and 30-inch tile pipe, between the blower house and pipe gallery shall be Class C concrete, as shown on the plans or ordered by the Engineer, otherwise Class C concrete shall be used for filling, and other similar purposes only when and as ordered by the Engineer.

The sand and gravel or broken stone shall be so graded in size that the cement shall more than fill the voids in the sand, and the sand and cement shall more than fill the voids in the broken stone or gravel. One bag of cement, weighing at least ninety-four (94) pounds net shall be regarded as having a volume of one (1) cubic foot, and the sand and gravel shall be measured loose.

If required, the mixtures shall be modified as directed by the Engineer, by changing the relative volume of sand and ballast, but keeping the aggregate of the volumes of sand and ballast the same. The proportions shall be determined by volumes, the sand and ballast when measured being packed not more closely than by throwing them in the usual way into a barrel or box. Suitable measuring devices shall be provided by the Contractor. These shall be maintained and operated at all times in a manner to give the proportions of crushed stone or gravel, sand, and cement, as specified herein.

Portland Cement.

(A39) The cement shall be first-class Portland cement of a reputable brand satisfactory to the Engineer. It shall be delivered in cooperage or in bags and stored in weather-proof

buildings having a wooden floor raised above the ground, and sufficient stock shall be kept on hand to allow at least twelve (12) days for testing. All necessary facilities shall be provided by the Contractor to permit of the inspection of the individual shipments, each of which shall be kept separate. All unsatisfactory cement shall be promptly removed from the work. The cement shall conform to the most recent standard specifications of the American Society for Testing Materials, serial designation C9-17, as published in 1918. Tests will be made in general accordance thereto, with limits as follows:

Specific gravity shall be not less than three and one-tenth (3.1).

Fineness shall be such that seventy-eight (78) per cent shall pass through the number two hundred (200) sieve.

Time of setting. The cement shall not acquire its initial set in less than forty-five (45) minutes and must have acquired its final set within ten (10) hours.

Tensile strength. Briquettes after being kept the time specified shall develop a tensile strength per square inch as follows:

Age.	1 Cement, 3 Sand.
7 days	200 lb.
28 days	300 lb.

Soundness. Pats shall be satisfactory after storing one (1) day in air, followed by exposure to steam for five five (5) hours.

Sand.

(A40) Sand for concrete and mortar shall be silicious material, well graded from fine to coarse, and not more than six (6) per cent shall pass through a sieve having one hundred (100) meshes per lineal inch, and not more than five (5) per cent shall be retained on a screen having one-quarter (¼) inch holes. All sand shall be clean, hard, free from soft particles, vegetable matter or other deleterious material, and shall be subject to the approval of the Engineer. Screenings shall not be used as a substitute for sand in concrete or mortar.

Crushed Stone or Gravel.

(A41) Crushed stone or gravel shall consist of clean, hard, durable particles of stone, well graded between the limits of one-quarter (¼) and one and one-quarter (1¼) inch, with the diametrical axes as nearly as possible the same length, with all dust and all particles less than one-quarter (¼) inch removed. It shall be free from loam, clay, organic matter, soft or micaceous pebbles or other impurities. When directed, for thin sections of concrete, a finer stone than specified above shall be used, and for very heavy sections a coarser stone may be permitted.

The Contractor shall store and handle both sand and crushed stone or gravel in an approved manner to keep the material clean and free from foreign substances.

Water.

(A42) Water for mortar, concrete, flooding trenches and for all other purposes shall be provided by and at the expense of the Contractor and shall be free from oil, acid, strong alkalies or vegetable matter. Water from the Desplaines River shall not be used for concrete or mortar.

The Contractor shall note the provisions of Section A82.

Forms.

(A43) The Contractor shall provide suitable water-tight centers or forms with smooth surfaces of ample strength and rigidly braced. The bracing shall be entirely adequate to prevent deviations from the correct lines. No center or form shall be used which is not clean and of proper shape and strength and in every way suitable. Deformed, broken, or defective centers or forms shall be removed from the work. Before placing concrete, the forms shall be coated with vaseline, form grease or other suitable substance, approved by the Engineer, to prevent adherence of concrete. All forms and form lumber once used shall be thoroughly cleaned and recoated before being used again.

All wooden forms shall be built of clean, No. 1 yellow pine lumber, reasonably free from knots, dressed on all sides and neatly fitted. Tongued and grooved material shall be used where required. Not less than two (2) inch lumber shall be used in forms, except by express permission of the Engineer. The use of one (1) inch lumber will be permitted, if properly braced. The form surface shall be watertight, securely fastened by nails, screws or bolts to the ribs or supports.

All forms shall be thoroughly braced to keep them in exact position

and alignment during the placing and setting of the concrete. All wall forms shall have their sides tied together by wires or other approved ties, as far as possible.

On all horseshoe and circular sections of the outfall, conduits, sewer or sewer connections, the Contractor shall build first the bottom strip in the invert in the shape of a continuous block to support the forms in the trench. This block is to be molded, either in sections not over sixteen (16) feet long if end screeds are used with a longitudinal straight edge, or between parallel longitudinal screeds, all carefully floated to a true, smooth, hard finish and shall be thoroughly set before the forms are placed on it.

No centers or forms on any part of the work shall be struck without the consent of the Engineer.

The Contractor shall furnish a sufficient number of centers and forms so that the work can be prosecuted rapidly.

Templates.

(A44) The Contractor shall furnish and place all templates required for setting the foundation bolts required for any equipment to be erected by him under Item 21 of this contract, and for the electrical equipment to be furnished under Division P and for miscellaneous equipment to be furnished under Divisions C, V, X. These templates shall be carefully made to dimensions furnished by the Sanitary District, and shall be thoroughly checked by the Contractor when in place. The Contractor shall also set all anchor bolts required.

Wooden templates, as ordered by the Engineer, shall be furnished by the Contractor at his expense and no additional payment will be made therefor.

Mixing.

(A45) The concrete shall be mixed in an approved machine of the batch type, except that when relatively small quantities are to be used, resort may be had to hand mixing, but only by consent of the Engineer. Accurate measuring devices shall be used for proportioning the aggregate, cement and water. The mixing shall last at least two (2) minutes with each batch of concrete and not less than twenty (20) revolutions, and shall be thorough and continued until every particle of ballast is completely covered with mortar. The Contractor shall supply a clock or other means for determining the time of mix. When necessary to mix by hand, a watertight platform shall be used and ingredients shall be turned together at least six times, and until they are homogeneous in appearance and color. No concrete shall be placed after its initial set has occurred, and no retempered concrete shall be allowed to be used under any conditions. The mixtures shall be moderately wet, of a consistency to flow sluggishly into forms and around reinforcement and not to cause a separation of fine from coarse material in transportation from the mixer to the work.

Placing of Concrete.

(A46) After mixing, the concrete shall be transported rapidly to the place of deposit. It shall be carried up level along the whole length of the section under construction, and shall be so placed as to avoid rehandling within the forms. It shall be spaded or rammed into place and shall be thoroughly compacted around reinforcement, pipes, or other shapes built into the work. On the interior surfaces of the sewer connections, suction chamber, all interior walls of the substructure of the buildings, and on all exposed faces of the various tanks and connecting channels, grit chamber, screen foundations and pipe gallery, it shall be thoroughly spaded to bring rich mortar to the face. Particular care shall be taken at all points where water tightness is a prime requisite.

If a long spout is used in pouring concrete, the spout shall be wet with Portland cement mortar along its entire length before the first batch of concrete is released from the hopper, after each period when the spout is not in use.

Concrete shall not be placed in water nor shall water be allowed to rise over freshly placed concrete or mortar until the concrete or mortar has obtained final set.

Smooth Surfaces.

(A47) With the use of moderately wet concrete in the manner above specified, and with smooth water-tight forms, satisfactory surfaces shall be obtained for the interior exposed surfaces of the work. But if for any reason the surfaces have voids or are unduly rough, the walls shall be plas-

tered with Portland cement mortar, and floated to give a satisfactory appearance, or give a wash of neat Portland cement, applied with a whitewash brush, as the Engineer may direct. If required, before applying the mortar or wash, the surface shall be rubbed with a stiff wire brush until the surface presents a uniform appearance.

All inverts in all sewers and connections to sewers shall be given a thin coat of neat Portland cement, applied with a whitewash brush. On tile sewers, the upper surface of all manhole bottoms, including the sewer waterway, shall be carefully screeded to shape and troweled to a hard finish.

The underside of all roofs and concrete ceilings of all rooms shall be finished smooth for painting. If not sufficiently smooth the surface shall be rubbed with a stiff wire brush until the surface presents a uniform appearance and a wash of neat Portland cement shall be applied with a whitewash brush, if ordered by the Engineer.

Joints and Binding.

(A48) At joints the concrete last to be laid shall be suitably dovetailed, grooved or stepped, and upon resuming operations the joining surfaces shall be thoroughly cleaned and wetted, a bed of bond mortar being used one (1) inch thick, composed of one (1) part Portland cement and two (2) parts sand, thoroughly spread over the entire surface. On vertical joints keyways shall be set before pouring concrete. On all joints the reinforcing rods shall be set to extend into subsequent sections of construction, as shown on the plans. In general the work shall be poured as a monolith. Joints shall not be made except as the Engineer may direct to preserve the strength, or watertightness of the structures.

Where removable slabs are shown on the plans, or ordered by the Engineer, the Contractor shall make suitable joints by the use of tar paper or other approved material capable of making a clean non-adhesive joint.

Where steel water stops are ordered by the Engineer, to be placed in vertical joints, the Contractor shall furnish and place them, greasing one-half the surface as ordered. For such material, as and when ordered by the Engineer, the unit price per pound specified under Item 9 will be paid.

Finished Surfaces.

(A49) The concrete floor or invert of the suction chamber, grit chamber, screen foundation, shall be finished with a coating of mortar at least one-half (½) inch thick, placed upon the concrete before initial set has occurred. The mortar shall be composed of one (1) volume of Portland cement and two (2) volumes of torpedo sand. The surface shall be well screeded, floated, and troweled to a smooth hard face, true to line and grade.

The basement floors in the pump room and the floor of the operating gallery of the pump room basement shall be finished as above specified. The floor of the basements of the blower room pipe gallery, and the air screen room shall be troweled smooth. The main floor of the pump and blower house at or about elevation 45.5 shall be screeded to an even uniform surface, true to line and grade.

The tops of all walls, except those upon which concrete, brick or stone are to be placed, and the top of beams and walkways in the grit chamber, screen house, aeration, settling and sludge tanks shall be finished with a hard, troweled finish.

The exposed surface of the sloped bottoms of all the settling tanks (and the sludge tanks if poured in place) shall be troweled to a hard smooth finish.

The exposed surface of the bottom of the aeration tanks shall be screeded to an even uniform surface, true to line and grade.

Floors.

(A50) All floors in the pump and blower building shall be poured monolithic with the floor beams, as shown on the plans. The main floor of the pump room (at elevation 45.5) shall not be finally poured, as directed by the Engineer, until the installation of the pumps is completed. The Contractor shall, when ordered by the Engineer, complete the placing of the floor and neatly finish it against and around the pump castings and facings.

Where removable slabs are shown or ordered by the Engineer, joints shall be made as specified in Section A48.

Granolithic Floors.

(A51) The floor of the boiler room, ash and coal storage room, switch room, the operating floor of the pipe

gallery, and the roof of the coal and ash pocket rooms, as shown on the plans or specified, shall be surfaced with granolithic finish, with a special coating to prevent sanding. The surface course shall consist of a stiff mortar composed of one (1) volume Portland cement and one (1) volume of granite screenings, of approved quality; the largest particles of which would pass through a three-eights (3/8) inch ring, free from loam or other impurities. This course shall be placed before the concrete below has attained its initial set, laid to a full thickness of one (1) inch and carefully screeded, floated and troweled to a smooth, even surface. A dryer mixed in the proportion of two (2) volumes of Portland cement and one (1) volume of sand shal be sprinkled in a dry state over the surface and then floated and troweled smooth, after which, if directed, joints shall be cut and the surface indented as required. All granolithic surface shall be uniform in color. After the granolithic surface has been completed it shall be covered for three (3) days and kept moist by sprinkling with a fine spray of water.

After the operating floors of the pipe gallery and boiler room are dry and have been cleaned thoroughly, the Contractor shall apply a floor coating to harden and prevent sanding of the granolithic surfaces. The hardener is to be the Bay State cement floor coating, manufactured by Wadsworth, Howland & Co., or equal, applied according to the manufacturer's directions, using at least two (2) coats. The first coat shall be applied with a wide brush and full body to fill the pores of the concrete. After the first coat has dried at least forty-eight (48) hours, or otherwise as directed by the Engineer, the finish coat shall be evenly applied. Both first coat and finish coat shall be tinted as directed by the Engineer.

Pipe and Steps in Walls.

(52) Pipes, slants, sluice gate frames, anchor bolts, steps, or castings, as shown on the plans or as directed, shall be placed by the Contractor in the concrete. Special care shall be taken to place them to the proper lines and grades and to tamp thoroughly around them to prevent passage of water through the wall. They shall be placed before pouring concrete, as far as possible, and thoroughly braced to prevent movement during the progress of the work.

Care of New Work.

(A53) All exposed surfaces in finished and unfinished concrete shall be kept constantly moist by sprinkling with water at short intervals or covering with moistened burlap or by such other means as may be approved until the permanent covering is in place or until, in the opinion of the Engineer, the concrete is sufficiently hardened. No new work shall be laid during rainstorms. Freshly laid concrete shall be protected by canvas during storms to prevent the water from coming in contact with it. Sufficient canvas covering shall be kept ready at hand for this purpose.

Defective Work.

(A54) Should any voids or other defects be discovered in any part of the work when the forms are taken down, or otherwise, the defective work shall be removed and the space refilled with suitable material in a proper manner at the expense of the Contractor.

Placing Reinforcing Steel.

(A55) The Contractor shall furnish and place such reinforcing steel in the concrete as may be ordered by the Engineer, whether shown on the plans or not. The furnishing and placing of the reinforcing steel will be paid for at the unit price specified to be paid for reinforcing steel under Item 8.

Placing Material Furnished by the District.

(A56) The Contractor shall place in the concrete, at points to be indicated by the Engineer, any materials not included in this contract, which may be necessary to complete the work. All materials thus placed will be furnished on the ground at the site of the work by the Sanitary District at its own expense, but the Contractor shall perform such extra work in accordance with the provisions of Article 8. The Contractor shall carefully inspect all materials furnished by the Sanitary District, shall reject and set aside all cracked, broken or otherwise defective pieces discovered by him, and shall notify the Engineer in writing of the same within twenty-four (24) hours after the inspection. The Contractor will be held responsible for all materials furnished by the Sanitary Dis-

trict, after they have passed his inspection as being sound and until they are accepted in the completed work. Any cracked, broken, or otherwise defective pieces discovered after being inspected by him shall be replaced at his own expense.

No payment, however, will be made under this section for any work done in carrying out the provisions of Sections A59, A60, and A61, so far as they apply to concrete.

Concreting in Freezing Weather or at Night.

(A57) No concrete shall be laid at night or in freezing weather except by permission of the Engineer, and then with special precautions, satisfactory to the Engineer, to avoid the use of materials containing frost, or covered with ice, and to provide means to prevent the concrete from freezing until it is thoroughly set. The cost of all material furnished and labor employed that may be necessary or required by the Engineer to protect against freezing, shall be at the sole expense of the Contractor without extra charge therefor.

Grounds, Holes, Etc.

(A58) Where required, electrical conduits, plumbing and other work may be ordered placed in the concrete. Such material where not shown on the plans or specified will be furnished and placed by other contractors, when and as ordered by the Engineer. The Contractor shall aid the other contractors in such work in a reasonable manner without any additional payment therefor.

Holes shall be left in the concrete for pipes or other conduits which are not to be embedded, and such holes shall be protected with wrought iron pipe sleeves, which will be paid for at the unit price specified to be paid under Item 9.

Plumbing, Leaders, Etc.

(A59) The plumbing work, including hot and cold water piping, fixtures, heater, gas piping, drain piping, miscellaneous piping, etc., with rainwater leaders, leader heads, pressure piping for hydraulic gates, etc., will be furnished and placed by the Sanitary District under a separate contract. The Contractor, however, shall embed in the walls and floors or other parts of the building, both substructure and superstructure, any piping or other material whatsoever, and shall leave boxes, holes, etc., as required. He shall also assist in placing material, if required, and shall neatly close up, grout, repair or otherwise finish any openings, holes, etc., which shall be made.

Electrical Installation.

(A60) The electric wiring and conduits for both power and light, the telephone wiring and conduits and other miscellaneous electrical work will be furnished and placed by the Sanitary District under a separate contract. The Contractor, however, shall embed in the walls and floors or other parts of the building, both substructure and superstructure, any conduits, ducts, boxes, or other material, whatsoever, and shall leave boxes, holes, etc., as required. He shall also assist in placing material, if required, and shall neatly close up, grout, repair or otherwise finish any opening, holes, etc., which shall be made.

Patching, Plastering and Cleaning Up.

(A61) After the plumbing, electrical, and all work under this contract is completed, the Contractor shall clean up the work, as specified in the particular sections, and shall also patch all damaged places, plaster in holes, and repair generally to leave the completed work in first class condition, free from all defects.

Watertightness of Concrete Work.

(A62) The walls and floors of the pump suction chamber, walls and floors of the coal and ash pocket and pump room and blower room basement shall be constructed with as few joints as possible. Great care shall be taken where joints are necessary to make them watertight, and also at all points where pipes or castings pass through the walls or floors. When the concrete work has attained sufficient strength, and before any painting is done, the suction chamber shall be filled with water to elevation +42 above Chicago city datum. The Contractor shall repair any imperfections which cause the water to fall in the suction chamber at a rate of more than one-half (½) inch in twenty-four (24) hours. All interior walls or floors of the pump room, blower room basement and coal and ash pocket shall be practically bone dry. All places in the foregoing rooms which show appreciable seepage,

weeping or moisture shall be made perfectly watertight, even if the preceding requirement for tightness is fulfilled.

The grit chamber, screen substructure, aeration tanks, settling tanks and sludge tanks shall be constructed with as few joints as possible. Great care shall be taken where joints are necessary to make them watertight, and also at all points where pipes or castings pass through the walls or floors particularly in the pipe gallery between the aeration and settling tanks. At the close of the work, all the tanks, grit chamber and screen substructure shall be filled with sewage to the working water line. The Contractor shall repair any imperfections which cause the water to fall at a rate of more than one (1) inch in twenty-four (24) hours. The walls and basement floor of the pipe gallery shall be practically dry. All noticeable leaks in the work shall be repaired in any case, even if the preceding requirements for tightness are satisfied.

Measurement.

(A63) Concrete for payment will be measured only inside the lines and grades given by the Engineer, and only the net cubical contents thus placed will be allowed. Deductions will be made for all openings in the concrete. All concrete placed outside these lines and grades to fill unauthorized excavation, as specified in Section A8, and all concrete used for replacing defective work shall be at the expense of the Contractor.

In general, payment, will be made only for the yardage comprised in the walls, floors, beams, conduits, etc., as specified by the neat lines of the structure, as shown on the plans, except where said plans have been changed by order of the Engineer.

Payment.

(A64) The unit price specified to be paid per cubic yard for concrete, Class A, B and C, under Items 5, 6 and 7 respectively, shall not include the materials specified in Section A56, which will be furnished by the Sanitary District, but shall include the handling and placing of such materials in the concrete, and further shall include the furnishing and placing of the concrete and the furnishing of all labor, tools, materials (other than as above stated) and appurtenances necessary to complete the work as specified.

ITEM 8—REINFORCING STEEL.

Description.

(A65) The Contractor shall furnish and place in the concrete, steel bars, as specified, for reinforcement, of the size called for on the plans, or as ordered by the Engineer, at such points as are shown or as may be required. Corrugated, twisted, or deformed bars may be used, of a form to be approved by the Engineer.

The Contractor shall also furnish the spiral reinforcing required in columns.

Placing.

(A66) The Contractor shall supply all necessary wiring, supports, and labor to put the reinforcement in place, fasten it securely and keep it in place while concrete is being laid. In general, all rods shall be placed with the center two (2) inches from the form. In columns and beams, the rods shall be placed with the center three (3) inches from the form. Concrete spacing chairs shall be furnished to hold them in position. These shall be of the Securo Supporting and Locking Bar-spacer type or equal in all beams and slabs. The Contractor shall place the bars as shown on the plans or in accordance with instructions of the Engineer. The bars shall be cut and bent as required, and wired together at intersections as often as necessary. Bars shall preferably be bent in the shop or mill to the forms shown on the plans. All bending shall be accurately done as shown on the plans and by methods and appliances approved by the Engineer. Adjoining bars at splices shall overlap at least forty (40) diameters, and steel rod clamps shall be provided and placed where shown on the drawings or ordered by the Engineer. In all beams, bars of single length shall be used.

On any section of the work where horizontal bars run further than the length of the forms, the form or head against which the work ends shall be perforated at the proper places to allow the bars to project through a distance at least equal to the lap specified. The projecting ends, however, shall be of different lengths so that in no place will laps in adjoining bars in the same place occur opposite each other. Floor bars shall extend at least four (4) inches beyond the face

of the wall supporting the floor and beam bars at least eight (8) inches.

Quality.

(A67) Steel for reinforcing bars to be imbedded in concrete shall be corrugated, twisted, or deformed bars of the size called for on the plans, or of equivalent section, and of a form approved by the Engineer. Bars shall be free from defects and kinks, and from bends not shown on the plans. Bars shall be rolled from open hearth steel billets (not rerolled material), and shall conform in all respects to "Standard Specifications for Billet Steel Reinforcement Bars" adopted by the American Society for Testing Materials in 1911, and revised in 1912, 1913 and 1914. Deformed bars shall be of the grade therein specified as "Intermediate Grade." All tests shall be made on the finished bars as furnished for the work under this contract, and at least one tensile and one bending test shall be made from each melt of steel from which bars are furnished for this work, or from each lot of ten (10) tons or less of bars. Specimens for test shall be so taken as to represent as nearly as possible the average of the bars furnished.

Spiral reinforcing shall be of the quality specified above for bars, of manufacture approved by the Engineer.

All bars shall be new stock, free from rust scale or excessive rust when placed in the work. A thin coating of red rust resulting from short exposure will not be considered objectionable when bars are placed in the work, but any bars having rust scale or a thick rust coat shall be thoroughly cleaned satisfactorily to the Engineer, or shall be rejected and removed from the premises upon the order of the Engineer. All bars shall be stored in racks and protected from the weather after delivery at the site of the work.

Ordering.

(A68) All reinforcing metal shall be furnished by the Contractor only by order of the Engineer, and in such lengths and quantities as the Engineer shall specify in such order, and the Contractor shall notify the Engineer when he desires such order given by him. The Contractor shall not be entitled to any claim for damages for delays that may result from failure to so notify the Engineer.

Reinforcing steel will be inspected by the Sanitary District at the mills at which it is rolled (unless furnished from stock) and the Contractor shall furnish, free of charge, the use of a testing machine capable of properly testing the prepared specimens. Specimens for testing of material, and also the necessary labor at the mill shall be furnished without charge when called for by the Engineer or his authorized representative, either of whom shall have full power to reject all material which does not conform to the specifications.

Stock material shall be used for reinforcing bars which cannot be rolled in time to be used in various parts of the work. In case the records of the chemical analysis and physical tests of such stock material are not available, a reasonable number of tests of the same shall be furnished free of charge, sufficient to satisfy the Engineer of its quality.

Payment.

(A69) The unit price specified to be paid per pound under Item 8 shall include all labor, tools, materials, and appurtenances necessary to furnish and place all reinforcing steel. The weight of steel paid for shall be the scale weight for all steel actually placed in the work, no allowance being made, however, for wire ties, clips or other devices used to tie pieces together for support during construction.

ITEM 9—MISCELLANEOUS STEEL.

Description.

(A70) The Contractor shall furnish, fabricate, and place miscellaneous steel required for floor plates, gratings, bar screen, steel ladders, manhole rungs and any other miscellaneous steel work shown on the plans or specified herein, necessary to complete the work when and as ordered by the Engineer. No payment, however, will be made under this item for any steel work used in floor beams, trolleys, pipe hangers or supports, air piping, sludge piping, sewage piping, water piping, or bracing for bilge pump shafting or any of the steel work covered by Items 17, 18, 19, 20 and 21, unless specifically mentioned therein.

Materials and Workmanship.

(A71) All structural steel shall conform in every respect with the requirements of the "Standard Specifications for Structural Steel for Buildings," Serial Designation A9-16, of the American Society for Testing Materials. All workmanship shall be first-class in every respect and must conform to the latest and best practice. All material must be thoroughly straightened in the shop by methods that will not injure it before templates are placed on same for laying off and before any work is done upon it. Finished members must be absolutely straight and free from open joints and distortions of any kind. All shearing shall be neatly and accurately done and parts exposed to view shall be neatly finished. All necessary fillers, connections, and other minor details, not shown on the plans, but necessary for the work, shall be furnished without extra charge. All material shall be kept clean and protected from the weather. All bent pieces shall be carefully bent to shape.

Pipe spacers, pipe sleeves, tie rods, bolts, rivets and other miscellaneous parts shall be furnished as required, of suitable material, when ordered by the Engineer.

Ladders and Manhole Steps.

(A72) The ladders shown on the plans or ordered by the Engineer are to be furnished and placed in a careful manner. The vertical bars are to be two and one-quarter (2¼) inch by one-half (½) inch and round rungs three-quarter (¾) inch diameter. The rungs are to be set twelve (12) inches on centers, and are to be turned to a shoulder and headed over as shown in the plans. The wall supports are to anchor bolts set at proper intervals.

The manhole steps are to be made of genuine wrought iron, cut and bent to shape, and then heavily galvanized.

Cleaning and Painting.

(A73) All the steel work shall be thoroughly cleaned and painted before rusting begins. Prior to assembling, all parts which would be inaccessible when assembled, shall be painted with red lead paint herein specified. Unless otherwise directed by the Engineer, all steel (except manhole steps) shall be given one (1) heavy coat of red lead paint well brushed in, before removal from the shop. The shop coat of paint shall consist of red lead and raw linseed oil mixed in the proportions of twenty-five (25) pounds of dry red lead or thirty-five (35) pounds of red lead paste, to each gallon of linseed oil, with the addition of not more than one-half (½) pint of pure turpentine or turpentine Japan dryer, mixed as directed. In the field, before or after erection, as ordered by the Engineer, all steel work shall be given two (2) coats of asphaltum varnish or other approved rust-resisting paint.

Weight.

(A74) The weight of miscellaneous steel to be paid for, shall be the actual scale weight of the steel work as delivered.

The Contractor shall provide all necessary facilities for the determination of the correct scale weight of all material by the Engineer. In no case shall the total weight of metal to be paid for exceed the total weight of such metal as calculated from the shop plans by more than two and one-half (2½) per cent.

Payment.

(A75) The unit price specified to be paid per pound for miscellaneous steel shall include the furnishing and placing of the steel and shall include the furnishing of all labor, tools, material and appurtenances necesarry to complete the work as specified.

ITEM 10—IRON CASTINGS.

Description.

(A76) The Contractor shall furnish and place cast iron castings required for circular or rectangular cast iron frames and covers for manholes and catch basins, frames for floor plates, floor cast iron plates, edging stop plank grooves, lamphole castings, and any other iron castings shown on the plans, or specified herein, necessary to complete the work, as and when ordered by the Engineer. No payment, however, will be made under this item for any cast iron used in machinery of any kind, in gate valves, hydrants, sewage screens or any part thereof, or for any castings in the screen chamber or for water pipes, soil pipes, or other appurtenances to water piping, valve boxes, or other similar work. No payment will be made under this item for any iron castings

used in any work under Items 17 to 21, inclusive, unless specifically mentioned therein.

The Contractor shall also furnish and tap into the stop plank grooves, bronze tap bolts and nuts, as shown on the plans, the cost of which shall be included in the unit price paid per pound under Item 10.

Cast Iron.

(A77) All castings shall be of tough, close grained gray iron, free from blowholes, shrinkage, and cold shuts. They shall be sound, smooth, clean and free from blisters and all defects. All castings shall be made by the cupola process.

Workmanship.

(A78) All castings shall be made accurately to dimensions shown and shall be planed where marked or where otherwise necessary to secure perfectly flat and true surface. Allowance shall be made in the patterns so that the specified thickness shall not be reduced. Manhole covers and floor plates shall be true and shall seat at all points.

The top of each circular manhole shall be checkered and perforated as shown on the plans. Around the outside edge, the top of the cover for a width of one (1) inch shall be left plain and flush with the top of the checkering. There shall be cast on each cover in raised letters, at least two (2) inches long, the initials "S. D. C." The top of other manhole and floor opening covers shall be checkered or marked as shown on the plans. Floor plates shall be checkered and ribbed as required by the Engineer.

Cleaning and Painting.

(A79) All castings shall be thoroughly cleaned and painted before rusting begins and before leaving the shop with two (2) coats of high grade asphaltum or other suitable varnish that the Engineer may direct. After the castings have been placed in a satisfactory manner, all foreign adhering substances shall be removed and the castings given two (2) additional coats of asphaltum or other varnish as directed by the Engineer.

Weight.

(A80) No casting shall be accepted the weight of which shall be less than that due to its dimensions by more than five (5) per cent. The Contractor shall furnish scales and every facility for weighing the castings in the presence of the Engineer.

Payment.

(A81) The unit price specified to be paid per pound for iron castings shall include the furnishing and placing of the iron castings and shall include the furnishing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 11—6-INCH WATER PIPE.

General.

(A82) The Contractor shall furnish and lay the 6-inch cast iron water pipe from the main on First Avenue near 12th Street, at the south boundary of Maywood, to the pumping station, as shown on the plans or as specified herein. The Contractor shall lay this pipe for his own use during construction as soon as possible after the bond is approved. The Contractor shall maintain the pipe during the progress of the work, and upon completion of the work he shall make such repairs as may be necessary to put the pipe in first-class condition before final acceptance.

The Contractor shall arrange his water pipe system so that water may be taken from it for use by any other contractor. Water so used, however will be metered and all water used by other contractors will be paid for, if measured by the meter of the Contractor under Division A, at the same rate as paid by him. The Contractor under Division A shall install his own meter for measuring all water used by him, said meter to be satisfactory to the President of the Village of Maywood. The Contractor shall further pay all charges made by the Village of Maywood for water used by him at the rates fixed by the Village of Maywood.

Included unter Item 11 shall be the cost of cutting the existing 6-inch pipe in Maywood, furnishing and placing the necessary special fitting and connecting up, together with the furnishing and placing of three (3) six (6) inch gate valves, one (1) gate box, and two (2) fire hydrants, as shown on the plans and specified herein. The pipe shall be carried through the wall of the boiler room to a point given by the Engineer. The hydrant shall be connected up by a branch line, running into the basement, at a point

designated by the Engineer. The Contractor shall also extend the 6-inch pipe from the boiler room to the outside wall of the pipe gallery. He shall also furnish and place two (2) six (6) inch gate valves inside the boiler room at points designated by the Engineer.

Clearing, Trimming, Excavation, Etc.

(A83) The site of the excavation shall be cleared, and excavation, backfilling, resurfacing, restoration of sidewalks, crossing, etc., carried on as specified in Sections A3 to A23 inclusive, in so far as they may apply.

The cost of all excavation for water pipe shall be included in the unit price specified to be paid per lineal foot of water pipe. No additional payment will be made for excavation at the unit price specified under Item 1.

Cast-Iron Pipe and Specials.

(A84) All cast-iron pipe furnished shall be in accordance with the latest standard specifications of the American Water Works Association. The pipe shall be Class B. Whenever the pipe requires cutting, the work shall be done by the Contractor, without further compensation, in a manner satisfactory to the Engineer.

All specials furnished shall be in accordance with the latest standard specifications of the American Water Works Association. All specials shall be Class D. Sleeves and plugs shall be furnished as required.

Placing of Pipes.

(A85) All pipes must be laid on a good foundation, trimmed to shape, and, where required, secured against settlement in a manner approved by the Engineer.

In general, excavation shall be made so as to place the outside top of the pipe at a depth of five (5) feet six (6) inches below the top of the curb, or where no curb exists, below the established grade of the street or at the grade given by the Engineer. At pipe or special joints, enough additional depth shall be excavated to permit the making of the joint in a proper manner. In all cases the pipe shall be laid to a depth fixed by the Engineer.

Laying.

(A86) Proper and suitable tools and appliances for the safe and convenient handling and laying of the pipes and special castings shall be used. Great care shall be taken to prevent the pipe coating from being damaged, particulary on the inside of the pipes and special castings. All pieces shall be carefully examined for defects and no piece shall be laid which is known to be defective. If any defective piece should be discovered after having been laid, it shall be removed and replaced with a sound one in a satisfactory manner by the Contractor at his own expense. The pipes and special castings shall be thoroughly cleaned before they are laid, shall be kept clean until they are accepted in the completed work, and when laid shall conform accurately to the lines and grades given by the Engineer.

Lead Joints.

(A87) In jointing the pipes and special castings, the spigot of each piece shall be properly seated in the bell of the next adjacent piece and adjusted so as to give a uniform space for the joint, which will be made with twisted or braided hemp packing and soft pig lead. The packing shall be thoroughly driven into the bell so that the lead, after having been calked, shall have a depth of at least two (2) inches for pipes. The melting pot shall be kept near the joint to be poured and each joint shall be made at one pouring. Dross shall not be allowed to accumulate in the melting pot.

The joints shall be thoroughly calked by competent mechanics and in such manner as shall secure a tight joint without overstraining the iron of the bells.

Testing.

(A88) Wherever conditions will permit, in the opinion of the Engineer, before the trench is back-filled, the pipe shall be tested by filling it with water under a hydrostatic pressure of one hundred (100) pound per square inch. This pressure shall not drop more than ten (10) per cent in one (1) hour with all valves and connections shut. The Contractor shall furnish, at his own expense, all apparatus, water and appliances necessary or proper for all tests, except the gages. All joints shall be examined during the open trench test and all visible leaks stopped.

Gate Valves.

(A89) All gate valves furnished under this item shall be of the double-

seated type. with non-rising stems and a circular waterway of the full diameter specified. They shall be provided with hubs of proper dimensions to fit the cast iron pipe furnished. All gate valves shall be bronze-mounted, and all bearing surfaces shall be of bronze or faced with bronze.

All cast-iron shall be of the same quality as that specified for cast-iron pipe. Bronze shall be of the best quality, compact and homogeneous, of such mixtures as will produce the best results for each particular part. All valve and seat rings shall be of hard mixture, and the valve stems shall be of Tobin bronze or other approved mixture.

All gates and seat rings shall be carefully and firmly secured in place. The iron castings shall be machined where the rings bear and the backs of the rings shall be machined all over. After the rings have been fastened securely in place, the front shall be machined all over to a perfectly true and smooth bearing, after which they shall be hand scraped to a water-tight joint. Each ring shall be cast in one piece. Threads of gate valves shall be lathe-cut and half-V pattern. The gate valves shall be provided with stuffing boxes constructed with bolt followers and so arranged as to be readily accessible. They shall have brass and bronze bolts and be left packed ready for use on the completion of the work. All gate valves shall have a square nut. All wrought iron bolts shall be made from the best American refined bar iron, with good well-fitting threads and cold-pressed nuts. All bolt heads and nuts shall be hexagonal of United States standard sizes, neatly trimmed and chamfered.

All cast-iron surfaces of valves outside and inside shall be thoroughly cleaned and coated with asphaltum varnish, applied hot, or other approved metal coating. All bronze tool-finished work shall be left bright.

All valves shall be built to operate continuously under a working pressure of at least sixty (60) pounds per square inch, and shall be tested in the shop under test pressures at least fifty (50) per cent greater than the working pressure above specified. A certificate from the manufacturer that the above tests have been sucessfully withstood shall be furnished by the Contractor.

Valve Boxes and Vaults.

(A90) For valves laid in the trench there shall be furnished, as ordered by the Engineer, a cast-iron valve box of approved heavy pattern, with suitable cover, of the standard pattern used by the Chicago Water Department. The valve box shall be adjustable in height, and shall cover the stuffing box and cap of the valve thoroughly. The valve box shall be thoroughly coated with three (3) coats of approved asphaltum varnish.

Hydrants.

(A91) The Contractor shall furnish and place two (2) fire hydrants to be used on sixty (60) pounds working pressure, of six (6) inch nominal size with a bell connection for a six (6) inch cast iron pipe, the center of the bell to be five (5) foot six (6) inches below the surface of the ground. The hydrant shall be provided with two two and one-half (2½) inch hose nozzles and one (1) four (4) inch steamer nozzle. All nozzles shall be of bronze with male hose threads, and shall be provided with iron nozzle caps and chains. The hose threads shall correspond with those in use in the Fire Department of the City of Chicago. The hydrants shall be of the sliding gate type. The drip outlet shall be so arranged that the moment the gate commences to open the outlet shall be sealed and shall remain sealed until the gate is closed. All parts connected with the drip outlet shall be of solid bronze, and the mountings and seats shall be bronze throughout. The gates shall be rubber faced. The hydrants shall be designed so that all working parts can be readily removed without digging up or disturbing the hydrant or its connections. All hydrants shall close by turning to the right. All cast iron surfaces inside and outside shall be coated with asphaltum or other approved coating. The hydrants shall be tested for one hundred and fifty (150) pounds pressure. The operating nut and nozzle cap shall be five-sided of standard size.

At each hydrant the Contractor shall furnish and place, as directed by the Engineer, one (1) cubic yard of clean crushed limestone, one and one-quarter (1¼) to two (2) inches in nominal size.

Measurement.

(A92) The length of pipe laid, to be paid for, will be the length measured along the axes of the pipe laid in place. No additional payment will be made for specials, valves, hydrants, or valve boxes placed in the line.

Payment.

(A93) The unit price specified to be paid per lineal foot under Item 11, for the laying of the 6-inch water pipe, shall include the furnishing and handling of the pipe, specials, valves, valve boxes, hydrant and crushed stone, the laying in place, furnishing, placing and calking of lead in joints, excavation, backfilling and removal of surplus material, resurfacing of streets, restoration of sidewalks and crossings, the making of all service connections to hydrants, the connection at 12th Street to the main of the Village of Maywood and shall include the furnishing and placing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 12—CAST-IRON PIPE.

General.

(A94) Under this item the Contractor shall furnish and lay miscellaneous cast-iron pipe, as shown on the plans, or as specified herein. No payment will be made under this item for any cast-iron pipe in the cast-iron water pipe, pump suctions, sewage force main, float tubes, air piping, or piping in pipe gallery, aeration tanks, settling tanks or sludge tanks, which are specified to be covered by Items 11 and 17 to 21, inclusive. Included under this item, however, are the cast-iron pipe laid under the road and walks for culverts or to inlet, basins, the 18-inch culvert at First Ave., the 12-inch and 18-inch cast-iron pipe in the main drain from the sludge concentration tanks to the suction chamber.

Cleaning, Trimming, Excavation, Etc.

(A95) All excavation shall be carried on as specified in Section A3 to A23, inclusive, in so far as they may apply, and will be paid for at the unit prices specified for earth and rock excavation, under Items 1 and 2, respectively. Where cast-iron pipe under this Item is laid in excavation with other pipes, conduits, or structures, the excavation will be measured only once, for the entire cross section of the excavation, to the lines and grades given by the Engineer. No additional measurement shall be made, because more than one structure or pipe is placed in a common excavation.

Cast-Iron Pipe, Specials, Placing of Pipe, Laying, Lead Joints.

(A96) The cast-iron pipe, specials, placing of pipe, laying, and lead joints shall be carried out as specified in Sections A82 to A88, inclusive, so far as they may apply. Wall castings shall be furnished where required. Flanged pieces shall be supplied, faced and drilled, where shown on the plans or ordered by the Engineer.

All pipe shall be Class A, and specials shall be of the lightest class of the American Waterworks Association Standard specifications.

Testing.

(A97) The sludge drain line shall be tested with twenty (20) pounds pressure.

All tests shall be made as specified in Section A88, in so far as the same may apply. No other lines of pipe will be tested.

Measurement.

(A98) The length of the pipe laid, to be paid for, will be the length measured along the axes of the pipe laid in place. No additional payment will be made for specials, valves or sluice gates placed in the line.

No measurement will be made under this item for cast-iron pipe or specials used in water pipe, pump suctions, sewage force main, float tubes, air piping, or piping used in pipe gallery, aeration tanks, settling tanks, or sludge tanks, that is, for any or all material which is specified to be furnished and paid for under Items 11, 17, 18, 19, 20 and 21.

Payment.

(A99) The unit price specified to be paid per pound under Item 12 for the furnishing and laying of cast-iron pipe, shall include the furnishing and handling of the pipe and specials, the laying in place, furnishing, placing and calking of lead in joints, testing, and shall include the furnishing and placing of all labor tools, materials and

appurtenances necessary to complete the work as specified.

ITEM 13—VITRIFIED SEWER PIPE, 8-INCH.
ITEM 14—VITRIFIED SEWER PIPE, 12-INCH.

Description.

(A100) The Contractor shall furnish and lay as required eight (8) inch and twelve (12) inch vitrified sewer pipe under Items 13 and 14 respectively as shown on the plans, and at such other points as may be shown or required, with bends, branches, or other specials as may be necessary to complete the work.

Excavation.

(A101) All excavation shall be carried on as specified in Sections A3 to A23, inclusive, insofar as they may apply.

The cost of all excavation shall be included in the unit prices specified to be paid per lineal foot of the tile under Items 13 and 14. No additional payment will be made for excavation at the unit price specified under Item 1.

Quality.

(A102) All sewer pipe shall be standard quality, made of the best material, thoroughly and perfectly burned, of homogeneous texture without cracks or imperfections, well glazed, so that their inner and outer surfaces shall be smooth, hard, and even.

Dimensions.

(A103) The pipes shall be at least two (2) feet in length. Shorter or cut lengths shall be used only where necessary to make closures. Branches, bends and other specials, where so shown or required, shall be made to dimensions furnished by the Engineer. All pipes shall be straight, true in form, of full diameter throughout, and shall have deep and wide socket joints. The thickness of the pipe and dimensions of the deep and wide socket shall be at least equal to those of single strength standard sewer pipe of the same diameter for sizes from four (4) inch up to and including twelve (12) inch pipe.

Laying.

(A104) All pipes shall be laid true to the lines and grades given by the Engineer. The ends or shoulders of each pipe shall abut against the next adjacent pipes in such a manner that there will be no unevenness of any kind along the bottom half of the pipes.

Joints.

(A105) The space between the pipe and socket shall be as uniform as possible and made water-tight by first using a small jute gasket thoroughly saturated with neat Portland cement, carefully coiled and placed in the bell of the pipe. The joints shall then be thoroughly filled with Portland cement mortar, made of equal volumes of cement and clean, sharp, screened sand thoroughly mixed dry, the cement and sand to be of the quality specified in Sections A39 and A40, sufficient water being afterwards added slowly to give the proper consistency. Mortar shall be used as soon as made. It shall be solidly rammed into the joints, after which the joints shall be carefully wiped inside and out.

Interior of Pipe.

(A106) The interior of the pipe shall be carefully freed from all dirt, cement, or superfluous materials, of every description as the work proceeds, for which purpose a disc mold or swab filling the entire bore of the pipe, and attached to a rod sufficiently long to pass two (2) joints from the ends of the pipe last laid shall be continuously worked through as the laying of the pipe proceeds. In all cases, the open ends of the pipes and branches shall be temporarily and securely closed with carefully fitted boards or stoppers to prevent any earth or other substance from entering. The Contractor shall make good all defects and remove any foreign matter which may have been left in or otherwise introduced into the pipe before the final acceptance of the work.

Future Inlets.

(A107) Tile pipe shall be built into the sewer or conduits at points shown on the plans, to provide entrance for existing and future connections. At future connections, the bell end of the tile shall be blanked off with tile blanks, brick or a thin concrete slab cast outside and seasoned. These shall be included in the unit price specified to be paid for the items wherein specified. The blanks shall fit neatly in the open bell of the pipe and shall be made tight with cement mortar or a suitable asphalt or com-

position joint filler applied hot. The cost of making such joints, cutting and placing the tile shall be included in the price specified to be paid under the items wherein specified.

Measurement.

(A108) The length of vitrified sewer pipe, laid, to be paid for under Items 13 and 14, will be the length measured along the axes of the pipe laid in place. No additional payment will be made for specials, placed in the line, which may be necessary to complete the work.

Payment.

(A109) The unit price specified to be paid per lineal foot under Items 13 and 14 for the laying of the vitrified sewer pipe shall include the furnishing and handling of vitrified sewer pipe and specials, the laying in place, making joints, excavation, backfilling, and removal of surplus material, and shall include the furnishing and placing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 15—VITRIFIED SEWER PIPE, 30-INCH.

Description.

(A110) The Contractor shall furnish and lay as required thirty (30) inch vitrified sewer pipe under Item 15, as shown on the plans, and at such other points, as may be shown or required, with bends, branches, or other specials as may be necessary to complete the work.

Excavation.

(A111) All excavation shall be carried on as specified in Sections A3 to A23, inclusive, insofar as they may apply, and will be paid for at the unit price specified for earth and rock excavation under Items 1 and 2, respectively. Where 30-inch vitrified sewer pipe under this Item is laid in excavation with other pipes, conduits or structures, the excavation will be measured only once, for the entire cross-section of the excavation, to the lines and grades given by the Engineer. No additional measurement shall be made, because more than one structure or pipe is placed in a common excavation.

Where 30-inch vitrified sewer pipe under this Item is laid in a separate trench the excavation will be measured between vertical planes two (2) feet farther apart than the inside diameter of the pipe barrel, and from the surface of the ground to the elevation of the invert of the pipe. No allowance shall be made for bell holes.

Quality, Dimensions, Laying, Joints, Interior of Pipe.

(A112) The tile pipe shall be furnished and laid as specified in Sections A96 to A100, inclusive, so far as the same may apply, with the exception that the thickness of the pipe and the dimensions of the deep and wide socket shall be at least equal to those of double strength deep and wide socket sewer pipe of the same diameter.

A cradle of Class C concrete shall be placed under the pipe as shown on the drawings. This will be paid for at the unit price specified under Item 7.

Measurement.

(A113) The length of 30-inch vitrified sewer pipe, laid, to be paid for under Item 15, will be the length measured along the axes of the pipe laid in place. No additional payment will be made for specials, placed in the line, which may be necessary to complete the work.

Payment.

(A114) The unit price specified to be paid per lineal foot under Item 15 for the laying of 30-inch vitrified sewer pipe, shall include the furnishing and handling of the vitrified sewer pipe and specials, the laying in place and making joints, and shall include the furnishing and placing of all labor, tools, materials, and appurtenances necessary to complete the work as specified.

ITEM 16—TILE UNDERDRAINS.

Description.

(A115) Under Item 16, the Contractor shall furnish and lay as required four (4) inch tile underdrains as shown on the plans and at such other points as may be shown or required.

Excavation.

(A116) The site of the excavation shall be cleaned and excavation, backfilling, resurfacing, etc., carried on as specified in Sections A3 to A23, inclusive, insofar as they may apply.

The cost of all excavation shall be included in the unit price specified

to be paid per lineal foot of tile underdrain. No additional payment will be made for excavation at the unit price specified under Item 1.

Underdrain.

(A117) All underdrain tile shall be of standard quality, for (4) inch internal diameter farm tile, made of the best material, well burned, unglazed, without bells. The pipe shall be at least one (1) foot in length. All pipes shall be straight, true in form and of full diameter throughout.

Laying.

(A118) All underdrain tile shall be laid true to the lines and grades given by the Engineer. The ends of each piece of underdrain tile shall be lined up closely, leaving a space not over one-quarter (¼) inch between adjacent underdrain tile. The pipe shall be laid on as even a grade as possible. Care shall be taken in backfilling to place the dirt around the body of the tile, and to keep the finer material away from direct contact with the joints. The backfilling shall be carried on as specified in Section A14.

Measurement.

(A119) The length of underdrain tile, laid, to be paid for will be the length measured along the axes of the pipe laid in place.

Payment.

(A120) The unit price specified to be paid per lineal foot under Item 16 for the laying of underdrain tile, shall include the furnishing and handling of the tile, the laying in place, excavation, backfilling, and removal of surplus material, and shall include the furnishing and placing of all labor, tools, materials, and appurtenances necessary to complete the work as specified.

ITEM 17—PUMP AND BLOWER HOUSE EQUIPMENT.

Description.

(A121) Under Item 17, the Contractor shall receive a lump sum which shall cover the furnishing of all material, labor, tools, and appurtenances required to complete the pump and blower house substructure, including suction and discharge piping, check valves, gate valves, gages and float tubes, float tubes for Venturi meter, bilge pumps and piping, except for such work as is covered by unit prices under Items 1 to 16, inclusive, and under Items 18 to 21, inclusive, all as specified, and except as otherwise specified herein. Under this item the Contractor shall furnish all the materials for and construct, complete, the work shown on the plans and specified in detail, under the following general heads:

Suction and discharge piping.
Check valves.
Gate valves.
Gages and float tubes.
Float tubes for Venturi meter.
Bilge pump and piping.

The substructure of the pump room, including the operating floor, is hereinafter referred to as the pumping station.

SUCTION AND DISCHARGE PIPING.

General.

(A122) The Contractor shall furnish and erect all cast-iron piping, specials, and fittings forming the suction and discharge pipes of the pumps, the flow control pipe, and connections and appurtenances. Included shall be the discharge pipe outside the building foundations up to and through the inlet into the grit chamber. Included also are the cast-iron pipe and specials required for the float tubes of the Venturi meter on the discharge main, the 6-inch floor drains of the blower room, coal pocket, and boiler room basement, the drain for the suction chamber, the 8-inch by-pass for the sluice gate, the wall castings and blank flanges for future pump suctions, the 12-inch pipe between the Venturi sewage meter vault and the basement, and wall castings and plug for the future discharge main in basement and meter vault.

Cast-Iron Pipe and Specials.

(A123) Except where otherwise noted on the plans or specified herein, the cast-iron piping and specials shall comply with the most recent edition of the standard specifications for cast-iron water pipe and special castings of the American Waterworks Association. All piping shall be Class A, except where receiving the spigot end of specials, when bells of the size furnished on the specials shall be provided. All specials shall be of the lightest class, which is standard, provided, however, that for special 14-

inch and over in diameter, the bells shall be made of the dimensions of Class C. All pipe and specials shall receive the hot treatment specified in said standard specifications.

All flange special castings shall meet the requirements of the American Waterworks specifications in as far as they apply. All flange special castings shall be made to and drilled to the American standard drilling. All flanges shall be cast solid and shall be faced accurately at right angles to the axis of the pipe. All holes for bolts or studs shall be drilled. Where tap bolts are specified holes shall be drilled and tapped.

The Contractor shall also furnish and place in the air duct and blower room basement two (2) cast-iron floor drains, of which one (1) shall have a 6-inch outlet to fit the 6-inch cast-iron pipe, and one (1) 4-inch to fit the 4-inch cast-iron pipe, the drains to be respectively No. 501 and No. 500, the Josam Mfg. Co. or equal. The Contractor shall also furnish and place in the coal pocket and boiler room basement two (2) accessible clean-out cast-iron floor drain basins, 14 inches in diameter by 17 inches deep, with exposed inner seal, with 6-inch outlet, as made by the Wade Iron Sanitary Mfg. Co. or equal. A 4-inch gate valve is to be set in the drain from the air duct, as shown on the plans.

Laying and Supports.

(A124) The piping, specials, fittings etc., shall be laid to line and securely supported and held in position and alignment, as shown on the plans or specified herein. Proper and suitable tools and appliances for the safe and convenient handling and laying of the pipes and special castings shall be used. Great care shall be taken to prevent the pipe coating from being damaged, particularly on the inside of the pipes and special castings. All pieces shall be carefully examined for defects and no piece shall be laid which is known to be defective. If any defective piece should be discovered after having been laid, it shall be removed and replaced with a sound one in a satisfactory manner by the Contractor at his own expense. The pipes and special castings shall be thoroughly cleaned before they are laid, shall be kept clean until they are accepted in the completed work, and when laid shall conform accurately to the lines and grades given by the Engineer.

The Contractor shall furnish all the necessary pipe supports, saddles, hangers, and braces necessary to securely support the pipe and fittings in place and provide any necessary adjustment.

Lead Joints.

(A125) In jointing the pipes and special castings, the spigot of each piece shall be properly seated in the bell of the next adjacent piece and adjusted so as to give a uniform space for the joint, which will be made with twisted or braided hemp packing and soft pig lead. The packing shall be thoroughly driven into the bell so that the lead, after having been calked, shall have a depth of at least two (2) inches for pipes. The melting pot shall be kept near the joint to be poured and each joint shall be made at one pouring. Dross shall not be allowed to accumulate in the melting pot.

The joints shall be thoroughly calked by competent mechanics and in such a manner as shall secure a tight joint without overstraining the iron of the bells.

Testing.

(A126) The complete piping and connections shall be made tight when tested with water under a hydrostatic pressure of fifteen (15) pounds per square inch. The Contractor shall furnish, at his own expense, all apparatus, water and appliances necessary or proper for all tests, except the gages. All joints shall be examined and all visible leaks stopped. Where the piping is laid in excavation, the test shall be made before backfilling.

Flange Joints.

(A127) Flange joints shall be made with rubber gaskets, of the best quality cloth inserted rubber, of thickness and make, approved by the Engineer. When ordered by the Engineer joints shall be made with red lead, metal to metal.

All flange joints shall be firmly bolted with through, stud, or tap bolts of the required size as may be directed. The bolts and nuts shall be of the best quality of American refined bar iron, with good sound, well-fitting threads, the nuts to be cold punched. All heads and nuts shall be hexagonal. All heads, nuts and

threads shall be of the U. S. standard sizes. After each joint has been made, all bolt heads and nuts shall be coated with two (2) coats of asphaltum or other approved metal coating.

Wall castings, flanged on the suction chamber side, shall be furnished for the present and future pumps. The flanges shall be drilled and tapped for bronze stud bolts of the proper size, American standard drilling, and of sufficient length to bolt on a companion flange. The bolts shall be screwed home and provided with bronze nuts. The wall castings for the future pumps shall be equipped with companion flanges of cast iron, securely bolted in place, with rubber gaskets.

CHECK VALVES.

General.

(A128) The Contractor shall furnish and place in the pumping station, as shown on the plans, three (3) fourteen (14) inch check valves. The check valves shall be made preferably as shown on the detailed plans. However, the use of standard check valves may be permitted at the option of the Engineer, embodying the same features as the detailed designs, and providing the same area of water passage. A boss shall be furnished on the bottom of each check valve, with a 3½-inch hole through it. The boss shall be faced, drilled and tapped to join a standard 3½-inch flange. To this shall be bolted with bronze tap bolts and nuts a 3½-inch flanged gate valve. The check valves are designed to operate in sewage and drainage water containing trash. The workmanship and materials shall be the highest grade, conforming to the best standard practice.

The flap proper shall be made of cast steel, and in weight shall not be heavier than the calculated weight of the flap shown on the plans.

GATE VALVES.

General.

(A129) The Contractor shall furnish and place in the pumping station, gate valves of a make approved by the Engineer, of the size shown on the plans, together with all bolts, gaskets, supports, etc., to make a complete installation. These gate valves are designed to operate in sewage and drainage water containing trash and shall be of the highest grade in design, workmanship and material, conforming to the best standard practice.

The gate valves, 2 inches in size and larger, shall be made with iron bodies, bronze stems and full bronze mountings. The 14-inch gate valves shall be of the outside screw and yoke pattern, with solid wedge, geared.

The 8-inch gate on the by-pass shall be of the stationary spindle type with solid wedge. The 3½-inch, 4-inch, and 6-inch gate valves shall be of the outside screw and yoke pattern, with double disc. The valves shall have flanged ends, unless hub ends are shown on the plans or specified.

Each valve shall be constructed with a bolted bonnet, and provided with a stuffing box, constructed with a bolted follower. The stuffing box shall be provided with a bronze lined packing compressor. The stud bolts and nuts of each stuffing box shall be of bronze. The stuffing box shall be so arranged as to be readily accessible. All stuffing boxes shall be packed ready for use.

Both valve and seats shall be provided with bronze valve and seat rings which shall be carefully and firmly fitted and well hammered into dovetail grooves of uniform width and depth and shall be fastened to the cast-iron with counter-sunk head brass screws. The facing surfaces shall finally be machined all over to a perfectly true and smooth bearing, after which they shall be hand scraped to a water-tight joint.

The recess below the seat of the 14-inch gate valves shall be tapped for 1½-inch pipe. In each pipe tap shall be inserted a brass nipple, 1½-inch wrought iron pipe size, on which shall be screwed a 1½-inch brass gate valve of approved make.

The valves shall be of ample strength to withstand and operate satisfactorily under the working conditions specified. They shall be tested under thirty (30) pounds hydrostatic pressure in the shop, at the expense of the Contractor, and any valves which leak or show defects will be rejected. After the valves have been set they shall be tested for satisfactory operation.

Neat floor stands shall be provided for the 14-inch and 8-inch gate valves, equipped with wheels and indicators, where shown on the plans. Extension stems shall be provided, where

required, with guides, so far as practicable.

CONTROLLER.

General.

(A130) The Contractor shall furnish and place in the pumping station a controller unit designed to maintain a constant level in the suction chamber by bypassing a portion of the discharge. The unit comprises a special four-way valve, float and one (1) fourteen (14) inch hydraulically operated gate valve with appurtenances, as shown on the plans. All the apparatus furnished shall be of the highest grade in design, workmanship and material, conforming to the best standard practice. The Contractor shall erect all parts of the unit as far as practicable. Water connections will be furnished and made by the Sanitary District under another contract.

Hydraulic Valve.

(A131) The Contractor shall furnish and erect one (1) fourteen (14) inch hydraulically operated valve on the bypass. The gate valve shall be of the cast iron body pattern, with solid wedge, full bronze mounted, as specified in Section A129, so far as the same may apply.

The operating or lifting shaft of the hydraulically operated gate shall be of bronze. The upper end of the shaft shall be shouldered and threaded to connect with the piston which shall he held rigidly by a hexagon nut and lock nut.

The hydraulic cylinder shall be made of ample diameter to lift or close the gates when water is admitted at a pressure of twenty (20) pounds per square inch, but shall safely withstand and shall not jam the valve under a pressure of seventy-five (75) pounds per square inch. The water available for use will be taken from the mains of the Village of Maywood. The cylinder shall be tested at the maker's shop to a hydrostatic pressure of one hundred and fifty (150) pounds per square inch. The cylinder proper shall be of high-grade cast iron, flanged at both ends, and shall be machine bored through the entire length. It shall be lined with high-grade seamless-drawn brass tubing, which shall fit tightly inside the cast-iron housing, or it may be brass lined in any other manner approved by the Chief Engineer. The cylinder flanges shall be provided with male and female tenons, machined to a close fit, one with another. Suitable cast-iron supports shall be provided for attaching to the masonry. The lower head of the cylinder shall be provided with a stuffing box and bronze lined packing compressor. The stud bolts and nuts of each stuffing box shall be of bronze. Each head or cap shall be provided with tapped holes for wrought iron pipe. The piston shall be of cast-iron with the outer surface machined and equipped with approved means for adjustment of packing, so as to insure against leakage around the pistons.

The top head of the cylinder shall be provided with a stuffing box, similar to that on the lower head, through which a brass tail rod shall pass. The tail rod shall be furnished with an eye on the upper end.

All materials in the hydraulic valve and controller shall be of the best quality and suitable for the work required of them. The valve shall be tested as specified in Section A129, both in the shop and during operation.

GAGES AND FLOAT TUBES.

General.

(A132) The Contractor shall furnish and place all the water level gages, water level recorders, float tubes, floats, gage boards, fastenings and appurtenances, complete, as shown on the plans.

The Contractor shall furnish all the brass bolts, nuts, expansion bolts and wood screws, iron straps, and all other supports necessary to neatly secure and support the water level recording and indicating gages in place.

Water Level Recorders.

(A133) The Contractor shall furnish and set complete ready to use two (2) water level recorders of the type made by the F. B. Sanborn Co. of Boston, Mass., or equal, equipped to indicate water levels in the suction chamber and discharge pipe over the range specified. The charts are to be approximately twelve (12) inches in diameter, one for each 24 hours. The charts shall be printed with the ranges specified. A sufficient supply of charts, pens and ink shall be furnished to

equip each and every gage for one year.

Location	Range in Feet
Suction Chamber	30
Discharge	10

The materials are to be of the best quality for the purpose. The connecting cables are to be heavily armored. The cases are to be a neat glass front in a hinged iron frame, provided with a neat padlock. The cases are to be secured to the wall as directed by the Engineer, with anchor bolts with nickeled heads, screwed into lead sockets. The connecting cable and pressure tube are to be securely fastened in place as shown on the plans, by a brass pipe, w. i. pipe size, securely fastened to the flange at the top of the pipe.

Indicating Gages.

(A134) The Contractor shall furnish and set, complete, the indicating gage boards, gages, floats, float tubes and indicators, complete, as shown on the plans. The boards shall be made of selected clear oak stock, well seasoned, dressed all over. The wood shall be thoroughly primed and given three (3) coats of white paint composed of zinc white, white lead, and linseed oil, of the best quality, of make approved by the Engineer. The figures and lines shall be painted in black, in a size and manner to be approved by the Engineer. The floats shall be of No. 22 B. and S. gage copper, provided with brass strips, and secured to brass stems made to three quarters (¾) inch outside diameter No. 20 B. W. G. A brass indicator shall be furnished.

Gage and Float Tubes.

(A135) The Contractor shall also furnish and set the case-iron pipes for the water level recorders and for the float tubes, together with all specials, covers, plugs, footing pieces, and miscellaneous appurtenances, complete, erected in place, as shown on the plans. All cast iron pipe shall be Class A water pipe, American Water Works Association specification, latest edition. All specials shall be the lightest of the same specifications. The bells shall be provided, however, as specified in Section A123. All pipe shall be erected as specified in Sections A122 to A127, inclusive, so far as the same may apply. All flanges shall be faced and drilled. Hexagonal headed bolts and hexagon nuts shall be furnished. Gaskets shall be placed between all flanges of one-sixteenth (1/16) inch cloth insertion rubber. Split bronze bushings, threaded, shall be furnished where shown on the plans.

Float Tubes for Venturi Meter.

(A136) The Contractor shall also furnish and set the float tubes for the Venturi meters, complete, as shown on the plans. They shall be ten (10) inches internal diameter of Class A pipe, furnished and erected as specified in Section A135, so far as it may apply. Near the bottom, the tubes shall be drilled and tapped for a two (2) inch wrought iron pipe thread. All necessary supports, straps and anchor bolts shall be furnished.

The float tubes shall be connected up with two (2) wrought iron pipe and fittings to the Venturi meter as shown on the plans. Gate valves shall be furnished at the meter. Tees and plugs shall be furnished at angle points, as directed, for clear-outs. Unions shall also be used at intervals. All piping, fittings, valves and material shall be furnished and erected as specified in Sections A172 and A173, so far as the same may apply.

BILGE PUMP.

General.

(A137) The Contractor shall furnish and install, as indicated on the plans accompanying these specifications, one (1) bilge pump, as furnished by the Yeomans Brothers Co., grade one make, or equal, of the vertical, submerged, centrifugal type, with all floor plates and frames, discharge piping, motor, shafting, steady bearings, controls, alarms and all appurtenances necessary for its successful operation, without vibration, in continuous or intermittent service.

Pump.

(A138) The pump shall be of the vertical, submerged centrifugal type having a capacity of one hundred (100) gallons per minute against a total head of thirty-five (35) feet measured from the bottom of the sump. The pump and motor shall also be capable of operating against a head of ten (10) feet. It shall be of the open impeller type without diffusion or guide vanes. The pump

shall be supported by bosses resting on I-beams in the sump.

Motor.

(A139) The motor shall be of a standard manufacture, the General Electric Co. or Westinghouse Co. make or equal, as approved by the Engineer. It shall be of the vertical, squirrel cage type, slow speed. The motor shall be of ample size to care for the operating conditions under all conditions of head ranging from ten (10) to thirty-five (35) feet, to operate on alternating current of three (3) phase, sixty (60) cycle, four hundred and forty (440) volts. It shall be equipped with an approved thrust bearing and with protecting hood over the head.

Shafting and Bearings.

(A140) All necessary vertical shafting with guide bearings and couplings shall be provided to connect the motor and pump so that the pump and motor may operate continuously, with or without load, without vibration and noise. A flexible coupling of approved design shall be provided to connect the vertical extension shaft from the pump to its motor shaft. The vertical shafting and impeller of the pump shall be supported by a self-aligning, force feed, thrust bearing of an approved make, located at the motor floor level. A substantial arrangement for securing thrust collars of thrust bearings to vertical shafting shall be provided. The pump shaft where it passes through the pump casing shall be fitted with a bronze sleeve. A stuffing box and gland, packed, ready for use, shall be provided. The steady bearing on the pump case shall operate in an oil bath. Intermediate steady bearings shall be provided. All necessary oil piping and oil cups shall be provided for all bearings.

Floor Plate and Bracing.

(A141) The Contractor shall provide and place a neat cast-iron floor plate at the motor floor level, to which shall be bolted the feet of the motor and the thrust bearing. The Contractor shall also provide and erect the necessary angle or channel iron bracing to carry the steady bearings, and the I-beams to carry the pump. All angles, channels and I-beams shall be securely bolted to the wall with anchor bolts, and not set in.

Discharge Piping.

(A142) The Contractor shall furnish and install all suction and discharge piping from the bilge pump. There shall be furnished and installed in the discharge pipe from the pump one (1) four (4) inch gate valve and one (1) four (4) inch horizontal swing check valve of the Crane Co. make or equal, iron body with bronze facings.

Controlling and Alarm Equipment.

(A143) With the bilge pumping equipment there shall be furnished and installed an automatic control of the motor, which shall be mounted on an angle iron frame above the motor, on flanged pipe supports.

The automatic control shall consist of one (1) two-pole, butt-carbon-contact, quick-break automatic float switch, fully enclosed in cast iron casing; one (1) enclosed three-pole knife switch with fuses and time limit overload phase protective device.

The float shall be operated by a reinforced copper float running in a pipe casing suspended by brackets from the wall of the building or sump, the float being connected to the float switch by means of a suitable brass rod, with aluminum spreaders and adjustable stops.

There shall be installed with the bilge pump a high water alarm system, with enclosed contacts, a six (6) inch diameter 110 volt A. C. bell, with necessary relay.

Wiring.

(A144) The installation of all wiring to connect controlling apparatus, switches, and other operating devices with station wiring, will be furnished under another contract.

The alarm system shall be operated by a copper float, separate from the float switch control of the motor.

Painting.

(A145) All iron or corrosive material shall be properly primed and given two (2) coats of an approved paint before leaving the shop.

After erection the equipment shall be thoroughly cleaned and given a coat of machinery paint of color as directed by the Engineer, and a coat of varnish. All polished metal work shall be given a coat of lacquer.

Payment.

(A146) The lump sum specified to be paid under Item 17 for the pump and blower house equipment shall include the furnishing and placing of the suction and discharge piping, check valves, gate valves, gages and float tubes, float tubes for Venturi meter, bilge pump and piping, and appurtenances, complete, in place, as specified, and shall include the furnishing and placing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 18—TANK EQUIPMENT.

Description.

(A147) Under Item 18, the Contractor shall receive a lump sum which shall cover the furnishing of all material, labor, tools, and appurtenances required to complete the activated sludge tanks, including aeration tanks, settling tanks, sludge tanks and return channels, and miscellaneous work in the grit chamber, together with other miscellaneous work, complete, except for such work as is covered by the unit prices under Items 1 to 16, inclusive, and under Items 17 and 19 to 22, inclusive, all as specified, and except as otherwise specified herein. Under this item, the Contractor shall furnish all the materials for and construct, complete, the work shown on the plans and specified in detail, under the following general heads:

Ridge blocks.
Filtros plate containers.
Filtros plates.
Sludge tank blocks.
Sludge-removing pipes.
Winches and cable.
Baffles and deflectors.
Inlet weirs.
Slide gates.
Effluent troughs.
Sludge troughs.
Sludge measuring boxes.
Grit chamber equipment.

No payment will be made at the unit prices specified for concrete under items 5, 6, and 7 for any concrete used and placed in the ridge blocks, filtros plate containers and sludge tank blocks furnished under items 18. The cost of these shall be included in the lump sum to be paid under item 18.

For the effluent troughs and sludge measuring boxes, a standard tank construction detail may be submitted by the Contractor for approval, built up of dressed stock, through bolted in sides and bottom, and suitably stiffened, as manufactured by a recognized wooden tank manufacturer, all subject to the approval of the Engineer.

All the effluent troughs, sludge troughs, and sludge measuring boxes shall be made carefully with tight joints, to hold water. All leaks shall be fixed. The work shall be made watertight by the Contractor without the use of paint. The boxes and troughs, when erected, shall be kept full of water. The Contractor shall supply all wooden plugs or other material required for this purpose.

Ridge Blocks.

(A148) Inside the aeration tanks and elsewhere are required ridge blocks, to make the ridge and valley construction shown on the plans. The ridge blocks and filler blocks, wherever shown, shall be composed of Class B concrete, as specified in Sections A37 to A64, inclusive, so far as the same may apply. This concrete shall be moulded in forms, rigidly framed to prevent springing or warping. The blocks shall preferably be cast separately and afterwards placed in position. They may, however, with the approval of the Engineer, be constructed directly in place on the floor of the aeration tanks. Especial care shall be taken to keep in true alignment the edges which abut against the filtros plate containers. All surfaces shall be smooth and free from voids. Slight imperfections shall be plastered before the filtros plate containers are set. All blocks shall be inspected by the Engineer before the filtros plate containers are set, and all imperfect blocks shall be removed and promply replaced with acceptable ones, at the expense of the Contractor. If the ridge blocks are not cast in place, they shall be set in a thin bed of cement mortar composed of one (1) volume of cement and three (3) volumes of plastering sand. All chinks or crevices between the ends of the abutting blocks or between blocks and the walls of the tank shall be neatly filled with fine moist sand to within one-half (½) inch of the surface of the block, and then pointed flush with the cement mortar above specified. After all the pointing and

plastering has been completed, the channels or spaces between the blocks in which the containers are to be set, shall be thoroughly and carefully cleaned of all mortar, mortar droppings, or other debris.

Where drains, holes, grooves or other openings are shown on the plans, they shall be made neatly in the blocks, by suitable molds at the time the blocks are cast.

Where shown on the plans, the blocks shall be secured in place by dowels, grouted in. The dowels shall be of reinforcing steel, set in holes drilled in the bottom of the tank after the concrete is set, and grounted in. Companion holes shall be drilled or left in the blocks to be anchored.

Filtros Plate Containers.

(A149) Between the ridge blocks in the bottom of the aeration tanks, and in various channels appurtenant thereto, wherever shown, are required filtros plate containers, to hold the filtros plates through which the air is blown in fine bubbles. These containers shall be made above ground and shall be cast in watertight forms, preferably of cast-iron, accurate in size, true in shape, and rigidly framed to prevent any spring or warping or other distortion, while the concrete is being placed. The forms shall not be removed from the container before the concrete has attained its final set. The concrete shall be Class A concrete, made up with ballast, well graded, all of which shall pass through a one (1) inch ring. It shall be placed in the forms as quickly as possible after being mixed. The filling of forms shall be continuous, and if for any reason the work is stopped long enough for the cement or concrete to take its initial set, such partly filled forms shall be emptied. The concrete shall be thoroughly tamped into place and thoroughly spaded or troweled on the inside face to make a rich mortar and smooth finish. A dense watertight and airtight concrete is required. As soon as the forms are removed, the containers shall be protected from the sun, wind and weather for at least six (6) days. All containers shall be marked with the date of manufacture, and none shall be used until at least thirty (30) days old.

Reinforcing steel shall be of the quality and kind specified in Sections A65 to A69, inclusive, so far as the same may apply. The sizes shown shall be placed as shown on the plans. All reinforcing steel used in containers which are accepted, will be paid for at the unit price specified under Item 8. No payment will be allowed for reinforcing steel in containers which are rejected. The Contractor shall also furnish and place the wrought iron pipe fittings and wrought iron ring bolt, as shown on the plan. These shall be made for the purpose from a working plan to be furnished by the Sanitary District. No payment will be made for these fittings at the unit prices specified to be paid for reinforcing steel, miscellaneous steel, or cast iron under Items 8, 9 and 10.

Especial care shall be taken to secure sound airtight and watertight containers, true to dimensions of clean smooth concrete, free from flaws or defects. Unusual care must be taken to keep and make in true alignment the faces upon which the filtros plates seat and the seats into which the T-bars seat, so that all faces line up true to make a complete bearing all around for the filtros plate. If necessary, in the opinion of the Engineer, the seats shall be chipped or ground true, by the Contractor at his expense. All containers will be inspected by the Engineer before the filtros plates are set, and all imperfect containers shall be removed and destroyed by the Contractor at his expense.

Filtros Plates.

(A159) The Contractor shall furnish and set in the filtros plate boxes a specially prepared porous plate, known as Filtros, made by the General Filtration Co. of Rochester, N. Y., or equal. The filtros plate shall be composed essentially of silica, bonded by a silicate. The plates furnished shall be of the standard size twelve (12) by twelve (12) inches square, one and one-half (1½) inches thick, of the grade between those known as "R" and "S," which plate when dry shall pass at two (2) inch water pressure between ten (10) and twelve (12) cubic feet of air per square foot per minute. The Chief Engineer may, however, modify this rating in a written order, if he desires, to twelve (12) to fifteen (15) cubic feet of air per square foot per minute, or in this general range. The ratings shall be as nearly uniform as possible for the plates to be set in each tank. Each

plate shall be tested and marked with its rating. The ratings shall be reported to the Engineer. The rating, number of plates at each rating for each tank and other details shall be adjusted and arranged by the Chief Engineer and the Contractor, at such time as the order for the plates is placed by the Contractor subject to the approval of the Chief Engineer.

The plates shall be carefully inspected on the site of the work. All broken or imperfect plates shall be rejected. The plates shall be sorted by ratings, to conform to the schedule agreed upon by the Chief Engineer and placed in the boxes to conform to the schedule. The plates shall bear evenly on all four sides. The Contractor shall furnish the T-bars shown on the plans. These shall be cut to length from stock, thoroughly cleaned, and heavily galvanized, before delivery on the work. Before the plates are set in a container, the container, plates, pipe connection and T-bars shall be thoroughly cleaned. The plates shall be centered and seated, and the vertical joints around the plate between the plate and the concrete box shall be carefully filled with cement mortar, thoroughly troweled into place and pointed. The plates shall be kept clean and free from all cement on the surface. The mortar shall be composed of one (1) part of Portland cement and two (2) parts of fine sand.

Sludge Tank Blocks.

(A160) Inside the sludge tanks are required ridge blocks, to make the ridge and valley construction shown on the plans. The blocks shall be made and placed as specified in Section A148, so far as the same may apply. Reinforcing steel ordered placed in the blocks will be paid for at the unit price specified under Item 8.

Sludge-Removing Pipes.

(A161) The sludge tanks shall be equipped with the sludge-removing pipes, elbows and nipples, shown on the plans. The sludge-removing pipe or collector shall be a spiral riveted pipe, 8 inches interior diameter, of galvanized sheet steel, No. 14 gage, Birmingham gage, fitted with forged steel flanges, faced and drilled, American standard drilling. A neat pipe strap, one-eighth (⅛) inch thick, bolted on, shall be furnished to which the bronze cord is to be attached. The cast iron elbows and wrought iron pipe nipples shall be furnished as specified in Sections 171 to 173, inclusive, so far as they may apply, and shall be placed, as shown on the plans, with a loose thread, so as to allow an upward and downward movement of the sludge removing pipe by the cable. All threads shall be coated with a paste of graphite and heavy engine oil before assembling. After erection the elbows, nipples, pipe straps, and flanges as well as all bolts, boltheads and nuts shall be given two (2) coats of asphaltum varnish or other approved paint.

Winches and Cable.

(A162) The Contractor shall furnish and set in place six (6) hand power winches of the safety worm-geared type, made of the best malleable iron, with a drum approximately five and one-half inches in diameter, six (6) inches long, with drum flanges about two and three-quarters (2¾) inches high, of the pattern made by the Sasgen Derrick Co. or equal. Each winch shall be provided with a crank and handle, and shall be bolted to the concrete with steel anchor bolts. Suitable oiling holes shall be provided at the bearings.

The Contractor shall also furnish and place on each winch drum, connected to the lifting drain pipe, a twenty-five (25) foot length of flexible phosphor bronze tiller rope one-quarter (¼) inch diameter, with an estimated ultimate strength of 1,500 pounds. The ends of the rope attached to the lifting pipe shall be carried around a brass thimble and securely spliced or held by clips. The upper end of the rope shall be fastened to the drum in an approved manner. The winches and anchor bolts shall be given two (2) coats of asphaltum varnish or other approved paint after erection.

Baffles and Deflectors.

(A163) At all the inlets to the settling tanks shall be placed inlet baffles, made of galvanized genuine wrought iron plate, the Merchants IX, Toncan or equal brand, of thickness equal to No. 12, B.W.G. These baffles shall be stiffened at the corners and wall by angle irons as shown. Each baffle shall be secured to the wall by anchor bolts, leaded in. Before erection in place, the baffle shall be given

two (2) coats of asphaltum paint of approved make. At each inlet shall also be placed a deflector of the same weight and material above specified bolted to the wall. Immediately after erection all bolts and nuts shall be given two (2) coats of asphaltum varnish or other approved paint.

Inlet Weirs and Slide Gates.

(A164) The Contractor shall furnish and set the inlet weirs and slide gates as shown on the drawings, with all necessary materials and appurtenances, complete. All iron work shall be galvanized after cutting and making up.

The inlet weirs shall be made of steel plate, one-quarter (¼) inch thick, with a V-notch cut as shown and filed true. If necessary the edges shall be ground or filed after galvanizing. The bolt holes shall be slotted. Bronze stud bolts and nuts shall be furnished, and cast-iron washers or spacers.

The slide gates shall be made of steel plate, one-quarter (¼) inch thick, to which shall be riveted a neat steel handle made from stock one-half (½) inch diameter.

The weirs shall be set exactly true to the line and grade given by the Engineer. The plates shall be bedded in a thin bed of mortar, composed of one (1) part Portland cement and three (3) parts plastering sand.

Effluent Troughs.

(A165) The Contractor shall furnish and place the effluent troughs, posts, baffles and appurtenances in the settling and aeration tanks as shown on the plans. The troughs shall be made of well seasoned selected No. 1 yellow pine, 2-inch stock, free from loose knots, dressed all over, and doweled together, bolted, strapped and fastened with lag screws, as shown on the plans. Suitable fillets shall be placed in the corners. All necessary bolts, washers, wood screws, lag screws and other fastenings shall be furnished.

The weirs shall be made of genuine wrought iron plate, galvanized, one-eighth (⅛) inch thick, cut with a true-edge, which shall be filed or ground level after erection in place. The weirs shall be firmly secured to the troughs by screws.

The iron baffles shall be made of genuine wrought iron plate, galvanized, of thickness equal to No. 10 B.W.G. The baffles shall be screwed to the troughs and braced with strap iron braces, bolted and screwed in place.

Angle braces shall be securely fastened by lag screws to the troughs and posts. The posts shall be made of No. 1 yellow pine, dressed all over, securely guyed in place by one-half (½) inch galvanized steel wire rope, secured to galvanized eye bolts set in the wall. Each guy rope shall be provided with a galvanized turnbuckle. When adjusted the threads shall be heavily painted with a mixture of white lead and tallow. The wire rope shall be bent around suitable galvanized steel thimbles and secured by approved wire rope clips.

The wooden baffles shown on the plans, separating the sewage aeration from the sludge aeration compartment shall be of No. 1 yellow pine, dressed all over, as shown on the plans.

Sludge Troughs.

(A166) The Contractor shall furnish and support the sludge troughs and appurtenances in the aeration and settling tanks, complete, as shown on the plans. The construction shall be as specified under Section A165, so far as it may apply.

Sludge Measuring Boxes.

(A167) The Contractor shall furnish and set the sludge measuring boxes, required, made in accordance with the detail plan. The boxes shall be made of selected No. 1 yellow pine, free from loose knots, dressed all over and dowelled and bolted together. The boxes shall be bolted to the pipe flanges shown, a rubber gasket, painted on both sides with white lead, being set between. The weirs shall be made of steel plate cut to shape and filed true on the measuring edge, then galvanized. The measuring edges shall be refiled or ground if needed to smooth up. The weirs shall be fastened to the boxes with brass screws, using a rubber gasket painted on both sides with white lead. The necessary concrete, Class B, shall be placed in the boxes, and hand trowelled with an iron trowel to a smooth finish. The Contractor shall furnish the necessary pipe supports, with flanged ends and angle irons, neatly painted with two (2) coats of asphaltum varnish.

Each box shall be equipped with a float measuring gage, made up of sheet

copper, No. 14 B.W.G., neatly seamed and soldered, with the stem of seamless drawn brass pipe, w. i. pipe size, running through the float, and fastened top and bottom. Each float shall have a screwed inlet plug. The gage board shall be of oak, painted as specified in Section A134, and graduated as shown.

Grit Chamber Equipment.

(A168) The Contractor shall furnish and place in the bottom of each compartment of the grit chamber the 8-inch split tile and graded crushed stone and gravel as shown on the plans and specified herein. The 8-inch split tile shall be hard burned tile, with bells, of the quality specified in Sections A102 and A103. They shall be lightly bedded in the bottom of the grit chamber while the concrete is still soft. The joint between the barrel of the pipe and socket shall be kept full width, and the entering pipe shall make an open joint of one (1) inch between the end of the pipe and the bottom of the socket. After the concrete has set and the forms have been removed, a bed of clean graded material shall be built up, layer by layer, composed of a bottom layer six (6) inches thick of crushed limestone, passing a ring 1¼-inch diameter and retained on a ring ¾-inch diameter, a middle layer three (3) inches thick of crushed limestone passing a ring ¾-inch diameter and retained on a ring ¼-inch diameter, and a third and top layer composed of three (3) inches of fine roofing gravel practically all passing a ring ⅜-inch diameter and retained on a sieve having ten (10) meshes per lineal inch. All material shall be as specified in Section A41, so far as the same may apply. The 6-inch tile pipe shall be furnished as shown and of the quality specified in Sections A102 and A103.

Payment.

(A169) The lump sum specified to be paid under Item 18 for the tank equipment shall include the furnishing and placing of the ridge blocks, filtros plate containers, filtros plates, sludge tank blocks, sludge removing pipes, winches and cable, baffles and deflectors, inlet weirs, slide gates, effluent troughs, sludge troughs and grit chamber equipment, with appurtenances, complete, in place, as specified, and shall include the furnishing and placing of all labor, tools, material and appurtenances necessary to complete the work as specified.

ITEM 19—AIR PIPING.

Description.

(A170) Under Item 19, the Contractor shall receive a lump sum which shall cover the furnishing of all material, labor, tools and appurtenances required to furnish and erect in place all the air piping required to connect up the blowers with the air inlet duct and with all the filtros plate containers, air lifts, sludge pipes, aeration pipes in sludge tanks, air relief line, cross connection between the supply lines, and all other points where air piping is indicated. Included under this item shall be the placing and connecting of the Venturi air meters, the connecting up of the Venturi air meters with the recording and indicating apparatus, the placing and connecting up of the separators in the blower room basement, and all other work and material required to complete the air piping as shown on the plans and specified herein.

Included under this item shall be all piping required of riveted spiral sheet steel, cast iron, and wrought iron carrying air, with all necessary bends, specials, flanges, check valves, safety valve, gate valves, traps and other appurtenances. It is the intent of the specifications under this item to provide for the furnishing and placing of all piping, valves, supports and appurtenances required to complete the air piping in all parts of the work.

Riveted Spiral Pipe and Specials.

(A171) All riveted spiral pipe shall be of the American Spiral Pipe Works make or equal, galvanized both inside and out, of sheet steel. All 8, 10 and 12-inch diameter pipe shall be of No. 14 gage, B.W.G. All 16-inch and 24-inch pipe shall be of No. 12 gage, B.W.G. All flanges shall be of forged steel, securely riveted to the steel pipe. All bends, Ys and other changes of direction shall be made with spiral riveted pipe, but where necessary, flanged cast iron fittings shall be used. These shall be of standard patterns made by the American Spiral Pipe Works or equal, of weight and dimensions to be approved by the Engineer, and shall be galvanized. The Contractor shall submit a layout plan for the approval of the Engineer. In any case sufficient flanged joints

shall be made to facilitate ready erection or repair of the pipe. The use of standard reinforced spiral pipe, as made by the Standard Spiral Pipe Works or equal, will be permitted, of the same gages of sheet metal, as above specified. The spiral joints shall be made with a continuous interlocking seam. Flanges may be riveted or welded to the spiral pipe. The details of construction shall be submitted to the Engineer for approval.

All galvanizing shall be done by the hot process, after all forming has been done, joints riveted, welded or interlocked, and the flanges attached.

All flanges shall be faced and drilled. In general, the standard forged steel flanges of the American Spiral Pipe Works make or equal may be used, of the proper spiral pipe diameter and drilling, provided, however, that to connect to all gate valves, check valves, separators, Venturi meters, suction and discharge flanges of the blowers and other points where flanges of the American Society of Mechanical Engineers standard diameter and drilling have to be joined, the flanges furnished on the air piping or specials shall be of forged steel, of the A. S. M. E. standard diameter and drilling, herein referred to as the American standard.

An expansion joint of approved character, air tight, shall be placed in the 24-inch air line in the blower room basement, and also in the pipe gallery at a point to be approved by the Engineer.

At each meter, the Contractor shall drill the main air pipe and put a saddle on the riveted steel pipe, which shall be drilled and tapped for a 1-inch wrought iron pipe. A galvanized plug shall be furnished for each tap, together with a bushing and a ⅜-inch galvanized pipe nipple and cap screwed together so that the cap on the end of the nipple will not project beyond the center of the main air pipe, when the bushing is screwed home.

Cast-Iron Pipe and Specials.

(A172) All cast-iron pipe and specials shall be furnished and placed as specified in Sections A123 to A127, inclusive, so far as they may apply. All cast-iron pipe shall be Class A, bell and spigot, except for the connections to the Venturi meters, which shall be flanged. All specials shall be of the lightest class, for the respective sizes, given in the American Water Works standard specifications. All flanges shall be faced and drilled, American standard drilling.

The cast-iron header pipes in the aeration tanks shall be drilled and tapped for the 1½-inch wrought iron pipe connections to the filtros plate containers. At the end of the 24-inch air pipe, the 24-inch and 16-inch pipes shall be drilled and tapped for 2-inch wrought iron pipe connections, to drain the 24-inch pipe.

Certain cast-iron header pipes and specials in the aeration tanks shall be supplied galvanized, instead of the standard black coating. All such galvanizing of cast-iron pipe, when and as ordered by the Engineer, will be paid for at the unit price per pound specified for galvanizing under Item 25.

Wrought Iron Pipe and Fittings.

(A173) All wrought iron piping shall be of standard weight, Byers genuine wrought iron or equal, galvanized. All pipe shall be stood on end and pounded before erection, to remove all scale. Threads shall be clean cut and long taper.

In one aeration tank, as noted on the plans, galvanized steel nipples shall be used in connecting up to the filtros containers. These nipples shall be kept entirely separate from all genuine wrought iron nipples.

All fittings shall be galvanized. Fittings for pipe two (2) inches in size or larger shall be of fine grain gray cast iron. Fittings for pipe one and one-half (1½) inches in size or smaller shall be of malleable iron. All threads shall be cut clean, tapering and smooth. Flanged unions shall be used on all pipe 2½-inch diameter and over. Railroad unions with brass to iron seat shall be used on all piping 2-inch diameter and smaller. Pipe bends shall be made neatly to keep the full diameter of the pipe, where shown in the plans or ordered by the Engineer.

The piping shall be made up with a sufficient number of unions to permit ready breaking of lines at all points for inspection or maintenance. All piping shall be screwed together with an application of graphite and engine oil or other approved pipe compound on all threads. This application shall be carefully watched and all oil, gra-

phite, and dirt thoroughly wiped off the inside of every joint.

In the sludge concentration tanks, the air distribution piping shall be furnished with the 2-inch galvanized wrought iron piping drilled with ⅛-inch diameter holes, spaced 4 inches center to center and staggered, as shown on the plans. All burrs inside and outside the pipe shall be removed.

Water Traps.

(A174) At the low point on the main air lines the Contractor shall furnish and install on the 24-inch air line one (1) ¾-inch trap, and on the 10-inch air line one (1) ½-inch trap, both traps being of the Cranetilt type, Crane Co. Catalog, p. 273, or equal.

Check Valves and Relief Valve.

(A175) The Contractor shall furnish and place check valves of the sizes shown on the plans. In the discharge line from each blower and in the main headers to each aeration tank, as shown on the plans and specified herein, the check valves shall be standard swing check valves, iron body, with brass seats, with flanged ends, of the Crane Co. make, or equal. The flanges shall be faced and drilled, the American standard drilling. On the piping to the water traps and on the air lines to the feed troughs to settling tanks the check valves shall be standard brass check valves, with screw ends, of the Crane Co. make or equal.

A 6-inch flanged pressure relief valve of the spring loaded type, Crane Co. No. 386-A or equal, is to be furnished and set in the 6-inch relief line from the 24-inch main air line. This valve is to be adjustable to pressures up to 12 pounds per square inch gage. The flanges shall be faced and drilled.

Gate Valves.

(A176) All gate valves shall be of the double disc type, Chapman Valve Mfg. Co. or Crane Co. make or equal, suitable for light pressures, unless otherwise specified. All valves shall be of the outside screw and yoke pattern, iron body, full brass mounted for all pipe two (2) inches in diameter or larger. All valves shall be of the rising stem pattern, all brass, except the hand wheels, for all pipe one and one-half (1½) inches in diameter or smaller. All valves shall be left, packed, ready for use. Cotton yarn packing, dipped in cylinder oil, or other approved packing shall be used.

Extension stems shall be furnished where shown on the plans, with all necessary guides or supports bronze bushed. A neat floor stand shall be furnished and placed on the main operating floor, for the 10-inch blow off valve on the main air line in the blower room basement. In the sludge concentration tanks the 3-inch gate valves shall have non-rising stems, with extension stems, and guides as shown on the plans.

A ten (10) inch motor driven flanged gate valve, with solid plug gate suitable for throttling, is to be provided on the by-pass between the high pressure and low pressure air lines. The motor is to operate on 440 volts 3 phase 60 cycle alternating current and is to be controlled from a point approximately three hundred (300) feet away. Suitable controlling devices are to be provided to permit the valve to be stopped and set at any opening between full open and closed positions, and a set of indicator lamps to show whether the valve is open, closed or partly open is to be included. A limit switch for automatically stopping the motor when the valve is fully opened or closed shall also be provided as well as supplementary handwheel operation with suitable devices for disengaging the motor when hand operation is desired. The valve shall be of the general type specified in Section A129, and shall be furnished with drilled flanges. The valve and controlling devices shall be put in careful adjustment before acceptance. The wiring and erection of the controlling device will be done under another contract. 110 volt current will be available, however, for all solenoid control.

Gaskets, Bolts, Etc.

(A177) The Contractor shall supply and place all gaskets, bolts, nuts stud bolts, etc., necessary to erect the work and make it air tight. The gaskets shall be of rubber with cloth insertion, of a thickness and quality approved by the Engineer. The bolts and nuts shall be furnished and painted as specified in Section A127.

Supports.

(A178) The Contractor shall furnish at his expense all supports necessary to support the air piping and appurtenances in a firm substantial manner to the lines and grades given by the Engineer. The concrete saddles, how-

ever, shown on the plans, will be paid for at the unit price specified under Item 6. The Contractor shall supply all stirrups, rods, beam clamps, hangers, structural shapes or pipe columns, whether shown on the plans or not, necessary to complete the work in a manner satisfactory to the Engineer.

Pipe Sleeves.

(A179) Wherever air pipe lines pass through the walls or floors in general, there shall be provided pipe sleeves made of cast-iron with wall or floor plates, painted black. On all wrought iron pipe lines, the Contractor shall furnish these at his own expense. On cast-iron or riveted steep pipe lines, wall or floor casting will be paid for at the appropriate unit price specified under Items 9 or 10, according to the material used. Where air lines pass through the walls of the pipe gallery or tanks, holding water or sewage, the pipe lines or appropriate wall castings forming a part of the pipe line shall be bedded in the concrete, and no sleeve will be required. No additional payment will be made for such piping at any unit prices.

The Contractor shall furnish, at his own expense, a man to set the sleeves while the walls and floors, are being poured. All cutting, patching and repairing of walls, floors, partitions, etc., necessary for the proper installation of the air piping shall be included under this item.

Erecting Equipment Furnished by Sanitary District.

(A180) Under Item 21, the Contractor is to unload and erect certain equipment furnished by the Sanitary District as therein specified, including blowers, separators, Venturi meters and recording apparatus for measuring air, etc. Under Item 19, the Contractor shall connect the air lines with all such apparatus, in a complete manner, so that the blowers, separators, Venturi meters and recording apparatus, etc., will be connected up, ready for use. The drain and drain connections to carry away the water from the separators are not included under this contract. The recording and indicating apparatus for the air meters shall be connected to the respective connections on the meters. Gate valves shall be furnished at the meters on all pipe lines connecting to the recording or indicating apparatus.

Cleaning and Testing Air Piping.

(A181) It is of unusual importance that all air piping be absolutely clean inside when the work is completed. During erection, the Contractor shall use every care to clean out all pipe before placing, and to keep it clean after erection. By clean is meant free from every kind of foreign material, of whatever origin. Proper wooden bulkheads shall be provided to stop off each day's work. Before connecting up to the filtros plates, the entire system shall be blown out thoroughly for at least eight (8) hours. The current and operation of the blowers will be supplied by the Sanitary District, if the apparatus is set up and ready to operate. If the blowers are not ready to operate, the Contractor shall postpone the final connection of the filtros plate boxes until such time as the lines can be blown out.

The Contractor shall make the air lines tight under a test pressure of air at ten (10) pounds per square inch. This pressure shall not drop more than one-half (½) pound in one (1) hour with all valves and connections shut. All leaks shall be stopped. The lines to be bedded in concrete or laid in excavation shall be tested before the concrete or backfill is placed. The Contractor shall furnish the necessary bulkheads and make the necessary taps, and supply all connections for the gauges, which the Sanitary District will furnish. The Contractor shall also furnish for testing purposes all the air required, at his own expense.

Painting.

(A182) After the work is erected and tested all black iron pipe work, specials, pipe supports and hangers of all kinds, bolts, bolt heads and nuts shall be given two (2) coats of asphaltum varnish or other approved paint. These two coats, however, shall not be in addition to the two coats specified in any particular section of this item, but shall be taken to include all work not otherwise covered in this item. No painting is required on dipped cast-iron pipe or special, except to retouch the coating where damaged.

Payment.

(A183) The lump sum specified to be paid under Item 19 for the air

piping shall include the furnishing and placing of all air piping, including spiral riveted steel pipe, wrought iron pipe, cast iron pipe, specials, flanges, check valves, safety valve, gate valves, traps and other appurtenances, complete, in place, as specified, and shall include the furnishing and placing of all labor, tools, materials and appurtenances, necessary to complete the work as specified.

ITEM 20—SUPPLY, EFFLUENT, SLUDGE AND DRAIN PIPING.

Description.

(A184) Under Item 20, the Contractor shall receive a lump sum which shall cover the furnishing of all material, labor, tools and appurtenances required to furnish and erect in place the supply, effluent, sludge, and drain piping, with miscellaneous piping and appurtenances, within the pipe gallery, aeration tanks, settling tanks, and sludge tanks, as shown on the plans and specified herein. It is the intent of the specifications under this item to provide for the furnishing and placing of all piping, valves, supports and appurtenances required to complete the pipe work in the pipe gallery, aeration tanks, settling tanks and sludge tanks, exclusive of the tank equipment and air piping specified to be paid for under Items 18 and 19 respectively, and exclusive of all piping specified to be paid for at the unit prices under the respective items, provided, however, that no payment shall be made for any work at said unit prices for Items 9 to 16 inclusive, unless specifically mentioned in said Items 9 to 16 inclusive, for payment.

Supply Piping.

(A185) The supply piping shall comprise all piping, specials, fittings, gate valves, and appurtenances required to furnish and erect in place the piping furnishing raw sewage to the aeration tanks, beginning with the junction of the cast-iron pipe with the tile supply pipe, just north of the operating gallery, and extending through the operating gallery to each aeration tank, as indicated on the plans. The Venturi meters shall be connected up in the pipe lines. The meters shall be connected to the float tubes with galvanized wrought iron pipe, with a gate valve on each pipe connecting to a float tube, set near the meter tube. Under this heading shall also be furnished the extension of the water supply piping in the pipe gallery, aeration tanks, settling tanks, and sludge tanks, as shown on the plans.

Effluent Piping.

(A186) The effluent piping shall comprise all piping, specials, fittings, gate valves and appurtenances required to furnish and erect in place the piping carrying the effluent of the aeration tanks to the settling tanks and carrying the effluent of the settling tanks to the 42-inch concrete main outlet.

Sludge Piping.

(A187) The sludge piping shall comprise all piping, specials, fittings, gate valves and appurtenances required to furnish and erect in place the piping carrying the sludge from the bottom of the settling tanks to the measuring boxes and return channels, and all other piping in which sludge is carried, except such apparatus as is covered under Item 18.

Drain Piping.

(A188) The drain piping shall comprise all piping, specials, fittings, gate valves and appurtenances required to furnish and erect in place the piping which drains the aeration and settling tanks, through the pipe gallery to its junction with the 18-inch cast iron main drain at the north end of the operating gallery, and the piping draining the sludge tank to its junction with the 12-inch cast iron main drain at the north end of the tanks.

Wrought Iron Piping.

(A189) All wrought-iron piping shall be of standard weight Byers genuine wrought iron or equal. All piping and fittings 1½ inch diameter and smaller in size shall be galvanized. All piping and fittings 2 inch diameter and larger shall be given a hot pipe dip as specified in Section A123. All pipe and fittings shall be furnished and made up as specified in Section A173, so far as the same may apply.

Cast-Iron Piping and Specials.

(A190) All cast iron pipe and specials, whether bell and spigot or flanged, shall be furnished and placed as specified in Sections A123 to A127, inclusive, so far as the same may apply. For connecting all flanged

sluice gates or gate valves in tanks, where the sluice gates or gate valves will be under water, bronze bolts and nuts shal be furnished instead of iron. Blank flanges, drilled and faced, shall be provided where shown on the plans, with bronze bolts and nuts, or stud bolts. Cast iron float tubes shall be drilled and tapped for the wrought iron pipes connecting to the Venturi meter tubes. Condensed fittings shall be furnished where shown on the plans.

Gate Valves.

(A191) All gate valves shall be of the double disc type unless otherwise specified, the Chapman Valve Mfg. Co. or Crane Co. make or equal, suitable for light pressures. On all pipe two (2) inches in diameter or larger, all valves shall be iron body, full brass mounted, with screw, flanged or hub ends as shown on the plans or required. On all pipe one and one-half (1½) inches in diameter or smaller, all valves shall be of the rising stem pattern, all brass, except the hand wheels. All valves shall be left, packed, ready for use. Cotton yarn packing, dipped in cylinder oil, or other approved packing shall be used. Extension stems shall be furnished where shown on the plans or specified herein, together with all necessary guides or supports, bronze bushed.

In general all gate valves, 2-inch and over in size, shall be outside screw and yoke. In particular, however, the thirteen 6-inch gate valves on the drains from the settling tanks shall be of the non-rising stem pattern, with extension stems and hand-wheels, secured by neat guides, bronze bushed.

The 24-inch gate valve on the final discharge of the settling tank effluent into the 42-inch outlet drain, shall be of the plug gate type, with hub ends, non-rising stem, equipped with a neat wheel stand provided with indicator.

A neat floor stand, with hand-wheel and indicator shall be supplied with each of the 12-inch gate valves controlling the flow of sewage to the aeration tanks.

Pipe Supports and Sleeves.

(A192) The Contractor shall furnish at his expense all supports necessary to support the piping and appurtenances in a firm, substantial manner to the lines and grades given by the Engineer. All stirrups, rods, beams, clamps, structural shapes, or pipe columns or other appurtenances, whether shown on the plans or not, shall be furnished to complete the work in a manner satisfactory to the Engineer. The I beams and channels shown in the pipe gallery are shown as the minimum required. The wall end of beams shall be set in pockets left in the concrete, and grouted in at a time subsequent to the pouring of the concrete. The wall end of beams shown shall project six (6) inches into each wall and shall be equipped with bearing plates 6x8x¾ inch size. The beams and plates shall be given at least one (1) shop coat of red lead and two (2) coats of asphaltum or other approved paint in the field. The Contractor shall submit his scheme for supporting the pipes in advance of the work for the approval of the Engineer.

Where shown on the plans, sleeves shall be furnished through the walls, in particular on the sludge return lines, where cast-iron sleeves shall be set in the walls, into which the wrough-iron pipe shall be leaded and calked to make tight. Sleeves shall be furnished on all sluice gate stems where passing through concrete walls, floors or copings as required. These shall be of wrought-iron pipe, unless otherwise specified. All sleeves shall be furnished by the Contractor at his own expense.

Supports for Sludge Pipe.

(A193) The Contractor shall furnish the necessary supports for the sludge piping, as shown on the drawings. The cone shall be made of galvanized genuine wrought iron, No. 12 gage, B. W. G., cut, flanged and riveted to shape. All necessary piping, flanges, clamps, caps, eye bolts, bolts, and wall pieces shall be furnished to make the bracing to brace the vertical sludge pipes in two directions.

The galvanizing shall be done after the cone has been cut, flanged and riveted up.

Erecting Material Furnished by Sanitary District.

(A194) Under Item 21, the Contractor is to unload and erect certain equipment furnished by the Sanitary District as therein specified, including Venturi meters and recording ap-

paratus for measuring sewage, sluice gates and appurtenances. Under Item 20, the Contractor shall connect up the sewage meters with the respective recording apparatus, complete, ready for use. Gate valves shall be furnished at the meters on all pipe lines connecting to the recording apparatus. The sluice gates, operating stands, guides and other appurtenances shall be erected in place, suitably connected to the piping they serve, or secured to the concrete with anchor bolts, as shown on the plans. The lining up of the gates shall be carefully done.

Painting.

(195) After the work is erected and tested, all black iron pipe work, specials, pipe supports and hangers of all kinds, bolts, boltheads and nuts shall be given two (2) coats of asphaltum varnish or other approved paint. Galvanized iron work shall not be painted.

Testing.

(A196) All the piping under this item shall be tested in place for water tightness, so far as is practicable in the opinion of the Engineer. Where piping is to be embedded in concrete, it shall be tested before concrete is poured around the pipe. The test pressures shall be double the maximum working pressure on the pipe. The test pressure shall not drop more than ten (10) per cent in one (1) hour with all valves and connections shut. The Contractor shall furnish, at his own expense, all apparatus, water, and appliances necessary or proper for all tests except the gages. All joints shall be examined and all visible leaks stopped.

Payment.

(A197) The lump sum specified to be paid under Item 20 for the supply effluent, sludge and drain piping shall include the furnishing and placing of all piping, including wrought-iron pipe, cast-iron pipe, specials, flanges, gate valves, and other appurtenances, together with the erection of material furnished by the Sanitary District, complete, in place, as specified, and shall include the furnishing and placing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 21—ERECTION OF EQUIPMENT.

Description.

(A198) Under Item 21, the Contractor shall receive a lump sum which shall cover the furnishing of all material, labor, tools and appurtenances required to erect in place the equipment specified herein to be furnished by the Sanitary District f. o. b. cars, the Chicago and North-Western Railway, Maywood, Ill. Included shall be the unloading from the cars, transportation to the site of the work, the erection in place, and the protection at all times from the weather. The Sanitary District will order the equipment consigned direct to the Contractor, who shall be responsible for any delays in unloading, and shall pay all demurrage charges which may accrue.

The equipment to be furnished by the Sanitary District comprises:

a. Three (3) vertical centrifugal pumps, with shafting and steady bearings, complete.

b. Six (6) blowers, with separators and appurtenances.

c. One (1) traveling crane.

d. Venturi meters for sewage and air, with indicating and recording apparatus.

e. Sluice gates.

f. Door thickeners.

g. Steel I-beams for pump room floor and travelers in basement.

The Sanitary District expects to be able to deliver the above equipment, to be furnished by other contractors, f. o. b. cars, not later than the expiration of the following time intervals in calender days from the date of the approval of the bond of this Contractor by the Board of Trustees of the Sanitary District:

a. Centrifugal pumps (Division O), 270 days.

b. Blowers (Division R), 270 days.

c. Traveling crane (Division N), 150 days.

d. Venturi meters (Division W). Meter tubes, 120 days. Recording apparatus, etc., 270 days.

e. Sluice gates, 180 days.

f. Door thickeners, 270 days.

g. Steel I-beams, 100 days.

Of this equipment, subheads a to f inclusive will be furnished f. o. b. cars Maywood. The material under subhead g will be delivered at the

site of the work by another contractor.

All anchor or expansion bolts shall be set by the Contractor. All anchor bolts not furnished by the Sanitary District, required under this item, shall be furnished by the Contractor and will be paid for at the unit price specified to be paid per pound under Item 9.

In connection with the erection of the pump, the Contractor shall furnish and erect a complete oiling system as shown in the plans and specified herein.

Unloading.

(A199) Promptly upon receipt of notice from the railroad, the Contractor shall unload the equipment, as shipped, from the cars, and transport it to the site of the work. The bills of lading and lists of material shall be carefully checked by the Contractor in the presence of the Engineer, as the Contractor will be held responsible for the equipment from the time unloading begins until final acceptance. Any shortages or damage at the time of receipt shall be promptly reported to the Engineer. Any shortage or damage found thereafter shall be made good by the Contractor at his expense.

The unloading shall be carefully done in the most approved manner, to avoid injury to the equipment. Ample facilities shall be provided by the Contractor for handling the equipment, including all necessary rollers, block and tackle, blocking, timbers, and a gin pole or other form of hoisting apparatus suitable to the conditions.

Transportation and Protection.

(A200) The equipment shall be transported to the site of the works in trucks or other vehicles of suitable capacity. The equipment shall be protected at all times from weather, dust and dirt. If the pump and blower house is not sufficiently advanced to provide protection for the equipment, the Contractor shall provide temporary housing on the property of the Sanitary District, as the Engineer may direct for all apparatus which may be injured by weather, dust or dirt. The Contractor shall further provide a watchman.

During erection all exposed apparatus or equipment shall be covered and protected from mortar droppings, wet concrete, or other adhering substances, whether from work done by this Contractor or other contractors. At the completion of the work, when it will be no longer exposed to adhering substances, all foreign bodies shall be removed and the final painting done where specified. Any protective coatings of white lead and tallow or other materials used for such purpose shall be removed when and as directed by the Engineer.

a. ERECTION OF PUMPS.

General.

(A201) The Sanitary District will furnish three (3) fourteen inch centrifugal pumps, with shafting, steady bearings and anchor bolts, as shown on the plans. The Contractor shall erect the pumps in place and line them up to the satisfaction of the Engineer, before finally setting the I-beams in the pump room floor, and pouring the floor concrete. The pump suction and discharge flanges shall be bolted up, with gaskets as specified in Section A127. Necessary anchor bolts for the pumps and steady bearings will be furnished by the Sanitary District. All other bolts and erecting material shall be furnished by the Contractor.

Erection.

(A202) The Contractor shall line up each pump and its bearings, at the same time that the pump motor is being lined up by another contractor, so that the common coupling fits and the motor and pump line up perfectly. Bearings shall be scraped if necessary. The Contractor shall be responsible for the proper alignment of bearings. They must run cool, and show a bearing over the entire surface. All journal boxes, pins, keys and other details of the machinery shall be taken apart at any time during the process of erection, when the Engineer may so direct, to allow a thorough examination of the fit and workmanship. All keys shall be driven in the presence of the Engineer. The oil gages shall be set in place on all bearings. All oil reservoirs shall be thoroughly cleaned of all refuse or dirt. The wrench and tool boards shall be mounted on the wall of the superstructure, where the Engineer shall designate.

Oiling System.

(A203) The Contractor shall also furnish and erect a complete oiling system for the three 14-inch centrifugal pumps as shown on the plans and specified herein. This shall consist of a heavy galvanized steel tank holding approximately sixty (60) gallons, provided with inlet and outlet, tapped for wrought-iron pipe, and gage glass and brass gage glass fittings. The outlet shall be so placed that all the oil is available. The inlet shall be fitted with a 2-inch wrought--iron pipe nipple run up through the floor, and provided with a neat floor casting and screw plug, so the tank can be filled from the main operating floor. The tank shall be set on steel hangers as shown on the plans. A main header pipe shall be run from a gate valve placed on the outlet of the oil tank along the wall to the farthest pump. From this header shall be run leads to the upper steady bearing of each pump. At the take off from the header shall be placed on each lead a gate valve, followed by a brass drip and sight feed valve of the Lunkenheimer Co. make or equal. The lead to each pump shall be three-eighths (⅜) inch galvanized genuine wrought iron with galvanized malleable-iron fittings, as specified in Section A173. All galvanized piping for oil shall be reamed out clean. The upper bearing on each pump shall be connected to the lower bearing, and the lower bearing to the bearing at the pump casing, with three-eighths (⅜) inch pipe, the connection being bushed down where ¼-inch taps are shown.

Grouting.

(A204) All bed plates and castings resting on masonry or concrete shall be set and grouted in by the Contractor, to the satisfaction of the Engineer. The Contractor shall be responsible for the proper location and alignment of these parts.

Grout shall be composed of one (1) volume of Portland cement of an approved manufacture and two (2) volumes of approved fine plastering sand. The cement and sand shall be proportioned by measuring and not by estimation. These ingredients shall be thoroughly mixed in a tight box, and water then added, and the mixing continued until the grout has the proper consistency. No greater amount of grout shall be prepared than will be required for immediate use, and any grout that has set shall not be retempered or used in any way in the work.

Joints.

(A205) All joints between stationary parts must be made with the utmost accuracy and precision, insuring perfect and permanent alignment. None of the parts shall be unduly strained in lining up. Dutchmen will not be allowed, except by written permission of the Chief Engineer, and then they shall be made of steel forgings, to his satisfaction.

Where liners are specified and additional liners are needed beyond those furnished to the Contractor, they shall be of steel, cut from one piece, and shall be of different thicknesses down to No. 28 Birmingham gage, as required.

Painting.

(A206) During construction, the various parts of the equipment shall be covered and protected from mortar droppings, wet concrete or other adhesive substances, as far as practicable. After the work has been erected in a satisfactory manner and tested, and when it will no longer be exposed to adhesive substances, or when directed by the Engineer, the work shall be painted as hereinafter specified.

All exposed cast work on the pumps shall be painted in the following manner: All work shall be cleaned thoroughly with benzine and brushes. A good coat of priming shall then be applied. Next the work shall be given two (2) coats of white lead and linseed oil paint of color selected by the Engineer. The interior of all parts of pumps coming in contact with the sewage shall be thoroughly cleaned. Each coat of paint shall be allowed to dry forty-eight (48) hours or longer before the next coat is applied.

All bright surfaces on steel, wrought iron or cast steel work, shall be thoroughly protected from rust and kept free from rust until the work is completed and accepted. Any protective coatings of white lead and tallow or other materials used for such purpose shall be removed when and as directed by the Engineer.

All paint shall be properly stirred before using to secure thorough in-

corporation of the pigments and must be well brushed out in applying to secure a first-class job. Painting and varnishing shall be performed only by skilled workmen. Care shall be taken to protect all work against dust, water or other harmful agency. After the completion of the painting and varnishing work, all paint and varnish spots caused by the Contractor are to be removed from the floors, walls, glass, etc.

Paint Materials.

(A207) The red lead and linseed oil paint specified shall consist of red lead and linseed oil of the quality herein specified, mixed in proportions of twenty-five (25) pounds of dry red lead or thirty-five (35) pounds of red lead paste, to each gallon of oil, with the addition of not over one-half (½) pint of pure turpentine or pure turpentine Japan dryer, or a total of one-half (½) pint of both as permitted by the Engineer. The ingredients shall be thoroughly mixed.

All red lead shall have a true lead content (Pb_3O_4) of at least ninety-five (95) per cent and shall be of such fineness that not less than ninety-nine and one-half (99½) per cent will pass through a two hundred (200) mesh screen. All red lead paste used shall be manufactured from red lead and linseed oil of a purity not less than that herein specified, shall contain at least ninety-two (92) per cent by weight of the specified red lead and shall be capable of standing until used without perceptible hardening. All hardened paste will be rejected.

Paint, oil, varnish, and other materials used in painting shall be of the best quality, and the color of all paint, as well as the brands of all material, shall be satisfactory to the Engineer. All material used in painting or varnishing shall be delivered at the work in the original unbroken containers, bearing the manufacturer's stamp thereon.

All white lead shall be pure hydrated carbonate of lead free from all adulterants, and finely ground in at least eight (8) per cent by weight of pure linseed oil. It shall not contain more than 0.75 per cent of moisture.

All linseed oil shall be pure raw linseed oil conforming to "Standard Specifications of the Purity of Raw Linseed Oil from North American Seed," Serial D-15, adopted in 1915, by the American Society of Testing Materials.

All varnish shall be the Valspar brand or equal.

b. ERECTION OF BLOWERS.

(A208) The Sanitary District will furnish six (6) blower units, complete, with separators and chain drive, together with other appurtenances. Included are four (4) blowers, each of two thousand (2,000) cubic feet per minute capacity, one (1) of one thousand (1,000) cubic feet per minute capacity and one of four hundred and fifty (450) cubic feet per minute capacity. The blowers shall be erected carefully in place, and lined up, with reference to the electric motors, and otherwise as directed by the Engineer. The suction and discharge flanges shall be bolted up to the piping, with rubber gaskets. The blowers and separators shall be shimmed up to the final elevations as specified in Section 6, and then grouted in place as specified in Section A204.

All paint damaged shall be retouched. If the damage is sufficient in the opinion of the Engineer, the Contractor shall repaint the blower or blowers with an approved paint of approved color.

c. ERECTION OF TRAVELING CRANE.

(A209) The Sanitary District will furnish one (1) hand traveling crane of ten (10) tons capacity, together with stops to limit the travel on the crane rails. The crane rails will be erected by another contractor. The Contractor shall erect the crane, complete, ready for use. He shall bolt the stops in place on the rails. He shall keep the crane in good working order during its use by him and shall turn it over to the Sanitary District at the completion of his contract in first-class order.

After erection the crane shall be given two (2) coats of white lead and linseed oil paint as specified in Section A206, of a color to be selected by the Engineer.

d. ERECTION OF VENTURI METERS.

Sewage Meters.

(A210) The Sanitary District will furnish five (5) Venturi meter tubes (one (1) 24x12 inch and four (4) 12x5 inch) to operate in sewage pipe lines, together with recording instruments,

floats, cable and pulleys. The meter tubes are to be set in the pipe lines at the points shown on the plans and bolted in place with rubber gaskets. The meter tubes are to be properly supported, and shall be connected up to the float tubes with piping of the size shown in the plans. The interior of the meters, and connections shall be inspected and left thoroughly clean.

The recording apparatus shall be set up in the place shown on the plans or designated by the Engineer, leveled up and shimmed up, and the bed grouted. Holes shall be drilled in the floor in which the anchor bolts shall be set. The float pulley shall be adjusted on the float tubes, and the floats put in position. The working parts of the apparatus packed for shipment shall be unwrapped and adjusted ready for use.

The handy cabinet furnished with each recording instrument shall be neatly fastened to the wall with round head brass expansion bolts at the point designated by the Engineer.

Air Meters.

(A211) The Sanitary District will furnish twelve (12) Venturi meter tubes (one (1) 24x12 inch, two (2) 10x5 inch, four (4) 10x4 inch, two (2) 4x2 inch, and three (3) 4x1⅝ inch) to operate in air pipe lines, together with seven (7) recording apparatus and five (5) manometer indicators. The meter tubes are to be set in the air lines at the points shown on the plans and bolted in place with rubber gaskets. The meter tubes are to be properly supported and shall be connected up to the recording apparatus or manometers with piping of the size shown on the plans. The interior of the meters and connections shall be inspected and left thoroughly clean.

The recording apparatus shall be set up in the place shown on the plans or designated by the Engineer, leveled up and shimmed up, and the bed grouted. Holes shall be drilled in the floor in which the anchor bolts shall be set. The oil furnished with the apparatus shall be poured in to fill the reservoir to the point designated by the Engineer. Any surplus oil shall be turned over to the Engineer.

The working parts of the apparatus packed for shipment shall be unwrapped and adjusted ready for use.

The handy cabinet shall be secured to the wall as specified in the preceding section. The manometers shall also be secured neatly to the wall in like manner and shall be connected up to their respective meter tubes.

e. ERECTION OF SLUICE GATES.

(A212) The Sanitary District will furnish the Contractor with the sluice gates, guides, extension stems, floor stands and anchor bolts as shown on the plans and listed in Division V. The Contractor shall set the gates in place before the concrete is poured, with anchor bolts. Care shall be taken to prevent springing. The gates shall be carefully lined up. The guides for the extension stems shall be set in place after the forms have been stripped, after the floor stands and extension stems have been lined up. Where necessary, holes shall be drilled and anchor bolts set or calked in with lead, or otherwise secured as ordered by the Engineer. Any leakage around the gate frames shall be taken up by grouting or calking with oakum or lead as may be ordered by the Engineer.

After the work has been erected and tested, and when it will be no longer exposed to adhering substances, all foreign adhering bodies shall be removed and the iron work given one (1) coat of asphaltum varnish or other approved coating.

f. ERECTION OF DORR THICKENERS.

(A213) The Sanitary District will furnish seven (7) Dorr thickener units, knock down, complete, with floor stand, shaft, and radial arms, with anchor bolts. The Contractor shall erect one thickener in each of the settling tanks designed to receive them. He shall line up the vertical shaft, shim up and grout the floor stand and bolt it securely in place, after the pulley has been lined up with the electric motor to be set by another contractor.

When the apparatus has been tested, all exposed parts shall be given two (2) coats of high grade asphaltum varnish or other approved coating.

g. ERECTION OF STEEL I-BEAMS.

(A214) The Sanitary District will furnish the steel I-beams for the main pump room floor, together with the anchor bolts for the electric motors

driving the 14-inch pumps. The Contractor shall erect the I-beams at the time of lining-up the pumps and motors. When the alignment is satisfactory the Contractor shall grout in the I-beams and proceed to complete the reinforced concrete work comprising the floor. During erection the Contractor shall supply all temporary braces, supports, wedges, or appurtenances necessary to adjust the I-beams and hold them in position, until the alignment is adjusted. The anchor bolts for the electric motors shall be delivered on the pump room floor by this Contractor, but will be bolted up and set in place by another contractor erecting the electrical machinery.

The Sanitary District will also furnish the I-beam travelers to go in the pump room basement. The Contractor shall set these in place and shall give them two (2) coats of asphaltum varnish or other approved paint.

Payment.

(A215) The lump sum specified to be paid under Item 21 for the erection of equipment shall include the unloading, transporting and erecting of all equipment and appurtenances, furnished by the Sanitary District, together with the furnishing and placing of other material specified, complete, in place, as specified, and shall include the furnishing and placing of all labor, tools, materials, and appurtenances necessary to complete the work as specified.

ITEM 22—SHEETING.

Description.

(A216) Under Item 22, the Contractor shall leave in place such timbering, sheeting and shoring in open cut as the Engineer may order in writing, cut off as directed, as specified herein. No payment will be made for sheeting and bracing left in place, except where expressly specified herein, and then only when required to be left in place by the Engineer.

Measurement.

(A217) The lumber left in place as timbering, sheeting and shoring by order of the Engineer, will be measured as follows: If lumber used for sheeting and shoring is required to be cut and one-half or more in length is so left in place, the whole amount of such lumber will be included in the measurement and paid for; if less than half of the whole length is left in place, double the amount left in place will be paid for.

Payment.

(A218) For all lumber used for timbering, sheeting and shoring which is left in place by order of the Engineer, the unit price of thirty dollars ($30.00) per thousand feet, board measure, will be paid, which sum is agreed by the Contractor to be full compensation for all labor, tools, materials, and appurtenances necessary to complete the work as specified.

ITEM 23—SAND FILL.

Description.

(A219) Under Item 23, the Contractor shall furnish and place the sand fill, as specified herein, to fill the spaces between the sloped bottoms of the settling tanks, as shown on the drawings, and elsewhere on the work as ordered by the Engineer.

Sand for this purpose shall be well graded siliceous material substantially free from particles larger than one-quarter (¼) inch and shall be free from loam and perishable material. It shall be thoroughly tamped or rammed into place to the grades established by the Engineer to form an unyielding foundation. So far as practicable, all fills made of sand shall be flooded with water while in the process of making. If required, the fill may be brought above the finished grade and subsequently excavated thereto. Such excavation shall be paid for under Item 1.

Measurement and Payment.

(A220) Sand fill furnished and placed under this item shall be measured in place within the lines and grades given by the Engineer and paid for at the unit price per cubic yard specified, which price shall include all labor, tools and material required for doing the work. No material excavated on the site of the work and placed in fill as specified under Items 1 and 2 shall be paid for under this item.

ITEM 24—INLET BASINS.

Description.

(A221) Under Item 24, the Contractor shall furnish and build inlet

basins of concrete or brick, complete, as specified herein and shown in detail on the drawings, at the points shown on the drawings or where ordered by the Engineer. The inlet basins shall be connected up to the tile piping.

No payment will be made for excavation or masonry at the unit prices specified under Items 1, 2 and 6 for any excavation or masonry required in inlet basins.

Excavation.

(A222) The excavation, backfilling, and other details shall be as specified in Sections A3 to A23, inclusive, so far as they may apply.

Masonry.

(A223) The Contractor shall furnish all materials for and construct, complete, the inlet basins including all work incidental thereto, of concrete or brick, as shown on the drawings, herein specified and ordered by the Engineer.

Concrete shall be Class B, furnished and placed as specified in Sections A37 to A64, inclusive, so far as the same may apply.

Brickwork shall be made of selected sewer brick, free from lime nodules, neatly laid in a Portland cement mortar composed of one (1) volume cement and three (3) volumes sand, in which ten (10) per cent by volume of freshly slaked lime may be thoroughly mixed. All joints shall be thoroughly filled with mortar. All inside joints shall be neatly scraped, and all droppings removed.

Frame and Grating.

(A224) The Contractor shall furnish and place the cast-iron frame and grating. All frames and gratings shall be given two (2) field coats of approved asphaltum varnish and set in position. All frames and gratings will be paid for at the unit price per pound specified to be paid under Item 10.

Payment.

(A225) The sum specified to be paid per inlet basin under Item 24, shall include the excavation, the furnishing and placing of the masonry, and shall include the furnishing and placing of all labor, tools, materials and appurtenances necessary to complete the work as specified.

ITEM 25—GALVANIZING.

Description.

(A226) Under Item 25, the Contractor shall clean and galvanize cast-iron pipe and specials, furnished in the air piping under Item 19, as shown on the plans or specified herein, when and as ordered by the Engineer. Included shall be all costs of handling, teaming, rethreading tap holes and all expenses incidental to galvanizing.

No payment will be made under this item for any galvanizing required or specified on any part of the work, other than for the cast-iron pipe and specials in the airline as herein specified.

The cast-iron pipe and specials to be galvanized shall be thoroughly cleaned and pickled, and then shall be acceptably coated with zinc which shall uniformly cover all parts of the material. The hot process of galvanizing shall be used. The galvanizing shall be done after the holes have been drilled and tapped for the 1½-inch connections. The threads in the taps shall be recut neatly to avoid breaking the zinc coating.

Measurement.

(A227) The amount of galvanizing to be paid for will be the number of pounds of material galvanized, weighed before galvanizing, or calculated from the weights given for the material of the size and classes handled, as specified in the American Waterworks Association standard specifications.

Payment.

(A228) The sum specified to be paid per pound of material galvanized under Item 25 shall include the handling, cleaning, pickling, galvanizing, and all expenses incidental thereto, and shall include the furnishing and placing of all labor, tools, materials, and appurtenances necessary to complete the work as specified.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove ob-

structions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

Village Ordinances.

Art. 2. The said Contractor agrees to carry on all work provided for in this contract in strict conformity with the ordinances and rules passed by the Villages of Maywood and Broadview covering the construction of said work, and to conform to all other regulations or ordinances of said villages, and to furnish to the Sanitary District, at his own expense, all permits and certificates required by said villages.

Omission on Plans.

Art. 3. The plans furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or drawings.

Approximate Quantities.

Art. 4. It is expressly understood and agreed by the parties hereto that the quantities of the various classes of work to be done and material to be furnished under this contract, which have been estimated as stated in the "Requirements for Bidding and Instructions to Bidders," attached hereto, are only approximate and are to be used solely for the purpose of comparing on a uniform basis, the proposals offered for the work under this contract; and the Contractor further agrees that the Sanitary District will not be held responsible if any of said quantities shall be found incorrect; and said Contractor will not make any claim for damages or for loss of profits because of a difference between the quantities of the various classes of work as estimated and the work actually done. If any error, omission, or mis-statement shall be discovered in the said estimated quantities, the same shall not invalidate this contract or release the Contractor from the execution and completion of the whole or any part of the work herein specified, to the satisfaction of the Engineer and in accordance with the specifications and the plans mentioned and for the prices herein agreed upon and fixed therefor, or excuse him from any of the obligations or liabilities hereunder, or entitle him to any damages or compensation otherwise than may be provided for in this contract, except for such extra work as may be required, for the performance of which written orders must be given and received as herein specified.

Examination of Site.

Art. 5. All bidders for the work under this contract are required before submitting proposals to examine the site of the work and adjacent premises, and the various means of approach to the site, and to make all necessary investigations in order to inform themselves thoroughly as to the character and magnitude of all work involved in the complete execution of this contract; also as to the facilities for delivering, handling and installing the equipment at the pumping station and the conditions and the difficulties that will be encountered in the performance of the work specified herein. No pleas of ignorance of conditions that exist or that may hereafter exist, or of difficulties that will be encountered in the execution of the work hereunder, as a result of failure to make necessary examinations and investigations, will be accepted as a sufficient excuse for any failure or omission on the part of the Contractor to fulfill in every detail all the requirements of this contract, or will be accepted as a basis for any claim whatsoever for extra compensation.

Interference.

Art. 6. The Contractor shall so conduct the work of installation that there shall be no interference with work which may be in progress under contracts with other contractors. In case of dispute between the Contractor and other contractors employed by the Sanitary District, the decision of the Chief Engineer shall be final and binding.

The Contractor shall, at his own expense, repair any damage to machinery, equipment, masonry, building, painting or other property of the Sanitary District or under construction by other contractors, occasioned by the Contractor in the execution of this contract.

The disposal of tools, material, machinery, and other supplies and ap-

purtenances during storage and erection on the property of the Sanitary District shall be subject to the approval of the Engineer. The Contractor shall assume all responsibility for the security of everything he may have on the property of the Sanitary District.

Changes in Plans.

Art. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

Art. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month

Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All inspection of any and all material furnished for use in work to be performed under Division A, shall be made at the site of the work after delivery of the material; provided, that, if requested by the Contractor, the Engineer may at his option perform, or have performed, inspection of material at points other than at the site of the work. In any such case the Contractor shall pay the Sanitary District the extra cost of such inspection, including the necessary expenses of the inspector and the salary of the inspector for the extra time expended in performing any such inspection at such other points.

Under Division C, all structural steel work will be inspected, however, without expense to the Contractor, if all the structural steel is fabricated in one shop.

Under Division O, the fabrication of material will be inspected at the shop or shops where fabricated. The Engineer shall have full access at all times to all parts of the shop where material under his inspection is being manufactured. If ordered by the Chief Engineer, the Engineer shall stamp each piece accepted with a private mark and any piece not so marked may be rejected at any time and at any stage of the work. If the Engineer, through an oversight or otherwise has accepted material or work which is contrary to the specifications, this materal may be rejected, regardless of the stage of completion.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. Provided, however, that for material or equipment furnished under Divisions C, N, O, P, R, V, W, where delivery is specified, f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., any damage done after delivery shall be repaired by the contractor furnishing

the material and equipment and shall be paid for by the contractor responsible for the damage. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

(Divison A) The Contractor shall be guided by the lines, stakes marks and grades given by the Engineer and shall carefully preserve the same as far as possible during the progress of the work, and shall furnish all needed facilities, without extra charge therefor, to enable the Engineer to properly give lines and grades and measure the work from time to time.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Cost of Work.

Art. 12. All books and accounts kept by the Contractor in connection with this contract shall be open to the inspection of the Chief Engineer of the Sanitary District, or his properly accredited representative.

The Contractor shall furnish the Engineer reasonable facilities for obtaining such information as he may desire respecting the progress and execution of the work and the character of the materials, including all information necessary to determine the cost of the work, such as the number of men employed, their pay, the time during which they have worked on the various classes of construction, the cost of repairs to machinery, and other information required by the Engineer. The Contractor shall, on request furnish the Engineer with copies of expense bills for transportation charges on all machinery, material and supplies shipped to or from the work under this contract.

Plant.

Art. 13. The Contractor shall furnish all material and supplies, plant, staging and falsework tools and implements, teams, and care; in fact, all material and appliances of every sort or kind that may be necessary for the full and complete carrying out of this contract and shall furnish and maintain subject to the approval of the Engineer, all necesary barricades, and other protections, lights and signs, necessary for the proper protection of the public. He shall also furnish a watchman. The cost of all the above shall be covered by the amounts paid at the lump sum or unit prices herein specified, and no extra charge shall be made therefor.

Night, Sunday or Holiday Work.

Art. 14. Whenever the Contractor shall be permitted or directed to perform work at night, or on Sundays or a holiday, or to vary the period of hours during which work is carried on each day, he shall give written notice to the Engineer, so that proper inspection may be provided. Such work shall be done under the regulations to be furnished in writing by the Engineer, and no extra compensation shall be allowed therefor.

Cleaning Site.

Art. 15. The Contractor shall keep the site of the work and adjacent premises as free from material, debris and rubbish as is practicable and shall remove same from any portion of the site, if, in the opinion of the Engineer such material, debris or rubbish constitutes a nuisance or is objectionable in any way to the public. The Contractor further agrees to remove all materials, implements, barricades, staging, falsework, debris and rubbish connected with or caused by said work immediately upon the completion of the same, and to leave the premises in perfect condition in so far as affected by the work under this contract.

Precautions.

Art. 16. The Contractor shall take whatever precaution that may be necessary to render any portion of the work secure in every respect, or to decrease the liability of accident from any cause, or to avoid contingencies

which are liable to delay the completion of the work.

Superintendence.

Art. 17. The Contractor shall at all times have a competent foreman, superintendent or other representative on the work who shall have full authority to act for the Contractor and to receive and execute orders from the Engineer, who shall receive shipments of material to the Contractor, and who shall see that the work is executed in accordance with the specifications and plans and the orders of the Engineer thereunder. The Contractor shall furnish the necessary watchmen to protect all materials, tools, and equipment and all work performed by the Contractor until said work has been completed and accepted by the Engineer.

Workmen.

Art. 18. The Contractor shall employ competent foremen and laborers, and shall discharge, at the request of the Engineer, any incompetent or unfaithful men in his employ. None but men expert in their respective branches of work shall be employed where special skill is required.

Sanitation.

Art. 19. In accordance with the rules and regulations for the guidance of Sanitary Inspector, etc., adopted by the Board of Trustees on July 31, 1913, page 997 of the Proceedings for 1913, the Contractor shall introduce and enforce among his employees such regulations in regard to cleanliness and the disposal of garbage and wastes, as shall conduce to their health, and tend to prevent the inception and spread of contagious and infectious diseases among them, and shall take such means as the Engineer may direct to effectually prevent the creation of a nuisance on any part of the property of said Sanitary District, streets, or adjacent property. Necessary sanitary conveniences for the use of the laborers on the work, properly secluded from public observation, shall be constructed and maintained by the Contractor in such manner and at such points as shall be approved, and their use shall be strictly enforced.

Patents.

Art. 20. It is further agreed that the Contractor shall indemnify, keep and save harmlesss said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Provided, however, that the obligations imposed on said Contractor by this Article 20 shall not apply to claims for infringements of patents on activated sludge processes or machinery or equipment used in connection therewith.

Damages.

Art. 21. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the

execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 22. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State"; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912"; approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 23. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 24. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Co-operation.

Art. 26. It is understood and agreed that all work shall be executed in such manner and in such order or procedure as will permit of the commencement and carrying on of work of the Sanitary District and of other contractors with the least interference possible under a reasonable procedure whenever it is necessary or desirable to prosecute said work, either simultaneously with the work under this contract or otherwise. To this end the Contractor shall co-operate with and assist the Sanitary District and other contractors in every reasonable way and shall interfere as little as possible with their work in order to expedite all work of construction of the Desplaines River Sewage Treatment Works and all work collateral thereto, including construction of the Desplaines River Sewage Treatment Works and appurtenances. The Contractor shall so arrange his work, plant and equipment that work of the Sanitary District and of other contractors for the Sanitary District can be performed without unnecessary or unreasonable expense on account of the work, plant or equipment of the Contractor hereunder. The Contractor shall move, free of charge, his plant and equipment or any part of same whenever the Engineer shall consider reasonable and necessary for the work of the Sanitary District or other contractors. The Contractor when requested by the Engineer shall also furnish the Sanitary District and other contractors with material and with the use of plant and equipment of the Contractor at reasonable rates therefor, whenever in the opinion of the Engineer such use of such plant and equipment will not unreasonably delay or interfere with the work under this contract.

The Contractor shall not be entitled to any damages or to any anticipated profits on work dispensed with or to any extra compensation from the Sanitary District on account of any work performed by the Sanitary District, or other contractors, that is contemplated in these specifications, or on the plans, or that is necessary for carrying on or completion of or that in any way affects the work under this contract, provided that such work of the Sanitary District and other contractors, in the opinion of the Engineer, is performed in a proper and expeditious, or a necessary manner. The Engineer shall decide all questions between the Contractor and the Sanitary District or other contractors, and the order of carrying on the work shall always be subject to the Engineer's direction and approval. His decision upon all questions relating thereto shall be final and binding on both parties to this contract.

In case the Contractor, by his own acts or the acts of any person or persons in his employ, shall unnecessarily delay, in the opinion of the Engineer, the work of the Sanitary District or other contractors by not properly co-

operating with them or affording them sufficient opportunity or facilities to perform work, as hereinbefore specified, the Contractor shall, in that case, pay all costs and expenses incurred by such parties, due to any such delays, and hereby authorizes the Sanitary District to deduct the amount of such costs and expenses from any moneys due or to become due him under this contract. The Engineer shall decide the extent of such delay or delays and amount of such costs and expenses and his decision shall be final and binding upon both parties to this contract. Nothing contained in this paragraph shall, however, relieve said Contractor from any liability or damages resulting to the Sanitary District on account of such delay or delays.

Time and Progress.

Art. 27. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor for Division A hereby agrees to begin work first on the substructure of the pump and blower house, and have the same ready to receive the building superstructure on or before September 1, 1919. The Contractor further agrees to erect the crane and other equipment promptly, as soon as the structure is ready to receive it, and to complete the entire work within five hundred and forty (540) calendar days from the said date of approval of bond. He further agrees to build the road promptly and have it ready for traffic on or before August 15, 1919.

It is understood and agreed that Time is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 28. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division A within the respective times specified in Article 27, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of Thirty Dollars ($30.00) under Division A, for each and every day that said Contractor shall be in default in the completion of said work ready for operation. Provided, however, that in case two or more divisions are included under this contract, the liquidated damages shall be paid only upon the division or divisions in which the Contractor shall be in default.

Said sum of Thirty Dollars ($30.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for Delays.

Extensions or Additions.

Art. 29. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time, but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 30. The Contractor shall delay, or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work, or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 31. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States Government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 31), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 31) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract—Division A.

Art. 32. It is further agreed by said Contractor that if the work to be done under this contract shall be abandoned by the Contractor, or if there shall be a failure by said Contractor to perform the work of the character and in the time herein specified; or if said Contractor shall fail financially or from any other cause whatsoever be unable to carry out said contract and complete the said work; or if the contract shall be assigned by said Contractor; or if the Contractor shall lose control of said work for any cause whatsoever except by the act of God, the United States Government or the public enemy; or if the Contractor shall refuse to or neglect to follow the instructions of the Engineer, or if in the opinion of the Engineer, the Contractor refuses or neglects to use measures to protect the said work from damage; or if, in the opinion of the Engineer, the Contractor is guilty of carelessness or incompetency in the execution of said work; or if, in the opinion of the Engineer the said work has been or is being delayed by the Contractor; or if, in the opinion of the Engineer, the rate of progress is not such as to insure the completion of the work within the time specified; or if at any time the Engineer shall be of the opinion and so shall certify in writing to said Sanitary District that said work or any part thereof is unnecessarily or unreasonably delayed; or that the Contractor is wilfully or persistently violating any of the conditions or covenants of this contract, or is not fulfilling said contract in good faith, said Sanitary District shall have the power and authority, and may then immediately notify said Contractor to discontinue all work or

any part thereof, as may be designated by the Engineer of said Sanitary District.

Upon notice being given as aforesaid by the said Sanitary District to the said Contractor, or upon the happening of any of the conditions hereinbefore in this article specified, the said Sanitary District shall have a lien upon all the equipment, material, supplies, machinery, implements and tools of the Contractor then existing on the premises of said Sanitary District for the purpose hereinafter specified; and the said Sanitary District may thereupon immediately take possession of all said equipment, material, supplies, machinery, implements and tools for the uses and purposes hereinafter set forth; thereupon the said Sanitary District shall have the power to, and may at the cost of said Contractor, complete the said work by letting a new contract, and in completing the said work by contract the Sanitary District may use such equipment, materials, supplies, machinery, implements, tools and plant. as above specified, as may be the property of said Contractor, and may make the necessary repairs and replacements thereto.

The cost of fully completing all the work provided for under this contract shall include the sum or sums of money paid by the Sanitary District to other contractors if all or any part of said work is completed by contract, and any sum or sums of money paid by the Sanitary District in hiring men and teams, machinery, implements, tools and plants, and any sum or sums of money paid by the Sanitary District for the purchase of equipments, materials, supplies, machinery, implements, tools and plant, and the cost of repairs or replacements thereto; and all cost of repairs and replacements upon machinery, implements, tools and plant of the Contractor hereunder, used in the completion of said work, and also all sums of money paid for first aid, medical, surgical and hospital attendance, and as compensation for accidental injuries or death suffered by employees in the course of their employment in the performance of said work under the Employers' Liability Act of the State of Illinois, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto.

The cost of fully completing all the work under this contract as aforesaid shall be charged to the said Contractor, and the amount of said cost or expense so charged shall be deducted from and paid by the said Sanitary District out of any moneys that may be due or may at any time thereafter become due to the said Contractor under and by virtue of this contract, so far as the same shall suffice therefor.

Should the amount remaining unpaid of the contract price be insufficient to reimburse the Sanitary District for the cost of fully completing all work as aforesaid, then the Sanitary District may sell all materials, supplies, machinery, implements, tools and plant then on hand, whether obtained from the Contractor or by purchase, at public sale on giving said Contractor twenty (20) days' notice of the time and place of such sale, and the net proceeds derived from the sale of the said property at such sale shall be credited to the Contractor, and should the amount received from said sale be then insufficient to pay such deficiency, the Contractor and his bondsmen shall be liable to pay the amount of said deficiency; and at any such sale of said property as provided hereunder, the Sanitary District may bid and become a purchaser of said property.

Contractor's Bond.

Art. 33. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Art. 34. Division A. The Contractor shall furnish a maintenance bond, as specified in Section 10, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of those sections. The execution of said maintenance

bond shall be a condition precedent to the final payment specified in Article 37. The maintenance bond shall be in the amount of two (2) per cent of the amount of this contract for one (1) year only.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition precedent to the final payment specified in Article 37.

Prices.

Article 35. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

DIVISION A.

SEWAGE TREATMENT PLANT.

(1) For earth excavation, including the disposal of excavated material, complete, as specified, the sum of two dollars and twenty cents ($2.20) per cubic yard.

(2) For rock excavation, complete, including the disposal of excavated material, complete, as specified, the sum of three dollars and no cents ($3.00) per cubic yard.

(3) For macadam pavement, in place, complete, as specified, the sum of two dollars and eighty-five cents ($2.85) per square yard.

(4) For gravel or stone walks, in place, complete, as specified, the sum of two dollars and no cents ($2.00) per square yard.

(5) For concrete, Class A, complete, in place, as specified, the sum of sixteen dollars and no cents ($16.00) per cubic yard.

(6) For concrete, Class B, complete, in place, as specified, the sum of sixteen dollars and no cents ($16.00) per cubic yard.

(7) For concrete, Class C, complete, in place, as specified, the sum of fifteen dollars and no cents ($15.00) per cubic yard.

(8) For reinforcing steel, in place, as specified, the sum of no dollars and four and three-fourths cents ($0.0475) per pound.

(9) For miscellaneous steel, in place, as specified, the sum of no dollars and twelve cents ($0.12) per pound.

(10) For iron castings, in place, as specified, the sum of no dollars and nine cents ($0.09) per pound.

(11) For six (6) inch cast-iron water pipe, laid in place, complete, as specified, the sum of two dollars and eighty-four cents ($2.84) per lineal foot.

(12) For cast-iron pipe, laid in place, complete, as specified, the sum of no dollars and eleven and one-half ($0.115) per pound.

(13) For 8-inch tile pipe, laid in place, complete, as specified, the sum of two dollars and eighty-eight cents ($2.88) per lineal foot.

(14) For 12-inch tile pipe, laid in place, complete, as specified, the sum of two dollars and ninety-five cents ($2.95) per lineal foot.

(15) For 30-inch tile pipe, laid in place, complete, as specified, the sum of seven dollars and forty-seven cents ($7.47) per lineal foot.

(16) For tile underdrains, laid in place, complete, as specified, the sum of no dollars and eighty cents ($0.80) per lineal foot.

(17) For pump and blower house substructure, in place, complete, as specified, except for such work as is covered by unit prices under Items 1 to 16, inclusive, above, all as specified, the lump sum of ninety-two hundred dollars and no cents ($9,200.00).

(18) For the tank equipment, in place, complete, as specified, the lump sum of thirty-four thousand dollars and no cents ($34,000.00).

(19) For the air piping, in place, complete, as specified, the lump sum of thirty-seven thousand five hundred dollars and no cents ($37,500.00).

(20) For the supply, effluent, sludge, and drain piping, in place, complete, as specified, the lump sum of thirty thousand seven hundred dollars and no cents ($30,700.00).

(21) For the erection of equipment, in place, complete, as specified, the lump sum of four thousand dollars and no cents ($4,000.00).

(22) For the sheeting, shoring, bracing or other timbering left in place, as specified, by order of the Engineer, the sum of thirty dollars and no cents ($30.00) per thousand feet, board measure.

(23) For sand fill, in place, as specified, the sum of three dollars and no cents ($3.00) per cubic yard.

(24) For inlet basins, in place, as specified, the sum of fifty dollars and no cents ($50.00) per basin.

(25) For galvanizing cast-iron pipe, as specified the sum of no dollars and three cents ($0.03) per pound.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 36. Division A. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where unit prices are specified, the estimate shall be based on the quantities estimated. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where unit prices are specified, the estimate shall be based on the quantities estimated. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

Art. 37. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 34, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulation, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

In Witness Whereof, On the day and year first above written, The Sani-

tary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, the Leyden-Ortseifen Company, a coporation organized under the laws of the State of Illinois as principal, and New Amsterdam Casualty Company, as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of one hundred ninety-two thousand, one hundred forty dollars and sixty-three cents ($192,140.63), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this first day of May, A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That whereas the above bounden Leyden-Ortseifen Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the first day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the furnishing, delivering and installing the Sewage Treatment Plant at the Desplaines River Sewage Treatment Works in the Village of Broadview, County of Cook, State of Illinois, as specified under Division A of the attached contract.

Now, If the said Leyden-Ortseifen Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Leyden-Ortseifen Company, its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, except insofar as all liability on account of claims for infringements of patents on activated sludge processes or machinery, or equipment used in connection therewith, is expressly exempted; and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago be reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and

administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto which may accrue to each and every person who shall be employed by said Leyden-Ortseifen Company, in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Leyden-Ortseifen Company, or its agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Leyden-Ortseifen Company, shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Finance reports that it has examined and approved the bond of the Hutchins Lumber and Storage Company with the New Amsterdam Casualty Company thereon as surety for the faithful performance of its contract for furnishing and delivering Oregon fir timber to The Sanitary District of Chicago, and therefore recommends the passage of the following order:

Ordered, That the bond of the Hutchins Lumber and Storage Company, for the faithful performance of its contract for furnishing and delivering said timber to The Sanitary District of Chicago, said bond being in the penal sum of $2,000.00, be, and the same is hereby, approved; and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
Jas. H. Lawley,
Chairman.

Matt A. Mueller,
Willis O. Nance,
George W. Paullin,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

The following is the contract and bond of the Hutchins Lumber & Storage Company:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR FURNISHING AND DELIVERING TIMBERS FOR TRESTLES FOR SUPPORTING TRACKS OF THE GRAND TRUNK WESTERN RAILWAY COMPANY AT THE CALUMET-SAG CHANNEL, IN BLUE ISLAND, ILLINOIS.

THIS AGREEMENT, Made and entered into this first day of May, AD 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and Hutchins Lumber and Storage Co., a corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District and under the penalty expressed in the bond hereto attached, at his proper cost and expense to furnish all materials, tools, labor, and transportation charges free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for Furnishing and Delivering Timbers for Trestles for Supporting Tracks of the Grand Trunk Western Railway Company at the Calumet-Sag Channel in the City of Blue Island, County of Cook, State of Illinois.

The material furnished shall be strictly pursuant to and in conformity with the specifications herein contained. It is covenanted and agreed that all material shall be furnished and delivered subject to the supervision and inspection of the Chief Engineer of The Sanitary District of Chicago and his properly authorized agents, by whose measurements and calculations the quantities of material furnished under this contract shall be determined and on whose inspection all material shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District shall have full power to reject or condemn all materials furnished and delivered under this contract which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between The Sanitary District and said Contractor that said Engineer shall determine and decide all questions in relation to the furnishing and delivery of said material and his decision shall be final and binding upon both parties to this contract.

Wherever the words "Chief Engineer," or "Engineer" are used herein, spelled with a capital "E", they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago or other Engineer designated by said Chief Engineer.

Wherever the word "Contractor" is used, spelled with a capital "C", it shall be understood to refer to the Contractor under this contract.

SPECIFICATIONS.

General.

SECTION 1. The material to be furnished under this contract consists of timber stringers, caps, posts, sway braces, ties and guard timbers for pile and timber trestles to be constructed by or for The Sanitary District to carry railroad tracks to and across the Calumet-Sag Channel in the westerly part of the City of Blue Island, Illinois. The quantity of each size of material to be furnished by the Contractor is to be as follows, to-wit:

Item A—80 stringers 8″x16″x24′ long.
Item B—80 stringers 8″x16″x26′ long.
Item C—50 caps 12″x14″x14′ long.
Item D—80 posts 12″x12″x18′ long.
Item E—600 ties 8″x8″x14′ long and surfaced one side and one edge or surfaced four sides.
Item F—80 sway braces 3″x12″x24′ long.
Item G—60 guard timbers 4″x6″x20′ long.

Delivery.

SEC. 2. All material furnished under this contract shall be delivered to The Sanitary District free on board cars on a side track designated by the Engineer, either of the Baltimore & Ohio Chicago Terminal Railroad Company or of the Grand Trunk Western Railway Company as the Contractor may elect, situated between Vermont Street and Broadway, or near Broadway, in the western part of Blue Island, Illinois. All freight and switching charges, including the established war tax on same, for such delivery as specified, shall be covered by the prices hereinafter specified. In case the freight and switching charges on material delivered to The Sanitary District under this contract are not subject to

war tax, and the war tax thereon is not paid by the Contractor, then the Sanitary District shall receive credit for the amount of such war tax and the amount of same shall be deducted from the payments to be made by The Sanitary District to the Contractor under this contract.

Material.

SEC. 3. Timber to be delivered to The Sanitary District under this contract shall be either "Douglas Fir" or "Southern Yellow Pine," as The Sanitary District may elect, provided prices are specified herein for both Yellow Pine and Douglas Fir timber, but all pieces included in any one item herein mentioned shall be of the same kind of timber unless otherwise agreed between the Engineer and the Contractor.

DOUGLAS FIR TIMBER.

General Requirements.

SEC. 4. Douglas Fir shall include yellow and red Douglas Fir. White Douglas Fir will not be accepted. All timber shall be live, sound, straight and close grained, cut square cornered, full length, rough sawed unless otherwise ordered by the Engineer, and not more than ¼ inch scant in any dimension for rough timber or more than ½ inch scant for dressed timber. All timber shall be free from large, loose or unsound knots, knots in groups, or other defects that will materially impair its strength for the purpose for which it is intended.

Stringers.

SEC. 5. Stringers shall show not less than 85 per cent. heart on each side and edge, measured across the surface anywhere in the length of the piece. Stringers shall be out of wind and free from shakes, splits, or pitch pockets over ⅜ inch wide or 6 inches long. Knots greater than 2 inches in diameter will not be permitted within one-fourth of the depth of the stringer from any corner nor upon the edge of any piece. Knots shall in no case exceed 3 inches in diameter.

Caps and Posts.

SEC. 6. Caps and Posts shall show not less than 85 per cent. heart on each of the four sides, measured across the surface anywhere in the length of the piece, which shall be out of wind and free from shakes, splits, or pitch pockets over ½ inch wide or 6 inches long. Knots shall not exceed one-fourth of the width of the surface of the piece in which they occur and shall in no case exceed 3 inches in diameter.

Ties.

SEC. 7. Ties shall show one side and one edge all heart. The other side and edge shall show not less than 85 per cent. heart, measured across the surface anywhere in the length of the piece.

Guard Timbers and Sway Braces.

SEC. 8. Guard Timbers and Sway Braces shall be sound and square edged with no knots larger than 2½ inches in diameter.

Investigations.

SEC. 14. All bidders for furnishing material under this contract are required, before submitting proposals, to become thoroughly familiar with all requirements of the specifications and form of contract and to inform themselves thoroughly as to the facilities for the delivery of the specified material and as to the freight and switching charges that must be paid for such delivery, as specified. No plea of ignorance of conditions that exist or that may hereafter exist will be accepted as an excuse for any failure or omission on the part of the Contractor to fulfill in every detail all of the requirements of this contract or will be accepted as a basis for any claims whatsoever for extra compensation or for extension of time for delivery of all or any part of said material.

Inspection and Supervision.

SEC. 15. All material to be furnished and delivered under this contract shall be subject to the inspection of the Engineer and his properly authorized agents, at the time when and where unloaded by The Sanitary District; provided that, if requested by the Contractor, the Engineer may at his option perform or have performed inspection of material at other points than as above specified in this section hereof. In any such case, the Contractor shall pay to The Sanitary District the extra cost, if any, to The Sanitary District, as determined by the Engineer, of making such inspection at any points other than as hereinabove specified for its performance.

Responsibility of Contractor.

SEC. 16. The Contractor shall be responsible for all material furnished under this contract until such material, of the kind and quality herein specified, shall have been delivered to The Sanitary District in good condition at the

points and in the manner herein specified, and shall make good or replace, to the satisfaction of the Engineer, any material that has been damaged, lost or is missing at any time before delivery or when delivered as specified. The Contractor shall not assign by power of attorney or otherwise any portion of the money that may become due to him through the performance of this contract.

Damages and Liens.

SEC. 17. The Contractor agrees to pay all damages to any person or persons or property growing out of any act, doing or omission of himself or of his servants, agents, or employes, that are in the nature of a legal liability, and agrees to indemnify and save The Sanitary District harmless against all suits or actions of every name and description brought against The Sanitary District on account of such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employes in the performance of this contract. Said Contractor further agrees to protest and save The Sanitary District harmless against all liens of every description that may be placed upon any material furnished or delivered under this contract. Said Sanitary District is hereby authorized and empowered by said Contractor to retain so much of any sum of money that may be due or that may become due to the Contractor from the Sanitary District under this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, until said lien or liens or said suit or suits or claims for damages have been settled and evidence to that effect shall have been furnished to the satisfaction of said Board of Trustees.

Employers' Liability Act.

SEC. 18. The Contractor further agrees to insure to his employes or their beneficiaries, the necessary first aid, medical, surgical and hospital services, and the compensation provided for in the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this state by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10, 1911, in force May 1, 1912," approved June 28, 1913, in force July 1, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or deaths suffered by any of his employes in and about the performance of this contract.

Time.

SEC. 19. The Contractor agrees to furnish and deliver material of the character and in the manner herein specified as follows:

1. At least twenty-five (25) per cent. of the total amount of material under each item hereinafter specified shall be delivered as specified on or before the expiration of twenty (20) calendar days after the date when this contract is signed by both parties hereto.

2. At least fifty (50) per cent. of the total amount of material under each item hereinafter specified shall be delivered as specified on or before the expiration of forty (40) calendar days after the date when this contract is signed by both parties hereto.

3. All material shall be delivered as specified on or before the expiration of sixty (60) days after the date when this contract is signed by both parties hereto.

Forfeiture of Contract.

SEC. 20. It is further agreed by and between the parties hereto that time is of the essence of this contract and that if said Contractor abandons this contract or fails financially, or from any other cause whatsoever is unable to carry out the terms and conditions of this contract and is unable to complete the whole or any specified part of same in the time or times specified herein, or if he assigns this contract without the consent of The Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may re-advertise for bids for furnishing and delivering the whole or the balance of the material herein specified and award a contract therefor to the lowest responsible

bidder, or The Sanitary District may purchase on the open market at the lowest price then obtainable, such quantity or quantities of material as the said contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The cost of obtaining said material if the same is obtained by awarding a new contract therefor or if so purchased on the open market and all costs and expenses incurred by The Sanitary District in purchasing and delivering such material in excess of the cost hereunder to said Sanitary District, shall be paid to The Sanitary District by said Contractor.

Extension of Time.

SEC. 21. In case the amount of material ordered by the Engineer under any one or more of said items is greatly in excess of the amount shown under the same items in the schedule included in "Requirements for Bidding and Instructions to Bidders" attached hereto, or in case the sizes or lengths of pieces of timber ordered by the Engineer under any one or more of said items are not the same as the sizes or lengths shown under the same items in said schedule, thereby requiring, in the opinion of the Engineer, more time to furnish and deliver same than would be required to furnish and deliver timber of the amounts or of the sizes or of the lengths set forth in said schedule, then the time for delivery of all of the timber in excess of the amount shown in said schedule, or the time or times for delivery of timber of any size or length that is different from the size or length shown in said schedule, shall be extended by such period or periods of time as may be fixed by the Engineer as equivalent to the additional time required to deliver material as ordered by the Engineer.

Should the Contractor be obstructed or delayed in the furnishing and delivering of any or all of said material by order of the Engineer or by any act or delay of The Sanitary District, or by any act or delay of Railroad Companies in furnishing cars for loading said material or in transporting, switching or delivering cars loaded with said material, or by War Boards or Councils of the Federal Government or by Federal Administrators, or by riot, insurrection, war, pestilence, fire, lightning, earthquake, cyclone, floods, acts of public authorities, or by other causes that, in the opinion of the Engineer, are entirely beyond the control of the Contractor, then the period or periods of time herein fixed for the completion of delivery of all or of any specified part of said material shall be extended for a period or periods of time equivalent to the period or periods of time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless the Contractor shall have notified the Engineer in writing of said delay or delays within seven (7) days after the commencement of same.

It is further agreed that the Contractor shall not be entitled to any damages or compensation from The Sanitary District on account of any delays resulting from any of the causes specified in this section of this contract, except for extra premiums on his bond actually paid by said Contractor on account of delays caused by The Sanitary District. The Chief Engineer shall decide the number of days that the Contractor has been delayed and his decision shall be final and binding upon both parties to this contract.

Contractor's Bond.

SEC. 22. The Contractor shall furnish a bond in the sum of two thousand dollars ($2,000.00) for the performance of this contract, with good and sufficient sureties satisfactory to the Board of Trustees of The Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of said Board of Trustees, insufficient surety for the penalty of said bond, then, in that case, the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in the sum of two thousand dollars ($2,000.00), with such sureties thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Prices.

SEC. 23. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the materials, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid or from the action of the elements or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every descrip-

tion connected with the work; and for well and faithfully completing the work, and the whole thereof, in full compliance with the specifications and the requirements of the Engineer under them, to-wit:

OREGON FIR TIMBER.

Item A. For Stringers 8"x16"x24' long the sum of Fifty and no/100 dollars ($50.00) per 1,000' B. M.

Item B. For Stringers 8"x16"x26' long, the sum of Fifty and no/100 dollars ($50.00) per 1,000' B. M.

Item C. For Caps 12"x14"x14' long, the sum of Forty-eight and no/100 dollars ($48.00) per 1,000' B. M.

Item D. For Posts 12"x12"x18' long, the sum of Forty-six and no/100 dollars ($46.00) per 1,000' B. M.

Item E. For Ties 8"x8"x14' long, surfaced one side and one edge or surfaced four sides, the sum of Forty-four and no/100 dollars ($44.00) per 1,000' B. M.

Item F. For Sway Braces 3"x12"x24' long, the sum of Forty-four and no/100 dollars ($44.00) per 1,000' B. M.

Item G. For Guard Timbers 4"x6"x20' long, the sum of Forty-four and no/100 dollars ($44.00) per 1,000' B. M.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete this contract in all its details, as herein specified. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreement. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

SEC. 24. The Sanitary District will pay to the Contractor on or before the twentieth (20th) day of each month ninety (90) per cent. of the value, computed at the rates and prices herein specified, of all material of the sizes and lengths ordered by the Engineer and of the quality herein specified that is properly delivered to The Sanitary District in the manner herein specified, during the previous month. The remaining ten (10) per cent. of the value of said material will be retained by The Sanitary District as part security for the faithful performance of this contract and shall not become due to the Contractor until thirty (30) days after the completion of this contract and the delivery of the final certificate of the Engineer and after the payment by the Contractor of all claims for labor, material and transportation furnished in the performance of this contract.

Final Payment.

SEC. 25. The said Contractor further agrees that he shall not be entitled to demand or receive final payment hereunder, except in the manner set forth in this agreement, and not until said contract has been completed and all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and the delivery of such certificate, pay and it hereby binds itself to pay, to said Contractor, in cash, the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid and except such sum or sums of money as may be lawfully retained under any of the provisions of this contract hereinbefore set forth.

SEC. 27. This agreement shall be binding upon the heirs and legal representatives of the said Contractor.

IN WITNESS WHEREOF, On the day and year first above written, the party of the first part has caused these presents to be executed in duplicate by the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District of Chicago, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President and to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, that we, Hutchins Lumber and Storage Co., as principal, and New Amsterdam Casualty Company, as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of two thousand dollars ($2,000.00) lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this first day of May, A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH that whereas the above bounden Hutchins Lumber and Storage Co. has entered into a certain contract with The Sanitary District of Chicago, bearing date the first day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, transportation charges, appliances and appurtenances necessary for furnishing and delivering timbers for trestles for supporting tracks of The Grank Trunk Western Railway Company at the Calumet-Sag Channel, in the City of Blue Island, County of Cook, State of Illinois.

Now, if the said Hutchins Lumber and Storage Co. shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Hutchins Lumber and Storage Co., its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall repay any overpayments and shall pay all valid claims and demands whatsoever, including all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Hutchins Lumber and Storage Co. in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, and made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Hutchins Lumber and Storage Co. or its agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory there-

of and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Hutchins Lumber and Storage Co. shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, May 1, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents contract with the Forest Park Amusement Company, a corporation, Forest Park, Illinois, wherein said company agrees to take, and The Sanitary District agrees to furnish, 300 kilowatts of electrical energy for lighting and power purposes for the time and upon the terms and conditions therein set forth, which contract has been approved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of The Sanitary District and the Clerk be, and they are hereby, authorized and directed to execute in duplicate the attached contract, which has heretofore been executed by said Forest Park Amusement Company.

Respectfully submitted,
H. E. LITTLER,
Chairman.

WM. J. HEALY,
MATT A. MUELLER,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, May 1, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 Budget.

Engineering Department—

F. W. Mohlman, Chemist, $250.00 mo.

Thos. D. Burke, Rodman, $100.00 mo.

M. Vincent Gottschalk, Rodman, $100.00 month.

Stanley J. Dubel, Laborer, $96.00 mo.

Henry DeGraza, Laborer, 45c per hour.

Carl Newman, Laborer, 45c per hour.

Dominick Albano, Laborer, 45c per hour.

P. Carlin, Sub-foreman, 60c per hour.

M. Ryan, Carpenter Helper, 50c per hour.

L. Bobus, Painter, 87½c per hour.

I. G. McMurphy, Watchman, 40c per hour.

REINSTATEMENT.

Police Department—

John J. Burke, Patrolman, $115.00 mo.

INCREASE.

Provided for in 1919 Budget.

Electrical Department—

J. C. Kraiss, Painter, from 75c hour to 87½c per hour.

REINSTATEMENT.

Due to honorable discharge from the U. S. Army Service.

Engineering Department—

H. J. Curtis, Instrument Man, $150.00 month.

Respectfully submitted,
GEORGE W. PAULLIN,
Chairman.
H. E. LITTLER,
JAS. H. LAWLEY,
MATT A. MUELLER,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Healy, Lawley, Littler, Mueller, Nance and Paullin—Seven.

Nays—None.

Passed and not voting—Mr. Sergel—One.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a petition from various property owners and taxpayers of the Village of Shermerville, Ill., and vicinity, requesting relief from the conditions existing in the north branch of the North Branch of the Chicago river on account of its stagnation, and requesting that same be straightened and dredged.

Referred to the Committee on Engineering.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Carr presented the following resolution:

CHICAGO, Ill., May 1, 1919.

WHEREAS, Nothing is being done toward the construction of a bridge over the main channel of the Sanitary District at Crawford avenue, and the California avenue bridge project is awaiting a decision by the City of Chicago on the question of whether it will accept a bascule bridge; and

WHEREAS, It is urgent that work on these bridges be commenced at the earliest possible date. Residents of the territory affected have been before the Board at various times urging that the bridges be built. They are looking to The Sanitary District for relief that is imperative if progress is not to be blocked in the southwest section of the city; and

WHEREAS, There is no legal impediment at Crawford avenue because the Board of Trustees of The Sanitary District was given the power to build that bridge by legislative enactment upheld by the Supreme Court, and if there is any doubt about the right of the District to build the California avenue bridge, enabling legislation should be procured from the General Assembly now in session; and

WHEREAS, Appropriations were made in the 1919 budget for this work and there is no substantial reason for the District not proceeding as rapidly as possible with the construction, the type of the bridges not being so important

as the prompt construction of them; therefore be it

Resolved, That the time has come for the Board to act and the Board should at once decide all undetermined questions so that the work may be pushed to completion.

Mr. Carr moved that the resolution be referred to the Committee on Engineering.

The motion prevailed.

ADJOURNMENT.

Mr. Littler moved that the Board adjourn.

The motion prevailed.

John W. Gillon,

Clerk.

C455

JUL 19 1919

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, MAY 8, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

BIDS.

The Clerk opened and read the bids received for a five-ton motor truck for the Electrical Department as shown in the following schedule of bids:

THE SANITARY DISTRICT OF CHICAGO.

PROPOSALS RECEIVED FOR FIVE TON MOTOR TRUCK.

May 8th, 1919.

No. of Bid	Names and Address of Bidders	Deposit	Price of Truck
1	Signal Motor Truck Co.....Chicago...	$100.00	$5,154.80
2	Hall Truck Sales Co.....Chicago...	100.00	4,750.00
3	Republic Motor Truck Co.....Chicago...	100.00	6,183.50
4	Commercial Tire & Auto. Co.....Chicago...	100.00	5,995.00
5	Chicago Oneida Truck Co.....Chicago...	100.00	5,755.97
6	The White Company.....Chicago...	100.00	5,490.00
7	General Motors Truck Co., Pontiac, Michigan..	100.00	5,833.00
8	James Motor Co.....Chicago...	100.00	5,864.95

Mr. Lawley moved that the bids be referred to the Electrical Engineer for tabulation and to the Committee on Finance for report.

The motion prevailed.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the Regular Meeting of April 24, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The Clerk presented his report of money received and deposited with the Treasurer during the month of April, 1919, which was ordered published and filed, as follows:

CHICAGO, May 8, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—I beg to report the receipt of Two Hundred and Twenty-five Thousand Six Hundred and Ninety-five and Six One-hundredths ($225,695.06) Dollars, during the month of April, 1919, from the following sources:

John Westreicher, Collector, City of Evanston, account 1918 taxes	$ 27,612.17
Timothy J. Buckley, Collector, Town of Cicero, account 1918 taxes	18,087.55

GEORGE M. REYNOLDS,
Treasurer, The Sanitary District of Chicago.

REPORTS OF COMMITTEES.

Judiciary.

Mr. Healy presented the following report from the Committee on Judiciary:

CHICAGO, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Judiciary reports that on January 31, 1918, the Board authorized the payment to Thomas P. Garland, on the voucher of the Chief Engineer, of the sum of $3,621.61, found to be due him under his contract with the Sanitary District dated October 13, 1916 (page 1360 of the Proceedings), for the construction of the Niles Center Sewer Outlet, and at that time withheld the sum of $300.00 to cover the cost of fully completing said work.

Your Committee further reports that on July 11, 1918 (page 694 of the Proceedings), the Board authorized the Chief Engineer to complete all unfinished work provided to be done under said contract at the cost of said contractor.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that it was necessary to expend the sum of $370.75 for completing said work, and that there is now due said contractor as a final payment under the terms of said contract the sum of $3,550.86.

Your Committee further reports that on December 13, 1918, the William E. Dee Company filed a bill of complaint in the Circuit Court of Cook County, General Number B42,637, against said Thomas P. Garland and the Sanitary District to enforce a lien against the money due said contractor from the Sanitary District for furnishing certain sewer pipe and sewer pipe material used in the construction of said sewer outlet, and thereafter various other persons intervened in said bill and filed claims to enforce liens which they claimed to have against the money in the hands of the Sanitary District; that said case was heard on April 30, 1919, and a decree was entered therein finding that the parties named in the following order were entitled to liens against the money due said contractor in the amounts stated. Under the decree of said court, the Sanitary District was ordered to pay said amounts to said persons, and it is now necessary to make said payments to comply with the terms of said decree.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to draw warrants in favor of the following named persons in the amounts stated as follows:

Thomas Lynch	$ 16.00
Morton S. Cressy, assignee of Alfonso Notardonato and others	400.00
Wm. E. Dee Company	1,885.98
Wm. E. Dee Company, assignee of the Harvey Motor Truck Company	9.72
American Sewer & Drain Construction Company	181.12
Max Gerlach	456.64
United States Fidelity & Guaranty Company	379.20
W. J. Springer and Clara Blameuser, doing business as Niles Center Coal & Building Material Company	32.74
August Ruhnke	123.58
M. Foley Company	65.16

in full satisfaction of the terms of said decree.

Respectfully submitted,

WM. J. HEALY,
Chairman.

H. E. LITTLER,
PATRICK J. CARR,
Committee on Judiciary.

Mr. Healy moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has examined and approved the bond of the Coffin Valve Company with the Massachusetts Bonding and Insurance Company thereon as surety, on its contract for furnishing and delivering miscellaneous sluice gates with floor stands and appurtenances for the Desplaines River Sewage Treatment Works, designated as Division "V" of the specifications, for The Sanitary District of Chicago, and, therefore, recommends the passage of the following order:

Ordered, That the bond of the Coffin Valve Company for the faithful performance of the contract above specified, said bond being in the penal sum of $3,125.00 be, and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the form of the contract of the Coffin Valve Company:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR DES PLAINES RIVER SEWAGE TREATMENT WORKS.

THIS AGREEMENT, Made and entered into this 1st day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Coffin Valve Company, a corporation organized under the laws of the State of Maine, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for furnishing and delivering the Sluice Gates, and the apparatus, equipment and appurtenances thereto, as called for under Division V, of the attached specifications, complete, as specified, freight prepaid, or board cars, the Chicago and North-Western Railway in the Village of Maywood, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed and attached hereto. The speci-

fications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Division V, of the Des Plaines River Sewage Treatment Works.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the sluice gates, and all other fittings and appurtenances, including all material, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items each division of the entire sewage treatment works are numbered, A1, A2, etc., B1, B2, etc., C1, C2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, on order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

General Specifications.

Location of Work.

(1) The Des Plaines River Sewage Treatment Works are to be erected on property owned by the Sanitary District situated between 12th and 22nd streets, just west of the Des Plaines River and east of First avenue extended, in the Village of Broadview, County of Cook, State of Illinois.

Description.

(2) The work included under this contract and specifications consists in furnishing, delivering and erecting at the site of the Des Plaines River Sewage Treatment Works and in furnish-

ing and delivering f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., the following:

Division V, sluice gates, including miscellaneous sluice gates, with floor stands and appurtenances.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Contract Drawings.

(4) Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the equipment included under this contract and the foundations for same, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use. Under this head plans and information shall be furnished by the Contractor, in part, as follows:

DIVISION V.

SLUICE GATES.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as the Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment to make the same conform to the drawings as finally approved.

Of the minor equipment for which drawings may not be required, the Contractor shall furnish to the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalog number and type of equipment proposed, together with such prints, dimensions, specifications, samples, or other data, as may be required to permit intelligent judgment of the acceptability of the equipment proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Prior to the issuance by the Engineer of the final certificate specified in Article 37, the Contractor shall furnish to the Engineer a set of record blue prints of the various equipment, as actually installed, for which drawings are required from the Contractor.

These drawings shall include complete wiring diagrams and such plans and elevations and sectional assemblies as may be necessary to show the size, location and method of assembly of all parts of the equipment, to facilitate the dismantling and reassembling of the same. Each part shown shall be identified by a number and each drawing shall contain a bill of material giving the name, material and number required of each part. Such dimensions shall be given on the drawings as are desirable for the proper erection and adjustment of the equipment.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Foundations.

(6) The foundations for all equipment included under Division V of this contract will be furnished by the contractor for Division A. These foundations will be brought up to

within about one (1) inch of their final elevation. After placing equipment thereon, the contractor erecting said equipment shall shim the same to the final elevation, using for this purpose approved metal wedges, and complete the foundation by grouting under and around the bases of the equipment.

Shop Tests.

(8) All tests shall be made in the presence of the Engineer. The Contractor, at his own expense, shall supply in place and ready to use, all necessary power, apparatus, wiring, piping and instruments and shall make the tests, and shall provide all facilities for the Engineer to inspect the work previous, during or subsequent to the test and to calibrate and otherwise check all the instruments used in the tests.

Should the above tests and inspections show any failure on the part of any of the equipment to fulfill the requirements of these specifications, the Contractor shall forthwith, at his own expense, make such changes and repairs to the equipment as may be necessary to make the same conform to the specifications before shipment to the site of the work, and shall again provide all the necessary equipment and facilities and shall make the tests as outlined herein.

Shipment.

(9) Unless otherwise notified, as specified in Article 27, the Contractor (under Division V), shall ship the material and equipment included under this contract, when ready, to the Chicago and Northwestern Railway, Maywood, Illinois, freight prepaid, consigned to the contractor named as the consignee by the Chief Engineer of the Sanitary District. All equipment shall be carefully crated, as required, and protected from dust, dirt and weather.

Guarantees.

(10) Before the completion of the work and immediately prior to the issuance of the final certificate, the Contractor shall furnish a maintenance bond or guarantee against all improper workmanship or materials, for the period stated from the date of the completion of the work, as herein specified, under Article 34. This date shall be taken as the date when the Board of Trustees of The Sanitary District of Chicago approves the final voucher of the Contractor.

SPECIFICATIONS.

DIVISION V, SLUICE GATES.

General.

(V1) The Contractor shall furnish the sluice gates of a make approved by the Engineer, as shown on the plans, together with the wall castings, guides, extension shafts, floor stands, gearing, anchor bolts and other appurtenances, complete, as specified. The sluice gates shall all be made by one manufacturer. These gates are designed to operate in sewage and drainage water containing trash, and shall be of the highest grade in design, workmanship and material, conforming to the best standard practice.

All sluice gates shall have a clear waterway of the proper dimensions for the clear waterway openings shown on the plans or specified herein. The sluice gates shall be of ample strength to withstand on either side of the gate the hydrostatic head of water specified, and shall be tight against this head when the pressure is applied to either side of the gate. All operating mechanisms shall be so designed that the gates may be easily opened or closed by one man by hand against the specified head.

Schedule of Sluice Gates.

(V2) In the schedule below are given brief data as to the type and means of operating the sluice gates. Requirements not included therein are specified elsewhere. The distances given from center of gate to base of operating stand are approximate.

(The table referred to is at top of page 480).

Under column headed "head on center of gate," * denotes that normal method of use and operation will be with head on the back of the gate.

In the foregoing table, under the column "How Operated," "Nut" means the extension stem is non-rising and furnished in a square nut for key operation; "Stand" means that the extension stem is rising and that an operating stand is to be furnished as specified in Section V9; under the column "Connection," "Spigot" means a spigot end on the sluice gate frame extending into the wall, with the inside of the bore or tube flush with the face of the waterway; "flanged"

2	24x24	5	Stand	Spigot	6-0

means an extension end, flanged, faced and drilled to American standard, to bolt the flange on the end of a pipe. Where a nut is called for, the dimension "center of gate to base of operating stand" shall be understood to mean "center of gate to elevation of operating floor."

Materials and Castings.

(V3) All materials shall be of the quality and character best adapted for the purpose for which it is to be used. No material shall be used for any purpose for which it has not previously been in use for a like purpose for a sufficient length of time to demonstrate its probable success for the purpose for which it is to be used.

All castings shall be smooth and sound, free from all defects of any description.

Bronze Mountings.

(V4) The sluice gate, lifting shaft guides and operating stand shall be bronze-mounted throughout; that is all bearing or wearing parts shall be either of solid bronze or faced with bronze unless otherwise specified.

Frames.

(V5) The frames of the gates shall be built of cast iron, of the pattern specified or shown on the plans. Where flanged ends are called for, they shall be faced and drilled. The side guides shall consist of heavy castings of approved section. The flanges of the frames shall be provided with bronze seats in order to provide non-corrosive faces upon which the corresponding faces of the valves shall slide, and when in close contact, shall furnish a water-tight closure.

Gates.

(V6) The gates shall consist of cast iron plates, stiffened with heavy ribs both vertically and horizontally, suitably spaced, and with sufficient depth to stand the specified water pressure without twisting or springing. The face of the gate castings shall be provided with bronze faces as hereinafter described.

Facings.

(V7) Both gates and frames shall be provided with bronze, non-corrosive facings which shall be dove-

tailed into the iron castings. The dove-tail grooves in the cast iron, and the sides of the bronze strips shall be carefully peened until every crevice in the dove-tail is well filled, after which the facings shall be additionally fastened by countersunk head brass screws, and the facing surface finally machined and hand scraped to a water-tight bearing.

Wedges.

(V8) The sluice gates 10 inch and under in size, shall be fitted with fixed wedges, with ample bearing. The sluice gates 12 inches and over in size shall be fitted with the proper number of adjustable wedges or other devices, properly distributed, in order to force them tightly to the seat at the point of closure. No wedges which tend to retain trash will be accepted. The side wedges must be capable of taking the entire pressure. The gates shall be provided with final stops to prevent further travel after the ports are covered. Both the faces of the wedges and the bearing spots therefor shall be of bronze. The guides and those portions of the valves which make the sliding contact shall be planed smooth. The gates shall operate without sticking, binding or chattering.

Shafts and Operating Stands.

(V9) The lifting shafts connecting the sluice gates with the operating stands shall be of the best cold rolled steel, except the upper ends which are to be threaded, shall be of high grade rolled bronze. The lifting shaft shall be of sufficient length to extend up above the operating stand, when the gate is fully closed, a distance of one (1) inch, the exposed end of the shaft to be neatly finished.

The extension stems of the sluice gates shall be provided with adjustable cast iron guides designed for securely bolting to the wall for guiding and steadying the shaft, where shown on the plans or required. Each guide shall be furnished with a bronze bushing for the stem to pass through. No lifting shaft shall be unsupported for a length greater than ten (10) feet.

Where nuts are specified, the head of the shaft shall be finished by forming into a square nut. Four (4) key wrenches shall be furnished for operating these gates.

For the sluice gates under 24 inch in size, where operating stands are specified, a neat wheel stand shall be furnished, in which the stem passes through the wheel hub and serves as an indicator. For the 24 inch sluice gates, wheel stands equipped with roller bearings running in grease shall be supplied. For the 66-inch sluice gate a two speed bevel gear stand shall be provided, the gears and stem being cased in a moisture proof cover, securely fastened on. A neat indicator shall be furnished.

Painting and Protection.

(V10) All finished parts shall be well protected in the shop and during transportation to prevent injury and abrasion. All castings not finished shall be thoroughly cleaned and painted before rusting begins and before leaving the shop with two (2) coats of high grade asphaltum varnish or other coating. All bronze tool-finished work shall be left bright.

Anchor Bolts.

(V11) The Contractor shall furnish all the bolts required for securing and supporting the sluice gates, extension stems, guides and operating stands.

Tests.

(V12) The sluice gates, when erected, will be tested by the Sanitary District, as the Chief Engineer may require, to demonstrate compliance with contract requirements. Any part or parts failing to comply with such requirements or showing undue strain or weakness, shall be corrected or removed by the Contractor, at his expense, until such requirements are met.

Transportation and Delivery.

(V13) The sluice gates and appurtenances furnished hereunder shall be delivered by the Contractor at his own risk, f. o. b. cars, on the Chicago and Northwestern Railway, Maywood, Ill., consigned to the contractor designated by the Chief Engineer.

Guarantee.

(V14) All equipment furnished hereunder shall be guaranteed free from mechanical defects in workmanship, design and materials, and the Contractor shall replace, without cost to the Sanitary District, any part or

parts proving defective within one (1) year after the equipment has been placed in operation, in accordance with the maintenance bond for this purpose specified under article 34.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

Omission on Plans.

Art. 3. The plans furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or drawings.

Changes in Plans.

Art. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

Art. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the

opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed hereinbefore and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. Provided, however, that for material or equipment furnished under Divisions C, N, O, P, R, V, W, where delivery is specified, f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., any damage done after delivery shall be repaired by the contractor furnishing the material and equipment and shall be paid for by the contractor responsible for the damage. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any pro-

gress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Patents.

Art. 20. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Provided, however, that the obligations imposed on said Contractor by this Article 20 shall not apply to claims for infringements of patents on activated sludge processes or machinery or equipment used in connection therewith.

Damages.

Art. 21. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the execution of said work; or by, or in consequence of any negligence in guarding the same; or by or, on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 22. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State"; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912;" approved June 28, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any

accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 23. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 24. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in, or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time and Progress.

Art. 27. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees

of said Sanitary District of the bond of said Contractor.

The Contractor for Division V hereby agrees to deliver the sluice gates and appurtenances to the railroad within one hundred and eighty (180) calendar days from the said date of the approval of the bond.

The words "deliver to the railroad" or "deliver" as used in this article shall be understood to mean delivery f. o. b. cars, The Chicago and North-Western Railway, Maywood, Illinois.

It is understood and agreed that Time is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 28. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division V, within the respective times specified in Article 27, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of Ten Dollars ($10.00) for Division V, for each and every day that said Contractor shall be in default in the completion of said work ready for operation, provided, however, that in case two or more divisions are included under this contract, the liquidated damages shall be paid only upon the division or divisions in which the Contractor shall be in default.

Said sum of Ten Dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for Delays.

Extensions or Additions.

Art. 29. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 30. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 31. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any

part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 31), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 31) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Division V.

Art. 32. It is further agreed by and between the parties hereto, that if said Contractor abandons this contract or fails financially or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for furnishing and delivering the balance of the material, machinery or equipment herein specified and award a contract therefor to the lowest responsible bidder, or the Sanitary District may purchase on the open market at the lowest price then obtainable such quantity or quantities of material, machinery or equipment as the said contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The cost of obtaining said material, machinery or equipment, if the same is obtained by awarding a new contract therefor, or if so purchased on the open market, and all costs and expenses incurred by the Sanitary District in purchasing and delivering such cable, material, machinery or equipment in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

Contractor's Bond.

Art. 33. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Art. 34. Division V. For one year, subsequent to the completion of the operating tests and the acceptance of the equipment included under this contract, the Contractor shall make good, at his own expense, any excessive wear to any

parts, any defects in or damages to any equipment included in this contract, which may arise from faulty materials, design or construction, or from the inability of any of the equipment to successfully perform all the work put upon it within the limits of these specifications.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition precedent to the final payment specified in Article 37.

Prices.

Article 35. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and spcifications and the requirements of the Engineer under them, to-wit:

DIVISION V.

SLUICE GATES.

For furnishing and delivery, complete, of the sluice gates with extension shafts, operating stands, and miscellaneous appurtenances, complete as specified, f. o. b. cars, the Chicago and North Western Railway, Maywood, Ill., the lump sum of six thousand two hundred fifty dollars ($6,250.00).

The Contractor guarantees that the sluice gates to be furnished under this contract will work satisfactorily under all the conditions proposed without any undue strain, wear or vibration. The Contractor guarantees the workmanship and the strength and quality of all materials entering into their construction, agreeing to make good at his own expense all damages caused by defects in the same during the maintenance period of one year after acceptance of said sluice gates.

The Contractor further agrees that in the event that the sluice gates or any part thereof shall fail to conform to the requirements of the specifications in any particular, the Sanitary District shall have the option of rejecting said sluice gates or of accepting the same at such reduced price, as will in its judgment fully compensate for such failure to meet the guarantees.

If the Sanitary District shall elect to reject any part or all of the sluice gates which fall below the guarantees, the Contractor agrees that they shall remain in place and be operated by the Sanitary District until other apparatus which does comply with the guarantees is furnished.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 36. Division V. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for

the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and the completion of the erection and the operating tests, and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract, provided however, that said twelve and one-half (12½) per cent so reserved may be paid to said Contractor at the expiration of thirty (30) days from the completion of delivery f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., with the consent of the Chief Engineer and the sureties on the bond of the Contractor, in which case said bond is to remain in full force to the completion of the operating tests and the final acceptance of the equipment included under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where unit prices are specified, the estimate shall be based on the quantities estimated. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

Art. 37. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 34, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its Treasurer to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

Know All Men by These Presents, That we, the Coffin Valve Company, as principal and Massachusetts Bonding and Insurance Company, as surety are held and firmly bound unto The Sanitary District of Chicago in the penal sum of thirty-one hundred

twenty-five dollars and no cents ($3,125.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this 1st day of May, A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That whereas the above bounden Coffin Valve Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the 1st day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the furnishing, and delivering miscellaneous sluice gates with floor stands and appurtenances, f. o. b. cars the Chicago and North-Western Railway, in the Village of Maywood, County of Cook, State of Illinois, as specified under Division V, of the attached contract.

Now, If the said Coffin Valve Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Coffin Valve Company, its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, except insofar as all liability on account of claims for infringements of patents on activated sludge processes or machinery, or equipment used in connection therewith, is expressly exempted; and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Coffin Valve Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Coffin Valve Company or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employes, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Coffin Valve Company shall be conclusive against each and all parties to

this obligation, as to amount, liability and all other things pertaining thereto.

Assistant Attorney.
CHAS. E. ANTHONY,

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has examined and approved the bond of Eugene E. Maher with the Southern Surety Company thereon as surety, on his contract for furnishing and delivering the pumping machinery for the Desplaines River Sewage Treatment Works, designated as Division "O" of the specifications, for The Sanitary District of Chicago, and, therefore, recommends the passage of the following order:

Ordered, That the bond of Eugene E. Maher, for the faithful performance of the contract above specified, said bond being in the penal sum of $4,525.00, be, and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the form of the contract and bond of Eugene E. Maher:

THE SANITARY DISTRICT OF CHICAGO. CONTRACT AND SPECIFICATIONS FOR DES PLAINES RIVER SEWAGE TREATMENT WORKS.

THIS AGREEMENT, Made and entered into this 1st day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated The Sanitary District, and Eugene E. Maher, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree, with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, and that are necessary for furnishing and delivering the pumping machinery and the apparatus, equipment and appurtenances thereto, as called for

under Division O of the attached specifications, complete, as specified, freight prepaid, on board cars, the Chicago and North-Western Railway in the Village of Maywood, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Division O of the Des Plaines River Sewage Treatment Works.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the pumps and all other fittings and appurtenances, including all material, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each division of the entire sewage treatment works are numbered A1, A2, etc., B1, B2, etc., C1, C2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

GENERAL SPECIFICATIONS.

Location of Work.

(1) The Des Plaines River Sewage Treatment Works are to be erected on property owned by The Sanitary District situated between 12th and 22nd streets, just west of the Des Plaines River and east of First avenue extended, in the Village of Broadview, County of Cook, State of Illinois.

Description.

(2) The work included under this contract and specifications consists in furnishing and delivering f. o. b. cars, the C. and N. W. Ry., Maywood, Ill.,

the following: Division O, pumping machinery, including three (3) 14-inch centrifugal pumps and two (2) circulating pumps and miscellaneous appurtenances.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Provisions for Handling Equipment at Site.

(3) The Sanitary District will reserve a right-of-way to the station site, from First avenue on the west. A hand crane will be installed under Division A and will be available for handling the equipment to be installed in the pump and blower room. The Contractor shall operate this, however, at his own expense, and shall properly oil and maintain it during his use thereof.

The Contractor under Division A shall, at his own expense, provide any temporary blocking, supports or other protection for the pump and blower room floor necessary to prevent injury to the same, and shall make good at his own expense any damages done by him to the station structure or its appurtenances or to the equipment handled in unloading from the cars, hauling, unloading, and installing any of the equipment included under this contract for erection under Division A, or in removing plant or other property or in cleaning up.

It is expected that the superstructure of the station will be sufficiently advanced at the time of installation to afford protection from storms to the equipment included under this contract after the same is within the superstructure walls. The Contractor under Division A shall, however, furnish such protection as may be necessary against temperature, dust, dirt, and humidity, and shall be fully responsible for the protection of such equipment until its final acceptance.

Contract Drawings.

(4) Within thirty (30) days after the approval by the Board of Trustees of The Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the equipment included under this contract and the foundations for same, other than that for which working drawings are given in the plans attached hereto by The Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use. Under this head plans and information shall be furnished by the Contractor, in part, as follows:

DIVISION O.

Circulating Pumps.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as The Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment to make the same conform to the drawings as finally approved.

Of the minor equipment for which drawings may not be required, the Contractor shall furnish to the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalog number and type of equipment proposed, together with such prints, dimensions, specifications, samples or other data, as may be required to permit intelligent judgment of the acceptability of the equipment proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Prior to the issuance by the Engineer of the final certificate specified in Article 37, the Contractor shall furnish to the Engineer a set of record blue prints of the various equipment, as actually installed, for which drawings are required from the Contractor.

These drawings shall include complete wiring diagrams and such plans and elevations and sectional assemblies as may

be necessary to show the size, location and method of assembly of all parts of the equipment, to facilitate the dismantling and reassembling of the same. Each part shown shall be identified by a number and each drawing shall contain a bill of material giving the name, material and number required of each part. Such dimensions shall be given on the drawings as are desirable for the proper erection and adjustment of the equipment.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by the examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Foundations.

(6) The foundations for all equipment included under Division O, of this contract will be furnished by the contractor for Division A. These foundations will be brought up to within about one (1) inch of their final elevation. After placing equipment thereon, the contractor erecting said equipment shall shim the same to the final elevation, using for this purpose approved metal wedges, and complete the foundation by grouting under and around the bases of the equipment.

Foundation Bolts.

(7) The foundation bolts for the pumps, electrical machinery, blowers, and other equipment furnished by the Sanitary District will be furnished by the Sanitary District and placed by the Contractor under Division A, in accordance with substantial templates constructed by him to dimensions furnished by the contractor for the equipment to be set. Previous to setting any piece of equipment on its foundation the Contractor shall satisfy himself that these bolts are properly placed and shall make no claim against the Sanitary District for any expense incurred in resetting of the equipment due to any error in the bolt setting. Should any such error be discovered, the same will be corrected by the Sanitary District, unless the error be due to incorrect dimensions furnished by the contractor for the equipment furnished, in which case expense of making such corrections shall be paid by said contractor furnishing the equipment.

Shop Tests.

(8) Each pump shall be tested in the shop to such an extent as may be necessary to determine the balance of the moving parts and the character of the workmanship.

Each motor shall be tested in the shop for efficiency, insulation and operating characteristics, except as hereinafter specified.

All tests shall be made in the presence of the Engineer. The Contractor, at his own expense, shall supply in place and ready to use, all necessary power, apparatus, wiring, piping and instruments and shall make the tests, and shall provide all facilities for the Engineer to inspect the work previous, during or subsequent to the test and to calibrate and otherwise check all the instruments used in the tests.

Should the above tests and inspections show any failure on the part of any of the equipment to fulfill the requirements of these specifications, the Contractor shall forthwith, at his own expense, make such changes and repairs to the equipment as may be necessary to make the same conform to the specifications before shipment to the site of the work, and shall again provide all necessary equipment and facilities and shall make the tests as outlined herein.

Shipment.

(9) Unless otherwise notified, as specified in Article 27, the Contractor (under Division O,) shall ship the material and equipment included under this contract, when ready, to the Chicago and Northwestern Railway, Maywood, Illinois, freight prepaid, consigned to the contractor named as the consignee by the Chief Engineer of the Sanitary District. All equipment shall be carefully crated, as required, and protected from dust, dirt and weather.

Guarantees.

(10) Before the completion of the work and immediately prior to the issuance of the final certificate, the Contractor shall furnish a maintenance bond or guarantee against all improper workmanship or materials, for the period stated from the date of the completion of the work, as herein specified, under Article 34. This date shall be taken as the date

when the Board of Trustees of the Sanitary District of Chicago approves the final voucher of the Contractor.

SPECIFICATIONS

Division O, Pumping Machinery.

General Description.

(O1) The work to be done under Division O of this contract includes the furnishing and delivering of all the pumping machinery and appurtenances, complete, as shown on the plans or specified herein. The equipment called for includes three (3) 14-inch centrifugal pumps, flexible bearings, steady bearings, shafting, bearing bracing, and miscellaneous appurtenances, complete. All this material will be erected in the Des Plaines River Sewage Treatment Works by the Sanitary District under another division.

The Contractor shall also furnish and deliver, complete, ready to run, two (2) circulating pump units, each consisting of pump and motor direct connected, mounted on a neat cast iron base, as specified herein.

The workmanship and finish of all parts and of the machinery as a whole shall be of the best grade, in every respect satisfactory to the Chief Engineer.

The contract is intended to cover complete pumping machinery and equipment, ready for erection, including all anchor bolts and gaskets. The Contractor shall furnish all bolts, pins or other small parts necessary for the successful operation of the pumping machinery and equipment specified herein, even though these details are not shown on the plans.

Machine Work.

(O2) The work to be done under this contract (Division O) must be in exact accordance with the detail plans. No variation from the same will be permitted except with the written consent of and by the written order of the Chief Engineer in each case.

The plans show the amount of material and machine work required to construct the apparatus as specified. Minor changes in these plans shall be made at any time, as may be ordered in writing by the Chief Engineer, until the work has been completed on any piece. The Contractor shall make no claim for compensation for any changes which do not require additional labor or material.

For changes which do not require any additional machine work but do require additional material, when ordered in writing by the Chief Engineer, the Contractor will be paid the following unit prices per pound, as specified, for all additional material furnished when ordered:

For cast iron, ten (10) cents per pound.
For steel, twenty (20) cents per pound.
For bronze, fifty (50) cents per pound.

The Contractor shall make no claim for additional compensation for any changes so ordered.

All water passages and curves must conform exactly to the plans, after casting and machining. The Contractor shall make the necessary allowances for shrinkage and warping, or furnish new parts, if required by the Chief Engineer.

Replacements.

(O3) The Contractor shall make the individual pieces of the machinery herein specified to conform to the exact dimensions shown on the plans, so that no fitting or adjusting will be necessary in setting up the entire machine, other than such as is usually done in high grade standard designed apparatus. This requirement will be rigidly enforced, as it is essential that any defective pieces of the machinery may be easily replaced by a new piece made in accordance with the plans.

Inspection.

(O4) The Chief Engineer may, at his discretion, have an Engineer present during the construction of every piece. The Contractor shall afford every facility to check up the compliance with the specifications. Unless instructions are given to the contrary in writing by the Chief Engineer, any work done during the absence of the Engineer will not be accepted. It is distinctly understood that the inspection at the shop or during erection is simply a precaution taken by the Sanitary District to insure compliance with these specifications, and does not in any way affect the right of rejection of any part or parts by the Chief Engineer, if, in his opinion, the same does not comply with these specifications, even though such part was previously examined by the Engineer. It is further understood that the inspection at the shop or during erection does not relieve the Contractor of full responsibility for the dimensions of any part. Any variation from the plans will be cause for rejection of the part in which the variation is found at any time up to the final release

of the Contractor from his obligations under this contract.

Templates.

(O5) The drilling of all flanges shall be spaced uniformly and symmetrically so that flanges will fit at any angle.

MATERIALS

General.

(O6) The material in every piece shall be the highest grade of its kind, homogeneous, and free from all flaws which could possibly affect its strength or appearance. Test bars or pieces shall be made as often as required by the Engineer. Material which does not comply with the requirements shall be rejected. Broken test pieces shall be the property of the Sanitary District. The Contractor shall receive the following unit prices per pound for all test pieces ordered by the Engineer:

For wrought iron and steel, thirty (30) cents per pound finished.

For all composition or bearing metal, sixty (60) cents per pound finished.

For all cast iron, eight (8) cents per pound.

The cast iron, cast steel, steel shafts and forgings, wrought iron, rivets, bolts, copper, and bronzes shall conform in composition, physical characteristics and method of treatment to the latest standard specifications of the American Society of Testing Materials, except in so far as the specifications herein given may modify the same.

Any materials for which no detailed specification is given herein shall be of the quality and character best adapted for the purpose for which it is to be used. No material shall be used for any purpose for which it has not previously been in use for a like purpose for a sufficient length of time to demonstrate its probable success for the purpose for which it is to be used.

Castings.

(O7) Castings shall be smooth and sound, free from blow holes, flaws lumps, cracks, scabs, shrinkage strains, cold shuts and any other defects of any description. Castings shall be made as nearly as practicable of uniform thickness throughout, where not detailed on plans. Cores shall be carefully centered. If the cores shift, the piece may be rejected. No plugging or stopping of holes or defects of castings by welding or other method will be allowed, except by the written permission of the Chief Engineer. They shall be of true form and dimensions and made in accordance with the best modern foundry practice. Castings above five hundred (500) pounds in weight shall be moulded in dry sand or loam.

All castings forming the water passages shall be perfectly smooth and true, without lumps, hollows or spongy places. No filler or paint will be allowed except when directed by the Chief Engineer. The surfaces exposed to the water must show a smooth, close-grained structure.

Cast Iron.

(O8) Cast iron shall be tough, fine-grained and uniform in character, suitable for the uses to which it will be put and for machining where required. Test pieces twenty-six (26) inches long by two (2) inches wide and one (1) inch deep, cast from the same melt as the castings which they represent, when placed flatwise on supports twenty-four (24) inches apart and loaded in the center, shall sustain a load of not less than two thousand (2,000) pounds, with a deflection of not less than 0.35 inch.

Shafts.

(O9) The shafts of the centrifugal pumps shall be of the highest grade open hearth steel, forged and hammered, carefully annealed and without welds. They shall be free from cracks or flaws, either before or after finishing, and shall be of ample length before finishing, to assure sound ends. Each shaft shall have a full sized prolongation on one end, from which the test piece shall be cut, parallel to the axis of the forging. The test piece shall receive the same treatment as the forging. The test pieces shall be cut half-way between the outside and the center of the forging. All tests shall be made after annealing. The tensile strength shall be not less than sixty-five thousand (65,000) pounds per square inch. The elongation shall be not less than twenty-five per cent in two (2) inches.

Steel Forgings.

(O10) All steel forgings, other than shafts, shall be of the best open hearth steel, carefully annealed and without welds. They shall be free from cracks and flaws. Test pieces shall be cut from a properly forged prolongation, after annealing. The tensile strength shall be not less than sixty thousand (60,000) pounds per square inch. The elongation

shall be not less than twenty-five (25) per cent in two (2) inches.

Wrought Iron.

(O11) All wrought iron shall be ductile, tough, fibrous and uniform in character and shall have an ultimate tensile strength of not less than forty-five thousand (45,000) pounds per square inch, with an elongation of twenty (20) per cent in eight (8) inches.

Bolts.

(O12) Bolts and studs shall be of open hearth steel. The Engineer may select at random a number of bolts and nuts from each lot of each size, and have them broken in a testing machine. If any two (2) bolts so selected shall have an ultimate tensile strength lower than forty-six thousand (46,000) pounds per square inch of effective area at the bottom of the the thread, the whole lot of that size may be rejected. The threads shall be cut from new dies to the United States Standard thread. Bolt heads and nuts shall be hexagonal unless otherwise ordered and shall be of the United States Standard sizes. The nuts shall be of the best quality cold-pressed. Bolt heads and nuts shall be machined on the bearing surfaces with chamfered edges square with the axis of the bolt. Bolts shall be made of the exact length required and shall not project more than one-quarter (1-4) inch beyond the nut when tight. When bolts are shown on the plans which cannot be inserted, the Contractor shall furnish stud bolts or double-threaded bolts, as may be required. All bolt heads and nuts on moving or finished parts or plainly showing, shall be neatly finished. When frequent removal and adjustment is necessary, the nuts shall be case hardened.

No tightening of bolts with hammer and chisel will be be permitted.

Brass.

(O13) All brass shall be of the highest grade of red brass, with an ultimate tensile strength of not less than twenty-two thousand (22,000) pounds per square inch. It shall be homogeneous and uniform in character. New metal only shall be used.

Phosphor Bronze.

(O14) All bronze or phosphor bronze shall be of the highest grade, homogeneous and uniform in character, of composition satisfactory to the Engineer, and shall have an ultimate tensile strength of not less than thirty thousand (30,000) pounds per square inch, with an elongation of fifteen (15) per cent in two inches.

Rolled Bronze.

(O15) All rolled bronze must be homogeneous and uniform in character, properly annealed, of composition satisfactory to the Engineer, and shall have a tensile strength of not less than fifty thousand (50,000) pounds per square inch and an elongation of twenty (20) per cent in two (2) inches.

Finished bolts and nuts of rolled or phosphor bronze may be selected by the Engineer at random and tested, and if any two (2) fail to conform with the specified requirements, the whole lot may be rejected.

Babbitt Metal.

(O16) All babbitt metal shall be made of high grade ingredients of quality satisfactory to the Engineer, mixed in the proportions shown in the plans and specified herein. It shall be well peened in place before cooling. The metal must be free from blow holes. No filling or burning in of metal to stop blow holes will be allowed, but the whole bearing shall be repoured. Babbitt in bearings in contact with shafts of centrifugal pumps shall be composed of the following parts by weight—tin, eighty-six (86), copper, four (4), and antimony, ten (10).

Copper.

(O17) All copper used shall be of the best copper obtainable, thoroughly annealed and ductile.

Gaskets and Packing.

(O18) All gaskets shall be of the best quality rubber packing, not less than one-eighth (⅛) inch thick, with canvas insertions, of a manufacture, thickness and grade satisfactory to the Engineer. Where noted on the plans, a special thickness shall be furnished or a special quality, as Rainbow or equal.

Joints.

(O19) Joints specified as red lead shall be made of a mixture of the best grade of red lead ground dry, white lead, and linseed oil, of the best quality, thoroughly mixed to the consistency of a heavy paint, in proportions approved by the Engineer. This shall be mixed only as required for the work.

Drilling.

(O20) All drilling shall be fair and square with faces. All bolt holes shall be spot faced, square with the axis of the holes, and the size of the outside diameter of the nuts.

Eye Bolts.

(O21) The Contractor shall drill and tap all heavy pieces for the insertion of eye bolts. He shall furnish all necessary eye bolts. These shall be drop forgings of liberal dimensions to handle the pieces. Additional eye bolts may be ordered by the Engineer when not shown on the drawings, to facilitate erection or dismantling.

Dowel Pins.

(O22) All parts requiring alignment shall be secured with, at least, two steel dowel pins. These shall be tapered, and as far as practicable interchangeable and standard. The pins shall have square ends and be threaded and provided with nuts to allow of removal.

Liners.

(O23) Where liners are specified. these shall be of steel, cut from one piece and shall be of different thicknesses down to No. 28 Birmingham gauge, as required.

Machine Work.

(O24) All surfaces worked with machine tools must be made true and smooth and must accurately conform to the plans in shape, size and alignment. All bearing surfaces of sole and bed plates shall be perfectly smooth and true and done in one setting of the piece.

Boring.

(O25) Boring shall be done in a vertical position to assure truly cylindrical work. The support of the tools shall be of ample stiffness to prevent any chattering.

Centers.

(O26) All shafts and turned rods shall be worked on lathe centers, of ample size. The centers, shall be carefully preserved. Rigid steady rests shall be used on long pieces to assure true work. All corners must be rounded with proper fillets, where the diameter changes. Neglect of this precaution shall be sufficient cause for the rejection of the shafts or rods.

True.

(O27) After erection, the shaft and runners must run perfectly true. If the shaft or impellers should be sprung in any way they may be rejected, or the Chief Engineer, at his discretion, may require the revolving parts to be re-turned in place, at the expense of the Contractor.

Journals.

(O28) All journals shall be turned straight, cylindrical and smooth, and shall then be scraped to a red-lead bearing on the shafts in order to make the same an extraordinarily good bearing surface and accurate fit. Oil ways must be cut exactly in accordance with directions and scraped on the entering edge as directed.

Examination of Parts.

(O29) All journal boxes, pins, keys and other details of the machinery, shall be taken apart at any time during the process of fitting, when the Engineer may so direct, to allow a thorough examination of the fit and workmanship.

Keys.

(O30) All keys must be accurately fitted to the sides of the keyways and made with an appropriate taper. They shall be driven in the presence of the Engineer.

Taper Fits.

(O31) Taper fits shall be accurately made to insure a uniform bearing throughout their length.

Force Fits.

(O32) Where shown on the plans or specified, force fits shall be made. This shall preferably be done with a hydraulic press, to the pressures given, but if done with bolts and nuts, the force required shall be determined by the Engineer, who shall make what allowances he deems necessary for friction. The pressure required to take these fits home must be within ten (10) per cent of that specified.

No Bushing.

(O33) No bushing of fits to correct shop mistakes will be allowed under any condition.

Patterns.

(O34) All patterns required for any and all parts of the pumps shall be the property of the Sanitary District, including all special devices for making sweep castings, core boxes, and any and all similar material. The patterns shall be made of thoroughly seasoned material, carefully fastened together and braced

to prevent warping. Immediately after being used in the foundry, each pattern or core box shall be cleaned, shellacced and marked with the name "Sanitary District of Chicago," and the part for which it is to be used. It shall then be carefully crated, stored, and delivered to the Sanitary District at any place it shall designate in the City of Chicago when and as ordered by the Chief Engineer at any time prior to the final payment under this contract. All patterns damaged in use or shipment shall be be carefully repaired.

Couplings

(O35) The couplings shown on the plans shall be promptly furnished by the Contractor. The pump end shall be forced on by the Contractor. The Contractor shall finish and rough bore the motor end of all couplings and deliver them f. o. b. cars at a point in the United States to be designated by the Chief Engineer.

Guages.

(O36) On all bearings, brass-mounted oil guages of a design satisfactory to the Engineer, shall be furnished to show the level of the oil in each bearing.

Wrenches and Tools.

(O37) The Contractor shall furnish a full set of wrenches to fit every bolt head and nut. All sizes up to 2-inch opening, including wrenches for nut and cap bolts, shall be case hardened, finished, and polished. They shall be mounted on oak boards, carefully laid out, finished and varnished. Large wrenches, spanners, socket wrenches, etc., shall be furnished in neat heavy wooden boxes, iron bound and painted in approved colors. Socket wrenches shall be machined or drop forged and not hand forged.

The Contractor shall furnish all necessary eye-bolts, hooks and rods required in handling various parts of the pumping units and appurtenances. All hooks and eye-bolts forming a part of the permanent equipment shall be made of steel, smoothed and polished.

Name Plates.

(O38) The Contractor shall furnish for each pump a polished, bronze name plate, the lettering and design for which will be furnished by the Engineer of the Sanitary District. The name of the Contractor will be put on this plate as builder but his name shall not be cast on any other part of the pumps.

Oil Reservoirs.

(O39) All oil reservoirs shall be thoroughly cleaned of foundry refuse. They shall be perfectly tight. Any reservoir which shows leakage will be rejected and shall be promptly replaced by new tight reservoirs by the Contractor at his expense.

Shop Erection.

(O40) The principal parts shall be erected by the Contractor in his shop to assure their fit and alignment, and to facilitate rapid final erection. The joints in all water passages of the pumps should be chipped off. In general all chipping which the Engineer may consider necessary shall be done by the Contractor at his own expense.

Sag of Shafts and Final Alignment.

(O41) Proper allowance shall be made in all machine work for the sag of the shafts.

Circulating Pumps.

(O42) The Contractor shall furnish two, two (2) inch centrifugal pumps, directly connected to slow speed squirrel cage induction motor to operate on alternating current at 440 volts, 3 phase, 60 cycles. Each pump shall have a capacity of at least one hundred (100) gallons per minute. One pump shall be designed to operate against a maximum total head of thirty (30) feet and the other against a maximum total head of forty (40) feet.

The pumps shall be of the split case type, with bronze impellers and shaft sleeves, self-oiling bearings, carried outside of and separate from the stuffing boxes. The design, material and workmanship shall be of the highest grade throughout. The pumps shall be designed for continuous 24 hours service.

Transportation and Protection.

(O43) The Contractor shall deliver at his own risk and expense all parts of the machinery f. o. b. cars, on the Chicago and Northwestern Railway, Maywood, Illinois. All material must be consigned to the contractor designated by the Chief Engineer and not to the Sanitary District, except as specified for patterns under Section O34.

All finished parts and bearings must be well protected in the shops and during transportation to prevent injury and abrasion. Special care shall be taken to crate rigidly all shafts or other parts liable to be sprung. The Contractor shall be responsible for the trueness of the

shafts until the erected work is finally accepted. All injured parts must be replaced, when in the opinion of the Engineer, refitting will not suffice, if said injury is due to damage in transit or prior to delivery.

Tests.

(O44) After the completion of the various parts of the pumping machinery and appurtenances, the Contractor shall make, at his own expense, all tests necessary to demonstrate the tightness and strength of the work, and any other additional tests ordered by the Chief Engineer to demonstrate compliance with the contract requirements. Any part or parts designed by the Sanitary District showing undue weakness due to defective material or workmanship shall be corrected or removed by the Contractor. Any part or parts designed by the Contractor showing undue weakness from any cause whatsoever shall be corrected or removed by the Contractor.

Painting.

(O45) Before leaving the shops, the metal work included in various parts of the equipment, where made of iron or corrosive material, except where the nature of the service makes it impracticable, shall be thoroughly cleansed of rust and loose scale on all surfaces. No paint shall be applied until the castings have been inspected by the Engineer and approved. They shall then be painted with thin paint without filler, unless otherwise specified, to protect the parts from rust during transportation.

All bright surfaces on steel, wrought iron or cast steel work shall be amply protected in shipment with a heavy coat of white lead and tallow.

Operation and Maintainance.

(O46) It is anticipated, but not guaranteed, that construction of the incoming sewer and other construction work to be carried on under other contracts coincident with this will be sufficiently advanced to allow the operation of the station upon the completion of the installation of the equipment included under this contract. In any case, as soon as conditions will permit, the Sanitary District will place the equipment in operation to such an extent as it may deem necessary, and will continue to operate the same for at least sixty (60) calendar days. During the operative period the Contractor shall promptly supply all materials or parts, betterments or replacements in the equipment included in this contract as may be required to make the same comply with the specifications and plans or to replace any defective material. The actual making of any changes, betterments or replacements on the pumps, when installed, on the work, will, however, be done by the Sanitary District, and the expense thereof charged to the Contractor.

Transportation and Delivery

(O47) The pumping machinery furnished hereunder shall be delivered by the Contractor at his own risk, f. o. b. cars, on the Chicago & Northwestern Railway, Maywood, Illinois, consigned to the contractor designated by the Chief Engineer.

Superintendence During Erection.

(O48) The Contractor shall furnish, at his own expense, a competent erecting engineer who shall be on the work during the erection and the operating tests for a total of thirty (30) working days, on such days as the Engineer shall designate. He shall see that the work is properly erected and shall be responsible for the correct alignment. Any additional time required and ordered by the Chief Engineer will be paid for as specified for extra work under Article 8.

Guarantee.

(O49) All equipment furnished hereunder shall be guaranteed free from mechanical defects in workmanship, design and materials, and the Contractor shall replace without cost to the Sanitary District any part or parts proving defective within one (1) year after the equipment has been placed in operation, in accordance with the maintenance bond for this purpose specified under Article 34.

GENERAL CONDITIONS

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

Omission on Plans.

Art. 3. The plans furnished, or to be furnished, form a part of these specifi-

cations, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or drawings.

Changes in Plans.

Art. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

Art. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work per-

formed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

Under Division O, the fabrication of material will be inspected at the shop or shops where fabricated. The Engineer shall have full access at all times to all parts of the shop where material under his inspection is being manufactured. If ordered by the Chief Engineer, the Engineer, shall stamp each piece accepted with a private mark and any piece not so marked may be rejected at any time and at any stage of the work. If the Engineer, through an oversight or otherwise, has accepted material or work which is contrary to the specifications, this material may be rejected, regardless of the stage of completion.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. Provided, however, that for material or equipment furnished under Divisions C, N, O, P, R, V, W, where delivery is specified, f. o. b. cars, the C. & N. W. Ry., Maywood, Ill., any damage done after delivery shall be repaired by the contractor furnishing the material and equipment and shall be paid for by the contractor responsible for the damage. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Patents

Art. 20. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of de-

signs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner upon the same conditions as hereinafter specified in the next following clause of this contract.

Provided, however, that the obligations imposed on said Contractor by this Article 20 shall not apply to claims for infringements of patents on activated sludge processes or machinery or equipment used in connection therewith.

Damages.

Art. 21. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 22. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State"; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912," approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 23. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 24. The contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the

same, and in event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any subcontractor for any claim or damages whatsoever. In case any party or parties to whom any work under this contract shall have been sublet shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the sub-letting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time and Progress.

Art. 27. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor for Division O hereby agrees to deliver the pumps and appurtenances to the railroad within two hundred and seventy (270) calendar days from the said date of approval of the bond.

The words "deliver to the railroad" or "deliver" as used in this article shall be understood to mean delivery f. o. b. cars, The Chicago & North-Western Railway, Maywood, Illinois.

It is understood and agreed that Time is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 28. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division O within the respective times specified in Article 27, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of Ten Dollars

($10.00) for Division O for each and every day that said Contractor shall be in default in the completion of said work ready for operation. Provided, however, that in case two or more divisions are included under this contract, the liquidated damages shall be paid only upon the division or divisions in which the Contractor shall be in default.

Said sum of Ten Dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for Delays.

Extensions or Additions.

Art. 29. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time, but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 30. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 31. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States Government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 31), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any

damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 31) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

FORFEITURE OF CONTRACT.

Division O.

Art. 32. It is further agreed by and between the parties hereto, that if said Contractor abandons this contract or fails financially or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for furnishing and delivering the balance of the material, machinery or equipment herein specified and award a contract therefor to the lowest responsible bidder, or the Sanitary District may purchase on the open market at the lowest price then obtainable, such quantity or quantities of material, machinery or equipment as the said contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The cost of obtaining said material, machinery or equipment, if the same is obtained by awarding a new contract therefor or if so purchased on the open market, and all costs and expenses incurred by the Sanitary District in purchasing and delivering such cable, material, machinery or equipment in excess of the cost hereunder to said Sanitary District shall be paid to the Sanitary District by said Contractor.

Contractor's Bond.

Art. 33. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Divisions O. For one year, subsequent to the completion of the operating tests and the acceptance of the equipment included under this contract, the Contractor shall make good, at his own expense, any excessive wear to any parts, any defects in or damages to any equipment included in this contract, which may arise from faulty materials, design or construction, or from the inability of any of the equipment to successfully perform all the work put upon it within the limits of these specifications.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition precedent to the final payment specified in Article 37.

Prices.

Article 35. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

DIVISION O—PUMPING MACHINERY.

For furnishing and delivery, complete, of the three (3) fourteen (14) inch centrifugal pumps and auxiliary machinery, complete, as specified, f. o. b. cars, the Chicago and North Western Railway, Maywood, Ill., the lump sum of nine thousand fifty dollars ($9,050.00).

The pumps will be manufactured in the shops of the Dayton-Dowd Company at Quincy, Illinois.

The foregoing price shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder; and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimate.

Art. 36. Division O. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and the completion of the erection and the operating tests, and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract, provided however, that said twelve and one-half (12½) per cent so reserved may be paid to said Contractor at the expiration of thirty (30) days from the completion of delivery f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., with the consent of the Chief Engineer and the sureties on the bond of the Contractor, in which case said bond is to remain in full force to the completion of the operating tests and the final acceptance of the equipment included under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where unit prices are specified, the estimate shall be based on the quantities estimated. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

Art. 37. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 34, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

IN WITNESS WHEREOF, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed,

and the party of the second part has hereunto set his hand and seal.

THE SANITARY DISTRICT OF CHICAGO.
By JAS. H. LAWLEY,
Chairman of Its Finance Committee.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That I, Eugene E. Maher, as principal, and the Southern Surety Company, as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Forty-five Hundred Twenty-five Dollars and no Cents ($4,525.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this first day of May, A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That, whereas, the above bounden Eugene E. Maher has entered into a certain contract with The Sanitary District of Chicago, bearing date the first day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the furnishing and delivering pumping machinery, including three (3) 14-inch centrifugal pumps and two (2) circulating pumps, and miscellaneous appurtenances, f. o. b. cars, The Chicago & North-Western Railway, in the Village of Maywood, County of Cook, State of Illinois, as specified under Division O of the attached contract.

Now, If the said Eugene E. Maher shall in all respects well and truly keep and perform the said contract on his part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Eugene E. Maher, his agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, except insofar as all liability on account of claims for infringements of patents on activated sludge processes or machinery, or equipment used in connection therewith, is expressly exempted; and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including all valid claims, and repay any overpayment, also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois, entitled, "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Eugene E. Maher

in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Eugene E. Maher, or his agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Eugene E. Maher shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Eugene E. Maher (Seal)

Attorney.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Finance reports that it has examined and approved the bond of the Stannard Power Equipment Company with the National Surety Company thereon as surety, on its contract for furnishing and delivering six blowers for the Desplaines River Sewage Treatment Works, designated as Division "R" of the specifications, for The Sanitary District of Chicago, and, therefore, recommends the passage of the following order:

Ordered, That the bond of the Stannard Power Equipment Company, for the faithful performance of the contract above specified, said bond being in the penal sum of $11,397.50 be, and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
Jas. H. Lawley,
Chairman.
Matt A. Mueller,
Willis O. Nance,
George W. Paullin,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the form of the contract and bond of the Stannard Power Equipment Company:

The Sanitary District of Chicago.
CONTRACT AND SPECIFICATIONS FOR DES PLAINES RIVER SEWAGE TREATMENT WORKS.

This Agreement, Made and entered into this 1st day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Stannard Power Equipment Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for furnishing and delivering the Blowers, and the apparatus, equipment and appurtenances thereto, as called for under Division R of the attached specifications, complete, as specified, freight prepaid, on board cars, the Chicago and North-Western Railway in the Village of Maywood, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specification, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Division R, of the Des Plaines River Sewage Treatment Works.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the blowers, and all other fittings and appurtenances, including all material, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each division of the entire sewage treatment works are numbered, A1, A2, etc., B1, B2, etc., C1, C2, etc.,

respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

GENERAL SPECIFICATIONS.

Location of Work.

(1) The Des Plaines River Sewage Treatment Works are to be erected on property owned by the Sanitary District situated between 12th and 22nd streets, just west of the Des Plaines River and east of First avenue extended, in the Village of Broadview, County of Cook, State of Illinois.

Description.

(2) The work included under this contract and specifications consists in furnishing and delivering f. o. b. cars, the C. & N. W. Ry., Maywood, Ill., the following:

Division R, Blowers, including six (6) blowers of the horizontal hydro-turbine type with appurtenances.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Provisions for Handling Equipment at Site.

(3) The Sanitary District will reserve a right-of-way to the station site, from First Avenue on the west. A hand crane will be installed under Division A and will be available for handling the equipment to be installed in the pump blower room. The Contractor shall operate this, however, at his own expense, and shall properly oil and maintain it during his use thereof.

The Contractor under Division A shall, at his own expense, provide any temporary blocking, supports or other protection for the pump and blower room floor necessary to prevent injury to the same, and shall make good at his own expense any damages done by him to the station structure or its appurtenances or to the equipment handled in unloading from the cars, hauling, unloading, and installing any of the equipment included under this contract for erection under Division A, or in removing plant or other property or in cleaning up.

It is expected that the superstructure of the station will be sufficiently advanced at the time of installation to afford protection from storms to the equipment included under this contract after the same is within the superstructure walls. The Contractor under Division A shall, however, furnish such protection as may be necessary against temperature, dust, dirt, and humidity, and shall be fully responsible for the protection of such equipment until its final acceptance.

Contract Drawings.

(4) Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the equipment included under this contract and the foundations for same, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use. Under this head plans and information shall be furnished by the Contractor, in part, as follows:

DIVISION R.

Blowers—Separators.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as the Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment to make the same conform to the drawings as finally approved.

Of the minor equipment for which drawings may not be required, the Contractor shall furnish to the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalog number and

type of equipment proposed, together with such prints, dimensions, specifications, samples, or other data, as may be required to permit intelligent judgment of the acceptability of the equipment proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Prior to the issuance by the Engineer of the final certificate specified in Article 37, the Contractor shall furnish to the Engineer a set of record blue prints of the various equipment, as actually installed, for which drawings are required from the Contractor.

These drawings shall include complete wiring diagrams and such plans and elevations and sectional assemblies as may be necessary to show the size, location and method of assembly of all parts of the equipment, to facilitate the dismantling and reassembling of the same. Each part shown shall be identified by a number and each drawing shall contain a bill of material giving the name, material and number required of each part. Such dimensions shall be given on the drawings as are desirable for the proper erection and adjustment of the equipment.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Foundations.

(6) The foundations for all equipment included under Division R, of this contract will be furnished by the contractor for Division A. These foundations will be brought up to within about one (1) inch of their final elevation. After placing equipment thereon, the contractor erecting said equipment shall shim the same to the final elevation, using for this purpose approved metal wedges, and complete the foundation by grouting under and around the bases of the equipment.

Shop Tests.

(8) Each blower shall be tested in the shop for the horse-power required to deliver the quantity of air specified at the various pressures specified. Full operating characteristics shall be determined as specified in Division R.

All tests shall be made in the presence of the Engineer. The Contractor, at his own expense, shall supply in place and ready to use, all necessary power, apparatus, wiring, piping and instruments and shall make the tests, and shall provide all facilities for the Engineer to inspect the work previous, during or subsequent to the test and to calibrate and otherwise check all the instruments used in the tests.

Should the above tests and inspections show any failure on the part of any of the equipment to fulfill the requirements of these specifications, the Contractor shall forthwith, at his own expense, make such changes and repairs to the equipment as may be necessary to make the same conform to the specifications before shipment to the site of the work, and shall again provide all the necessary equipment and facilities and shall make the tests as outlined herein.

Shipment.

(9) Unless otherwise notified, as specified in Article 27, the Contractor (under Division R), shall ship the material and equipment included under this contract, when ready, to the Chicago and Northwestern Railway, Maywood, Illinois, freight prepaid, consigned to the contractor named as the consignee by the Chief Engineer of the Sanitary District. All equipment shall be carefully crated, as required, and protected from dust, dirt and weather.

Guarantees.

(10) Before the completion of the work and immediately prior to the issuance of the final certificate, the Contractor shall furnish a maintenance bond or guarantee against all improper workmanship or materials, for the period stated from the date of the completion of the work, as herein specified, under Article 34. This date shall be taken as the date when the Board of Trustees of The Sanitary District of Chicago approves the final voucher of the Contractor.

SPECIFICATIONS.

DIVISION R, BLOWERS.

General.

(R1) The Contractor shall furnish the blowers herein specified, of the hydro-turbine type, chain driven, to furnish the quantities of air at the pressures specified respectively as follows. One (1) machine shall be furnished to deliver two thousand (2000) cubic feet per minute of free air against a working head of eight and one-half (8.5) pounds per square inch. Three (3) machines shall be furnished, each capable of delivering two thousand (2000) cubic feet per minute of free air against a working head of six and one-half (6.5) pounds per square inch. One (1) machine shall be furnished to deliver one thousand (1000) cubic feet per minute of free air against a working head of six and one-half (6.5) pounds per square inch. One (1) machine shall be furnished to deliver four hundred fifty (450) cubic feet per minute of free air against a working head of six and one-half (6.5) pounds per square inch. The machines shall be designed so that they will also work satisfactorily at a working head of eight (8) pounds per square inch.

Specifications and Plans.

(R2) The specifications and plans are intended to cover complete equipment. It is not the intent to give every detail in the plans and specifications. The Sanitary District will not be responsible for the absence of any detail the Contractor may require. No additional compensation will be allowed for material or labor used in performing any work hereunder unless the work can be clearly shown to be beyond the intent and scope of the plans and specifications, to the satisfaction of the Chief Engineer.

Materials.

(R3) Any materials for which no detailed specification is given herein shall be of the quality and character best adapted for the purpose for which they are to be used. No material shall be used for any purpose for which it has not previously been in use for a like purpose for a sufficient length of time to demonstrate its probable success for the purpose for which it is to be used.

Replacements.

(R4) The Contractor shall make the individual pieces of the machinery herein specified to be furnished in duplicate or triplicate to conform to exact dimensions on the working drawings made by the Contractor, so that no fitting or adjusting will be necessary in setting up the entire machine, other than such as is usually done in high-grade standard designed apparatus. This requirement will be rigidly enforced as it is essential that any defective piece of the machinery may be easily replaced by a new piece made in accordance with the drawings.

Castings, Bolts and Nuts.

(R5) All castings shall be free from blow-holes, shrinkage strains, cold shuts and like defects, and shall be smooth, true to form and of accurate dimensions.

All seats for bolt heads and nuts shall be spot-faced. Case hardened nuts shall be used on all covers, bonnets, pedestals and other parts requiring frequent removal or adjustment.

Eye bolts for all heavy parts requiring removal shall be furnished.

Blowers.

(R6) The blowers shall all be of the horizontal hydro-turbine type. The casing shall be made of close grained cast iron, with the internal chamber of the proper elliptical shape. The rotor shall consist of a cast-iron wheel casing with integral projecting blades, reinforced by shrouds. The wheel casing shall be machined on the sides. The rotor is to be mounted on a machined steel shaft, driven on and securely fastened in place by feather keys. The steel shaft

shall be supported by ball bearings, running in an oil well, mounted outside of the casing, to clear the stuffing box. The shaft shall be extended to the proper distance required to receive the chain sprocket. The rotor shall be pressed on and keyed on the shaft. On the two thousand and one thousand cubic feet per minute machines, bronze sleeves shall be furnished through the stuffing boxes, lightly driven on the shaft and secured by screws, to be readily removable. The stuffing boxes shall be made with cast-iron glands, with sufficient clearance to permit ready packing without disturbing the ball bearings.

The suction and discharge flanges of the blowers shall be faced and drilled to the American Standard pipe flange drilling.

Each casing shall be tapped for an inlet and outlet for water, with standard wrought iron pipe threads.

Each blower shall be equipped with two (2) oil filling pipes set in place, two (2) heavy bronze compression grease cups of the marine type, starting screws on the flanges of the casing, suitable eye bolts for handling, and brass square-headed plug cock and a brass shut-off valve on the water inlet.

The Contractor shall also furnish for each size of unit a wrench to fit the nuts on the main ball bearings.

Each blower shall be equipped with an adjustable relief valve, capable of being set at a given pressure, to blow off before the motor drive will be overloaded.

Chain Drive.

(R7) Each blower will be driven by an electric motor connected to it by a chain drive, as shown on the plans. The Contractor shall furnish with each blower the chain drive and sprockets, both for the blower and the motor end. The chain shall be of the Morse silent chain type or equal, of suitable size and strength to transmit the maximum horse power required when operating under full load. The chains shall be of the proper length to fit the distances, center to center, of motor and blower shown for the respective size of machine on Sheet A-4 of Division A. The sprockets shall also be furnished. The blower sprockets shall be bored, to a light drive fit and keyed on. The motor sprockets shall be furnished unbored, delivered to any point in the U. S. designated by the Chief Engineer.

Separators.

(R8) The Contractor shall furnish with each blower a separator of ample size to remove all particles of water from the compressed air. The separator shall be thoroughly baffled. The separator shall be made of cast iron or steel with a suitable arrangement for cleaning and inspection, of a design to be approved by the Engineer. The bottom of the separator shall be tapped for a wrought iron pipe to remove separated water. Each separator shall rest on its bottom or on suitable support. Suitable inlet and outlet flanges shall be provided for the air, of approved size faced and drilled to the American standard drilling. Each separator shall be provided with a water outlet designed to keep the separator properly drained, consisting of a ball-float valve mounted integral on a flange, to permit withdrawal.

The separators shall be designed to go in the basement as shown on the plans, and to be readily handled.

Painting.

(R9) The blowers are to be thoroughly painted before shipment. Each shall be given a priming coat, a coat of filler, and shall then be well rubbed down, followed by two (2) coats outside, of a machinery enamel paint of semi-gloss. The separators shall be thoroughly coated both inside and out, with at least two (2) coats of an approved asphaltum varnish or paint.

All exposed bright surfaces on steel wrought-iron or cast steel work shall be protected before shipment, with a heavy coat of white lead and tallow

Tests.

(R10) Each of the blower units furnished hereunder shall be assembled erected and completely tested with its separator in the shops of the manufacturer to determine the operating characteristics and also to determine whether or not the equipment meets all of the requirements of the specifications and contract. The capacity of each unit shall be determined at pressures of six and one-half, seven, eight and eight and one-half pounds

per square inch, together with the power required and the speed. The power at shut-off shall also be determined for 450 and 1000 c. f. m. size of blower and calculated for the 2000 c. f. m. blower.

The Contractor shall notify the Engineer when the equipment is ready for test so that the Engineer may have a representative present to witness the tests. All the expense of conducting such tests shall be borne by the Contractor and he shall furnish all instruments and all other equipment and material required for conducting said tests.

The Contractor shall hold in his shop a number of units, so that the tests on a number of blowers can be made during one or more consecutive days.

Results of Tests.

(R11) Should any equipment, when tested, fail to meet any of the requirements of the specifications or the performance guarantees, due to any weakness of construction or design, the Contractor shall, at his own expense, forthwith make such changes, betterments or replacements in any equipment so that said equipment when again tested will meet the requirements of the specifications and the performance guarantees.

If after such changes, betterments or replacements have been made to any equipment, and the result of any test on any such equipment shows that the equipment does not then meet the requirements of the specifications and the performance guarantees, then such equipment may be rejected by the Engineer and the Contractor hereby agrees to replace the same at his own expense with new equipment, which shall be tested in the same manner as the original equipment.

In the further event that the result of any test of said second new equipment show that said equipment does not meet the requirements of the specifications and the performance guarantees, then said equipment may be rejected by the Engineer, and if installed the said Contractor hereby agrees if so ordered to at once remove the rejected equipment and said Sanitary District is hereby authorized to purchase and install at the sole cost and expense of said Contractor, such other equipment as will meet the requirements.

All changes, betterments or replacements made after the installation shall be made subject to the acceptance of the Engineer at such time and in such manner as not to interfere with the operation of the station. The Sanitary District shall have the use of the equipment as originally installed, or replaced, without charge, until such time as the changes, betterments or replacements are made. Any changes, betterments or replacements that are made in the shops shall be made to the acceptance of the Engineer.

Transportation and Delivery.

(R12) The blowers and appurtenances furnished hereunder shall be delivered by the Contractor at his own risk, f. o. b. cars, on the Chicago and Northwestern Railway, Maywood, Ill., consigned to the contractor designated by the Chief Engineer.

Guarantee.

(R13) All equipment furnished hereunder shall be guaranteed free from mechanical defects in workmanship, design and material, and the Contractor shall replace, without cost to the Sanitary District, any part or parts proving defective within one (1) year after the equipment has been placed in operation, in accordance with the maintenance bond for this purpose specified under Article 34. The Contractor further guarantees the delivery of air and the horsepower required, together with the use of water, as stated in Article 35.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

Omission on Plans.

Art. 3. The plans furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to

be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or drawings.

Changes in Plans.

Art. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

Art. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor

and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satify the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. Provided, however, that for material or equipment furnished under Divisions C, N, O, P, R, V, W, where delivery is specified, f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., any damage done after delivery shall be repaired by the contractor furnishing the material and equipment and shall be paid for by the contractor responsible for the damage. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Patents.

Art. 20. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the

event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Provided, however, that the obligations imposed on said Contractor by this Article 20 shall not apply to claims for infringements of patents on activated sludge processes or machinery or equipment used in connection therewith.

Damages.

Art. 21. If any damage shall be done by the Contractor or by any persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or his employees, that is in the nature of a legal liability, and he hereby agrees to indemnify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employees, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employees; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 22. The Contractor further agrees to insure to his employees or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State;" providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912"; approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employees in and about the performance of this contract.

Responsibility of Contractor.

Art. 23. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employees.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 24. The Contractor shall not sublet any part of the work herein

mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporations for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time and Progress.

Art. 27. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor for Division R hereby agrees to deliver the blowers to the railroad within two hundred and seventy (270) calendar days from the said date of the approval of the bond.

The words "deliver to the railroad" or "deliver" as used in this article shall be understood to mean delivery f. o. b. cars, The Chicago and North-Western Railway, Maywood, Illinois.

It is understood and agreed that time is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 28. It is, therefor, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division R, within the respective times specified in Article 27, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of ten dollars ($10.00) for Division R, for each and every day that said Contractor shall be in default in the completion of said work ready for operation.

Provided, however, that in case two or more divisions are included under this contract, the liquidated damages shall be paid only upon the division or divisions in which the Contractor shall be in default.

Said sum of ten dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payment under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for Delays.

Extensions and Additions.

Art. 29. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 30. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 31. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defence, or by Federal administrators, or by delays in obtaining priority certificates from the United States government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to

strikes, or to other causes, which causes of delay mentioned in this article (Art. 31), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 31) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.
Division R.

Art. 32. It is further agreed by and between the parties hereto, that if said Contractor abandons this contract or fails financially or from any other cause whatsoever is unable to carry out the terms and conditions of this contract and is unable to complete the same or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole therof and may readvertise for bids for furnishing and delivering the balance of the material, machinery or equipment herein specified and award a contract therefor to the lowest responsible bidder, or the Sanitary District may purchase on the open market at the lowest price then obtainable, such quantity or quantities of material, machinery or equipment as the said contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The cost of obtaining said material, machinery or equipment, if the same is obtained by awarding a new contract therefor or if so purchased on the open market, and all costs and expenses incurred by the Sanitary District in purchasing and delivering such cable, material, machinery or equipment in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

Contractor's Bond.

Art. 33. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Division R. For one year, subsequent to the completion of the operating tests and the acceptance of the equipment included under this contract, the Contractor shall make good, at his own expense, any excessive wear to any parts, any defects in or damages to any equipment included in this contract, which may arise from faulty materials, design or construction, or from the inability of any of the equipment to successfully perform all the work put upon it within the limits of these specifications.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be

satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition precedent to the final payment specified in Article 37.

Prices.

Article 35. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

DIVISION R.

Blowers.

For furnishing and delivery, complete, of the six (6) blowers of the horizontal hydro-turbine type, with separators and appurtenances, complete, as specified, f. o. b cars, the Chicago and North Western Railway, Maywood, Ill., the lump sum of twenty two thousand seven hundred ninety-five Dollars ($22,795.00).

The Contractor hereby guarantees the horsepower required for the blower units with the capacities specified will not exceed the horsepower stated for the pressures given:

Blower Capacity Cu. Ft. per Min.	H. P. Required 6.5 lb.	Per Unit at 8.5 lb.
Not less than 2,000	125	150
Not less than 1,000	60	75
Not less than 450	25	30

The Contractor further guarantees the use of water in the blower for compressing 1,000 cu ft. of air per min, will not exceed 50 gallons per minute, and that the blowers will give guaranteed capacity of air when flowing a minimum of 10 gallons per minute per 1,000 cubic feet of air per minute.

The Contractor further guarantees that the blowers to be furnished under this contract shall operate satisfactorily without undue wear, strain or vibration, and that the separators shall remove all the entrained water.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 36. Division R. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed eighty-seven and one-half (87½) per cent of the value of the work properly performed under this contract, and that the remaining twelve and one-half (12½) per cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and the completion of the erection and the operating tests, and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract, provided however, that said twelve and one-half (12½) per cent so reserved may be paid to said Contractor at the expiration of thirty (30) days from the completion of delivery f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., with the consent of the Chief Engineer and the sureties on the bond of the Contractor, in which case said

bond is to remain in full force to the completion of the operating tests and the final acceptance of the equipment included under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where unit prices are specified, the estimate shall be based on the quantities estimated. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

Art. 37. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 34, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its President, to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

Know All Men by These Presents, That we, the Stannard Power Equipment Company as principal and National Surety Co., as surety, are held firmly bound unto The Sanitary District of Chicago in the penal sum of eleven thousand three hundred ninety-seven dollars and fifty cents ($11,397.50), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this first day of May A. D. 1919.

The Condition of the Above Obligation Is Such, That whereas the above bounden Stannard Power Equipment Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the first day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the furnishing and delivering six (6) blowers of the horizontal hydro-turbine type, with appurtenances, f. o. b. cars, the Chi-

cago and North-Western Railway, in the Village of Maywood, County of Cook, State of Illinois, as specified under Division R, of the attached contract.

Now, If the said Stannard Power Equipment Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Stannard Power Equipment Company, its agents, employees or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery- processes, devices or apparatus used or furnished in the performance of said contract, except insofar as all liability on account of claims for infringements of patents on activated sludge processes or machinery, or equipment used in connection therewith, is expressly exempted; and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Stannard Power Equipment Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Stannard Power Equipment Company or its agents, employees or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employees, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Stannard Power Equipment Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has been advised by the Marshal that it is necessary to purchase miscellaneous hardware, tools and equipment for the gasoline launch "White Flyer" at an estimated cost of $324.21, and he requests that he may be authorized to make said purchase.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Marshal be, and he is hereby authorized and directed to purchase in the open market for the best price obtainable, the hardware, tools and equipment specified, provided the cost of the same shall not exceed the sum of $324.21.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 8, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of May payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Construction Account.

Sanborn Company (automatic gages)	$ 475.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
GEORGE W. PAULLIN,
MATT A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel (*except as to voucher to Edmund D. Adcock for legal services for $2,400.00, on which Mr. Sergel voted "nay"*), Carr, Clark, Healy, Lawley, Littler, Mueller, Nance (*except as to voucher to Edmund D. Adcock for legal services for $2,400.00, on which Mr. Nance voted "nay"*) and Paullin—Seven

on all vouchers and nine on all vouchers not excepted.

Nays—None (except as above stated).

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Electrical Engineer in which he states that in order to complete the dredging of the forebay at the Power House, it is advisable to purchase a second-hand ten-inch centrifugal pump and equipment.

He further states that he obtained competitive bids for furnishing said pump and equipment, and the lowest bid received was that of the William Heggie Company of Joliet, Illinois, for the sum of $426.25, and he recommends that said bid be accepted.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby authorized and directed to accept the bid of William Heggie Company to furnish said pump and equipment for the sum of $426.25.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
PATRICK J. CARR,
MATT A. MUELLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that he is about to resume the work of repairing the walls of the Main Channel near Lockport, and in order to perform said work economically it is advisable to purchase a portable, gasoline-driven, three-quarter yard concrete mixer at an estimated cost of $1,200.00, which will obviate the necessity of renting such a mixer at a yearly cost of $900.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to obtain informal bids for a concrete mixer as specified above and transmit same to the Committee on Engineering.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents renewal contract with Maurice Tauber Company, 2599 Archer avenue, wherein said company agrees to take, and the Sanitary District agrees to furnish, seventy kilowatts of electrical energy for the time and upon the terms and conditions therein set forth, which contract has been approved by the Electrical Engineer.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby authorized and directed to execute in duplicate the attached contract which has heretofore been executed by said Maurice Tauber Company.

Respectfully submitted,
H. E. LITTLER,
Chairman.
WM. J. HEALY,
MATT A. MUELLER,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Real Estate Development.

Mr. Carr presented the following report from the Committee of Real Estate Development:

CHICAGO, May 8, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Real Estate Development transmits herewith a form of lease to be entered into between The Sanitary District of Chicago and Stanley Kler, by the terms of which the Sanitary District leases to him lots one hundred seventy-two (172) and one hundred seventy-three (173) of the Sanitary District Trustees' subdivision, containing 35.50 acres more or less, situated in Cook County, from January 1, 1919, to December 31, 1923, at an annual rental of $177.50, payable in advance.

Your Committee further reports that said lease has been approved by the Attorney, and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby authorized and directed to execute the form of lease herewith submitted with Stanley Kler, the same having been duly executed by him.

Respectfully submitted,
PATRICK J. CARR,
Chairman.
MATT A. MUELLER,
WM. J. HEALY,
WILLIS O. NANCE,
Committee on Real Estate Development.

Mr. Carr moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

NEW BUSINESS.

Mr. Clark presented the following editorial from the Chicago Tribune of April 28, 1919:

"THE DRAINAGE SLUDGE PLANT."

"Applause is due the Drainage Board for expediting the construction of the Desplaines river activated sludge plant, bids for which have been opened. The plant will amply provide artificial aid to the natural cleansing processes of the drainage canal in the disposition of sewage and render it possible for the Sanitary District greatly to enlarge its territory of operation. Several new districts will, in the course of time, be added to the original sphere of influence of the Sanitary District, and the Trustees do well to keep scientifically ahead of the need for septic disposal of sewage. The sludge plant will forestall any possibilities of down-state pollution."

Mr. Clark moved that the editorial be printed in the Proceedings.

The motion prevailed.

Committee of the Whole.

The Board resolved itself into the Committee of the Whole to permit Mr. C. Arch Williams, Attorney, to make a statement in reference to a decision of the Supreme Court of Illinois relative to the powers of the State Public Utilities Commission.

The President called Mr. Healy to the chair.

The Committee rose and the Board resumed business.

Mr. Clark reported verbally that about a year ago the mayors and other representatives of various cities and villages of northern Indiana, in a spirit of cooperation, met with the Trustees of the Sanitary District and discussed methods of solving the problem of sewage disposal in said territory and the purification of the waters of Lake Michigan.

He further reported that he was informed that the Legislature of the State of Indiana had passed a law, subject to a referendum, authorizing the formation of drainage districts in northern Indiana for the purpose of diverting sewage from Lake Michigan, and that a meeting of the members of the Board of Trustees of the Sanitary District and representatives of these various cities and villages of northern Indiana had been suggested for the evening of May 22, 1919, at Chicago, to discuss the subject.

It was the sense of the Board that said meeting be held.

ADJOURNMENT.

Mr. Littler moved that the Board adjourn.

The motion prevailed.

John W. Gilbert, Clerk.

C43s

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, MAY 15, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

BIDS.

The Clerk opened and read the bids received for plumbing and pipe work for the Calumet and the Evanston Pumping Stations, as shown in the schedules printed on page 534 of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

The Clerk opened and read the bids received for the construction of the Morton Grove Sprinkling Filter Plant, as shown in the schedule printed on page 535A of the Proceedings.

Mr. Clark moved that the bids be referred to the Chief Engineer for tabulation and to the Committee on Engineering for report.

The motion prevailed.

Chicago, May 12, 1919.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance, in accordance with Rule 46 of the Rules and Regulations of the Board herewith presents weekly reports made to your Committee by the Clerk of all purchases made by him for and on account of The Sanitary District of Chicago from February 3 to March 29, 1919, inclusive.

Your Committee further reports that it has examined said reports, found them to be correct, has approved same and recommends that they be accepted and placed on file.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has received a communication from the Electrical Engineer, in which he states that it is advisable to obtain and set out plants and flowers in the flower beds at the Terminal Station at an estimated cost of $100.00.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Electrical Engineer be, and he is hereby authorized to purchase and set out said plants and flowers, provided that the cost of the same shall not exceed the sum of $100.00.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 8, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that the Board on March 10, 1919 (page 323 of the Proceedings), authorized the Marshal to purchase a boat for the use of the Police Department at a cost of not to exceed $1,450.00.

Your Committee further reports that pursuant to said authority, the Marshal purchased a gasoline driven launch, the "White Flyer," for the sum stated and that he has now received an offer from A. Rosenow to purchase the old police boat, the "Illinoy," which is no longer necessary for the use of the Sanitary District, for the sum of $125.00, its appraised valuation.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Marshal be, and he is hereby authorized and directed to accept the offer of A. Rosenow to purchase the old police boat "Illinoy" for the sum of $125.00, and to execute on behalf of the Sanitary District a bill of sale therefor on the receipt of said purchase price.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has received a communication from the Electrical Engineer transmitting a form of sales contract in duplicate between the Air Reduction Sales Company and the Sanitary District covering the purchase by the Sanitary District of acetylene and oxygen gases from May 4, 1919, to May 4, 1920.

The Electrical Engineer states that said gases are used in the work of the Electrical Department and the amounts used from time to time will not cost to exceed the sum of $500.00 in the aggregate, and he recommends that said contract be executed, as by so doing he can obtain favorable discounts which would not be allowed if no contract was entered into.

Your Committee having had the matter under consideration recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute said contract in duplicate.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 15, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of May payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel (*except as to vouchers to the Consumers Company, for coal, in the sum of $1,072.80, and to the T. J. Forschner Contracting Company, for work on the Calumet Sewage Pumping Station for $49,973.18, on which Mr. Sergel voted "nay"*), Carr, Clark, Healy, Lawley, Littler, Mueller, Nance (*except as to voucher to the T. J. Forschner Contracting Company, for work on the Calumet Sewage Pumping Station, for $49,973.18, on which Mr. Nance voted "nay"*) and Paullin—Seven on all vouchers and nine on all not excepted.

Nays—None (*except as above stated*).

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has agreed with Mr. Francis A. Horrigan, owner of:

The south half of the following described land all situated in Section three (3), Township thirty-six (36) North, Range ten (10) East of the Third Principal Meridian, in Will County, Illinois, to-wit:

The east half of the southwest quarter and the west fraction of the southeast quarter of Section three (3) Also beginning at a line stone at the southeast corner of the west half of the southwest quarter of said Section three (3) running thence north on the east line of said tract forty (40) chains to a stone on the East and West center line of said section at the Northeast corner of said tract, thence west one (1) chain and six (6) links to a stone in the center of the road at the northwest corner of said tract, thence south thirty (30) minutes west along the center of the road forty (40) chains and one (1) link to a stone at the southwest corner of said tract, thence east along the south line of said section, one (1) chain and forty-seven (47) links to place of beginning, containing five and four one-hundredths (5.04) acres more or less excepting and reserving from the whole of the above described land, that part thereof described as follows, to-wit: Commencing at a point in the center of the highway running in a northerly direction through the southwest quarter of said Section three (3), said point being on the section line between Section three (3), and Section ten (10) in said Township thirty-six (36) and running thence in a northerly direction along the center of said highway two hundred ninety-one (291) feet, thence east two hundred thirty-two feet, thence south two hundred ninety-one (291) feet, to the section line, thence west along said section line between Sections three (3) and ten (10) aforesaid two hundred thirty-two (232) feet to the place of beginning, to purchase said tract as part of the right of way of the storage basin to be used in connection with the operation of the Main Channel and the power plant of the Sanitary District.

Your Committee further reports that said purchase is made at the price of $80.00 an acre, making a total consideration to be paid therefor of $7,840.00.

Your Committee is of the opinion that said price is a reasonable one and, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to draw a warrant in the sum of $7,840.00, payable to Francis A.

Horrigan and deliver the same to him upon the delivery by him to the Sanitary District of a warranty deed conveying to it said real estate in fee simple.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

Mr. Nance moved as a substitute for the report of the Committee on Finance, that the matter be referred to the Chief Engineer for an early report as to the practicability of installing and operating said basin..

Mr. Clark moved that the substitute of Mr. Nance be laid on the table.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

The question recurring, on the motion to adopt the report and pass the order was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Finance reports that it has examined and approved the bond of the Builders Iron Foundry, with the American Surety Company of New York thereon as surety, for the faithful performance of its contract for furnishing and delivering Venturi meters, including miscellaneous sewage and air Venturi meters, with recording and indicating apparatus for the Desplaines River Sewage Treatment Plant, designated as Division "W" of the specifications, to The Sanitary District of Chicago, and, therefore, recommends the passage of the following order:

Ordered, That the bond of the Builders Iron Foundry, for the faithful performance of the above specified contract, said bond being in the penal sum of $6,380.00 be, and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract and bond of the Builders Iron Foundry:

THE SANITARY DISTRICT OF CHICAGO.

CONTRACT AND SPECIFICATIONS FOR DESPLAINES RIVER SEWAGE TREATMENT WORKS.

THIS AGREEMENT, Made and entered into this 6th day of May, A. D. 1919, by and between The Sanitary District

of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Builders Iron Foundry, a corporation organized under the laws of the State of Rhode Island, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for furnishing and delivering the Venturi meters and the apparatus, equipment and appurtenances thereto, as called for under Division W of the attached specifications, complete, as specified, freight prepaid, on board cars, the Chicago & North-Western Railway in the Village of Maywood, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Division W, of the Des Plaines River Sewage Treatment Works.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the Venturi meters, and all other fittings and appurtenances, including all materials, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications

following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each division of the entire sewage treatment works are numbered, A1, A2, etc., B1, B2, etc., C1, C2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such orders shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

GENERAL SPECIFICATIONS.

Location of Work.

(1) The Des Plaines River Sewage Treatment Works are to be erected on property owned by the Sanitary District situated between 12th and 22d streets, just west of the Des Plaines River and east of First avenue extended, in the Village of Broadview, County of Cook, State of Illinois.

Description.

(2) The work included under this contract and specifications consists in furnishing and delivering f. o. b. cars, the C. & N. W. Ry., Maywood, Ill, the following: Division W, Venturi meters, including miscellaneous sewage and air Venturi meters with recording and indicating apparatus.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Contract Drawings.

(4) Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the equipment included under this contract and the foundations for same, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use. Under this head plans and information shall be furnished by the Contractor, in part, as follows:

DIVISION W.

Venturi Meters—Recording Apparatus.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as the Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment to make the same conform to the drawings as finally approved.

Of the minor equipment for which drawings may not be required, the Contractor shall furnish to the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalogue number and type of equipment proposed, together with such prints, dimensions, specifications, samples, or other data, as may be required to permit intelligent judgment of the acceptability of the equipment proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Prior to the issuance by the Engineer of the final certificate specified in Article 37, the Contractor shall furnish to the Engineer a set of record blue prints of the various equipment, as actually installed, for which drawings are required from the Contractor.

These drawings shall include complete wiring diagrams and such plans and elevations and sectional assemblies as may be necessary to show the size, location and method of assembly of all parts of the equipment, to facilitate the

dismantling and reassembling of the same. Each part shown shall be identified by a number and each drawing shall contain a bill of material giving the name, material and number required of each part. Such dimensions shall be given on the drawings as are desirable for the proper erection and adjustment of the equipment.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Foundations.

(6) The foundations for all equipment included under Division W of this contract will be furnished by the contractor for Division A. These foundations will be brought up to within about one (1) inch of their final elevation. After placing equipment thereon, the contractor erecting said equipment shall shim the same to the final elevation, using for this purpose approved metal wedges, and complete the foundation by grouting under and around the bases of the equipment.

Shop Tests.

(8) All tests shall be made in the presence of the Engineer. The Contractor, at his own expense, shall supply in place and ready to use, all necessary power, apparatus, wiring, piping and instruments and shall make the tests and shall provide all facilities for the Engineer to inspect the work previous, during or subsequent to the test and to calibrate and otherwise check all the instruments used in the tests.

Should the above tests and inspections show any failure on the part of any of the equipment to fulfill the requirements of these specifications, the Contractor shall forthwith, at his own expense, make such changes and repairs to the equipment as may be necessary to make the same conform to the specifications before shipment to the site of the work, and shall again provide all the necessary equipment and facilities and shall make the tests as outlined herein.

Shipment.

(9) Unless otherwise notified, as specified in Article 27, the Contractor (under Division W) shall ship the material and equipment included under this contract, when ready, to the Chicago and Northwestern Railway, Maywood, Illinois, freight prepaid, consigned to the contractor named as the consignee by the Chief Engineer of the Sanitary District. All equipment shall be carefully crated as required, and protected from dust, dirt and weather.

Guarantees.

(10) Before the completion of the work and immediately prior to the issuance of the final certificate, the Contractor shall furnish a maintenance bond or guarantee against all improper workmanship or materials, for the period stated from the date of the completion of the work, as herein specified, under Article 34. This date shall be taken as the date when the Board of Trustees of The Sanitary District of Chicago approves the final voucher of the Contractor.

SPECIFICATIONS.

DIVISION W, VENTURI METERS.

General.

(W1) The Contractor shall furnish the Venturi meter tubes, recording apparatus and miscellaneous equipment specified herein to operate on sewage and on air of the type and pattern made by the Builders Iron Foundry or equal.

Meters on Sewage.

No. Wanted	Diameter in Inches Inlet	Throat	Flow Expected Gallons per Day
1	24	12	2,500,000 to 13,000,000
4	12	5	600,000 to 1,700,000

Meters on Air.

No. Wanted	Diameter in Inches Inlet	Throat	Air Pressure Lb. per Sq.In.	Flow Expected Cu. Ft. per Min.
1	24	12	6.5	3,000 to 9,000
1	10	5	6.5	750 to 2,100
1	10	5	8.5	750 to 2,100
4	10	4	6.5	300 to 1,200
2	4	2	6.5	75 to 400
3	4	1⅝	6.5	50 to 300

Under the heading "flow expected" is stated the probable flow expected during operation. This shall not be taken as the capacity of the meter, but meters shall be furnished with the inlet and throat sizes given, which have a capacity actually larger than the flow expected.

The sewage meters shall be of a special type designed to operate on sewage and water containing trash.

The air meters will be operated on air filtered through muslin at average air pressures approximately as given in the table.

The sewage meters, air meters and all recording apparatus shall be made up, complete, and furnished with all parts specified, ready for erection. The specifications are intended to cover complete equipment. It is not the intent to give every detail in the plans and specifications.

Sewage Meter Tubes.

(W2) The 24x12 inch meter tube shall be of cast iron of quality and thickness corresponding to at least Class A pipe, American Water Works Association standard, and shall have spigot ends suitable for laying with Class A pipe. The inlet meter shall be 24 inches in diameter, the throat 12 inches in diameter and the outlet 24 inches in diameter, with an overall length of 16 feet 10 inches. All joints shall be flanged except the outlet end, which shall have a spigot end. The throat shall have a bronze lining, bored to the proper inside diameter, which shall form the inner wall of the pressure chamber and through which the vent holes shall be drilled. The up-stream chamber shall also be lined with brass or shall have the vent holes bushed with brass pipe, iron pipe size. The pressure chambers shall be fitted with hand holes and special vent cleaning devices. The design shall be such that the cleaners will not only clean the vent holes, but at the same operation will close all communications between the pressure chambers and the interior of the pipe. The vent holes shall be dressed flush on the inside, shall have sharp edges and shall be at right angles to the axes of the tube.

The 12x5 inch meter tube shall be of similar construction to the 24x12 inch meter tubes, modified in so far as the size may require. The ends shall be flanged with an overall length of nine (9) feet eleven (11) inches.

Suitable taps shall be made, with wrought iron pipe threads, for the connections to the float tubes, also for drainage and flushing. Hand holes shall also be provided.

Air Meter Tubes.

(W3) The air meter tubes shall be furnished of the sizes indicated for inlet and throat, the outlet to be of the same size as the inlet. These meters shall all be furnished with flanged ends. The meter tubes shall be of cast iron of quality and thickness corresponding to at least Class A pipe, American Water Work Association standard. All flanged ends shall be faced and drilled to the American standard drilling.

The joint at the throat and one joint on either side of and next to the throat joint shall be flanged. The throat shall have a bronze lining bored to the proper inside diameter which shall form the inner wall of the pressure chamber and through which the vent holes shall be drilled. The upstream chamber shall also be lined with brass.

Suitable taps shall be made, with wrought iron pipe thread, for the connections to the recording instruments.

Recording Apparatus, Sewage Meters.

(W4) The recording apparatus furnished with the sewage meters shall be of the float controlled type. Furnished with each meter shall be a complete equipment of two (2) copper floats each eight (8) inches in diameter, the pulley framing or yokes of the top of the two (2) float tubes, each ten (10) inches internal diameter, and the necessary flexible cord of a non-corrosive metal.

For all the sewage meters, the registers shall be that known as the Type M Register-Indicator-Recorder. Three dials shall be furnished with each register, one to indicate the momentary rate of flow, one to record this rate accurately and continuously in ink on a chart in million gallons per 24 hours and one to show the total gallons pumped. The indicator dial shall be at least ten (10) inches in diameter, graduated to show as fine divisions on as open a scale as possible. The dial shall be machine engraved on metal, silver plated, with the graduations in black enamel. The charts shall be at least 11 inches in diameter, of the circular type, making one revolution in twenty-four hours, and shall be lettered in accordance with the instructions furnished by the Engineer. All dials of the totaling counter shall

be graduated in a clock-wise direction. The entire records of all three dials shall be completely visible from the front of the machine. The registering apparatus shall not require to be wound more than once in seven days.

Recording Apparatus, Air Meters.

(W5) The recording apparatus furnished with the air meters shall be of the pressure controlled type, suitable for light pressures. One recording apparatus, complete, shall be furnished with each meter as specified herein. For the 24x12 air meter and the 10x5 air meter, operating at 8.5 pounds pressure, the registers shall be those known as the Type QS Register-Indicator-Recorder. The three dials and charts shall be as specified in Section W4, in so far as it may apply, except that the dials and charts shall record cubic feet of air instead of gallons. In addition, the Type QS register shall be equipped with manometer tubes connected to the oil in the pressure chambers.

For the 10x5 air meter operating at 6.5 pounds pressure, and the four (4) 10x4 air meters, the registers shall be those known as the Type S Indicator-Recorder. Two dials shall be furnished with each register, one to indicate the momentary rate of flow, one to record this rate accurately and continuously in ink on a chart in cubic feet. Otherwise the Type S Indicator-Recorder shall be as specified for the Type QS.

With each recording apparatus shall be furnished a sufficiently special oil for the installation.

Manometer Air Meters.

(W6) For use on the two 4x2 and the three 4x1⅝ air meters shall be furnished five (5) U-tube manometer equipments, complete, with graduated metal scale, nickeled fittings and board, designed to fasten to the wall. The connections shall be threaded with a standard wrought iron pipe thread.

Supplies.

(W7) The Contractor shall provide for each recording apparatus a neat cabinet containing all necessary wrenches, tools and accessories for handy use. In addition, the Contractor shall furnish one year's supply of pens, ink and charts for each recorder.

The Contractor shall furnish one (1) special planimeter, with aluminum disc, suitable for use with all the charts on both air and water. They shall be furnished in a neat wooden box.

The Contractor shall also furnish the test constants for the sewage meters and tables or diagrams of corrections for the air meters, showing the correction in the volume of air for various ranges of temperature and pressure to which the meters will be exposed. In general all the charts shall be based on a pressure of six (6) pounds per square inch except for the 10x5 air meter, operating nominally at 8.5 lb. per sq. in., which shall have its chart worked up at eight (8) pounds per square inch. The range of temperature expected may be between 40 and 120 deg. Fahr. A table or diagram shall be furnished for the meters equipped with manometers, giving the volumes of air for various differences of elevation in the water columns, with the corrections for pressure and temperature.

Painting.

(W8) The cast iron work on all meter tubes shall be dipped, as specified for pipe, in the latest American Water Works Association standard specification or shall be painted hot with an approved coating. The registers shall be filled and rubbed and painted with two (2) coats of enamel paint of a color and make to be approved by the Engineer.

Superintendence.

(W9) The Contractor shall furnish, at his own expense, when notified by the Chief Engineer, a competent superintending engineer for a period not to exceed six (6) working days to check up the erection, adjust the apparatus and instruct the engineers designated by the Sanitary District in the adjustments and use.

Transportation and Delivery.

(W10) The Venturi meters and appurtenances furnished hereunder shall be delivered by the Contractor, at his own risk, f. o. b. cars, on the Chicago and Northwestern Railroad, Maywood, Ill., consigned to the contractor designated by the Chief Engineer.

The meter tubes shall be shipped as soon as possible after the approval of the bond by the Board of Trustees of the Sanitary District. The recording and indicating apparatus, with appurtenances, shall be delivered within the time specified in Article 27.

Guarantee.

(W11) All equipment furnished hereunder shall be guaranteed free from mechanical defects in workmanship, design and materials, and the Contractor shall replace, without cost to the Sanitary District, any part or parts proving defective within one (1) year after the equipment has been placed in operation, in accordance with the maintenance bond for this purpose specified under Article 34.

GENERAL CONDITIONS.

Sanitary District Law.

Article 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29, 1889, in force July 1, 1889, and all amendments and acts supplementary thereto.

Omission on Plans.

Art. 3. The plans furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer notwithstanding any minor omissions in the specifications or drawings.

Changes in Plans.

Art. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary, either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

Art. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided, however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actu-

al cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

Art. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

Art. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. Provided, however, that for material or equipment furnished under Divisions C, N, O, P, R, V, W, where delivery is specified, f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., any damage done after delivery shall be repaired by the contractor furnishing the material and equipment and shall be paid for by the contractor responsible for the damage. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

Art. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon ap-

proximate estimates, shall be subject to the correction of the final certificate.

Patents.

Art. 20. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Provided, however, that the obligations imposed on said Contractor by this Article 20 shall not apply to claims for infringements of patents on activated sludge processes or machinery or equipment used in connection therewith.

Damages.

Art. 21. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employes, that is in the nature of a legal liability, and he hereby agrees to indemnity and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employes, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on account of any omission or act of said Contractor, his agents or employes; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

Art. 22. The Contractor further agrees to insure to his employes or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State;" providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912;" approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employes in and about the performance of this contract.

Responsibility of Contractor.

Art. 23. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District

will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employes.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

Art. 24. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor or by such other party or parties agreed upon who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

Art. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in, or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time and Progress.

Art. 27. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor for Division W hereby agrees to deliver the meter tubes to the railroad within one hundred and twenty (120) calendar days from the said date of the approval of the bond, and to deliver the recording and registering apparatus within two hundred and seventy (270) calendar days from said date of approval of the bond.

The words "deliver to the railroad" or "deliver" as used in this article shall be understood to mean delivery f. o. b. cars, The Chicago & North-Western Railway, Maywood, Illinois.

It is understood and agreed that Time is of the essence of this contract, and that a failure on the part of any con-

tractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

Art. 28. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division W within the respective times specified in Article 27, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of Ten Dollars ($10.00) for Division W for each and every day that said Contractor shall be in default in the completion of said work ready for operation. Provided, however, that in case two or more divisions are included under this contract, the liquidated damages shall be paid only upon the division or divisions in which the Contractor shall be in default.

Said sum of Ten Dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then the Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for Delays.

Extensions or Additions.

Art. 29. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time, but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

Art. 30. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work, or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

Art. 31. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States Government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods, or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes

of delay mentioned in this article (Art. 31), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 31) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract—Division W.

Art. 32. It is further agreed by and between the parties hereto, that if said Contractor abandons this contract or fails financially or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same, or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof, and may readvertise for bids for furnishing and delivering the balance of the material, machinery or equipment herein specified and award a contract therefor to the lowest responsible bidder, or the Sanitary District may purchase on the open market at the lowest price then obtainable, such quantity or quantities of material, machinery or equipment as the said Contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The cost of obtaining said material, machinery or equipment, if the same is obtained by awarding a new contract therefor, or if so purchased on the open market, and all costs and expenses incurred by the Sanitary District in purchasing and delivering such cable, material, machinery or equipment in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

Contractor's Bond.

Art. 33. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

Art. 34. Division W. For one year, subsequent to the completion of the operating tests and the acceptance of the equipment included under this contract, the Contractor shall make good, at his own expense, any excessive wear to any parts, any defects in or damages to any equipment included in this contract, which may arise from faulty materials, design or construction, or from the inability of any of the equipment to successfully perform all the work put upon it within the limits of these specifications.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition precedent to the final payment specified in Article 37.

Prices.

Art. 35. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all

the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

DIVISION W.

Venturi Meters.

For furnishing and delivery, complete, of the Venturi meters for sewage and air, together with recording and indicating apparatus, and miscellaneous appurtenances, complete, as specified f. o. b. cars, the Chicago & North-Western Railway, Maywood, Ill., the lump sum of Twelve Thousand, Seven Hundred Sixty Dollars ($12,760.00).

The foregoing price shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said price shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

Art. 36. Division W. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed Eighty-seven and One-half (87½) Per Cent of the value of the work properly performed under this contract, and that the remaining Twelve and One-half (12½) Per Cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and the completion of the erection and the operating tests, and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract, provided, however, that said twelve and one-half (12½) per cent so reserved may be paid to said Contractor at the expiration of thirty (30) days from the completion of delivery f. o. b. cars, the C. & N. W. Ry., Maywood, Ill., with the consent of the Chief Engineer and the sureties on the bond of the Contractor, in which case said bond is to remain in full force to the completion of the operating tests and the final acceptance of the equipment included under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where unit prices are specified, the estimate shall be based on the quantities estimated. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

Art. 37. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 34, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the manner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash the whole amount of money accruing to said Contractor under this contract, except such sum or sums of money as may

have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

In Witness Whereof, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the party of the second part has caused these presents to be executed in duplicate by its Treasurer, to be duly attested and its corporate seal to be hereunto affixed.

CONTRACTOR'S BOND.

Know All Men by These Presents, That we, the Builders Iron Foundry as principal and American Surety Company of New York as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of six thousand three hundred eighty dollars and no cents ($6,380.00), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this sixth day of May, A. D. 1919.

The Condition of the Above Obligation Is Such, That whereas, the above bounden Builders Iron Foundry has entered into a certain contract with The Sanitary District of Chicago, bearing date the 6th day of May, A. D. 1919, for doing all the work and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the furnishing and delivering of Venturi meters, including miscellaneous sewage and air Venturi meters, with recording and indicating apparatus f. o. b. cars, The Chicago & North-Western Railway, in the Village of Maywood, County of Cook, State of Illinois, as specified under Division W of the attached contract.

Now, If the said Builders Iron Foundry shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said Builders Iron Foundry, its agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, except insofar as all liability on account of claims for infringements of patents on activated sludge processes or machinery, or equipment used in connection therewith, is expressly exempted; and, moreover, shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services, and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course

of employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said Builders Iron Foundry in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

And It Is Hereby Expressly Understood and Agreed, And made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said Builders Iron Foundry, or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employes, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said Builders Iron Foundry shall be conclusive against each and all parties to this obligation as to amount, liability and all other things pertaining thereto.

Mr. Lawley presented the following report from the Committee on Finance:

Chicago, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

Gentlemen — Your Committee on Finance reports that it has examined and approved the bond of the W. A. Jackson Company with the Southern Surety Company thereon as surety, on its contract for furnishing and delivering electrical equipment for the Desplaines River Sewage Treatment Works, designated as Division "P" of the specifications, for The Sanitary District of Chicago, and, therefore, recommends the passage of the following order:

Ordered, That the bond of the W. A. Jackson Company for the faithful performance of the contract above specified, said bond being in the penal sum of $11,-187.50 be, and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
Jas. H. Lawley,
Chairman.
Matt A. Mueller,
Willis O. Nance,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract and bond of the W. A. Jackson Company:

The Sanitary District of Chicago.

CONTRACT AND SPECIFICATIONS FOR DES PLAINES RIVER SEWAGE TREATMENT WORKS.

This Agreement, Made and entered into this first day of May, A. D. 1919,

by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the W. A. Jackson Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by the said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for furnishing and delivering the electrical equipment, and the apparatus, equipment and appurtenances thereto, as called for under Division P of the attached specifications, complete, as specified, freight prepaid, on board cars, the Chicago and North-Western Railway in the Village of Maywood, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the others, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work as contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be determined and on whose inspection all work shall be accepted or condemned. The said Chief Engineer or other engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which, in his opinion, do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor, that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of the said Contractor, and his estimate and decision shall be final and conclusive; and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Division P, of the Desplaines River Sewage Treatment Works.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the electrical equipment, including motors and accessories, transformers, controlling apparatus, switches, switchboards, and all other fittings and appurtenances, including all material, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each division of the entire sewage treatment works are numbered, A1, A2, etc., B1, B2, etc., C1, C2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

GENERAL SPECIFICATIONS.

Location of Work.

(1) The Desplaines River Sewage Treatment Works are to be erected on property owned by the Sanitary District situated between 12th and 22nd streets, just west of the Desplaines River and east of First avenue extended, in the Village of Broadview, County of Cook, State of Illinois.

Description.

(2) The work included under this contract and specifications consists in furnishing and delivering f. o. b. cars, the C. & N. W. Ry., Maywood, Ill., the following:

Division P. Electrical equipment, including three (3) vertical shaft, squirrel cage induction motors, each 50 H.P.; four (4) horizontal shaft, slip-ring, wound rotor motors, each 150 H.P.; two (2) horizontal shaft, squirrel cage induction motors, comprising one (1) at 75 H.P. and one (1) at 30 H.P.; four (4) 300 K.V.A. transformers, oil switch equipment, and miscellaneous appurtenances.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Contract Drawings.

(4) Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the equipment included under this contract and the foundations for same, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use. Under this head plans and information shall be furnished by the Contractor, in part, as follows:

Division P.

Electric motors.
Switchboard equipment.
Transformers.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as the Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment to make the same conform to the drawings as finally approved.

Of the minor equipment for which drawings may not be required, the Contractor shall furnish to the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalog number and type of equipment proposed, together with such prints, dimensions, specifications, samples, or other data, as may be required to permit intelligent judgment of the acceptability of the equipment proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Prior to the issuance by the Engineer of the final certificate specified in Article 37, the Contractor shall furnish to the Engineer a set of record blue prints of the various equipment, as actually installed, for which drawings are required from the Contractor.

These drawings shall include complete wiring diagrams and such plans and elevations and sectional assemblies as may be necessary to show the size,

location and method of assembly of all parts of the equipment, to facilitate the dismantling and reassembling of the same. Each part shown shall be identified by a number and each drawing shall contain a bill of material giving the name, material and number required of each part. Such dimensions shall be given on the drawings as are desirable for the proper erection and adjustment of the equipment.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Foundations.

(6) The foundations for all equipment included under Division P of this contract will be furnished by the contractor for Division A. These foundations will be brought up to within about one (1) inch of their final elevation. After placing equipment thereon, the contractor erecting said equipment shall shim the same to the final elevation, using for this purpose approved metal wedges, and complete the foundation by grouting under and around the bases of the equipment.

Shop Tests.

(8) Each motor shall be tested in the shop for efficiency, insulation and operating characteristics, except as hereinafter specified.

All tests shall be made in the presence of the Engineer. The Contractor, at his own expense, shall supply in place and ready to use, all necessary power, apparatus, wiring, piping and instruments, and shall make the tests, and shall provide all facilities for the Engineer to inspect the work previous, during, or subsequent to the test and to calibrate and otherwise check all the instruments used in the tests.

Should the above tests and inspections show any failure on the part of any of the equipment to fulfill the requirements of these specifications, the Contractor shall forthwith, at his own expense, make such changes and repairs to the equipment as may be necessary to make the same conform to the specifications before shipment to the site of the work, and shall again provide all the necessary equipment and facilities and shall make the tests as outlined herein.

Shipment.

(9) Unless otherwise notified, as specified in Article 27, the Contractor (under Division P) shall ship the material and equipment included under this contract, when ready, to the Chicago and Northwestern Railway, Maywood, Illinois, freight prepaid, consigned to the contractor named as the consignee by the Chief Engineer of the Sanitary District. All equipment shall be carefully crated, as required, and protected from dust, dirt and weather.

Guarantees.

(10) Before the completion of the work and immediately prior to the issuance of the final certificate, the Contractor shall furnish a maintenance bond or guarantee against all improper workmanship or materials, for the period stated from the date of the completion of the work, as herein specified, under Article 34. This date shall be taken as the date when the Board of Trustees of The Sanitary District of Chicago approves the final voucher of the Contractor.

SPECIFICATIONS.

DIVISION P, ELECTRICAL EQUIPMENT.

Scope.

(P1) The equipment to be furnished hereunder includes three (3) vertical shaft, squirrel cage induction motors with complete starting and control equipment; four (4) horizontal shaft, slip ring, wound-rotor and two (2) horizontal shaft, squirrel cage induction motors, complete, with starting and control equipment; four (4) 300 K. V. A. step-down transformers; three (3) 15,000 volt, 300 ampere, 3-pole, single throw, automatic oil switches with current transformers and relays; one (1) 4,500 volt, 1,500 ampere, 3 pole, single throw automatic oil switch with current transformers and relays; three (3) 2,500 volt, 200 ampere, 3 pole, single throw, automatic oil switches with current transformers; two (2) 15,000 volt current transformers; three (3) 2,500 volt current transformers; four (4) 11,000/110 volt potential transformers and four (4) 5 KVA. step-down transformers.

The electrical energy for the operation of the station will be supplied from a hydro-electric power plant having a maximum generating capacity of 32,000 KVA. over a 60 cycle transmission system consisting of step-up transformers, thirty (30) miles of 44,000 volt overhead transmission line consisting of three (3) circuits, step-down transformers and nine (9) miles of 12,000 volt transmission line. The 44,000 volt line consists of three circuits supported on one line of steel towers. The three conductors of each circuit consists of 270,000 circular mil aluminum cables arranged in the form of an equilateral triangle. The spacing between conductors is approximately six (6) feet. Each 44,000 volt circuit is protected at the power plant end by an automatic oil switch. These circuits terminate in a "Terminal Station" where the energy is stepped down to 12,000 volts and from which the 12,000 volt lines radiate. The step-down transformers at the Terminal Station are protected on both primary and secondary side by automatic oil switches and the 12,000 volt line leaving the Terminal Station is also protected by an automatic oil switch. The 12,000 volt line from the Terminal Station to the Desplaines Sewage Treatment Works will consist of five (5) miles of three conductor, lead covered cable connecting to a substation bus through an automatic oil switch and four (4) miles of overhead line from this substation bus through an automatic oil switch to the Desplaines Sewage Treatment Works. The underground cable is Number 4/0 and the overhead conductors are No. 1 B & S gauge copper. The conductors on the overhead circuit are spaced two (2) feet apart at the corners of an equilateral triangle.

Specifications and Plans.

(P2) The specifications and plans are intended to cover complete equipment. It is not the intent to give every detail in the plans and specifications. The Sanitary District will not be responsible for the absence of any detail the Contractor may require, or for any special construction which may be found necessary as the work progresses. No additional compensation will be allowed for material or labor used in performing any work hereunder, unless the work can be clearly shown to be beyond the intent and scope of the plans and specifications, to the satisfaction of the Chief Engineer.

Materials.

(P3) Any materials for which no detailed specification is given herein shall be of the quality and character best adapted for the purpose for which they are to be used. No material shall be used for any purpose for which it has not previously been in use for a like purpose for a sufficient length of time to demonstrate its probable success for the purpose for which it is to be used.

The various materials called for, including cast iron, cast steel, carbon and alloyed steel forgings, steel, copper and manganese bronze castings and rods, shall conform in general to the composition, physical characteristics and methods of treatment specified in the latest standard specifications of the American Society of Testing Materials, so far as they may apply. With the written permission of the Chief Engineer, substitution of materials equally good and well adapted for the purpose proposed may be allowed, if there is difficulty in obtaining metals usually employed for electrical machinery owing to conditions produced by the war.

Replacements.

(P4) The Contractor shall make the individual pieces of the machinery herein specified to be furnished in duplicate or triplicate to conform to exact dimensions on the working drawings made by the Contractor, so that no fitting or adjusting will be necessary in setting up the entire machine, other than such as is usually done in high-grade standard designed apparatus. This requirement will be rigidly enforced, as it is essential that any defective piece of the machinery may be easily replaced by a new piece made in accordance with the drawings.

Castings, Bolts and Nuts.

(P5) All castings shall be free from blow-holes, shrinkage strains, cold shuts and like defects, and shall be smooth, true to form and of accurate dimensions.

All seats for bolt heads and nuts shall be spot-faced. Case hardened nuts shall be used on all covers, bonnets, pedestals and other parts requiring frequent removal or adjustment.

Eye bolts for all heavy parts requiring removal shall be furnished.

INDUCTION MOTORS FOR PUMPS.

Number, Type and Capacity.

(P6) Three (3) 50 horsepower, 440 volt, three-phase, sixty cycle, vertical shaft, squirrel cage, induction motors

are required for driving the centrifugal sewage pumps. The motors will be direct-connected to their respective pumps through a flexible coupling to be furnished by the pump contractor. The Contractor under Division P shall bore and keyway the motor end of each coupling, and drive it in place on its shaft, and furnish and place the key.

Speed.

(P7) The synchronous speed of these 50 horsepower motors shall be four hundred (400) R.P.M. The pump capacities are based on full load speed of the motors approximately six (6) per cent below synchronism and it is desired that the full load slip of the motors shall not exceed this amount.

Base and Frame.

(P8) The base and frame of the motors shall be properly designed and constructed to support and distribute the stresses placed upon them and shall be provided with large openings to permit free circulation of air through the core and windings.

Magnetic Circuits.

(P9) The stator and rotor cores shall be built up of thin sheet iron or steel laminations, properly insulated to prevent excessive eddy current losses. Slots of the open type shall be provided to receive the windings and the windings shall be held in the slots by means of fibre or wooden wedges. Ventilating ducts shall be provided in both stator and rotor core to allow free circulation of air for cooling purposes. The laminations shall be clamped and rigidly held in place in an approved manner.

Windings.

(P10) The windings shall consist of conductors composed of copper or other suitable material of proper size thoroughly insulated in an approved manner. Attention is called to the fact that these motors will operate in a room subject to considerable moisture and wide variation of temperatures and the insulation used must be thoroughly impregnated or otherwise treated to withstand such conditions without deterioration or damage.

The stator windings shall consist of form wound coils held in the core slots by means of suitable separators so as to permit free circulation of air around all coils and shall be protected by approved metal shields fastened to the frame or in some other approved manner.

The rotor windings shall consist of insulated bars imbedded in the slots of the rotor core and welded, brazed or bolted at the ends to short-circuiting rings. The method used in making the connection between the rotor bars and the short-circuiting rings must be such as will insure against separation due to mechanical causes.

Rotor Spider.

(P11) The rotor core shall be supported in a proper manner on a cast iron or cast steel spider which shall be mounted on and keyed to the shaft in an approved manner. The spider shall be properly designed to withstand all strains to which it may be subjected.

Bearings.

(P12) The bearings of each motor shall consist of a thrust bearing of the surface type (not ball bearings) above and a suitable guide bearing below the stator frame. These bearings shall both be provided with suitable oil gauges.

The guide bearing shall be self-oiling, either by means of an oil pump geared to the shaft or by the centrifugal action of the rotating elements, and shall be of a design to prevent oil getting into the windings.

The thrust bearing shall run in oil and shall preferably be submerged at all times. This bearing shall be of a type which has proven satisfactory for similar service and which will be easy of repairs and adjustments. This bearing shall be protected by an approved housing.

Starting and Control Equipment.

(P13) There shall be provided with each motor complete starting and control equipment consisting of two push botton control switches, starting compensator, solenoid or motor operated carbon break switches with complete protective devices. The equipment furnished shall be equal in every respect to equipment manufactured by the Cutler-Hammer Manufacturing Company for such service. One of the push button control switches shall be mounted on the starting panel and the other in a condulet or other conduit fitting to be installed near the motor. These switches are to be of a type such that the motor may be started or stopped at either the switchboard panel or at a point near the motor. The starting equipment is to be so designed and furnished that these push button control switches may be replaced by a float control switch for the

complete automatic operations of the pump motor.

The starting equipment for each motor shall consist of auto-transformer or compensator and solenoid or motor operated carbon break switches mounted on a black Monson slate panel. It is estimated that fifty starts per day will be made under normal conditions and the switches and other equipment shall be properly designed for such service. Each starting and control equipment shall include complete overload, phase failure and phase reversal protective devices of an approved type, designed to automatically disconnect the motor in case of overload, short circuit, failure of any phase, reversal of any phase or excessive drop in line voltage.

All starting and control equipment for each motor, except one push button switch, shall be mounted on a black Monson slate panel two (2) inches thick and sixty-two (62) inches high with three-eighths (3/8) inch bevel on all front edges, rubbed to a smooth finish. Each of these panels shall consist of a lower section twenty-eight (28) inches high and an upper section thirty-four (34) inches high.

The starting compensator or auto-transformer shall be mounted on the back of the panel, not to extend above the top of the panel. All other equipment shall be mounted on the front of the panel and all connections made between the various parts of the equipment. These panels will be mounted as part of the main switchboard under another contract. They shall be furnished by the Contractor for Division P with all equipment in place and drilled for mounting as indicated on drawing to be furnished by the Sanitary District. All holes shall be drilled straight and clean by counter boring from both sides and shall be perpendicular to the face of the panel and of proper size for the stud, bolt or wire passing through same. Any panels showing chipping or cracking of the slate around the holes may be rejected.

Starting Load.

(P14) The starting load on the motors will consist of the friction of the pump and shafting and the water load of the pump. The water load will be nil at rest and will be somewhat below the rated load of the motor at full speed and will vary in proportion to the cube of the speed. The weight of the rotating parts outside of the motor will be 3,600 pounds for the 50 H.P. motors and will act on a sliding bearing, of which the mean radius of gyration is 6.

INDUCTION MOTORS FOR BLOWERS.

Number, Type and Capacity.

(P15) Four (4) 150 H.P., one (1) 75 H.P. and one (1) 30 H.P., 440 volt, three phase, sixty cycle, horizontal shaft induction motors are required for driving Hydro-Turbine Blowers. The 150 H.P. motors shall be of the slip ring, wound-rotor type and the 75 H.P. and 30 H.P. motors of the squirrel cage type. The motors will be connected to their respective blowers through a silent-chain to be furnished, together with the gears or pinions for both ends, by the blower contractor under Division R. The shaft of each motor shall extend beyond the motor-frame bearing to the proper length for the installation of these gears or pinions, and shall be keyed as ordered by the Engineer. The Contractor under Division P shall bore and keyway each gear or pinion to size and drive it in place on its shaft, and furnish and place the key.

Each motor shall be arranged for conduit wiring. The side of the frame on which the leads are to be brought out will be determined by the Sanitary District. This information will be furnished to the Contractor as soon as reasonably possible after this contract has been signed.

Complete starting and control-equipment for each motor shall be furnished with the motors. The motors are to be used for constant speed service on either continuous or intermittent duty.

The motors and starting and control equipment shall be equal in every respect to similar equipment manufactured by the General Electric Company or by the Westinghouse Electric and Manufacturing Company.

Speed.

(P16) The synchronous speed of each motor shall be 600 r.p.m. for the 150 H.P. and 900 r.p.m. for the 75 H.P. The full load speeds shall be approximately 575 r.p.m. for the 150 H.P. motor and 870 r.p.m. for the 75 H.P. and 30 H.P. motors.

Base and Frame.

(P17) The base and frame of the motors shall be designed and constructed to support and distribute the stresses placed upon them and to give proper ventilation. A sliding base, complete,

shall be furnished with each motor. Motors of the three (3) bearing type are required on the motors of 150 H.P. and 75 H.P. size.

Starting and Control Equipment.

(P18) There shall be provided with each motor a complete starting and control equipment. For the 150 H.P. motors the starting and control equipment shall consist of a drum controller with the necessary resistors for the control of the secondary circuit, not less than two 5 ampere secondary current transformers, an ammeter, an oil switch with operating handle with overload and low voltage release trip coils and a black Monson slate panel with 3/8 inch bevel on front edges. The entire equipment, with the possible exception of the resistors which may be mounted below floor if necessary, shall be assembled as a unit on angle iron or one and one quarter (1¼) inch iron pipe frame for installation near the motor. An interlock shall be provided such that the oil switch can not be closed unless the controller is in such position that all of the resistance is in the motor circuit. For the 30 H.P. and 75 H.P. motors the starting and control equipment shall consist of a starting compensator with overload relays, no voltage release and an ammeter. The compensator with overload relay and ammeter panel and wiring case for conduit wiring shall be made as a complete unit. The compensator shall have an oil immersed switch and with the lever in the "off position" both the compensator and motor windings shall be disconnected from the line.

POWER TRANSFORMERS.

General.

(P19) Four (4) 300 K.V.A., 12,000/220-440 volt, 60 cycle, single phase, oil insulated, self-cooled, indoor type transformers are required for supplying power and lighting for the operation of the station. These transformers will be arranged in one bank of three (3) transformers and one spare unit. The bank of three transformers to be connected in delta on both primary and secondary side.

The primary winding shall be provided with full capacity taps for operation at 11,400 volts and 10,800 volts.

These transformers will be subject to surges and operating conditions usually encountered in a long distance transmission system and will be installed in a room subject to considerable moisture, and special attention must be given to the design to insure satisfactory operation under such conditions.

Core.

(P20) The core shall be built up of thin laminations of the best grade of silicon steel especially adapted to this purpose. The laminations shall be properly insulated to prevent excessive eddy current losses and shall be mounted securely in a heavy iron frame. The construction shall be such that the laminations cannot vibrate or become loose and that no bolts or rivets pass through the laminations. Suitable ventilating ducts shall be provided through the core to allow free circulation of oil.

Windings.

(P21) The windings shall consist of coils thoroughly impregnated with an insulating compound by means of the vacuum process. The insulation used shall conform to the requirements of Class A or Class B insulation as specified in Table III of the 1916 issue of the Standardization Rules of the American Institute of Electrical Engineers and shall withstand the temperatures given in said table as permissible for insulation of the class used without injury. Extra insulation shall be provided on the end turns of all windings to insure against breakdown due to surges. The coils shall be separated by suitable spacers to allow free circulation of oil between the coils and shall be rigidly and securely braced to prevent any shifting on the core or distortion of the coils from any cause. Particular attention shall be given to this detail of construction.

Cases.

(P22) Each transformer shall be mounted in a suitable case, composed of a heavy boiler plate or sheet steel tank with welded joints, mounted on a heavy cast iron or structural steel base and fitted with a cast iron cover with gaskets. All joints must be thoroughly tight to prevent any leakage of oil or air.

Each tank shall be provided with a thermometer and an electric alarm attachment for warning of high temperatures and also with an oil gauge and drain cock and with a pet cock for drawing off oil samples.

Suitable bushings shall be mounted in the cover for bringing out the leads from the terminal boards and windings.

These bushings shall be securely held in place and shall be of heavy and suitable construction and shall be mounted in the cover in a manner to prevent any air or moisture entering or leaving the case at this point. Eye bolts shall be provided for lifting the cover and also for lifting the complete transformer and case, and for removing the transformer from the case.

Terminal Boards and Terminals.

(P23) All leads shall be brought to suitable terminal boards mounted inside the transformer case below the oil level. Strap connections shall be provided for obtaining the different voltages specified. Leads shall be provided from the terminal boards through bushings in the cover for outside connections for each winding. These leads shall consist of copper tubing or rod of proper size and stiffness provided with a suitable union for connection to outside circuits.

Oil.

(P24) A sufficient quantity of the best grade of transformer oil shall be furnished with each transformer. The oil shall withstand a dielectric test between one-half inch spheres spaced two-tenths of an inch apart of forty thousand (40,000) volts A. C. at 60 cycles and a flash test of one hundred and twenty-five (125) degrees Centigrade.

Diagrams.

(P25) Diagrams showing connections to be made for obtaining the different voltages shall be attached to the cover or tank and properly protected so as to remain clear and distinct at all times.

Name Plate.

(P26) Each transformer shall be provided with a suitable name plate, mounted on the outside of tank, giving the capacity in K.V.A., the voltages obtainable, the frequency and the primary and secondary full load current.

OIL SWITCHES.

General.

(P27) The following oil switches are required:

Three (3) 3-pole, single-throw, 300 ampere, 15,000 volt, hand operated, remote control, automatic oil switches for the two (2) 12,000 volt lines and the high-tension side of the 900 K.V.A. transformer bank.

One (1) three-pole, single throw, 1,500 ampere, 4,500 volt, hand operated remote control, automatic oil switch for the low side of the 900 K.V.A. transformer bank.

Three (3) three-pole, single throw, 200 ampere, 2,500 volt, hand operated, remote control, automatic oil switches for the 440 volt feeders.

The three (3) 300 ampere, 15,000 volt switches furnished shall be equal in every respect to type F, Form K-12, General Electric oil switches or to type F-3, Westinghouse oil circuit breakers. The one (1) 1,500 ampere, 4,500 volt switch shall be equal in every respect to type F, Form K-12B, General Electric oil switch or to type B-2 Westinghouse oil circuit breaker. The three (3) 200 ampere, 2,500 volt switches shall be equal in every respect to Type F, Form K-13, General Electric oil switches or to Type F-1, Westinghouse oil circuit breakers.

Type.

(P28) These oil switches shall be of the hand operated, remote control, gravity opening type arranged for mounting on one and one-quarter (1¼) inch iron pipe frame in basement, the floor elevation of which is approximately thirteen (13) feet below the main or switchboard floor elevation as shown on drawing Sheets Q-2 and Q-3 for Desplaines Sewage Treatment Works. All switches are to be operated by bell cranks and operating rods from handles mounted on the switchboard. The necessary bell cranks, operating handles and face plates complete with trip coils shall be furnished with the oil switches. The bell cranks shall be such that they may be arranged to put all operating rods in tension for the closing of the oil switches.

Capacity.

(P29) All oil switches shall be ample and safe for protecting and rupturing their circuits in normal operation or on repeated short circuits when connected as shown on wiring diagram, Sheet Q-1 for Desplaines Sewage Treatment Works and connected to transmission lines and generating station as stated under Section P1.

Contacts.

(P30) The main contacts must be designed to carry the rated current continuously and to extinguish the arc on opening or closing of the switch without damage to any part of the switch under any and all conditions which may arise. The contacts and all connections which may be subjected to high potentials must be entirely submerged in oil.

Leads.

(P31) The leads of the switch shall be brought out at the top of the switch through porcelain or other insulating bushings and shall consist of copper or brass rods of proper sizes terminated at the upper end with copper or brass unions for making connections. Porcelain or other insulating sleeves shall be provided for covering the terminals. The leads must be insulated in a manner to prevent syphoning of oil from the tanks and must be securely connected to the contacts of the switch below the oil level.

Oil Tanks.

(P32) The oil tanks shall be constructed of heavy sheet metal, lined with a suitable insulating material. All seams shall be double lapped and riveted or welded to insure against leakage. All leaky tanks must be removed promptly and new tight tanks supplied by the Contractor at his expense. The tanks shall be supported from the switch frame and shall be readily removable for inspection and repairs. Each tank shall be marked to show the proper level at which the oil should be maintained and must be so designed that the oil level may vary throughout a range of two and one-half (2½) inches without affecting the operation of the breaker.

Trip Coils and Auxiliary Switches.

(P33) Each of the three (3) 300 ampere, 15,000 volt oil switches and the 1,500 ampere, 4,500 volt oil switch shall be equipped with A. C. overload trip coils to be energized through a circuit closing relay from the secondary of the current transformers. The trip mechanism is to be equal in every respect to the "Direct Trip Attachment" as manufactured by the Westinghouse Electric and Manufacturing Company. Each of the three (3) 200 ampere, 2,500 volt oil switches shall be equipped with at least two A. C. overload trip coils to be energized from the secondary of the current transformers and with a low voltage release. The necessary current transformers for the complete automatic operation shall be furnished for each of the seven oil switches.

Each of the seven oil switches shall be equipped with auxiliary switches for the operation of red and green A. C. indicating lamps and for the closing of a 110 volt A. C. circuit through a bell alarm relay upon the automatic opening of the oil switches.

Current Transformers.

(P34) The current transformers for the automatic operation of the 15,000 volt oil switches shall have a primary current rating of fifty (50) amperes, a secondary current rating of five (5) amperes, a capacity of not less than forty-five (45) volt-amperes and a voltage rating of not less than 15,000 volts. The current transformers for the automatic operation of the 4,500 volt, 1,500 ampere oil switch shall have a primary current rating of twelve hundred (1,200) amperes, a secondary current rating of five (5) amperes, a capacity of not less than forty-five (45) volt-amperes and a voltage rating of not less than 2,500 volts. The current transformers for the automatic operation of the oil switches for the 440-volt feeders shall have a secondary current rating of five amperes, a capacity of not less than forty-five (45) volt-amperes, a voltage rating of not less than 2,500 volts and primary current rating of sixty (60) amperes for feeder No. 1, forty (40) amperes for feeder No. 2 and twenty (20) amperes for feeder No. 3. At least two (2) current transformers shall be furnished for each oil switch. The 15,000 volt current transformers shall be equal in every respect to General Electric Type K-48 or Westinghouse Type K-B and 2,500 volt current transformers to General Electric Type W-2 or W-5 or Westinghouse Type K-A current transformers.

All current transformers shall be provided with mounting feet, designed to be supported on a base of one and one-quarter (1¼) inch iron pipe or structural steel.

Relays.

(P35) The overload relays required for the operation of the oil switches shall be of the circuit closing, time-limit, induction type equal in every respect to the General Electric Type I R or Westinghouse Type C O. At least two (2) relays shall be provided for each of four (4) oil switches. There shall also be provided with each oil switch a circuit closing control relay for closing the circuit through the trip coil of the oil switch.

Oil.

(P36) There shall be furnished for each oil circuit breaker a sufficient quantity of the best quality of oil having high flash and ignition points and low carbonizing properties. Before being put in the tanks the oil shall be thoroughly

dried and free from dirt or other foreign matter and shall have a high breakdown value.

Lighting Transformers.

(P37) Four (4) 5 K.V.A., 440 to 110-220 volt, single phase transformers shall be furnished for the 110 volt lighting service. These transformers shall be equal in every respect to similar equipment manufactured by the General Electric Company or the Westinghouse Electric and Manufacturing Company.

Current and Potential Transformers.

(P38) Four (4) 200 watt, 11,000 to 110 volt, oil insulated potential transformers with primary fuses, fuse holders and separate mountings, two (2) 40 to 5 ampere, 15,000 volt, 45 volt-ampere and three (3) 120 to 5 ampere, 2,500 volt, 45 volt-ampere current transformers shall be furnished for the operation of switchboard instruments. These current and potential transformers furnished hereunder shall be equal in every respect to similar equipment manufactured by the General Electric Company or by the Westinghouse Electric and Manufacturing Company. The potential transformer fuse mountings shall be front connected, equal in all respects to Delta Star Catalog No. 37250 and fitted with S. & C. fuses.

Oil.

(P39) The Contractor shall furnish a sufficient quantity of best grade transformer oil for all power, lighting and potential transformers, and a sufficient quantity of high grade lubricating oil for all bearings of equipment supplied hereunder.

SHOP ERECTION AND TESTS.

General.

(P40) All the equipment furnished hereunder shall be assembled, erected and completely tested in the shops of manufacturer to determine the operating characteristics and also to determine whether or not the equipment meets all of the requirements of the specifications and contract.

A. I. E. E. Rules.

(P41) All tests shall be conducted in accordance with the recommendations embodied in the Standardization Rules of the American Institute of Electrical Engineers in force at the date of the contract and all calculations based upon such tests shall be made in accordance with said recommendations and Standardization Rules.

Tests to Be Made.

(P42) Tests shall be made to determine the following characteristics:

Insulation resistance and dielectric strength of motor and transformer insulation.

Efficiency, power-factor, slip, and torque of the induction motors at various loads.

Efficiency and regulation of transformers at various loads and power-factors.

Heating of transformers and motors under continuous operation at rated full load.

Expense of Tests.

(P43) The Contractor shall notify the Engineer when the equipment is ready for test so that the Engineer may have a representative present to witness the tests. All expense of conducting such tests shall be borne by the Contractor and he shall furnish all instruments and all other equipment and material required for conducting said tests.

Calibration of Instruments.

(P44) The Contractor shall, if directed to do so by the Engineer, have all instruments, instrument transformers, etc., used in making such tests, calibrated in the presence of the Engineer or his representative and shall furnish to the Engineer certified copies of any necessary correction curves or factors applying to such instruments or other equipment.

Results of Test.

(P45) Should any equipment, when tested, fail to meet any of the requirements of the specifications or the performance guarantees, due to any weakness of construction or design, the Contractor shall, at his own expense, forthwith make such changes, betterments or replacements in any equipment so that said equipment when again tested will meet the requirements of the specifications and the performance guarantees.

If, after such changes, betterments or replacements have been made to any equipment, and the results of any test on any such equipment shows that the equipment does not then meet the requirements of the specifications and the performance guarantees, then such equipment may be rejected by the Engineer

and the Contractor hereby agrees to replace the same at his own expense with new equipment, which shall be tested in the same manner as the original equipment.

In the further event that the results of any test of said second new equipment show that said equipment does not meet the requirements of the specifications and the performance guarantees, then said equipment may be rejected by the Engineer, and if installed the said Contractor hereby agrees if so ordered to at once remove the rejected equipment and said Sanitary District is hereby authorized to purchase and install at the sole cost and expense of said Contractor, such other equipment as will meet the requirements.

All changes, betterments or replacements made after the installation shall be made subject to the acceptance of the Engineer at such time and in such manner as not to interfere with the operation of the station. The Sanitary District shall have the use of the equipment as originally installed, or replaced, without charge, until such time as the changes, betterments or replacements are made. Any changes, betterments or replacements that are made in the shops shall be made to the acceptance of the Engineer.

Painting.

(P46) All equipment furnished hereunder shall be thoroughly cleaned and painted before shipment.

All exposed cast iron, steel or corrosive material of the motors shall be painted as follows: All parts shall be thoroughly cleansed with benzine and brushes. A good coat of priming shall be applied, followed by a thorough coat of good rough stuff or heavy machinery filler, rubbed to an even surface with pumice stone. The work shall then be given one (1) coat of white lead and linseed oil paint of color to be selected by the Engineer, and then one (1) coat of white lead and linseed oil paint and varnish as selected, and rubbed with powdered pumice stone. Two (2) coats of Valspar varnish or equal shall then be applied.

Transformer casings and oil switch tanks shall be painted with three (3) coats of asphaltum varnish or equal.

Paint, oil, varnish and other materials used in painting shall be of the best quality. The color of all paint and the brands of all material used shall be approved by the Engineer.

Transportation and Delivery.

(P47) All equipment furnished hereunder shall be delivered by the Contractor at his own risk f. o. b. cars, on the Chicago and Northwestern Railway, Maywood, Illinois. All equipment must be consigned to the contractor designated by the Chief Engineer.

Guarantee.

(P48) All equipment furnished hereunder shall be guaranteed free from mechanical and electrical defects in workmanship, design and materials, and the Contractor shall replace, without cost to The Sanitary District, any part or parts or any equipment proving to be defective within one (1) year after the equipment has been placed in operation. A maintenance bond for this purpose is specified under Article 34.

GENERAL CONDITIONS.

Sanitary District Law.

ARTICLE 1. The said Contractor hereby agrees to carry on all the work provided for in this contract in strict conformity with the requirements of the law under which The Sanitary District of Chicago is organized, entitled "An Act to create Sanitary Districts and to remove obstructions from the Desplaines and Illinois Rivers," approved May 29th, 1889, in force July 1st, 1889, and all amendments and acts supplementary thereto.

Omission on Plans.

ART. 3. The plans furnished, or to be furnished, form a part of these specifications, and any work shown thereon shall be executed the same as if mentioned herein. The work is to be made complete, and to the satisfaction of the Engineer, notwithstanding any minor omissions in the specifications or drawings.

Changes in Plans.

ART. 7. The Sanitary District reserves the right to make any changes in the specifications and plans which may be deemed necessary either before or after beginning any work under this contract, without invalidating this contract; provided, that if alterations are made, the general character of the work as a whole is not changed thereby.

If such alterations increase the quantity of work to be done, where unit prices are specified, such increase shall be paid for according to the quantity

of work actually done at the unit price specified under this contract for each class of work performed. If such alterations diminish the quantity of work to be done, where unit prices are specified, they shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the said Sanitary District shall not be required to pay for work or material omitted.

If such alterations increase the amount of work to be done, where lump sum prices are specified, such increase shall be paid for as an extra as provided in Articles 8 and 9. If such alterations or omissions diminish the amount of work to be done, where lump sum prices are specified, such alterations or omissions shall not constitute a claim for damages or for loss of profits on the work that may be dispensed with, and the Sanitary District shall not be required to pay for work or material omitted. The Contractor shall allow a credit for all such work or material omitted, the amount of the credit to be fixed by the Chief Engineer on the basis of the estimated cost of the labor and material omitted.

Extra Work.

ART. 8. The Contractor shall perform only such extra work as the Engineer may order in writing, provided, however, that no extra work, the total price or cost of which is in excess of $500.00, shall be performed by the Contractor until the Engineer is authorized to issue a written order therefor by the Board of Trustees of said Sanitary District.

Whenever work is required to be done which is not now contemplated or covered by the prices herein specified, the Engineer shall fix such prices for the work as he shall consider just and equitable, and the Contractor shall abide by such prices, provided, he enters upon such work with a full knowledge of the prices so fixed by the Engineer, but if the Contractor declines to perform said work at the prices fixed by said Engineer, then the Sanitary District may contract with any person or persons for its performance the same as if this contract had never existed; and if extra work, or work not provided for in this contract is ordered performed by the Engineer and is so performed by the Contractor before prices have been fixed for such work, then the Engineer shall estimate the same at such prices as he shall consider just and reasonable and his decision shall be final and binding upon both parties to this agreement, and the said Contractor shall accept such prices in full satisfaction of all demands against the Sanitary District for said extra work; provided, that if extra work done under this contract is of such a nature being distinct from other work being done by the said Contractor, that in the opinion of the Engineer the actual cost of the same can be determined, then the said Contractor shall receive and the Sanitary District shall pay in full satisfaction for the same, the actual cost of the work as determined by the Engineer with fifteen (15) per cent added for superintendence, use of tools and profit, provided that said fifteen (15) per cent shall not be added to any unit or lump sum price fixed by the Engineer for extra work performed by the Contractor.

A statement of all claims for extra labor or material furnished by the Contractor or for damages from any cause whatsoever, must be reported to the Engineer in writing at the time such labor or material is furnished or such damages occur and they must also be presented to the Engineer and the Committee on Engineering of the Board of Trustees of said Sanitary District in writing within ten days after the end of the month. Whenever so required, the Contractor shall deliver to the Engineer each day a signed statement of the extra labor and material furnished during that day. The written orders of the Engineer to the Contractor to perform any extra work therein mentioned and the written notices and statements of the work performed herein before and hereinafter required from said Contractor are conditions precedent to any recovery on the part of said Contractor for any extra work performed.

Estimating Extra Work.

ART. 9. In estimating the cost of extra work, the cost of material and equipment shall be the actual price paid for same delivered at the site of the work. The cost of labor shall be taken as the amount paid for same, as shown by the pay rolls of the Contractor, with cost of indemnity insurance added when such can be shown to have been paid. No charge for cost of administration will be allowed except as covered by said allowance of fifteen (15) per cent for superintendence, use of tools and profit. The Contractor shall, when requested by the Chief Engineer, certify, by his affidavit, the correctness of the amounts paid for material, equipment and labor.

It is further agreed that in all cases of question or dispute arising or growing out of this contract in any way regarding the cost or value of extras, variations, allowances, deductions or the amount of damages in any manner growing out of the violation of any of the provisions of this contract, the decision of the Engineer shall be final and binding on both parties hereto.

Supervision, Materials, Workmanship and Inspection.

ART. 10. All work provided for under this contract shall be done under the direction and supervision of the Engineer and his properly authorized agents.

All equipment and materials of whatsoever kind to be used in the work shall be subject to the inspection and approval of the Engineer, and shall be subject to constant inspection before acceptance. Any imperfect work that may be discovered before its final acceptance shall be corrected immediately, and any unsatisfactory materials used in the work or delivered at the site shall be rejected and removed on the requirement of the Engineer. The inspection of any work shall not relieve the Contractor of any of his obligations to perform proper and satisfactory work, as herein specified, and all equipment and materials and work, which during the progress and before its final acceptance, may become damaged from any cause, or do not for any reason satisfy the requirements of these specifications, shall be removed and replaced by good and satisfactory equipment, materials and work, without extra charge therefor. Provided, however, that for material or equipment furnished under Division P, where delivery is specified, f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., any damage done after delivery shall be repaired by the contractor furnishing the material and equipment and shall be paid for by the contractor responsible for the damage. The Engineer and his assistants shall have at all times free access to every part of the work, and at all places where equipment or material to be used in the work is manufactured, or stored, and shall be allowed to examine any equipment or material furnished for use in the work under this contract.

Progress Certificates.

ART. 11. It is further expressly agreed that the granting of any progress certificates, or the payment of any moneys hereunder, shall in no way lessen the liability of the Contractor to replace defective equipment, material and work, though the same may not have been detected at the time such certificate was given or acted upon. All progress certificates, being made merely upon approximate estimates, shall be subject to the correction of the final certificate.

Patents.

ART. 20. It is further agreed that the Contractor shall indemnify, keep and save harmless said Sanitary District from all liabilities, judgments, costs, damages and expenses which may in any wise come against said Sanitary District, or which may be the result of an infringement of any patent by reason of the use of any material, machinery, devices, equipment or processes furnished or used in the performance of this contract, or by reason of the use of designs furnished by the Contractor and accepted by the Sanitary District, and in the event of any claim or suit or action at law or in equity of any kind whatsoever being made or brought against said Sanitary District, then the Sanitary District shall have the right to retain a sufficient amount of money in the same manner and upon the same conditions as hereinafter specified in the next following clause of this contract.

Provided, however, that the obligations imposed on said Contractor by this Article 20 shall not apply to claims for infringements of patents on activated sludge processes or machinery or equipment used in connection therewith.

Damages.

ART. 21. If any damage shall be done by the Contractor or by any person or persons in his employ to the owner or occupants of any land or to any real or personal property adjoining or in the vicinity of the work herein contracted to be done, or to the property of a neighboring contractor, the Engineer shall have the right to estimate the amount of said damage, and cause the Sanitary District to pay the same to the said owner, occupant or contractor, and the amount so paid for said damages shall be deducted from the money due said Contractor under this contract. Said Contractor covenants and agrees to pay all damages for any personal injury sustained by any person growing out of any act or doing of himself, or of his employes, that is in the nature of a legal liability, and he hereby agrees to indem-

nify and save the Sanitary District harmless against all suits or actions of every name and description brought against said Sanitary District for, or on account of any such injuries or such damages received or sustained by any person or persons, from said Contractor, his servants, agents or employes, in the execution of said work; or by or in consequence of any negligence in guarding the same; or by or on acount of any omission or act of said Contractor, his agents or employes; and the said Contractor further agrees that so much of the money due him under and by virtue of this contract, as shall be considered necessary by the Board of Trustees of said Sanitary District, may be retained by the Sanitary District until such suit or claim for damages shall have been settled, and evidence to that effect shall have been furnished to the satisfaction of the said Board of Trustees.

Employers' Liability Act.

ART. 22. The Contractor further agrees to insure to his employes or their beneficiaries the necessary first aid, medical, surgical and hospital services, and the compensation provided for in Act of the General Assembly of the State of Illinois, entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment within this State;" providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an act entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment, approved June 10th, 1911, in force May 1st, 1912;" approved June 28th, 1913, in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, and further agrees to indemnify, keep and save harmless said Sanitary District from all claims, judgments, awards and costs which may in any wise come against said Sanitary District by reason of any accidental injuries or death suffered by any of his employes in and about the performance of this contract.

Responsibility of Contractor.

ART. 23. The Contractor shall be responsible for the entire work until completed and accepted by the Sanitary District. The Contractor shall be required to give his personal attention to the fulfillment of this contract and to the execution of the work. He shall keep the same under his control, and shall not sublet any part of it, except as hereinafter specified. The Sanitary District will not recognize any parties engaged on the work embraced by this contract other than the Contractor and his employes.

The Contractor shall not assign by power of attorney or otherwise any portion of the moneys that may become due through the performance of this contract or any part thereof.

Subletting Work.

ART. 24. The Contractor shall not sublet any part of the work herein mentioned to any person or corporation that is not, in the opinion of the Engineer, competent, experienced and financially able to properly carry out and execute the same, and in the event that said Contractor desires to sublet any part of the work he shall, prior to such subletting, submit to the Engineer a statement showing the character of the work and the party or parties to whom it is proposed to sublet the same and his or their experience, financial ability and other qualifications for properly carrying out and completing the same, and the decision of the Engineer as to said qualifications, financial ability, experience and competency shall be final and binding upon both parties hereto. It is further understood and agreed that such subletting, or the approval thereof by the Sanitary District or by said Engineer, shall not directly or indirectly release or modify the responsibility of the Contractor for the satisfactory and entire completion of said work at each and every part and portion thereof, and that said Sanitary District shall not be liable to any sub-contractor for any claim or damages whatsoever. In case any party or parties, to whom any work under this contract shall have been sublet, shall disregard the directions of the Engineer or his duly authorized representatives, or shall furnish any unsatisfactory work, or shall fail or refuse in any way to conform to any of the conditions of this contract, then, in that case, upon the written order of the Engineer, the Contractor shall require said party or parties in default to discontinue work under this contract. Said work shall be corrected or made good and shall be completed by the Contractor, or by such other party or parties

agreed upon, who shall be satisfactory to the Engineer.

It is distinctly understood and agreed that the subletting of the work covered by this contract or any part thereof, except as herein above provided shall, after twenty (20) days' notice to said Contractor, work a forfeiture of this contract at the option of the Sanitary District.

Liens.

ART. 25. If at any time during the progress of said work the said Contractor shall fail or neglect to pay for any labor performed, material furnished, or tools, machinery, appliances, fuel, provisions or supplies of any sort or kind used or consumed in, upon, or on account of said work for ten (10) days after payment for same shall have become due, then the said Sanitary District shall have the power to pay for such labor, or for materials, tools, machinery, appliances, fuel, provisions or supplies, and the amount so paid shall be retained out of the money due or to become due to said Contractor. The said Sanitary District may refuse to make payment hereinafter mentioned to the extent of such indebtedness until satisfactory evidence in writing has been furnished that said indebtedness has been discharged. In any such case, said Sanitary District is hereby authorized and empowered by said Contractor to ascertain by the Engineer the amount due or owing from said Contractor to any laborer or laborers, or to any person or persons, or corporation, for labor, equipment, materials, tools, machinery, appliances, fuel, provisions or supplies of any sort or kind consumed upon, in or on account of the work covered by this contract in such manner and upon such proofs as the said Engineer may deem sufficient.

Time and Progress.

ART. 27. The Contractor agrees to begin the work covered by this contract within ten (10) days from the date of the approval by the Board of Trustees of said Sanitary District of the bond of said Contractor.

The Contractor for Division P hereby agrees to deliver the electrical equipment to the railroad within two hundred and seventy (270) calendar days from the said date of approval of the bond.

The words "deliver to the railroad" or "deliver" as used in this article shall be understood to mean delivery f. o. b. cars, The Chicago and North-Western Railway, Maywood, Illinois.

It is understood and agreed that TIME is of the essence of this contract, and that a failure on the part of any contractor to complete his work herein specified within the time specified will result in great loss and damage to said Sanitary District, and that on account of the peculiar nature of such loss or damage it is difficult, if not impossible, to accurately ascertain and definitely determine the amount thereof.

Liquidated Damages.

ART. 28. It is, therefore, covenanted and agreed that in case the said Contractor shall fail or neglect to complete work under Division P, within the respective times specified in Article 27, even though he is allowed to complete any one or more of said items of work, then said Contractor shall pay to said Sanitary District the sum of Ten Dollars ($10.00) for Division P for each and every day that said Contractor shall be in default in the completion of said work ready for operation.

Said sum of Ten Dollars ($10.00) per day is hereby agreed upon, fixed and determined by the parties hereto as the liquidated damages which said Sanitary District will suffer by reason of such default, and not by way of a penalty. In case the said Contractor does not complete the work covered by this contract on or before the time specified herein for the completion of the same, then Engineer shall decide the number of days the said Contractor is in default, and the decision of said Engineer shall be final and binding upon both parties hereto.

It is further agreed that if said Sanitary District shall accept any work or make any payments under this contract after any such default, such acceptance, payment or payments shall not in any respect constitute a waiver or modification of any of the provisions hereof, and particularly the provisions in regard to Time and Liquidated Damages for Delays.

Extensions or Additions.

ART. 29. In the event that any material alterations or additions are made as herein specified, which in the opinion of the Engineer will require additional time for the execution of any work under this contract, then in that case the time of the completion of the work shall be extended by such a period of time as

may be fixed by said Engineer, and his decision shall be final and binding upon both parties hereto, provided that in such case the Contractor, within four (4) days after being notified in writing of such alterations or additions, shall request in writing an extension of time but no extension of time shall be given for any minor alterations or additions, and the provisions of this article shall not otherwise alter, change or invalidate the provisions of this contract with reference to Liquidated Damages, and the said Contractor shall not be entitled to any damages or compensation from the said Sanitary District on account of such additional time required for the execution of the work.

Notice to Suspend Work.

ART. 30. The Contractor shall delay or suspend the progress of the work, or any part thereof, whenever he shall be so required by written order of the Engineer, and for such periods of time as the Engineer may order, provided that in the event of such delay or delays or of such suspension or suspensions of the progress of the work or any part thereof, the time for the completion of the work so suspended or of work delayed by such suspension or suspensions, shall be extended for a period equivalent to the time lost by reason of such suspension or suspensions, but such order of the Engineer shall not otherwise modify or invalidate in any way any of the provisions of this contract, and said Contractor shall not be entitled to any damages or compensation from the Sanitary District on account of such delay or delays, suspension or suspensions.

Unavoidable Delay.

ART. 31. Should the Contractor be obstructed or delayed in the commencement, prosecution or completion of any part of said work by any act or delay of the Sanitary District, or by any act or delay on the part of railroads in furnishing cars or transporting said equipment, material or appurtenances for said work, or by War Boards or Councils of the Federal Government or State Councils of Defense, or by Federal administrators, or by delays in obtaining priority certificates from the United States government if such are required, or by riot, insurrection, war, pestilence, acts of public authorities, fire, lightning, earthquake, cyclone, floods or through any default or delay of other parties under contract with said Sanitary District, or due to strikes, or to other causes, which causes of delay mentioned in this article (Art. 31), in the opinion of the Chief Engineer are entirely beyond the control of the Contractor, then the time herein fixed for the completion of the work so delayed shall be extended for a period equivalent to the time lost by reason of any of the causes aforesaid, but no such allowance shall be made unless at the commencement of the delay the Contractor notify verbally the Engineer in direct charge in the field, and unless the Contractor notify the Chief Engineer in writing before the fifth of each succeeding month of all delays occurring in the preceding month.

It is further expressly agreed that said Contractor shall not be entitled to any damages or compensations from the said Sanitary District on account of any delays resulting from any of the causes above specified in this article (Art. 31) except compensation for wages for extra time for any necessary watchmen and for extra premiums on his bond, actually paid by said Contractor on account of said additional time so required to complete all work hereunder, due only to delays caused by the Sanitary District or by other parties under contract with said Sanitary District. The Chief Engineer shall decide the number of days that said Contractor has been so delayed and his decision shall be final and binding upon both parties hereto.

Forfeiture of Contract.

Division P.

ART. 32. It is further agreed by and between the parties hereto, that if said Contractor abandons this contract or fails financially or from any other cause whatsoever, is unable to carry out the terms and conditions of this contract and is unable to complete the same or if he assigns this contract without the consent of the Sanitary District first having been obtained, then said Sanitary District may declare this contract forfeited either as to a portion of the same or the whole thereof and may readvertise for bids for furnishing and delivering the balance of the material, machinery or equipment herein specified and award a contract therefor to the lowest responsible bidder, or the Sanitary District may purchase on the open market at the lowest price then obtainable, such quantity or quantities of material, ma-

chinery or equipment as the said contractor shall fail to furnish and deliver as herein specified, notwithstanding such forfeiture. The cost of obtaining said material, machinery or equipment, if the same is obtained by awarding a new contract therefor or if so purchased on the open market, and all costs and expenses incurred by the Sanitary District in purchasing and delivering such cable, material, machinery or equipment in excess of the cost hereunder to said Sanitary District, shall be paid to the Sanitary District by said Contractor.

Contractor's Bond.

ART. 33. The Contractor shall furnish a bond in the sum of fifty (50) per cent of the amount of this contract for the performance of the work under this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, conditioned upon the faithful performance of all the terms and conditions of this contract; and should the sureties on said bond at any time fail financially, or be, in the opinion of the said Board of Trustees, insufficient security for the penalty of said bond, then in that case the said Board of Trustees may, on giving ten (10) days' notice thereof in writing, require said Contractor to furnish a new and additional bond in place of the bond so having become insufficient, with such securities thereon as shall be satisfactory to the Board of Trustees of said Sanitary District.

Maintenance Bond.

ART. 34. Division P. For one year, subsequent to the completion of the operating tests and the acceptance of the equipment included under this contract, the Contractor shall make good, at his own expense, any excessive wear to any parts, any defects in or damages to any equipment included in this contract, which may arise from faulty materials, design or construction, or from the inability of any of the equipment to successfully perform all the work put upon it within the limits of these specifications.

The Contractor shall furnish a bond in the sum of five (5) per cent of the amount of this contract, with good and sufficient sureties, the same to be satisfactory to the Board of Trustees of the Sanitary District, for the faithful fulfillment of the requirements of this section. The execution of said bond shall be a condition precedent to the final payment less than the following:

Prices.

ART. 35. And the said Contractor further agrees to accept the following prices as full compensation for furnishing all the equipment and material, and for doing all the work contemplated and specified in this contract; also for all loss or damage arising out of the nature of the work aforesaid, or from the action of the elements, or from any unforeseen obstruction or difficulties which may be encountered in the prosecution of the same; and for all risks of every description connected with the work; and for well and faithfully completing the work and the whole thereof, in full compliance with the drawings and specifications and the requirements of the Engineer under them, to-wit:

DIVISION P.

ELECTRICAL EQUIPMENT.

For the furnishing and delivery complete, of the three (3) vertical type induction motors, six (6) horizontal shaft induction motors, transformers and auxiliary apparatus, with appurtenances, complete, as specified, the lump sum of Twenty-two Thousand Three Hundred Seventy-five Dollars ($22,375.00).

The Contractor hereby guarantees the efficiency of apparatus as hereinafter stated and agrees to furnish the make of apparatus hereinafter listed.

Induction Motors for Pumps.

The induction motors furnished hereunder will be manufactured by the General Electric Company at Schenectady, N. Y.

The efficiency at rated voltage and frequency including all losses will be not less than the following:

	—Per Cent Efficiency at—			
H.P. of Motor	¼ Load	½ Load	¾ Load	Full Load
50.....	79	81	84	85

The power-factor at rated voltage and frequency will be not less than the following:

	—Per Cent Power-Factor at—			
H.P. of Motor	¼ Load	½ Load	¾ Load	Full Load
50.....	40	51	64	73

The slip in per cent of Synchronous

speed will be not greater than the following:

H.P. of Motor	¼ Load	½ Load	¾ Load	Full Load
	——Per Cent Slip at——			
50.....	1.75	2.5	3.75	5

The torque in foot-pounds of the induction motors furnished hereunder at rated voltage and frequency will be not less than the following:

H.P. of Motor	¼ Load	½ Load	¾ Load	Full Load	Starting	Running
	—Torque in Foot-Pounds at—					
50	163	345	508	1560		690

Induction Motors for Blowers.

The induction motors furnished hereunder will be manufactured by the General Electric Co. at Schenectady, N. Y.

The efficiency at rated voltage and frequency including all losses will be not less than the following:

H.P. of Motor	¼ Load	½ Load	¾ Load	Full Load
	—Per Cent Efficiency at—			
150.....	87	89	91	91
75.....	88	90	90.5	90
30.....	87	89	89.5	88.5

The Power-factor at rated voltage and frequency will be not less than the following:

H.P. of Motor	¼ Load	½ Load	¾ Load	Full Load
	—Per Cent Power-Factor at—			
150.....	57	68	79	84
75.....	72	80	87	90
30.....	65	75	84	88

The slip in per cent of synchronous speed will be not greater than the following:

H.P. of Motor	¼ Load	½ Load	¾ Load	Full Load
	——Per Cent Slip at——			
150.....	.9	1.75	2.65	3.5
75.....	1.13	2.25	3.38	4.5
30.....				4.5

The torque in foot-pounds of the induction motors furnished hereunder at rated voltage and frequency will be not less than the following:

H.P. of Motor	¼ Load	½ Load	¾ Load	Full Load	Starting	Running
	—Torque in Foot-Pounds at—					
150	337	675	1012	3300		1350
75	114	229	344	1050		458
30	46	92	137	375		183

Power Transformers.

The 300 K.V.A. transformers furnished hereunder will be manufactured by the General Electric Co. at Pittsfield, Mass.

The efficiency at rated voltage and frequency will be not less than the following:

100% P. F.	Full Load	¾ Load	½ Load
	Per Cent Efficiency at		
.....	98.2	98.3	98.1

The regulation at rated load, voltage and frequency will be not greater than the following:

Per cent regulation at 100 per cent P. F. 1.5
Per cent regulation at 80 per cent P. F. 4

The exciting current for 60 cycles will be as follows:

At normal voltage.....5%
At 110 per cent of normal voltage...8%
The per cent reactance will be.....4.75

The losses at normal rated load by wattmeter method will be as follows:

Copper losses .....3850 watts
Core losses .....1625 watts

Oil Switches.

The oil switches furnished hereunder will be as follows:

The oil switches for the two 12,000 volt lines and the high side of the transformer bank will be General Electric Co., Type K-12.

Voltage rating, 15,000.

Continuous carrying capacity in amperes per pole, 300.

Ultimate rupturing capacity in amperes per pole at 12,000 volts, 1,500.

The oil switch for the low side of the transformer bank will be General Electric Co., Type K-12-B.

Voltage rating, 4,500.

Continuous carrying capacity in amperes per pole, 1,500.

Ultimate rupturing capacity in amperes per pole at 600 volts, 37,500.

The oil switches for the 440 volt feeders will be General Electric Co., Type K-13 or K-5.

Voltage rating, 3,300 (K-5, 4,500 volts).

Continuous carrying capacity in amperes per pole, 200.

Ultimate rupturing capacity in amperes per pole at 600 volts, 12,500 (K-5, 16,000 amperes).

Instrument Transformers.

The current and potential transformers furnished hereunder will be Current, General Electric Co., Type K-48, Potential, General Electric Co., Type CE-2.

Lighting Transformers.

The 440 to 110-220 volt lighting transformer furnished hereunder will be manufactured by the General Electric Company at Pittsfield, Mass.

The foregoing prices shall cover the cost of all plant and tools and of all work and materials of whatsoever kind that shall be furnished or needed to complete the entire work in all details ready for the purpose for which it is intended. Said prices shall also cover all royalties for patents and patented material, appliances and processes used in the work described in the specifications and agreements. Before final payment is made the Contractor shall furnish a satisfactory guarantee against all claims on account of work performed, tools and plant employed, and material and labor furnished hereunder, and against all claims for patents, patented materials, appliances and processes used in or on account of the work under this contract.

Progress Estimates.

ART. 36. Division P. The said Sanitary District agrees to pay said Contractor the sum herein specified in monthly installments as the work progresses upon certificates signed by said Engineer, but said certificates, however, shall in no way lessen the total and final responsibility of the Contractor. It is agreed that the amounts to be paid from time to time shall in no case exceed Eighty-Seven and One-Half (87½) Per Cent of the value of the work properly performed under this contract, and that the remaining Twelve and One-Half (12½) Per Cent shall be reserved by the said Sanitary District as part security for the faithful performance hereof and shall not become due said Contractor until the expiration of thirty (30) days after the completion of said work and the completion of the erection and the operating tests, and delivery of the final certificates of said Engineer, and after payment by said Contractor of all claims for labor and material furnished in the performance of work under this contract, provided, however, that said twelve and one-half (12½) per cent so reserved may be paid to said Contractor at the expiration of thirty (30) days from the completion of delivery f. o. b. cars, the C. and N. W. Ry., Maywood, Ill., with the consent of the Chief Engineer and the sureties on the bond of the Contractor, in which case said bond is to remain in full force to the completion of the operating tests and the final acceptance of the equipment included under this contract.

The value of the work properly performed shall be estimated by the Engineer at the end of each month. Where unit prices are specified, the estimate shall be based on the quantities estimated. Where lump sum prices are specified, the Engineer shall estimate the proportionate part of the lump sum accomplished. To facilitate this estimate, the Contractor shall furnish the Engineer with a balanced statement in detail showing the division of cost for each of the various sub-items comprised in the lump sum.

Final Payment.

ART. 37. Upon the completion of all the work included under this contract, the performance of satisfactory operation and acceptance tests, and the execution of the bond called for in Article 34, the Engineer will certify to that effect. The said Contractor further agrees that he shall not be entitled to demand or receive final payment for any portion of the aforesaid work or materials except in the maner set forth in this agreement; nor until all the stipulations, provisions and conditions hereinbefore mentioned are complied with, and the said Engineer shall have given his certificate to that effect; whereupon said Sanitary District will, at the expiration of thirty (30) days after such completion and delivery of such certificates pay, and it hereby binds itself to pay the said Contractor in cash the whole amound of money accruing to said Contractor under this contract, except such sum or sums of money as may have been already paid, and as may be lawfully retained under any of the provisions of this contract herein set forth.

This agreement shall be binding upon the heirs and legal representatives of said Contractor.

IN WITNESS WHEREOF, On the day and year first above written, The Sanitary District of Chicago has caused these presents to be executed in duplicate by the Chairman of its Finance Committee, and to be duly attested, and its corporate seal to be hereunto affixed, and the

party of the second part has caused these presents to be executed in duplicate by its President, to be duly attested and its corporate seal to be hereunto affixed.

THE SANITARY DISTRICT OF CHICAGO.
By JAS. H. LAWLEY,
Chairman of Its Finance Committee.
Attest:
JOHN MCGILLEN,
Clerk.

CONTRACTOR'S BOND.

KNOW ALL MEN BY THESE PRESENTS, That we, W. A. Jackson Company, as principal and Southern Surety Company as surety, are held and firmly bound unto The Sanitary District of Chicago in the penal sum of Eleven Thousand One Hundred Eighty-seven Dollars and Fifty Cents ($11,187.50), lawful money of the United States, for the payment of which sum of money well and truly to be made, we bind ourselves, our heirs, executors and administrators, successors and assigns, jointly and severally, firmly by these presents.

Sealed with our hands and seals and dated this first day of May, A. D. 1919.

THE CONDITION OF THE ABOVE OBLIGATION IS SUCH, That whereas the above bounden W. A. Jackson Company has entered into a certain contract with The Sanitary District of Chicago, bearing date the first day of May, A. D. 1919, for doing all the work, and furnishing all the materials, tools, labor, appliances and appurtenances necessary for the Furnishing and Delivering Electrical Equipment, including three (3) vertical shaft, squirrel cage induction motors, each 50 H.P.; four (4) horizontal shaft, slip ring, wound rotor motors, each 150 H.P.; two (2) horizontal shaft, squirrel cage induction motors, comprising one (1) at 75 H. P. and one (1) at 30 H. P.; four (4) 300 K.V.A. transformers, oil switch equipment and miscellaneous appurtenances, f. o. b. cars, the Chicago & Northwestern Railway, in the Village of Maywood, County of Cook, State of Illinois, as Specified Under Division P of the attached contract.

Now, if the said W. A. Jackson Company shall in all respects well and truly keep and perform the said contract on its part in accordance with the terms thereof, and specifications therein contained, and the plans accompanying the same, and in the time and manner therein prescribed, and further shall protect, indemnify, keep and save harmless The Sanitary District of Chicago against all liabilities, judgments, costs, damages, expenses and attorney's fees which may in any wise come against said The Sanitary District of Chicago in consequence of the awarding of such contract, or which may in any wise result from the carelessness or neglect of said W. A. Jackson Company, its agents, employes or workmen, in any respect whatsoever, or which may result on account of any infringement of any patent by reason of the materials, machinery, processes, devices or apparatus used or furnished in the performance of said contract, except insofar as all liability on account of claims for infringements of patents on activated sludge processes or machinery, or equipment used in connection therewith, is expressly exempted; and moreover shall pay to said The Sanitary District of Chicago any sum or sums of money determined by the Engineer to be due said The Sanitary District of Chicago by reason of any failure or neglect in the performance of said contract, and shall pay all valid claims and demands whatsoever, including repayment of overpayments and including also all valid claims and demands for first aid, medical, surgical and hospital services and for compensation for accidental injuries or deaths, under the provisions of the Act of the General Assembly of the State of Illinois entitled "An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of

employment within this State; providing for the enforcement and administering thereof, and a penalty for its violation, and repealing an Act entitled 'An Act to promote the general welfare of the people of this State by providing compensation for accidental injuries or death suffered in the course of employment,' approved June 10th, 1911; in force May 1st, 1912," approved June 28th, 1913; in force July 1st, 1913, and all Acts amendatory thereof and supplementary thereto, which may accrue to each and every person who shall be employed by said W. A. Jackson Company in or about the performance of said contract, or which shall accrue to the beneficiaries of any such person, then is this obligation to be null and void, otherwise to remain in full force and effect.

AND IT IS HEREBY EXPRESSLY UNDERSTOOD AND AGREED, and made a condition hereof, that any judgment rendered against said The Sanitary District of Chicago, as aforesaid, in any suits for damages occasioned by carelessness or neglect of said W. A. Jackson Company or its agents, employes or workmen in the premises, and also that any judgment of any court or award of any Board of Arbitrators or of the State Industrial Board of the State of Illinois rendered against said The Sanitary District of Chicago in any suit or claim arising under the said Act of the General Assembly of the State of Illinois, approved June 28th, 1913; in force July 1st, 1913, and all acts amendatory thereof and supplementary thereto, relating to compensation for accidental injuries or death suffered by employes, in the course of their employment, when notice of the pendency of such suit, hearing or arbitration shall have been given said W. A. Jackson Company shall be conclusive against each and all parties to this obligation, as to amount, liability and all other things pertaining thereto.

W. A. JACKSON CO. (Seal)
W. A. JACKSON,
President.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that on account of the swift current in the extension of the Main Drainage Channel below the power house it is advisable, in order to protect boats navigating therein, to construct a boom along one pier of the Elgin, Joliet & Eastern Railroad bridge which spans the channel. He further states that boats are now navigating the Main Channel and Illinois & Michigan Canal and he recommends that a boom be installed at said point at an estimated cost of $250.00 for materials and $750.00 for wages of employes of the Sanitary District in doing said work.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer be, and he is hereby authorized and directed to have the work above specified performed, provided the total cost shall not exceed the sum of $1,000.00.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

MATT A. MUELLER,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark,

Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering transmits herewith a form of lease wherein Augusta Schwarz leases to the Sanitary District the first floor and east half of the basement of the building known as Number 288 Canal street, in the City of Blue Island, for the term of one year from June 13, 1919, at a monthly rental of $22.00, to be used as a field office by the Engineering Department.

Your Committee having had the matter under consideration recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate, the lease above described.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

MATT A. MUELLER,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering to which were referred at the meeting held April 24, 1919 (page 352 of the Proceedings), bids for furnishing and delivering the traveling crane for the Desplaines River Sewage Treatment Works designated as Division "N" of the specifications, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer, finds that the lowest responsible bidder is the Bedford Foundry & Machine Company, of Bedford, Ind.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work and, having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing and delivering the traveling crane for the Desplaines River Sewage Treatment Works designated as Division "N" of the contract be, and the same is hereby awarded to the Bedford Foundry & Machine Company for the lump sum price of $2,300.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by said Bedford Foundry & Machine Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the re-

spective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT A. MUELLER,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that on May 2, 1919, a short section of a two-foot sewer on 115th street at the west side of Prairie avenue, partially collapsed. Said sewer was built by the City of Chicago, but was rebuilt by Byrne Brothers Dredging & Engineering Company across the top of the Calumet Intercepting Sewer under its contract for the construction of Section 6 of the Calumet Intercepting Sewer.

He further states that said collapse was due to a settlement of the ground which was not detected at the time the sewer was rebuilt and was not the fault of said contractor.

He further states that it was necessary to repair said sewer at once and he employed a local sewer contractor to repair the same at an estimated cost of $200.00, and requests that his action in the premises be ratified and confirmed.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the action of the Chief Engineer in employing a local sewer contractor to perform the work above specified on the basis stated be, and the same is hereby ratified and confirmed.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT A. MUELLER,
H. E. LITTLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Electrical Development herewith presents renewal contracts with the Universal Stamping & Manufacturing Company, 1925 South Western avenue; the Crown Stove Works, 4631 West 13th street; Illinois Show Case Works, 1735 North Ashland avenue, and Alwart Brothers Coal Company, 1854 Webster avenue, wherein they agree to take and the Sanitary District agrees to furnish electrical energy for the periods and upon the terms and conditions therein set forth. Said contracts have been approved by the Electrical Engineer.

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate the attached contracts, which have been properly executed by said above named parties.

Respectfully submitted,

H. E. LITTLER,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, May 15, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of action taken:

NEW APPOINTMENTS.

Provided for in 1919 Budget.

Engineering Department—

J. X. Cohen, Assistant Engineer, $250.00 per month.

Edgar Diercks, Tracer, $130.00 per month.

Daniel Reagan, Timekeeper, $115.00 per month.

John Koenig, Bridge Tender (vacation period), $100.00 per month.

Chas. Johnson, Operator Concrete Mixer, 55c per hour.

Louis Welzien, Laborer, 45c per hour.
Thos. Kenefick, Laborer, 45c per hour.
Jos. Sullivan, Laborer, 45c per hour.
Edward Welsh, Laborer, 45c per hour.
John Thornton, Laborer, 45c per hour.
Martin Hosty, Laborer, 45c per hour.
Jerry Sweig, Laborer, 45c per hour.
Louis Cherone, Laborer, 45c per hour.
John Smith, Laborer, 45c per hour.
Thos. Riordan, Laborer, 45c per hour.
Steve Zaccone, Laborer, 45c per hour.
Aug. Suzugga, Laborer, 45c per hour.
John Murray, Laborer, 45c per hour.
James Kelly, Laborer, 45c per hour.
John Muldoon, Laborer, 45c per hour.
Jas. McCummiskey, Laborer, 45c per hour.
Dennis Martin, Laborer, 45c per hour.
Thos. Murphy, Laborer, 45c per hour.
Jos. Donohue, Laborer, 45c per hour.

Electrical Department—

Andrew F. Ryder, Operator (vacation period), $125.00 per month.

William O'Hern, Laborer, 45c per hour.

Felix Donaldson, Caulker (temporary), 80c per hour.

Law Department—

Otto Kolar, Asst. Attorney, $400.00 per month.

Willis V. Jefferson, Law Clerk, $200.00 per month.

John J. Gorman, Law Clerk, $200.00 per month.

INCREASE.

Provided for in 1919 Budget.

Engineering Department—

Chas. Hopfer, from Laborer at 45c per hour to Sub-Foreman at $5.00 per day.

REINSTATEMENTS.

Due to Honorable Discharge from U. S. Army Service.

Electrical Department—

Otto E. Elmore, Operator, $125.00 per month.

Victor Rodighiero, Laborer, 50c per hour.

Police Department—

Frank Warszynski, Patrolman (vacation period), $100.00 per month.

Engineering Department—

Chas. J. Penders, Laborer, 45c per hour.

Wm. Sullivan, Laborer, 45c per hour.

Respectfully submitted,

GEORGE W PAULLIN,
Chairman.

JAS. H. LAWLEY,
WALLACE G. CLARK,
H. E. LITTLER,
MATT A. MUELLER,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—None.

Passed and not voting—Messrs. Sergel and Nance—Two.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from the Armour Grain Company, which states that at the hearing in regard to the proposed new Twelfth street bridge held recently, it had protested against the proposed 140-foot channel, but that at the meeting of the Chicago Association of Commerce held yesterday, Mr. Pihlfeldt, City Engineer, explained how one of the abutments was to be moved back so that the plan will not interfere with navigation, and that it desired to withdraw the protest made at the original meeting.

Referred to the Committee on Engineering.

The Clerk presented a communication from the Ketler-Elliott Erection Company, which states that said company intends to erect buildings on the land leased by it from the Sanitary District on the Main Channel and that it desires to install a twelve inch tile sewer to carry sanitary sewage and clean water to the Main Channel, and requests to be informed of the proper procedure to procure permission to construct said sewer.

Referred to the Committee on Engineering.

MISCELLANEOUS AND NEW BUSINESS.

Mr. Nance presented the following order:

WHEREAS, The Board of Trustees of The Sanitary District of Chicago is given the right under the law to prescribe the duties of the employes of the District, and

WHEREAS, To prescribe such duties intelligently it is necessary for the Trustees to know the qualifications of the employes as ascertained by the Committee on Employment at the time such employes were placed on the payrolls of the District; therefore, be it

Ordered, That the Chairman of the Committee on Employment be, and he is hereby directed to report to the next regular meeting of the Board of Trustees the names and addresses of all employes of the District, together with their qualifications for their positions as revealed at the time of their employment and the name of the person or persons recommending such employes.

Mr. Nance moved that the order be passed.

Mr. Clark moved that the order be laid on the table.

On roll call the motion to lay on the table was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

ADJOURNMENT.

Mr. Paullin moved that the Board adjourn.

The motion prevailed.

John W. Gillson
Clerk

JUL 10 1919

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, MAY 22, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the regular meeting of May 1, 1919, be approved as printed without being read.

The motion prevailed.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a

communication from the Electrical Engineer in which he states that it is necessary to replenish the supply of rubber coats and boots for the use of the linemen and helpers in the Electrical Department and that thirty-four pairs of boots and an equal number of rubber coats are needed for said purpose.

He further states that prices for said articles have been submitted by several dealers in rubber goods and the lowest price submitted was that of the Republic Rubber Company in the sum of $395.00, and he requests authority to purchase said coats and boots for said sum.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to accept the offer of the Republic Rubber Company to furnish the coats and boots above specified for the sum of $395.00.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

GEORGE W. PAULLIN,
MATT. A. MUELLER,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has received a communication from the Electrical Engineer in which he states that the storage battery belonging to the Sanitary District, which has been in service in the County Building for the past ten years, is in need of thorough overhauling. He further states that said storage battery was manufactured and installed by the Electric Storage Battery Company, and it is not practicable to obtain the necessary repair parts from any other manufacturer than said company which offers to supply the same for the sum of $894.90, f. o. b. cars at its factory in Philadelphia. Said company will not agree to install said repair parts and overhaul said battery for an agreed price, but offers to do said work on a "force account" basis.

The Chief Engineer estimates the cost of installation at the sum of $600.00 and requests that he may accept the offer of said company on the basis stated.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Electrical Engineer be and he is hereby authorized and directed to accept the offer of the Electric Storage Battery Company to furnish the necessary repair parts and perform the work above specified, provided the total cost of the same shall not exceed the sum of $1,494.90.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it deemed it advisable to dispose of scrap material and scrap machinery that has accumulated at the terminal station at 31st street and Western avenue, and at the power house at Lockport respectively and authorized the Clerk to obtain competitive bids therefor and submit the same to your Committee.

Your Committee further reports that seven bids based on estimated quantities were received for the scrap material at the terminal station and the highest bid was that of the Eastern Metal and Refining Company in the sum of $1,650.96 and three bids on the same basis were received for the scrap machinery at the power house and the highest bid was that of the Humphrey & Sons Co. of Joliet in the sum of $346.50 and the Electrical Engineer recommends that said bids be accepted.

Your Committee having considered said matter, recommends the passage of the following order.

Ordered, That the Electrical Engineer be, and he is hereby authorized and directed to accept the bids of the Eastern Metal and Refining Company and Humphrey & Sons Company above specified on the basis stated and deliver said scrap material and scrap machinery to said respective bidders upon the receipt of the sums bid therefor.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that the Village of Broadview on May 14, 1919, passed an ordinance granting the Sanitary District the right, permission and authority to enter upon, use and occupy such streets, alleys and public places within the corporate limits of said Village as the Sanitary District might deem necessary in order to construct, maintain, change, extend, reconstruct, repair and modify intercepting sewers, adjuncts and additions to its Main Channel and pumping stations, sewage treatment plants and appurtenances connected therewith.

Your Committee further reports that it has carefully examined said ordinance which has been approved by the Chief Engineer and Attorney and is of the opinion that the rights of the Sanitary District are properly safeguarded therein and said ordinance should be accepted by the Board, and therefore recommends the passage of the following order:

Ordered, That the ordinance of the Village of Broadview above specified, which is herewith transmitted to the Board, be and the same is hereby approved and accepted by The Sanitary District of Chicago, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to file with the Clerk of the said Village of Broadview

such documents as may be necessary to make such acceptance effective, and it is further

Ordered, That the form of said ordinance be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the ordinance passed by the Village of Broadview, referred to in the foregoing report:

AN ORDINANCE

Concerning the Right of The Sanitary District of Chicago to Construct, Reconstruct, Maintain and Operate an Intercepting Sewer, Adjunct and Addition to Its Main Channel Within the Village of Broadview.

Be It Ordained by the President and the Board of Trustees of the Village of Broadview:

SECTION 1. That the right of The Sanitary District of Chicago to construct such intercepting sewers, adjuncts and additions to its main channel, and such pumping stations, sewage treatment plants and appurtenances connected therewith, as the Board of Trustees of The Sanitary District of Chicago shall deem necessary to dispose of and convey to its main channel the sewage of the Villages of Forest Park, River Forest and Maywood and other parts of the township of Proviso, County of Cook and State of Illinois, and construct and maintain such intercepting sewers, adjuncts and additions to said main channel and such pumping stations, sewage treatment plants and appurtenances connected therewith, within the corporate limits of the Village of Broadview, and for such purpose to enter upon, use and occupy the streets, alleys, public places or such portions thereof within or without the corporate limits of said Village as The Sanitary District of Chicago may deem necessary to construct and maintain, change, modify, extend, reconstruct, repair and operate said intercepting sewers, adjuncts and additions and such pumping stations, sewage treatment plants and appurtenances connected therewith, subject to the provisions and limitations of an Act entitled, "An Act to Create Sanitary Districts and to Remove Obstructions in the Desplaines and Illinois Rivers,' approved May 20, 1889 and in force July 1, 1889, and all amendments thereto, is hereby recognized by the Village of Broadview, and such right of The Sanitary District of Chicago is hereby confirmed.

SEC. 2. The Village of Broadview hereby gives and grants to The Sanitary District of Chicago the right, permission and authority to enter upon, use and occupy such streets, alleys and public places, within the corporate limits of the Village of Broadview, as The Sanitary District of Chicago may deem necessary in order to construct, maintain, change, extend, reconstruct, repair and modify such intercepting sewers, adjuncts and additions to its main channel and such pumping stations, sewage treatment plants and appurtenances connected therewith. The location, size and manner of construction of said intercepting sewers, adjuncts and additions, pumping stations, sewage treatment plants and appurtenances shall be in accordance with such plans and specifications as may be adopted by The Sanitary District of Chicago, and

The Village of Broadview further agrees that all materials, plant and equipment used in the construction of said intercepting sewers, adjuncts and additions to said Main Channel and said pumping stations, sewage treatment plants and appurtenances connected therewith, may be transported to the site of said work on and across the streets, alleys and public places of said Village of Broadview by the use of dinkey engines and cars running on temporary tracks laid on the surface of said streets, alleys and public places, or by the use of horses and vehicles or by other means of transportation, and that all surplus soil and debris excavated in the course of the construction of said intercepting sewer, adjuncts and additions and said pumping stations, sewage treatment plants and appurtenances connected therewith, may be disposed of by The Sanitary District of Chicago or its contractor in the same manner as hereinabove specified for the transportation of material and plant.

SEC. 3. The said intercepting sewers, adjuncts and additions to the main channel of The Sanitary District of Chicago and said pumping stations, sewage treatment plants and appurtenances connected therewith shall be constructed and maintained by said The Sanitary District of Chicago at its own cost and expense.

SEC. 4. The said Village of Broadview does hereby direct and shall by ordinance or resolution require all persons, partnerships or corporations, who shall at the time of the construction of said intercepting sewers, adjuncts and additions, pumping stations, sewage treatment plants and appurtenances connected therewith, own, operate or maintain any conduits, wires, poles, pipes, gas mains, manholes, cables, street railway tracks and equipment or other structures within that portion of the streets, alleys and public places to be used in the construction, repair, extension or modification of such intercepting sewers, adjuncts and additions, pumping stations, sewage treatment plants and appurtenances, at his, its or their own expense to make such changes in the location of such conduits, wires, poles, pipes, gas mains, manholes, cables, street railway tracks and equipment or other structures as may be rendered necessary by the construction of said intercepting sewers, adjuncts and additions to said main channel, and said pumping stations, sewage treatment plants and appurtenances connected therewith.

The Sanitary District of Chicago shall have the right and the right is hereby given and granted to it to take such steps in the name of the Village of Broadview or otherwise as it may deem necessary for the enforcement of any ordinance, order or resolution of the Village of Broadview necessary to be enforced to accomplish the purposes herein mentioned at the expense of The Sanitary District of Chicago; and the said The Sanitary District of Chicago shall indemnify and save harmless the said Village of Broadview from any and all damages or claims that are in the nature of a legal liability that may be sustained or made by reason of the passage or enforcing of such ordinance, order or resolution.

SEC. 5. That whenever or wherever The Sanitary District of Chicago shall in the construction of its said intercepting sewer, adjuncts and additions to its main channel, intersect or cut, or cause to be intersected or cut, any sewers, sewerage pipes, or other pipes or structures through which sewage or drainage may flow, The Sanitary District of Chicago shall restore said pipes, or structures to their former condition of usefulness, in a manner to be approved by the Chief Engineer of The Sanitary District of Chicago.

SEC. 6. The said intercepting sewer, adjuncts and additions to the said main

channel and said pumping stations, sewage treatment plants and appurtenances connected therewith to be constructed as provided in this ordinance, shall be constructed, maintained and operated solely by The Sanitary District of Chicago, and the said Village of Broadview shall not be held responsible in any manner for the location and manner of construction, maintenance or operation of the same; and The Sanitary District of Chicago shall indemnify and hold harmless the Village of Broadview from any and all claims for damages to real or personal property by reason of the construction or manner of construction of said intercepting sewer, adjuncts and additions, pumping stations, sewage treatment plants and appurtenances within the corporate limits of said Village of Broadview.

SEC. 7. That the Sanitary District of Chicago shall restore as soon as practicable to their former state of usefulness, all streets, alleys and public places and all pavements, walks, cross-walks, curbs and other public property upon, under and through which said intercepting sewer, adjuncts and appurtenances are constructed and which are damaged thereby within the corporate limits of said Village of Broadview, except that the Sanitary District of Chicago shall not be held liable for such ordinary wear and tear as may be sustained by hauling material, surplus excavation or equipment in motor trucks, horse drawn wagons or trucks, or other vehicles. All surplus excavation and other spoil shall be removed from the site of the work by The Sanitary District of Chicago as soon as practicable, said Village of Broadview hereby agreeing to permit said spoil or any portion thereof to be carried through the streets, alleys and other public places within said Village of Broadview, and to be deposited within the corporate limits of said Village. The public use of the public property within the said Village of Broadview above specified shall not be unnecessarily interrupted or interfered with.

Insofar as is practicable, The Sanitary District of Chicago shall construct and maintain for both street and foot traffic temporary bridges or temporary diversions until the pavement, walks and cross-walks removed or disturbed by reason of said work of excavation shall be restored to their former usefulness.

SEC. 8. In consideration of the passage of this ordinance and the benefit conferred thereby on the Village of Broadview, said Village of Broadview shall and does hereby give, grant and issue without fees or cost therefor to The Sanitary District of Chicago or to any contractor to whom the work or any part thereof specified in this ordinance shall be awarded, all permits or licenses required for doing said work, and shall furnish free of cost to The Sanitary District of Chicago, or to any contractor to whom the work or any part shall be awarded at any existing water connection or hydrant, all water needed by it or them in the performance of said work to the extent of the reasonable capacity of the Village's water plant to furnish the same in addition to the Village's own reasonable needs.

Further, said Village of Broadview agrees that it will employ and furnish at its own expense any and all engineers or inspectors required by the rules and ordinances of said Village or who may be employed by said Village for any purpose in connection with the construction, maintenance, repair or reconstruction of said intercepting sewer, adjuncts and appurtenances.

SEC. 9. This ordinance shall be in force and effect from and after its passage and approval and the acceptance of the same by The Sanitary District of Chicago within ninety (90) days from the date of the passage hereof, which acceptance shall be evidenced by a certified copy of the order, resolution or ordinance of the Board of Trustees of

The Sanitary District of Chicago accepting the same, filed with the Clerk of the Village of Broadview.

HERMAN C. BERNDT,
President of the Village of Broadview.
Attest:
JAMES GRANT, (Seal)
Village Clerk.
Approved as to form:
JAS. M. SLATTERY,
Assistant Attorney.
C. ARCH WILLIAMS,
Attorney.
Approved as to engineering:
RALPH H. BURKE,
Division Engineer.
G. M. WISNER,
Chief Engineer.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to report that the semi-annual interest on the thirteenth, fifteenth, twenty-second, twenty-third, twenty-fourth and twenty-ninth issue of bonds of The Sanitary District of Chicago, amounting to the sum of one hundred two thousand, five hundred twenty and no/100 ($102,520.00) dollars, falls due June 1, 1919, as follows:

Six months' interest on $300,000.00 of the thirteenth issue at 4 per cent per annum	$ 6,000.00
Six months' interest on $375,000.00 of the fifteenth issue, at 4 per cent per annum	7,500.00
Six months' interest on $880,000.00 of the twenty-second issue, at 4 per cent per annum	17,600.00
Six months' interest on $496,000.00 of the twenty-third issue, at 4 per cent per annum	9,920.00
Six months' interest on $1,375,000.00 of the twenty-fourth issue, at 4 per cent per annum	27,500.00
Six months' interest on $1,700,000.00 of the twenty-ninth issue, at 4 per cent per annum	34,000.00
Total interest on bonds	$102,520.00

Your Committee, therefore, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby instructed to draw a warrant, payable to the order of the Treasurer of The Sanitary District of Chicago, for the sum of one hundred two thousand, five hundred twenty and no/00 ($102,520.00) dollars, to pay the semi-annual interest due June 1, 1919, on the thirteenth, fifteenth, twenty-second, twenty-third, twenty-fourth and twenty-ninth issues of bonds of The Sanitary District of Chicago, said amount to be charged by the Clerk to the proper account.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Fi-

nance reports that the appropriation bill of the Sanitary District for the year 1919 (page 114 of the Proceedings) sets up in the Sanitary Division of the Engineering Department, four positions with salaries attached thereto, totalling the sum of $19,200.00 and under the Mechanical Division of said Engineering Department, two positions with the salaries attached thereto (page 115 of the Proceedings), totalling the sum of $4,200.00, which positions and salaries are set forth in the order hereto attached.

Your Committee further reports that the Committee on Employment has requested that the salaries attached to certain of said positions be adjusted and that other positions under said Division be created to meet the requirements of the Engineering Department, which can be done without increasing the respective sums of $19,200.00 and $4,200.00 heretofore appropriated.

Your Committee having considered said request, is of the opinion that same should be granted and therefore recommends the passage of the following order:

Ordered, That the Clerk be and he is hereby authorized and directed to make adjustments of the positions and salaries set up under the Sanitary and Mechanical Divisions of the Engineering Department in the Appropriation Bill for the year 1919 in accordance with the requirements of the Committee on Employment as follows:

DEPARTMENT OF ENGINEERING—ACCOUNT NO. II.
SALARIES AND WAGES OF REGULAR EMPLOYES.
Sanitary Division.

Change from—	
Division Engineer, one at $4,500.00	$ 4,500.00
Assistant Engineers, three at $2,700.00	8,100.00
Chemist, one at $3,000.00	3,000.00
Principal Assistant Chemists, two at $1,800.00	3,600.00
	$ 19,200.00
to—	
Division Engineer, eight months, one at $4,500.00	3,000.00
Assistant Engineers, two at $2,700.00	5,400.00
Assistant Engineer, eight months, one at $3,000.00	2,000.00
Chemist, nine months, one at $3,000.00	2,250.00
Principal Assistant Chemists, two at $1,800.00	3,600.00
Principal Assistant Chemists, ten months, one at $1,800.00	1,500.00
Tracer, eleven months, one at $1,560.00	1,450.00
	$ 19,200.00

Mechanical Division.

Change from—	
Assistant Mechanical Designing Engineer, one at $2,400.00	$ 2,400.00
Mechanical Draftsman, one at $1,800.00	1,800.00
	$ 4,200.00
to—	
Assistant Mechanical Engineers, two at $2,100.00	$ 4,200.00

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT. A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of May payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance *(except as to voucher to Edmund D. Adcock, for professional services rendered in re Lake Level Controversy, $1,000.00, on which Mr. Nance voted "nay")* and Paullin—Eight on all vouchers, and nine on all vouchers with the exception above noted.

Nays—None (with the exception of one voucher above noted).

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that on March 20, 1919 (page 276 of the Proceedings) the Board authorized the Chief Engineer to direct Nash Bros. to remove and rebuild approximately 272 feet of the invert of the Desplaines river intercepting sewer, Contract No. 1, under the extra work clause of its contract for constructing said sewer at a cost of not to exceed $4,000.00.

Your Committee further reports that it has received a communication from the Chief Engineer in which he states that the total cost of the said work computed as specified under said extra work clause is $4,386.05, which is $386.05 in excess of the amount authorized; that the cost of the entire work has been checked and found to be correct and he recommends that the same be paid said contractors.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to draw a warrant in the sum of $4,386.05, payable to Nash Bros. and deliver the same to them in full payment of their bill for said work.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, to which were referred at the meeting held May 1, 1919 (page 366C of the Proceedings), bids for underground conduit construction, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Electrical Engineer, finds that the lowest responsible bidder is the F. E. Newbery Electric Company.

Your Committee further reports that it is of the opinion that said company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work, and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for work

of underground conduit construction be and the same is hereby awarded to the F. E. Newbery Electric Company for the unit prices named in its bid aggregating the sum of $45,701.65, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by the said F. E. Newbery Electric Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer with which he transmits a communication from Colonel W. V. Judson, Corps of Engineers, U. S. A., enclosing a plan presented by the City of Chicago for the construction of a bascule bridge at West Madison street over the south branch of the Chicago River to replace an existing central pier bridge at said site and requesting to be informed whether the plan submitted meets the approval of the Sanitary District.

The Chief Engineer states that the conditions of the south branch of the Chicago River at Madison street are similar to those existing at Monroe, Adams and Jackson streets in that the west abutments of said bridges can encroach only to a limited extent on the property of the Chicago Union Station Company and the west line of the abutment of the Madison street bridge is fixed by the Chicago Union Station ordinance at 239.1 feet east of the east line of Canal street at the south line of Madison street and that the east face of the west abutment of said new bridge will thereafter project about twenty feet into the river.

A layout for a bridge at this point providing 180 foot clear channel was submitted to the District in 1913 and by direction of the Committee on Engineering was approved by the Chief Engineer, the 180-foot channel being the maximum that could be obtained between the west abutment and the east dock of the river.

The Chief Engineer further states that the city has now devised a plan to keep the existing swing bridge in commission while the new bascule bridge is being built by lengthening the clear span of the bascule bridge to 188 feet between the abutments so that the swing bridge can operate between the two leaves of the new bridge, as they are erected in a standing position, and that the clear channel through said new bridge will remain at 180 feet.

He further states that the cross-section of the river obtained for flow with 180-foot opening is about 4,500 square

feet when dredged to the standard depth of 26 feet, which will give a velocity of 1.2 miles per hour for a flow of 6,000 cubic feet per second in the river, and he recommends that the plan submitted be approved by the Sanitary District.

Your Committee having considered the matter recommends the passage of the following order:

Ordered, That the Chief Engineer is hereby authorized to approve the plan submitted by Colonel W. V. Judson, Corps of Engineers, U. S. A., for the construction of the bascule bridge above described across the south branch of the Chicago river at Madison street.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering herewith transmits a form of agreement to be entered into between the Sanitary District and The Western Union Telegraph Company granting permission and authority to install and maintain a submarine armored cable across the bottom of the Main Channel of the Sanitary District on the west or down stream side of what is known as the eight-track bridge.

Your Committee reports that it has examined said agreement, which has been approved by the Chief Engineer and the Attorney and therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate said form of agreement hereto attached, the same having been executed by the officials of said company.

Respectfully submitted
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the form of agreement between The Sanitary District of Chicago and the Western Union Telegraph Company:

THIS AGREEMENT, Made and entered into this first day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation, organized and existing under and by virtue of the laws of the State of Illinois, hereinafter designated as the "District," and the Western Union Telegraph Company, a corporation organized and existing under and by virtue of the laws of the State of Illinois, hereinafter designated as the "Company," WITNESSETH:

WHEREAS, The said Company is desirous of excavating, building and maintaining a submarine armored cable across the bottom of the Main Channel of the District on the west or down stream side of what is known as the eight-track bridge near Marshall boulevard, in the City of Chicago, County of

Cook and State of Illinois, and has applied to said District for permission so to do, which the District is willing to grant,

Now, Therefore, In consideration of the premises and the mutual covenants and agreements hereinafter set forth, it is agreed by and between the parties hereto as follows:

1. The said District hereby gives and grants to the said Company, insofar as it can legally do so, permission and authority to lay and maintain a submarine armored cable across the bottom of the Main Channel on the west or down stream side of what is known as the eight-track bridge near Marshall boulevard, in the City of Chicago, County of Cook and State of Illinois, in the location and at the points designated in red on the plat hereto attached and made a part hereof as Exhibit "A."

2. Said cable shall be installed and maintained by said Company at its sole cost and expense and in a manner satisfactory to the Chief Engineer of said District, and said work shall conform in all respects to the requirements of all ordinances of the City of Chicago.

3. If, at any time, the District elects to deepen, widen or dock said Main Channel,or to do other work of any kind, nature or description in or about the same, or shall permit any person, firm or corporation to do any such work or any work upon the substructure or superstructure of the said eight-track bridge, or on its right-of-way contiguous and adjacent to said bridge, necessitating the temporary removal of said armored cable, the said Company shall, on demand, raise, lower or otherwise alter or change the location of said armored cable when requested so to do by the Chief Engineer of the District within such time and in such manner as said Chief Engineer shall direct at its own cost and expense, and, upon the failure of said Company to so remove said armored cable when requested so to do as above set forth, the said District shall have the right to immediately remove said armored cable at the expense of said Company, free of any and all claims for damages which might result from such removal.

4. It is further understood and agreed that the District shall not be liable for any damages caused to said armored cable or to any property of said Company, by reason of any act of said District, or of its contractors in widening, deepening or docking the said Main Channel, or caused by boats navigating the waters of said Main Channel, or caused by electric currents escaping from the poles, towers and wires of said District, it hereby being the intention of the said Company to absolve the said District from any and all damages of every kind, nature and description, growing out of the installation, use, operation or removal of the said armored cable and the use and operation of the poles, towers and wires of said District, and from damages caused by electric currents escaping from the same, and said Company agrees to keep and save harmless said District against any and all liabilities, judgments, costs, damages and expenses which may in any wise, directly or indirectly, come against or result from the installation, operation, maintenance or removal of said armored cable.

5. The said District may terminate this agreement at any time hereafter by giving to the said Company sixty (60) days' notice, in writing, of its intention so to do, at the expiration of which time all rights and privileges of the Company hereunder shall at once cease and determine and said Company will, at its sole cost and expense, remove its said armored cable without causing damage of any kind to the property of said District, and in event of its failure so to remove its armored cable within the time specified the District shall have the right to remove the said armored cable at the expense of said Company, and the said Company agrees to pay said District the cost of the same upon demand.

In Witness Whereof, The parties hereto have caused these presents to be signed, in duplicate, by their duly authorized officers, to be duly attested and their corporate seals to be hereto affixed, the day and year first above written.

The Sanitary District of Chicago.

Attorney.

Approved as to Engineering:
G. M. WISNER,
Chief Engineer.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering to which were referred at the meeting held May 15, 1919 (page 534 of the Proceedings), bids for furnishing, delivering and installing plumbing, service piping, gas fitting and conductor pipe work for the Evanston Sewage Pumping Station, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer, finds that the lowest responsible bidder is the Murphy Plumbing Company.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work, and having had the matter under consideration recommends the passage of the following order:

Ordered, That the contract for work of furnishing, delivering and installing plumbing, service piping, gas fitting and conductor pipe work for the Evanston Sewage Pumping Station be, and the same is hereby awarded to the Murphy Plumbing Company for the lump sum price named in its bid of $1,806.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by the said Murphy Plumbing Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT. A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying orders passed.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering to which were referred at the meeting of May 15, 1919 (page 534 of the Proceedings), bids for furnishing, delivering and installing plumbing, service piping, gas fitting and conductor pipe work for the Calumet Sewage Pumping Station for the Sanitary Dis-

trict, having considered all the proposals presented and the qualifications of each bidder, together with the report submitted by the Chief Engineer, finds that the lowest responsible bidder is the Carl John Stein Company.

Your Committee further reports that it is of the opinion that said Company is competent to comply satisfactorily with the terms and conditions of the contract for doing said work, and having had the matter under consideration, recommends the passage of the following order:

Ordered, That the contract for furnishing, delivering and installing plumbing, service piping, gas fitting and conductor pipe work for the Calumet Sewage Pumping Station be, and the same is hereby awarded to the Carl John Stein Company for the lump sum price named in its bid of $8,442.00, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be, and they are hereby authorized and directed to execute in duplicate said contract in accordance with the plans and specifications of the Sanitary District when the same shall have been executed by the said Carl John Stein Company and a bond for the faithful performance of said contract has been approved by the Committee on Finance, and it is further

Ordered, That the checks of the respective bidders for said work be returned upon the execution and approval of said bond.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

Mr. Clark moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Engineering reports that the City of Chicago on April 2, 1919, passed an ordinance granting to the Sanitary District permission and authority to maintain and operate as heretofore constructed, under an ordinance passed by the City Council January 25, 1902, as amended by an ordinance passed by said City Council March 29, 1904, a masonry duct or water tunnel five (5) feet in diameter and a return pipe or conduit three (3) feet in diameter in East Thirty-ninth street between South State street and the first north-and-south public alley east of South State street connecting the power house and station of the South Side Elevated Railroad Company on the south side of said street at that point with the Thirty-ninth street conduit. Said conduit and duct is to be used solely for cooling or condensing purposes by said Railroad Company in its said power house and station. Said grant is for a period of fifteen years from and after January 25, 1919, but may be revoked at any time prior thereto by the Mayor in his discretion without the consent of the Sanitary District and is also subject to amendment, modification or repeal by the City Council of said City at any time without the consent of the Sanitary District, and in case of such repeal all the privileges granted therein shall cease and determine and the City may retain all money received under the provisions of said ordinance.

The Sanitary District agrees to pay the City of Chicago as compensation for said duct and conduit the sum of $50 per annum, payable annually in advance, first payment to be made as of the date of January 25, 1919, and if default is made in the payment of any of the installments of said compensation, the privileges granted in said ordinance may be terminated under any one of the powers reserved to the Mayor or City Council by Section 2 of said ordinance and thereupon said ordinance shall become null and void.

Said ordinance also contains provisions relative to the removal of said duct and conduit, the use and restoration of said street, the necessity of obtaining a permit for work to be done on said duct and conduit and other provisions.

Your Committee further reports that Section seven (7) of said ordinance provides that said ordinance shall take effect and be in force from and after its passage, provided the said Sanitary District shall file its written acceptance of the same and together with the bond prescribed in Section six (6) of said ordinance with the City Clerk within sixty days after the passage thereof.

Your Committee having carefully considered said ordinance, recommends the passage of the following order:

Ordered, That the Sanitary District does hereby accept the terms and conditions of said ordinance of the City of Chicago above referred to and agrees to carry out all the terms and conditions therein specified to be kept and performed by said Sanitary District, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute for and on behalf of the Sanitary District a good and sufficient bond in the penal sum of $10,000.00, with a surety thereon to be approved by the Mayor conditioned as set forth in Section six (6) of said ordinance, and to incur all necessary expenses relative to procuring such bond, and it is further

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be and they are hereby authorized and directed to file with the City Clerk of Chicago a written acceptance of said ordinance and the bond above specified and such other documents as may be necessary to make such acceptance effectual.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.

H. E. LITTLER,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying orders passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the ordinance passed by the City Council of the City of Chicago, referred to in the foregoing report:

WHEREAS, By an ordinance passed January 25, 1904, and amended as to Section 2 of said ordinance by an amendatory ordinance passed March 29, 1904, the City of Chicago granted The Sanitary District of Chicago permission and authority for a period of fifteen years from the passage of said ordinance of January 25, 1904, to construct, lay down, maintain and operate a masonry duct or water tunnel five (5) feet in diameter in 39th street between Wabash avenue and State street connecting the power house and station of the South Side Elevated Railroad Company, located at State street between 39th and 40th streets in the City of Chicago with the 39th street conduit; and also to construct, lay down,

maintain and operate in said 39th street, between Wabash avenue and State street and connecting said power house and station with said 39th street conduit, a return pipe or conduit three (3) feet in diameter for the purpose of conveying from and returning to said 39th street conduit water to be used exclusively for cooling or condensing purposes by said South Side Elevated Railroad Company; and

WHEREAS, The Sanitary District of Chicago accepted said ordinance as amended, and filed its bond with said city as required by said ordinance of January 25, 1904, and caused said masonry duct or water tunnel and said return pipe or conduit to be constructed in all respects as specified in said ordinance as amended, and is now maintaining and using the same; and

WHEREAS, The Sanitary District of Chicago has requested that the period during which it might maintain and use said masonry duct or water tunnel and said return pipe or conduit be extended for a period of fifteen years from January 25, 1919; now, therefore,

Be It Ordained by the City Council of the City of Chicago:

SECTION 1. That permission and authority be and the same are hereby given and granted to The Sanitary District of Chicago, a municipal corporation, to maintain and operate as heretofore constructed under an ordinance passed by the City Council January 25, 1904, page 2118 of the Journal of the Proceedings of said date, as amended March 29, 1904, page 2864 of the Journal of the Council Proceedings of said last-mentioned date, a masonry duct or water tunnel five (5) feet in diameter and a return pipe or conduit three (3) feet in diameter in East 39th street between South State street and the first north-and-south public alley east of South State street connecting the power house and station of the South Side Elevated Railroad Company on the south side of said street at that point with the 39th street conduit; the location of said duct and conduit being substantially as shown in red upon blue print hereto attached, which for greater certainty is hereby made a part of this ordinance.

Said duct and conduit shall be used for the sole purpose of supplying said power house and station with water from said 39th street conduit and returning said water to said conduit to be used exclusively for cooling or condensing purposes by said Railroad Company in its said power house and station and shall not be used for any other purpose whatsoever.

SEC. 2. The permission and authority herein authorized shall cease and determine fifteen (15) years from and after January 25, 1919, or may be revoked at any time prior thereto by the Mayor in his discretion without the consent of the grantee herein named. This ordinance shall also be subject to amendment, modification or repeal at any time without the consent of the grantee, and in case of such repeal all the privileges herein granted shall thereupon cease and determine. In the event of the termination, revocation, amendment or modification of the authority or privileges herein granted by lapse of time, the exercise of the Mayor's discretion, or the exercise by the City Council of the powers above reserved, the said grantee, by the filing of the written acceptance hereinafter provided for, shall be understood as consenting that the city shall retain all money it shall have previously received under the provisions of this ordinance from said grantee, said money to be considered and treated as compensation for the authority, permission and privileges enjoyed from the date of the passage of this ordinance until such action by the Mayor or City Council as the case may be.

SEC. 3. At the expiration of the privileges herein granted, the duct and conduit herein authorized shall be removed, unless the privileges herein granted shall

be renewed. If said duct and conduit shall be removed the space where the same shall have been located shall be filled up and the pavement over the same restored to a condition similar to the balance of the street in the same block, to the satisfaction of the Commissioner of Public Works, at the sole expense of the grantee herein, without cost or expense of any kind whatsoever to the City of Chicago; provided, that in the event said grantee shall refuse or neglect to remove said duct and conduit when so ordered to do, and to restore the pavement over said space, said work shall be done by the City of Chicago, and the cost thereof charged to the grantee herein. Said grantee shall do no permanent injury to said street, or in any way interfere with any public cable, wire, pipe or conduit therein, and shall not open or incumber more of said street than shall be necessary to enable it to proceed with advantage in installing said duct and conduit. No permit shall be issued allowing any work to be done in and about the installation of said duct and conduit until plans and specifications of the completed structure shall first have been submitted to and approved by the Commissioner of Public Works. A copy of said plans shall at all times remain on file in the office of the said Commisioner of Public Works.

SEC. 4. The grantee herein agrees to pay to the City of Chicago as compensation for said duct and conduit the sum of fifty dollars ($50.00) per annum, payable annually in advance, the first payment to be made as of the date of January 25, 1919, and each succeeding payment annually thereafter; provided, that if default is made in the payment of any of the installments of compensation herein provided for, the privileges herein granted may be immediately terminated under any one of the powers reserved to the Mayor or City Council by Section two (2) hereof and thereupon this ordinance shall become null and void.

SEC. 5. During the life of this ordinance the grantee herein shall at all times keep the surface of the street over the said duct and conduit in a condition satisfactory to the Commissioner of Public Works and safe for public travel.

SEC. 6. No work shall be done under the authority of this ordinance until a permit authorizing same shall have been issued by the Commissioner of Public Works, and no permit shall issue until the grantee herein shall execute to the City of Chicago a good and sufficient bond in the penal sum of ten thousand dollars ($10,000.00) with sureties to be approved by the Mayor, conditioned upon the faithful observance and performance of all and singular the conditions and provisions of this ordinance, and conditioned further to indemnify, keep and save harmless the City of Chicago against all liabilities, judgments, costs, damages and expenses which may in any wise come against said city in consequence of the granting of this ordinance, or which may accrue against, be charged to or recovered from said city from or by reason or on account of any act or thing done by the grantee herein by virtue of the authority herein granted.

SEC. 7. This ordinance shall take effect and be in force from and after its passage; provided the said grantee shall file its written acceptance of this ordinance and the bond hereinabove provided for with the City Clerk within sixty (60) days after the passage hereof.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that in the original design of the Evanston Sewage Pump-

ing Station it was proposed to use a water ejector to empty the drainage from the basement of said station, but it has recently been found that it is not practicable to use much apparatus under the conditions which exist at said station and that his department has designed an electrically driven sump pump for said purpose.

He further states that no device for emptying the drainage from the basement of said station was included under the terms of the contract between the Sanitary District and Nash-Dowdle Co. for the construction of said station nor was it included in the contract to be let for the installation of the plumbing in said station. He further states that Nash-Dowdle Company have agreed to install said pumps under the extra work clause of its contract with the Sanitary District dated October 10, 1918 (page 1240 of the Proceedings) for the construction of said station for the agreed price of $1,550.00; that he has checked said price and considers the same reasonable and requests that he may order said work done.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to order Nash-Dowdle Company to furnish and install the electrically driven sump pump above specified for the agreed price of $1,550.00 under the extra work clause of its contract with the Sanitary District for the construction of the said Evanston Sewage Pumping Station.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
H. E. LITTLER,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Electrical Development.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith presents renewal contracts with Patrick Joseph King, 1740 North Crawford avenue and the North Side Sash & Door Co., 2448 West 22d street, wherein the Sanitary District agrees to furnish and said parties agre to take fifty and eight kilowatts of electrical energy respectively for the time and upon the terms and conditions therein set forth, which contracts have been aproved by the Electrical Engineer.

Your Committee therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in duplicate the attached contracts which have heretofore been executed by said Patrick Joseph King and the North Side Sash & Door Co.

Respectfully submitted,
H. E. LITTLER,
Chairman.
MATT A. MUELLER,
WALLACE G. CLARK,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Littler presented the following report from the Committee on Electrical Development:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Electrical Development herewith transmits to the Board, form of agreement to be entered into between the Sanitary District and the City of Chicago, with reference to the completion of all work performed by the Sanitary District for said city under the terms and conditions of an agreement dated October 27, 1910 (pages 668-1011-1115-1170 of the Proceedings) and four supplementary and amendatory agreements thereto relating to the rehabilitation and operation of the electric street lighting system of said city, and the furnishing of electrical energy by said District for a period of five years from January 1, 1918.

In general, the agreement is a final settlement of the agreements referred to above and set up in considerable detail new covenants relating to the use of substations, transmission lines and electrical equipment and the operation and repair of the same by the respective parties.

The city agrees to pay said District for electrical energy furnished between December 8, 1917, to December 31, 1917, at the rates specified in said original agreement and to pay the District for the maintenance and operation of the substations of said city during the said period the actual cost of all labor and material, plus 15 per cent, and to maintain and operate all city substations after January 1, 1918, at its sole cost and expense.

The District agrees to furnish said city during the period mentioned, electrical energy for street lighting purposes to the amount of 10,000 kilowatts, designated as the "firm power," and if said city requires a greater amount of electrical energy for its street lighting purposes more than 10,000 kilowatts, then said firm power shall be increased 2,000 kilowatts, but in case the District is released from furnishing electrical energy to supply the 22nd street pumping station, then said firm power shall be increased to 11,000 kilowatts and the greater amount of electrical energy to be furnished shall be increased to 2,600 kilowatts.

Said City agrees to pay said District for all electrical energy furnished at the rate of $1.25 per kilowatt per month on the number of kilowatts constituting the maximum demand for the month, which maximum demand shall be determined by maximum demand curve-drawing or other instruments or meters installed by said District in the substations of said city, and shall be the highest average kilowatts demand indicated or recorded by said instruments or meters in any thirty minute interval during each month.

The District further agrees to rearrange or rebuild exposed or unprotected transmission lines or electrical equipment, in or on viaducts, subways, streets, alleys or public places so as to safeguard the public and minimize the liability of personal injuries resulting from electrical energy passing through the same at a cost of not to exceed $80,000.00, and to paint the electric light poles and equipment along the streets of said city at a cost of not to exceed $60,000.00, which sums are to be repaid to said District with 5 per cent interest thereon.

The District also agrees to advance to the city the sum of $1,180, to be used by said city in the payment of a bill of the Chicago Union Station Company for the installation of two additional ducts for said city on Harrison street which is to be repaid to said District on April 1,

1920, with interest thereon at 5 per cent per annum.

The agreement also contains provisions that said city will indemnify and save the District harmless from all judgments, damages, costs or expenses that may be sustained by said District by reason of certain suits for damages now pending in the courts of Cook County and others which may be brought against said District to recover damages occasioned directly or indirectly by electrical energy generated by said District and transmitted over or through or escaping from the street lighting system of said city.

The said agreement also contains other usual and general clauses of an engineering and legal nature and has been approved by the Electrical Engineer of the Sanitary District, the Commissioner of Gas and Electricity of the City of Chicago and also by the Attorney of said District and the Corporation Counsel.

Your Committee having carefully examined said agreement, recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in quadruplicate the attached agreement, the same having been properly executed by the officials of the City of Chicago.

Respectfully submitted,
H. E. Littler,
Chairman.
Matt A. Mueller,
Wallace G. Clark,
Committee on Electrical Development.

Mr. Littler moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the form of agreement between the City of Chicago and The Sanitary District of Chicago:

This Agreement, Made and entered into this first day of January, A. D., 1918, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, hereinafter designated as the "District", party of the first part, and the City of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, hereinafter designated as the "City," party of the second part,

Witnesseth, That

Whereas, the parties hereto entered into an agreement dated October 27, 1910 and thereafter at different times four supplementary and amendatory agreements thereto, relating to the rehabilitation, extension and operation of the electric street lighting system of said City and the furnishing of electrical energy therefor, and

Whereas, said District has duly completed the work to be performed by it under the terms of all of said agreements and has furnished the electrical energy for said electric street lighting system of said City for a period of seven years from the date said service was first begun, which period expired on December 8, 1917 and

Whereas, the parties hereto desire to enter into a new agreement relating, among other things to the operation and maintenance of certain substations of said City, and use of electrical equipment therein contained and the furnishing of electrical energy for the electric street lighting system of said City.

Now, Therefore, in consideration of the mutual covenants and agreements hereinafter set forth to be by the respective parties hereto kept and performed, said parties do hereby covenant and agree each with the other as follows:

1. That said District has fully completed in a satisfactory manner all work to be performed by it under the terms and conditions of an agreement dated October 27, 1910, and the four supplementary and amendatory agreements thereto by and between the parties hereto, relating to the rehabilitation, extension and operation of the

electric street lighting system of said City and that said District has in all other respects fully complied in a satisfactory manner with the terms and conditions of said agreements. Said City hereby receives, takes over and accepts all of the work performed by said District under said agreements in the condition the same is in and hereby certifies that said District has fully complied to its satisfaction with all the terms and conditions of said agreements.

2. Said District hereby specifically delivers and transfers to said City the possession and use of the following substations belonging to said City, to-wit:

H. N. May, Fullerton avenue east of the river.

R. A. Waller, 6345 Wentworth avenue.

No. 6, 712 South Halsted street.

No. 8, Rice and Lincoln streets.

Emerald, 3348 Emerald avenue.

Wood, old number 855 South Wood street, near 19th street.

Wentworth, 4762 Wentworth avenue.

Central Park avenue and Milwaukee avenue, rear of engine House No. 91.

Forty-second court and Irving Park boulevard, rear of Truck No. 23, Engine House No. 69.

together with the possession and use of all the transformers, regulators, meters, poles, conduits, towers, tools, appliances, and equipment used in and about said stations, except such equipment, appliances and tools as have been installed in or about said stations by the Sanitary District for its corporate purposes, and also all the transmission lines and cables used by said City to convey current to and from said stations, thereinafter for convenience called by the term "electrical equipment."

3. Said District hereby also specifically delivers and transfers to said City, the possession and use of the following substations constructed under the terms and conditions of said agreements and now belonging to said City, to-wit:

Wabansia avenue, corner Wabansia and Hamlin avenues.

West 22nd street, 3246 West 22nd street.

Mohawk street, corner of Mohawk and Menominee streets.

Byron street, corner of Byron street and Ravenswood avenue.

together with all the electrical equipment which was installed in said substations under the terms and conditions of said agreements, and said District also hereby specifically delivers and transfers to said City, the possession and use of the substation belonging to said City known as the Morgan Park substation together with all the electrical equipment installed therein.

4. Said District hereby specifically transfers and delivers to said City, all the electrical equipment which was installed in the Thirty-ninth street pumping station of said District under the terms and conditions of said agreements, a full and complete inventory of which is hereto attached marked "Exhibit A" and made a part hereof.

5. It is hereby understood and agreed by and between the parties hereto that by the terms of section one (1) of said agreement between the parties hereto, dated October 27, 1910, said City yielded to said District to be occupied by said District during the life of said agreement the following substations belonging to said City, to-wit:

Sedgwick street, corner of Chicago avenue.

Fullerton avenue, Fullerton avenue west of the river.

Byron street and Hermitage avenue, rear of Engine House No. 112.

Cortland street and Ballou street, rear of Engine House No. 7.

together with all the electrical equipment contained therein, but that in the work of rehabilitating the electric street lighting system of said City, the use of said stations by the District was discontinued and said stations together with the electrical equipment contained therein were at that time delivered and transferred to said City.

6. It is hereby further understood and agreed by and between the parties hereto, that in accordance with the terms and provisions of Section thirteen (13) of said original agreement dated October 27, 1910 the District turned over to either the City Electrician of said City or his successor the Commissioner of Gas and Electricity all the property, supplies, material, electrical devices and equipment belonging to said City, which were not needed or required to be

used in the reconstruction and operation of said electric lighting system of the City of Chicago.

7. Said City hereby agrees that all electrical equipment which has been or may be hereafter installed in any substation of said City and the grounds of the same by said District, and is now or may become the property of said District and is used by it in supplying electrical energy to other municipalities or commercial consumers, may remain in said substations as at present installed and connected rent free for the space occupied by the same during the period of this agreement. Said District, however, agrees to maintain and repair at its sole cost and expense, all such electrical equipment.

8. Said District hereby agrees that all electrical equipment which has been installed by the District for said City under the terms and conditions of said agreements, in the Thirty-ninth street pumping station of the District and the grounds of the same may remain as at present installed and connected rent free for the space occupied by the same, during the period of this agreement. Said City, however, agrees to operate, maintain and repair, at its sole cost and expense, all such electrical equipment.

9. Said City hereby agrees, that on the termination of this agreement by expiration of time or otherwise, said District shall be entitled to occupy rent free the space occupied by the electrical equipment specified in section seven (7) of this agreement for a period of six months after any such termination and for such further and additional time as may be necessary for the purpose of removing all the electrical equipment specified in said section seven (7).

10. The said District hereby agrees that, on the termination of this agreement by expiration of time or otherwise, said City shall be entitled to occupy rent free the space occupied by the electrical equipment specified in section eight (8) of this agreement for a period of six months after any such termination and for such further and additional time as may be necessary for the purpose of removing all the electrical equipment specified in said section eight (8).

11. Said City hereby gives and grants to said District, during the period of this agreement, the right to use, free of cost, all twelve thousand volt transmission lines or cables belonging to said City, used by said District in supplying electrical energy to the substations of said City. Said District hereby agrees to operate, maintain and repair, at its sole cost and expense, all such transmission lines or cables, provided, however, if any repairs to such transmission lines or cables are necessary by reason of the action of electrolysis then the cost of said repairs shall be borne by said City. The said District may itself perform the work above specified or may let contracts therefor to the lowest responsible bidder. The Electrical Engineer of said District and the Commissioner of Gas and Electricity of said City, shall first jointly determine whether any repairs to such transmission lines or cables, are necessary by the action of electrolysis and if they so determine, then said District shall forthwith make such repairs and said City hereby agrees to pay the cost of the same on demand. In case the Electrical Engineer of said District and the Commissioner of Gas and Electricity are unable to jointly determine that said repairs are made necessary by the action of electrolysis then the determination of said question shall be referred to a Board of Arbitrators as provided for in section 45 of this agreement and the decision of said Board of Arbitrators shall be final and binding on both parties to the dispute.

12. In case said District itself, performs any work specified in this agreement for said City then the cost of the same shall be determined as follows:

The cost of material, supplies, electrical devices and equipment shall be the actual price paid for the same together with the standard charge of the District, for delivering said material and supplies and any and all material, electrical devices and equipment salvaged from said work to or from the site of the work. The cost of labor shall be taken as the amount paid for the same as shown by the payrolls and individual expense accounts of the District. To said items of cost there shall be added all sums of money which may be paid by the District to the employes of said District or their beneficiaries for first

aid, medical, surgical and hospital services and for the compensation provided for in the Act of the General Assembly of the State of Illinois relating to compensation for accidental injuries or deaths, and also the cost of insurance against injuries or deaths suffered by persons other than employes of said District by reason of performing any work specified in this agreement to be performed by said District for said City. To the total of said amounts shall be added an item of fifteen (15) per cent of same to cover superintendence, use of tools and other overhead expenses. In case the sum of money received by said District from said insurance is not equal to the sum of money said District is obliged to pay to persons other than employes who may be injured by reason of the performance of said work, or, in cases of death, to their beneficiaries, then said City agrees to pay to said District the difference between said sum of money received from said insurance and the sum of money said District may be obliged to pay to such persons or their beneficiaries. The various sums of money above specified in this paragraph 12 of this agreement to be paid by said City to said District shall hereinafter for convenience be called by the term "costs of construction." In case said District awards a contract for the performance of any work specified in this agreement then the cost of same shall be the contract price, together with such sums as may be jointly allowed said contractor by the Electrical Engineer of said District and the Commissioner of Gas and Electricity of said City for extra work to the total of said amounts shall be added an item of five (5) per cent of same to cover superintendence and all other overhead expenses, which contract price and sums allowed for extras shall hereinafter for convenience be called by the term "contract costs". Any and all material, electrical devices and equipment salvaged in doing any work shall be turned over by said District to the Commissioner of Gas annd Electricity of said City at the store room and yard of said City located at No. 712 South Halsted street as the property of said City.

13. Said City hereby agrees to repair and maintain at its sole cost and expense the synchronous motors of said City located in the Halsted street, Rice and Lincoln streets and R. A. Waller substations. Said City hereby agrees to operate said motors within their respective rated capacities during the hours specified in the street lighting schedule Exhibits "B" and "C"; in such a manner and at such times as the Electrical Engineer of said District or his duly accredited representative shall direct and the said City hereby agrees to pay the sole cost and expense of such operation, with the exception of the cost of the electrical energy used in such operation, which electrical energy shall be furnished by said District to said City free of cost.

14. Said City hereby grants to said District the right during the period of this agreement to use, free of rent, therefor, the H. N. May substation of said City together with all steam producing, generating, transforming and other electrical equipment contained therein, and said District hereby agrees to maintain and keep during the period of this agreement said substation and said steam producing, generating, transforming and other equipment, in as good repair as when delivered to said District by said City, depreciation from ordinary wear and tear excepted.

15. It is understood and agreed by and between the parties hereto, that said City, has now under construction a new plant for the generation of electrical energy by steam known as the "Bridewell Plant" from which electrical energy will be transmitted into the existing electric street lighting system of said City and to new substations and lighting circuits now in the course of construction, for the purpose of affording to said City more electrical energy for street lighting, or other municipal purposes than at the present time exists. It is agreed by the parties hereto, that the new and existing electric light plants of said City and the existing light plants of said District may be interconnected in such a manner as may be agreed upon by the Electrical Engineer of said District and the Commissioner of Gas and Electricity of said City, so that in case of an accident or in an emergency, electrical energy may be transmitted to the plant or plants of the party hereto requiring the same

by the plant or plants of the other party hereto.

16. It is further agreed by the parties hereto that either party may use, free of cost, such conduits, poles, and space in substations and the grounds connected therewith of the other party hereto, as the Electrical Engineer of said District and the Commissioner of Gas and Electricity of said City shall jointly determine will not unnecessarily interfere with the use by the other party of such conduits, poles and space.

17. It is further understood and agreed by and between the parties hereto, that said District has supplied said City with electrical energy from December 8, 1917 to December 31, 1917, both dates inclusive, at the rate specified in said original agreement and has maintained and operated said substations from December 31, 1917, to March 31, 1918, both dates inclusive, in accordance with certain terms heretofore agreed upon between the parties hereto. Said City therefore, hereby agrees to pay said District on demand at the rate of Fifteen ($15.00) dollars per horse power a year or one dollar and twenty-five cents ($1.25) per horse power a month for all electrical energy delivered to said City between December 8, 1917, and December 31, 1917, both dates inclusive, said electrical energy to be metered at the primary side of said substations and to pay for all electrical energy consumed by said City between January 1, 1918 and the expiration of this agreement at the rate hereinafter specified. In addition thereto said City hereby agrees to pay said District on demand the actual cost of all salaries, labor, material and supplies furnished by said District in the maintenance and operation of said substations between December 8, 1917 and March 31, 1918, both dates inclusive, plus a sum equal to fifteen (15) per cent of such actual cost of salaries, labor, material and supplies.

18. Said City hereby agrees to repair, maintain and operate, at its sole cost and expense, during the term of this agreement all the substations of said City (except the H. N. May substation during the period it is under the control of said District) together with all the electrical equipment contained therein used in connection with the electric street lighting system of said City. In case said City shall delay or neglect or refuse to make any repairs to any of its equipment in its said substations necessary for the operation of equipment of said District connected therewith then said District may make such repairs or replacements to the equipment of said City at the cost of said City, said cost to be computed in the manner specified in section 12 of this agreement and paid to said District on the receipt of bills, therefor with interest thereon at the rate of five (5) per cent per annum until paid. Said City also agrees to operate, at its sole cost and expense, under the supervision and direction of the Electrical Engineer and the Load Dispatcher of said District, all the electrical equipment of said District in said substations.

19. Said District shall make such rearrangements or changes in the cables of said City as the Electrical Engineer of said District and the Commissioner of Gas and Electricity of said City may agree are necessary and advisable. When such rearrangements or changes are made for the mutual benefit of said District and said City, said City shall pay to said District on demand its proportion of the actual cost of same; when any such rearrangements or changes are made for the sole benefit of said District, said District shall pay the cost of such work, and when any such rearrangements or changes are made for the sole benefit of said City, then said City shall pay to said District on demand the actual cost of such work, which cost in all instances shall be computed in the manner specified in section 12 of this agreement.

20. Said District hereby agrees to furnish and maintain, ready for use by said City, during the term of this agreement, which is hereby fixed for a period of five (5) years from the date hereof, for street lighting purposes, electrical energy in the form of three phase alternating current, delivered at a frequency of approximately sixty cycles per second and a difference of potential between phases of approximately 12,000 volts, to the amount of 10,000 kilowatts, which is hereinafter designated as the "firm power" and said City agrees to pay each month for said amount of elec-

trical energy, whether the same was used by said City in such month or not, subject, however, to any deductions from the total amount of electrical energy furnished said City under this agreement which may be allowed said City for interruption due to the causes specified in section 30 of this agreement.

21. In case said City, from time to time, requires the use of a greater amount of electrical energy for its said street lighting purposes than the firm power specified, then said District agrees to furnish and maintain, ready for use by said City, such greater amount as may be required, but not to exceed an amount of 2000 kilowatts in addition to said firm power. In case the said District is released from furnishing electric current to supply the 22nd street pumping station, then said firm power shall be increased to 11,000 Kilowatts and the greater amount of electric current to be furnished said City shall be increased to 2,600 Kilowatts. If any greater amount of electrical energy is furnished by said District to said City under this Section 21 of this agreement, then said City agrees to pay said District for such greater amount on the maximum demand basis specified in section 26 of this agreement.

22. The said District hereby agrees to furnish and maintain, for use by said City, the amount of electrical energy hereinabove specified each and every day of the term of this agreement during the hours specified in the tables hereto attached marked Exhibits "B" and "C" and Exhibit "D" and made a part hereof.

23. The said District hereby agrees to deliver said electrical energy in the manner specified in Section 22 of this agreement at the terminals of the disconnecting switches in the existing substations of said City.

Also to the terminals of the disconnecting switches of the electrical equipment installed in the Thirty-Ninth street pumping station of said District.

Also to the disconnecting switches in new substations to be constructed by said City known as "South Chicago," "Southwest" and any other substations which may be constructed by said City, provided said City furnishes and installs at its expense the necessary transmission lines or cables to transmit said electrical energy to said new and other substations.

24. The said City hereby agrees that all the electrical equipment used by said City in the operation of its street lighting system shall be suitable to receive the electrical energy furnished by said District and of standard design and construction, and shall be operated and maintained by said City, at its sole cost and expense, in a manner to secure and obtain the highest efficiency and best operation of said system and of the electrical system of said District. The said City also agrees to equip the lighting circuits of its electric lighting system and the 12,000 volt transmission circuits terminating in its stations and substations, with such approved protective devices as are in commercial use and to operate the same in such a manner as will protect the electrical equipment and circuits of said District from damage and interruptions in service, due to lightning, grounds, short circuits and other causes.

The Electrical Engineer of said District and the Commissioner of Gas and Electricity of said City shall jointly determine whether the said equipment and operation are such as to meet the requirements of this section and in case they are unable to agree then the determination of such questions as have arisen hereunder shall be determined by arbitration as specified in Section 45 of this agreement.

25. The said City hereby agrees to pay said District for all electrical energy furnished said City hereunder at the rate of one dollar and twenty-five cents ($1.25) per Kilowatt per month on the number of Kilowatts constituting the maximum demand for the month, which maximum demand shall be determined as is specified in Section 26 of this agreement. Said District shall render monthly statements of the amount of electrical energy furnished to said City in accordance with the terms hereinbefore set forth and said City agrees to pay said District on or before the last day of each month for the electrical energy used by said City during the preceding month, and said City agrees that in case of failure, refusal or neglect on its part to make such payments at the time specified, then the

amounts due shall bear interest at five (5) per cent per annum until paid.

26. The maximum demand for any month shall be determined by maximum demand, curve-drawing or other instruments or meters installed by said District in the substations of said City, and shall be the highest average kilowatt demand indicated or recorded by said instruments or meters in any thirty-minute interval during such month. The maximum demand for billing purposes shall be the sum total of the maximum demand indicated or recorded by all of the instruments or meters used to measure the electrical energy furnished hereunder, but in no case shall the maximum demand be less than the firm power herein agreed to be purchased and paid for by said City.

27. The electrical energy furnished hereunder shall be measured at the points of delivery or the nearest available places. The instruments or meters for measuring said electrical energy shall be furnished, installed and maintained by said District at its sole cost and expense. The said City agrees to furnish sufficient space, rent free, in its substations for the installation of said instruments or meters and instrument transformers. Said instruments or meters with their instrument transformers may be connected to either the high tension or low tension side of the step-down transformers, or some may be connected to one side and some to the other side of said transformers as the Electrical Engineer of said District may elect. Whenever said instruments or meters are connected at other than the points of delivery of said electrical energy, the readings of said instruments or meters shall be corrected, so as to give readings such as would be obtained by such instruments or meters if they were connected at the point of delivery of said electrical energy.

28. The said District shall have the right at all times to inspect and test said instruments or meters, and if the same are found to be defective said District may repair or replace the same, at its option, provided five (5) days notice in writing is given by the Electrical Engineer of said District to the Commissioner of Gas and Electricity of said City of the intention of said District to test, repair or replace said instruments or meters, so that said City may have a representative present. Said City shall also have the right at all times to inspect and test said instruments and meters provided that five (5) days' notice in writing is given by the Commissioner of Gas and Electricity of said City to the Electrical Engineer of said District of the intention to make such test.

29. If, as a result of any such test any meter or meters are found to register in excess of two (2) percent above or below normal, then the readings of such meter or meters previously taken shall be corrected in accordance with the percentage of inaccuracy so found, but no such correction shall extend back beyond thirty (30) days previous to the date on which such inaccuracy shall be discovered by such test, and in case a prior test of such meter or meters shall have been made within 30 days of the date on which such inaccuracy is discovered under the provisions hereof, then the correction of the readings shall not extend back beyond the date of such prior test. If any test shall be made at the request of said City with the result that the meter or meters tested shall be found to register correctly or within two (2) percent of normal the City shall bear the expense of such test. The expense of all other tests shall be borne by the District. During the time that any meter or meters are out of service it shall be assumed that the registrations of such meters are the average of the registrations of such meters for the other days of the month.

30. In case the District shall be prevented from furnishing and delivering said electrical energy, or in case the City shall be prevented from receiving said electrical energy at any of its substations by strikes, riots, insurrections, floods, fires, lightning, explosions, acts of third parties, acts of the State or Federal Authorities, War Boards or Councils or from any other cause reasonably beyond the control of either party hereto, then said District shall not be obliged to furnish and deliver such electrical energy at such substations, and the City shall not be obliged to receive such electrical energy, during the period of interruption of service, but

nothing herein contained shall be construed to permit said District to refuse to furnish and deliver said electrical energy or permit said City to refuse to receive the same as soon as the cause of interruption of service is removed and each of the parties hereto shall be prompt and diligent in removing and overcoming such cause or causes.

31. It is hereby expressly agreed by and between the parties hereto that if, for any of the reasons specified in section 30 of this agreement there is an interruption of the supply of electrical energy herein specified to be furnished and delivered by said District lasting for a period of seven hours or more, then said City shall not be required to pay for any electrical energy not received at any of its substations during the period of any such interruption of service. The amount of electrical energy which said City shall not be required to pay for by reason of such interruption of service shall be the average of the maximum demand of any and all stations which are so prevented from receiving such electrical energy for the three months preceding the month in which such interruption of service may have occurred. Said District shall not be liable for a failure to furnish and deliver electrical energy to said City during the period of any such interruption of service.

32. The said District hereby agrees to furnish all materials, supplies, electrical equipment and labor that are necessary to rearrange, change, protect or rebuild all exposed or unprotected transmission lines, lighting circuits, cables or other electrical equipment which are now in place, under, in or on viaducts and elevated structures, subways and in streets, alleys or public places of said City connecting therewith so as to safeguard the public and minimize the liability of personal injuries resulting from electrical energy passing through the same at a total cost of not to exceed $80,000.00; and also agrees to paint the electric light poles and equipment thereon belonging to said City at a total cost of not to exceed $60,000.00. The cost of doing said work to be computed in the manner specified in section 12 of this agreement. The said District may itself perform the work above specified or let contracts therefor to the lowest responsible bidder and said City hereby agrees to furnish to said District free of cost all permits which may be necessary to perform the work specified in this agreement.

In case any such work is required at such places and under such conditions as will make it necessary (by reason of ordinances, existing contracts, or for any other reason) to have the work or a part of same done by the City, by railroad or other public service corporations, or by contractors who have agreed to maintain streets under the terms of paving contracts, then the cost of such work or such parts of same as may be thus performed by them shall be paid by said District and shall thereupon become part of the "contract costs" specified in section 12 of this agreement, and shall be repaid to said District by said City as specified in this agreement.

33. It is further agreed by and between the parties hereto that no part of the above specified work shall be done by said District itself, or no contract for same shall be let or awarded by said District to the lowest responsible bidder therefor until complete plans and specifications for such part and the form of contemplated contract therefor shall have been prepared by the Commissioner of Gas and Electricity of said City and submitted to and approved by the Electrical Engineer of said District.

34. It further agreed by and between the parties hereto that during the progress of any work performed by said District or any of its Contractors therefor under any of the terms and provisions of this agreement that the Commissioner of Gas and Electricity of said City shall have the right to inspect, at the sole cost and expense of said City, all materials, supplies and electrical equipment used in such construction work or any other work done under the terms of this agreement and to reject any and all such materials, supplies and electrical equipment which in his opinion do not conform to the plans and specifications prepared therefor.

35. Said District hereby agrees to render monthly statements of the amounts of money expended during each and every month of the life of

this agreement for the costs of construction and contract costs of the work above specified in accordance with the terms and provisions hereinbefore set forth in the following manner:

(a) Said District shall enter in its books of account all expenditures made and credits received by it on account of the costs of construction and contract costs or other costs of the work herein specified, which books of account shall at all reasonable hours be open to the inspection of the Comptroller of said City and to such person or persons as the Comptroller or City Council of said City may designate.

(b) Said District shall furnish to said City within thirty (30) days after the close of each and every month during the period when the work above specified is in progress a full and complete itemized statement of the costs of construction and contract costs for and on account of the work done by said District for said City during the preceding month.

(c) On the first day of January of each and every year following the months in which the work is performed as shown by said itemized statements rendered by said District to said City, said City shall pay to said District five (5) per cent interest on the monthly costs of construction and contract costs shown by said itemized statements at the rate of five (5) per cent per annum from the date of said statements to December 31 of the year in which said costs of construction or contract costs were made and thereafter the City shall pay five (5) per cent interest on said monthly costs of construction and contract costs from said December 31, until said monthly costs of construction and contract costs are paid.

(d) The total costs of construction and contract costs expended by said District under the terms of this agreement during the year 1919 as shown by said monthly statements shall be repaid by said City to said District on April 1, 1920 with interest thereon as herein specified.

(e) The total costs of construction and contract costs expended by said District under the terms of this agreement during the year 1920 as shown by said monthly statements shall be repaid by said City to said District on April 1, 1921 with interest thereon as herein specified.

(f) The total costs of construction and contract costs expended by said District under the terms of this agreement during the year 1921 as shown by said monthly statements shall be repaid by said City to said District on April 1 1922 with interest thereon as herein specified.

(g) The total costs of construction and contract costs expended by said District under the terms of this agreement during the year 1922 as shown by said monthly statements shall be repaid by said City to said District on April 1, 1923 with interest thereon as herein specified.

36. It is hereby understood and agreed by and between the parties hereto that in case said Commissioner of Gas and Electricity of said City shall fail, refuse or neglect to examine and approve or disapprove said monthly statements within thirty (30) days after the receipt of same then said monthly statements shall be assumed to be correct and the work therein shown whether performed by the District itself or by other parties, shall be considered accepted by said City.

In the event that any question or dispute shall arise within said period of thirty days, concerning the performance of the work to be done under this agreement, then such question or dispute may be determined by arbitration in the manner specified in section 45 of this agreement.

37. Said District hereby agrees to advance to said City, the sum of $1,101.80 to be used by said City in paying a bill of the Chicago Union Station Company for material, supplies and labor furnished by said Company for the installation of two additional ducts for said City on Harrison street, from the manhole on Canal street to the manhole at the City's shaft near the west bank of the Chicago River, which work should have been performed by said District, but was ordered done by said Chicago Union Station Company. The said City hereby agrees to repay said sum of $1,101.80 to said District on April 1, 1920 with interest thereon at the rate of five (5) per cent per annum from the time said sum is paid to said City by said District until said sum is repaid by said City to said District

38. Said City hereby assumes (Except as otherwise provided in the paragraphs of this section thirty-eight (38) all responsibility for all loss, damage or expense to persons or property which may in any wise directly or indirectly be occasioned by the following:

(a) In the making of repairs, replacements or betterments by said District to all twelve thousand volt transmission lines or cables belonging to said City and used by said District which are rendered necessary by the action of electrolysis and from the electrical energy escaping from or passing through said transmission lines or cables because of such electrolysis.

(b) In the operation, maintenance and repair by said City of the electrical equipment installed by said District for said City in the Thirty-Ninth street pumping station of said District and from electrical energy escaping from or passing through said electrical equipment.

(c) In the operation, maintenance and repair of all the substations of said City (except the H. N. May substation during the period it is under the exclusive control of said District) together with all the electrical equipment contained therein, and from electrical energy escaping from or passing through said substations and electrical equipment.

(d) In the operation, maintenance and repair of the entire street lighting system of said City (except to the extent the said District has herein assumed the operation, maintenance and repair and the making of all necessary betterments or replacements to the twelve thousand volt cables of said City) including all distributing lines, arc circuits and all electrical equipment used in connection therewith, and from all electrical energy escaping therefrom or passing through the same.

(e) In the operation by said City of the electrical equipment of said District which has been installed by said District for its own use in the substations of said City and grounds connected therewith, and from all electrical energy escaping from said equipment because of the negligent operation of the same by the employes of said City.

(f) In the use by said City of conduits and poles of said District and use of space in the substations of said District and on the grounds connected therewith, and from all electrical energy escaping from said conduits and poles so used by said City if caused by such use.

And said City agrees and does hereby undertake to indemnify and save harmless said District from all liability therefor.

39. Said City hereby agrees to indemnify and save the said District harmless from all judgments, damages, costs or expenses which may be sustained by said District by reason of suits for damages against said District brought by Bertram Stedwell, a minor, by John Stedwell, his father and next friend, for personal injuries; John Stedwell for loss of services, earnings and expenses; Edward Salow, a minor, by Marie Salow, his next friend, for personal injuries; James F. Bishop, Administrator of the Estate of Arthur R. Anderson, deceased, for causing the death of Arthur R. Anderson; by Arthur Meyer, by E. J. Meyer, his father and next friend for personal injuries; John Mango, by Antonio Mango, his father and next friend, for personal injuries; Lucy Potter, for personal injuries; Lillian Rice, by John Rice, her father and next friend; Hans C. Anderson, by Mrs. B. Anderson, his next friend, for personal injuries; Edward Ottenhoff, by Conrad Ottenhoff, his next friend, for personal injuries; and Henry A. Fowler, Administrator of the Estate of Leo Kasmala, deceased, for causing the death of Leo Kasmala; and by reason of other suits for damages for personal injuries, deaths or loss of services, earnings and expenses, which may now be pending, or which may at any time hereafter be brought against said District by any person or persons, or his or their representatives, wherein it is claimed that the said District is liable either solely, jointly with said City or jointly with said City and others for damages for personal injuries, death or loss of services, earnings and expenses alleged to have been caused directly or indirectly by electrical energy generated by said District and transmitted over or through or escaping from the street lighting system of said City, including all transmission and distribution wires, arc

circuits and all electrical equipment owned or controlled by said City and used in connection therewith; and by reason of any other suits wherein it is claimed that said District is jointly or severally liable for damages for personal injuries, death, or loss of services, earnings and expenses alleged to have been caused by the negligent operation, (or) maintenance and (or) repair of the entire street lighting system of said City, including all transmission and distribution wires, arc circuits and all electrical equipment owned or controlled by said City and used in connection therewith; and also from all costs and expenses incurred by said District in defending said suits above specifically named, such other suits, or any of them.

40. Said District hereby assumes (except as otherwise provided in the paragraphs of this section forty (40) all responsibility for all loss, damage or expense to persons or property which may in any wise directly or indirectly be occasioned by the following:

(a) In the operation, maintenance and repair and the making of all necessary replacements and betterments by said District to all twelve thousand volt transmission lines or cables belonging to said City and used by said District in the furnishing and delivering of electrical energy over said transmission lines or cables, except such repairs and the making of all replacements and betterments to such transmission lines or cables rendered necessary by the action of electrolysis, and excepting loss, damage or expense occasioned by the electrical energy escaping from or passing through said transmission lines or cables by reason of electrolysis.

(b) In the use, operation and repair by said District of the H. N. May substation and the steam producing, generating, transforming and other equipment contained therein and all electrical energy escaping from or passing through the same during the period said substation and equipment is under the exclusive control of said District.

(c) In the maintenance and repair by said District of all electrical equipment which has been installed by said District in the substations of said City and on the grounds connected therewith and from all electrical energy escaping therefrom due to a lack of proper installation, maintenance and repair.

(d) To the use by said District of conduits and poles of said City and space in the substation of said City and on the grounds connected therewith and from all electrical energy escaping from said conduits and poles so used by said District of caused by such use.

And said District agrees and does hereby undertake to indemnify and save harmless said City from all liability therefor.

41. All questions as to liability for all loss or damage to persons or property not herein specifically assumed by the respective parties hereto due to the concurring negligence, wrongful act or omission of the respective parties hereto or their officers, agents, employees or contractors and the money to be paid therefor, if any, by the respective parties hereto shall be submitted to arbitration in the same manner as hereinafter specified in section forty-five (45) of this agreement. Such arbitration shall include any question or dispute which may arise as to whether any case comes within the expressly assumed obligation of either of the parties hereto.

42. In case a suit or suits shall be begun against either party hereto for or on account of any alleged damage or injury for which, under the terms of this agreement, the other party hereto shall be liable, in whole or in part, the party so sued shall give to the other party reasonable notice in writing of the pendency of such suit, and thereupon the other party shall and will assume the defense of said suit or participate in its defense, and shall and will save harmless the party so sued from all loss, costs and expense of defending such suit, or from its proportion thereof, as the case may be. In case a suit or suits shall be begun against both parties hereto for or on account of any alleged damage or injury for which, under the terms of this agreement, one of the parties hereto shall be solely liable, then thereupon the party so liable shall and will assume the defense of said suit or suits for both parties hereto, and shall and will save harmless the other party hereto from all

loss, cost or expense in defending said suit or suits. If in any suit either party hereto as defendant therein shall be compelled to pay any judgment which, under the provisions of this agreement, the other party hereto should have paid or should have participated in the payment of, then the other party so solely or jointly liable shall on demand promptly repay to it any money which it shall have so paid, whether in the way of damages, costs, fees or other expenses. If any party sole defendant shall be jointly liable with the party notified then the latter shall reimburse the party sole defendant to the extent and in the proportion that it may be required to bear or participate in such liability as hereinbefore provided, to be determined by arbitration as specified in Section forty-five (45) of this agreement.

43. Each party hereto shall give notice in writing to the other party hereto of any claim in excess of $50.00 made upon it for which such other party may be solely or jointly liable under the terms hereof, and no claim in excess of $50.00 shall be settled by either party hereto without the consent of the party so notified unless the latter shall for fifteen days after receipt of notice neglect to give consent or within said time shall advise that such claim will not be contested, in either of which cases, as well as with respect to all claims of $50.00 or less, the party to whom same shall be presented may make settlement for the account of the party liable under the terms of this agreement therefor, for which the latter agrees upon demand to reimburse the party so making payment; and in making such voluntary settlements the party making the same shall procure, from each claimant, a release in behalf of all parties concerned from liability in the premises.

44. In every case of death or injury suffered by employes of the respective parties hereto in carrying out the terms and provisions of this agreement, where under any law first aid, medical, surgical and hospital services are required to be furnished and compensation to be paid any such employes or his beneficiary, the party hereto whose employe is injured or suffers death shall make payment in accordance therewith and the other party hereto agrees (if under the terms of this agreement it is responsible for such injury or death) to reimburse the party making such payment for all payments so made whether initial or successive periodical payments.

45. In case the Electrical Engineer of said District and the Commissioner of Gas and Electricity of said City shall be unable to determine that repairs to the twelve thousand volt transmission lines or cables belonging to said City, and used by said District in supplying the electrical energy to the substations of said City, are rendered necessary by the action of electrolysis then said question shall be referred to a Board of Arbitrators consisting of three competent engineers, one of whom shall be chosen by said District, another by said City and the third shall be selected by the two so chosen. The party desiring such arbitration shall give written notice to the other party to the dispute setting forth definitely the point or points of dispute and naming the party selected by such party to act as its arbitrator. If the party on whom such notice is served shall for twenty (20) days thereafter neglect to name a person as its arbitrator, then the party giving such notice may request the then Chief Justice of the Circuit Court of Cook County to name an arbitrator in behalf of the party so in default, and such Judge is hereby given full power and authority to designate and name an arbitrator for the party so in default. Upon the naming of such arbitrators, the two so chosen shall name a third, and such Board of Arbitrators shall proceed immediately to hear and decide the matter or matters in dispute. The decision of such Board of Arbitrators or the majority of them shall be final and conclusive on the parties hereto. Each party hereto shall compensate the arbitrator selected by it or appointed by the court in its behalf, and one-half of the compensation of the third arbitrator shall be paid by each of the parties to the dispute. The arbitrators in making any decision shall be governed strictly by the terms of this agreement.

It is further agreed that if any dispute or controversy shall arise between the parties hereto concerning

W.

the matter aforesaid then such dispute or controversy shall not be permitted to delay or interfere with the progress of any work provided or permitted by this agreement to be done by either party hereto.

46. It is expressly understood and agreed by and between the parties hereto, that all agreements on the part of said City hereinabove referred to with reference to the assumption of any obligation to make any payment or payments of money to said District herein, or any obligation on the part of said District to furnish the electrical energy herein specified, or to do any work or to incur any expense hereunder are upon the condition that the City Council of said City shall in each fiscal year during the period covered by this agreement appropriate funds therefor and if necessary levy taxes for such purpose.

IN WITNESS WHEREOF, On the day and year first written the parties hereto have caused these presents to be executed in triplicate.

THE SANITARY DISTRICT OF CHICAGO.
By JAS. H. LAWLEY,
Chairman of Its Committee on Finance.
Attest:
JOHN MCGILLEN, (Seal)
Clerk.

CITY OF CHICAGO.
By WILLIAM G. KEITH,
Commissioner of Gas and Electricity.
Approved:
WM. HALE THOMPSON, (Seal)
Mayor.

CHAS. E. ANTHONY,
Asst. Attorney.
C. ARCH WILLIAMS,
Attorney.
Countersigned:
L. H. GOSSELIN,
Comptroller.
Approved as to Form:
FRANK S. RIGHEIMER,
Acting Corporation Counsel.

EXHIBIT A.

City of Chicago Equipment Located in Thirty-ninth St. Pumping Station.

High tension bus bars, disconnect switches and oil switches for receiving energy from two incoming feeders and delivering same to two transformer banks together with brick compartments or cells containing said equipment. This equipment in detail consists of:

Four (4) General Electric, Type F, Form K12. 300 amp., 15,000 volts, 3 pole, single throw, electrically operated, full automatic, transformer trip, oil switches.

Twenty-four (24) 300 amp., 15,000 volt disconnecting switches.

Eight (8) General Electric Form K-28, 80/5 amp., 15,000 volt current transformers.

Four (4) General Electric, 200 watt, 13,200/110 volt potential transformers.

Two (2) Pittsburgh 5 K. W. 13,200/110-220 volt transformers and fuses.

All copper tubing, cable, insulators and supports used in making connections to and between the above equipment except cable constituting part of 12,000 volt line No. 301.

All brick compartments or cells enclosing or protecting above equipment, together with all relays and other equipment mounted within or upon such compartments or cells and used in connection with the operation or control of the above equipment.

One (1) marble switchboard panel for containing switches for controlling the above oil switches, together with all equipment mounted thereon or attached thereto.

Six (6) 250 K. W. Step-down transformers—Primary voltages, 12,000-11,500-11,000-10,500, Secondary voltages, 4250-4650-5050.

Two (2) marble switchboard panels with all equipment mounted thereon or attached thereto used in controlling or measuring the energy delivered from the secondaries of the above transformers.

Real Estate Development.

Mr. Carr presented the following report from the Committee on Real Estate Development:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN — Your Committee on Real Estate Development reports that

on January 25, 1917 (page 105 of the Proceedings), the Board granted the City of Chicago the right to use a part of the east and west banks of the right of way of the North Shore Channel adjacent to and north of Lawrence avenue as an approach to a temporary bridge for public traffic, and to cross said North Shore Channel at said point with said temporary bridge, the term of said grant to begin September 1, 1916, and to end March 1, 1918, with the privilege of extension for one year.

Your Committee further reports that it is advised that said grant was extended to March 1, 1919, and the City of Chicago has requested that said grant be extended for a period of three months ending May 31, 1919, with the privilege of a further extension of not to exceed two months.

Your Committee further reports that said city has also requested the Sanitary District to consent to a sublease by the Illinois Stone Company for said period of three months with the privilege of renewal for not to exceed two months thereafter, of part of the west bank of said right of way of said channel, which was on March 20, 1913, leased to said company by the Sanitary District for a period of ten years from April 1, 1913, which property is to be used for the west approach of said temporary bridge.

Your Committee herewith presents to the Board an agreement between the Sanitary District and the Illinois Stone Company covering the subject matter above specified and also a consent to the said lease from the Illinois Stone Company to the City of Chicago above referred to, which agreement and consent have been approved by the Attorney, and recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District and the Clerk be and they are hereby authorized and directed to execute in triplicate the form of said agreement and the consent to the lease above specified.

Respectfully submitted,
PATRICK J. CARR,
Chairman.
MATT A. MUELLER,
WALLACE G. CLARK,
Committee on Real Estate Development.

Mr. Carr moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, May 22, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 budget.

Engineering Department.

Roger T. Hall, sub-instrument man, $130 per month.

Wm. F. Tuttle, sub-instrument man, $130 per month.

Arthur Jones, painter, 87½ cents per hour.

Charles Loetz, sub-foreman, $5 per day.

Fred Green, rough carpenter, 55 cents per hour.

Hugh Jones, rough carpenter helper, 50 cents per hour.

Henry Smith, laborer, 45 cents per hour.

John Galvin, laborer, 45 cents per hour.

Jos. Mooney, laborer, 45 cents per hour.

Michael Doyle, laborer, 45 cents per hour

Wm. Wellahan, laborer, 45 cents per hour.

Riggori Constantine, laborer, 45 cents per hour.

Electrical Department.

Thos. Brannigan, operator (vacation period), $125 per month.

A. P. Conlan, lineman (temporary), $165 per month.

REINSTATEMENTS.

Due to Honorable Discharge from the U. S. Army and Navy Service.

Engineering Department.

John A. Whalen, rodman, $115 per month.

Electrical Department.

John H. Carney, operator, $155 per month.

Respectfully submitted,
GEORGE W. PAULLIN,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
WALLACE G. CLARK,
H. E. LITTLER,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—None.

Passed and not voting—Mr. Sergel—One.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from H. M. Montgomery, Commissioner of Public Works of the City of Evanston, calling attention to the condition of the Brown avenue bridge in Evanston crossing the North Shore Channel and suggesting repairs thereon.

Referred to the Committee on Engineering.

The Clerk presented a communication from Harry Lewis, 3253 West Madison street, making claim for $12.40 alleged to be due him for services rendered while an employe of the Sanitary District.

Referred to the Committee on Finance.

The Clerk presented a communication from Frank Sloan, Assessor, Lockport, Ill., enclosing blank schedules for the listing of personal property of the Sanitary District in the Township of Lockport, and requesting a pass to admit him to the power house at Lockport.

Referred to Mr. Paullin.

MISCELLANEOUS AND NEW BUSINESS.

The Clerk presented his resignation of the office of Clerk of The Sanitary District of Chicago, as follows:

CHICAGO, May 21, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Hereby is respectfully tendered my resignation as Clerk of The Sanitary District of Chicago, effective at your convenience and upon the election of and qualifying by my successor.

May I be permitted to express my gratification at having been associated for the last six and one-half years with the vast and useful undertakings to our community so successfully carried through by your Honorable Body, also my appreciation of the uniform kindly consideration shown me throughout term of service.

Very respectfully,
JOHN MCGILLEN.

Mr. Clark moved that the resignation of Mr. John McGillen, as Clerk of The Sanitary District of Chicago, be accepted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark moved that a committee of two, composed of Messrs. Paullin and Carr, be appointed to prepare suitable resolutions reciting the services of Mr. John McGillen, Clerk, to the public during his incumbency in said office, and when prepared that they be spread upon the minutes of the Proceedings of the Board.

The motion prevailed.

Election of Clerk.

Mr. Lawley moved that Mr. Lawrence F. King be elected Clerk of The Sanitary District of Chicago, and that the letters of recommendation presented and read by the Clerk, testifying to the ability of Mr. King, be printed in the Proceedings.

Temporary Chairman.

President Sergel called Mr. Carr to the Chair and took a seat on the floor.

Mr. Sergel moved as a substitute for Mr. Lawley's motion that Mr. Isaac J. Bryan be elected Clerk of The Sanitary District of Chicago.

On roll call the substitute was lost by the following vote:

Yeas—Messrs. Sergel and Nance—Two.

Nays—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

The question recurring on the motion of Mr. Lawley was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

The following are the letters of recommendation of Mr. Lawrence F. King which were read to the Board:

CIRCUIT COURT OF ILLINOIS.
COOK COUNTY.

CHAMBERS OF JUDGE ANTON T. ZEMAN.

Chicago, May 16, 1919.

To the Honorable Trustees of The Sanitary District of Chicago.

Gentlemen—I am informed that you have under consideration the appointment of Mr. Ollie King as Chief Clerk of the Drainage Board.

I have known Mr. King for many years and know him to be a man of honesty, integrity and responsibility, both in private and public life.

His experience and record as an employe of the City of Chicago are such that, in my judgment, he will be eminently qualified to serve the people in the office which you have under consideration for him.

Yours very respectfully,
ANTON T. ZEMAN.

STANDARD TRUST & SAVINGS BANK.
MONROE AND CLARK STREETS.

Chicago, May 15, 1919.

Trustees, Sanitary District of Chicago, Chicago, Ill.

Gentlemen—Learning that Mr. Lawrence F. King is an applicant for the position of clerkship of your Board, I am writing to recommend his appointment.

Mr. King is vouched for and highly recommended by a number of friends and customers whose opinions I appreciate, and I am confident if the appointment is made and he is given an opportunity to demonstrate his ability he will make good in every particular.

Yours very truly,
C. S. CASTLE,
President.

CIRCUIT COURT OF COOK COUNTY.
JUDGE JESSE A. BALDWIN
IN CHAMBERS.

Chicago, May 8, 1919.

Jas. H. Lawley, Esq., Chairman, Finance Committee, Board of Sanitary Trustees, Chicago, Ill.

Dear Mr. Lawley—It has come to my knowledge that the Board is considering the possible appointment to the clerkship of your Board of Lawrence F. King, Esq. Mr. King, or "Larry," as he is familiarly called, was my Minute Clerk for many months, and proved himself to be the most gentlemanly and efficient clerk that I have ever known. He is a hard worker, is attentive to his

business and his integrity is unquestioned.

I do not believe there is a better man for the position in the city of Chicago.

Sincerely yours,
JESSE A. BALDWIN.

FORT DEARBORN NATIONAL BANK OF CHICAGO.

Chicago, May 15, 1919.

The Trustees of The Sanitary District of Chicago.

Gentlemen—We understand there has been submitted to you one Lawrence F. King, who is now in charge of the Waste Disposal Plant of the City of Chicago.

We know that Mr. King has held this position successfully for the past four years and feel that he is well qualified to hold the position of Clerk of the Sanitary District, to which he asks appointment.

We take great pleasure in recommending him upon his honesty, reliability and integrity.

Very respectfully,
W. W. LEGROS,
Cashier.

CIRCUIT COURT OF COOK COUNTY.
JUDGE ROBERT E. CROWE
IN CHAMBERS.

Chicago, May 15, 1919.

Hon. James H. Lawley, Sanitary District Trustee, Karpen Building, Chicago, Ill.

My Dear Mr. Lawley—I understand that Lawrence F. King is an applicant for the position of Chief Clerk of the Sanitary District. I have known Mr. King for a number of years. He filled with credit and distinction the position of Deputy Clerk of the Circuit Court, and while occupying that position in our Court Judge Jesse A. Baldwin had so much confidence in his honor and integrity that he selected him custodian of the ballots and records in what was commonly called the Hoyne and Cunnea vote fraud cases. He is a young man of education, character and ability, and I am satisfied will fill the position of Clerk of the Sanitary Board, if he is fortunate enough to be appointed by you gentlemen, with credit to himself and the Board.

Respectfully yours,
ROBERT E. CROWE.

STANDARD OIL COMPANY.
(INDIANA)
910 SOUTH MICHIGAN AVE.

Chicago, May 15, 1919.

Mr. James H. Lawley, Chairman of Finance Committee, Sanitary District, Chicago.

Dear Sir—It has come to my knowledge that the name of Lawrence F. King is pending before your bureau for appointment as Clerk of your bureau.

Our company has transacted a great deal of business with the Bureau Waste Disposal, over which Mr. King has jurisdiction, and our relations have been of a very satisfactory nature.

Yours very truly,
STANDARD OIL COMPANY,
T. J. THOMPSON,
Manager.

THE ATLAS DRYER COMPANY.
CLEVELAND, OHIO.

Cleveland, O., May 13, 1919.

To Whom It May Concern:

Our business relations with Mr. Lawrence F. King, general foreman in charge of the Bureau of Waste Disposal of the City of Chicago, have extended over a period of more than four years. We have found him capable and absolutely trustworthy and regard his word just as good as his bond.

We are satisfied that any business connection he undertakes will be carried out with credit to himself.

Very truly yours,
THE ATLAS DRYER COMPANY.
W. M. CUMMER,
President.

LYNCH-CLARISEY COMPANY.
FUEL OIL.
PEERLESS BRAND OILS AND GREASES.
3211-13 SOUTH WOOD STREET.

Chicago, May 15, 1919.

Mr. James H. Lawley, Chairman, Finance Committee, Sanitary District of Chicago, Chicago, Ill.

Dear Sir—I have been asked to give expression to my knowledge of the ability, character and habits of Mr. Lawrence F. King.

I have known Mr. King since boyhood, and it is with pleasure, indeed, that I am able to state that he is a man of exceptional ability, absolutely sober, an ideal family man, and one whose

word, to the writer at least, is as good as his bond.

I have watched with satisfaction his administration of the affairs of the Municipal Reduction Plant, and have seen him under difficulties where tact, diplomacy and executive ability of the highest order were essential, and Mr. King has measured up to the required standard in every instance.

I feel that Mr. King's capabilities are such that he can handle any position he undertakes to fill with credit to himself as well as all parties concerned.

Yours very truly,
M. J. LYNCH.

STATE OF ILLINOIS.
DEPARTMENT OF PUBLIC WORKS AND BUILDINGS.
SPRINGFIELD.

November 14, 1918.

Mr. L. F. King, Bureau of Waste Disposal, City Hall Square Bldg., Chicago, Ill.

Dear Mr. King—I have your letter with reference to fertilizer for public parks playgrounds, and will advise the purchasing agent concerning the matter. Glad to learn that you have found an outlet for some of the tankage.

Thank you for your kind expression of personal regard, and in return I wish to say that I feel that you have always been a great assistance and very efficient in handling the business.

Sincerely yours,
FRANK I. BENNETT.

Election of Manager of Real Estate Department.

Mr. Clark moved that Mr. Walter C. Davis be elected Manager of the Real Estate Department of The Sanitary District of Chicago.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Eight.

Nays—Mr. Sergel—One.

Mr. Sergel presented the following ordinance:

AN ORDINANCE

Amending an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on October 28, 1915, "Providing Certain Rules and Regulations and Rules of Order of the Board of Trustees of the Sanitary District of Chicago," as Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago December 23, 1915, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on December 1, 1916, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 4, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 11, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 18, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on April 5, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on May 3, 1917, and as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on July 12, 1917.

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago:

SECTION 1. That Section 1 of an ordinance passed by the Board of Trustees of the Sanitary District of Chicago on October 28, 1915, as amended, be, and the same is hereby further amended by striking out the word "sharp" in Rule and Regulation No. 2, as printed in line thirty-six of the first column of page 1414 of the Proceedings of October 21, 1915, and inserting in lieu thereof, "unless otherwise ordered at a regular meeting of the Board of Trustees."

SEC. 2. This ordinance shall be in force and effect from and after its passage.

Referred to the Committee on Rules.

Mr. Sergel presented the following ordinance:

AN ORDINANCE

Amending an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on October 28, 1915, "Providing Certain Rules and Regulations and Rules of Order of the Board of Trustees of the Sanitary District of Chicago," as Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on December 23, 1915, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on December 1, 1916, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 4, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 11, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 18, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on April 5, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on May 3, 1917, and as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on July 12, 1917.

Be It Ordained by the Board of Trustees of the Sanitary District of Chicago:

SECTION 1. That Section 1 of an ordinance passed by the Board of Trustees of the Sanitary District of Chicago on October 28, 1915, as amended, be and the same is hereby further amended by striking out the words, "except when it may be deemed necessary to hold executive sessions" in Rule and Regulation No. 1, as printed in lines twenty-seven, twenty-eight and twenty-nine of the first column of page 1414 of the Proceedings of October 21, 1915.

SEC. 2. This ordinance shall be in force and effect from and after its passage.

Referred to the Committee on Rules.

Mr. Nance presented the following order:

WHEREAS, The Trustees of The Sanitary District of Chicago are charged with the duties and responsibilities of administering the affairs of a corporation in which the public has invested upward of $100,000,000 with the main object of safeguarding the health and lives of the citizens of Chicago, and

WHEREAS, It is desirable that the public at all times and to the fullest extent possible be kept advised of the character of the work done by the Trustees, their management of the public fund and the zeal with which they maintain careful watch over the interests of the citizens in their investment, and

WHEREAS, There is considerable misunderstanding and lack of knowledge among citizens as to the exact functions of the Sanitary District and its place and scope in relation to other municipal governments of Cook County, because of which it is wise and expedient that the utmost publicity be given to every act of this Board, therefore be it

Ordered, That the Clerk of the Sanitary District be and he is hereby directed to mail notices of all Board and committee meeting, specifying the place and hour and any special business that may be on the calendar, to the city editors of all the daily newspapers, and the editors of the principal other newspapers, published in the city of Chicago, and the leading civic organizations of the city, such notices to be mailed not less than forty-eight hours previous to such Board or committee meetings.

Mr. Nance moved that the order be passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Committee of the Whole.

Mr. Lawley moved that the Board resolve itself into the Committee of the Whole to consider the advisability of accepting bonds of the City of Chicago at face value in payment of the judgments obtained by the Sanitary District against the City of Chicago under the street lighting contract.

The motion prevailed and the Board resolved itself into the Committee of the Whole with Mr. Carr in the Chair.

The Committee of the Whole rose and the Board resumed business.

The Chairman reported that the Committee had considered an offer of the City of Chicago to pay to The Sanitary District of Chicago in bonds the amounts of the judgments obtained against the City of Chicago of about five millions of dollars. A motion was carried authorizing the Chairman of the Committee on Finance of the Board of Trustees of the Sanitary District to notify the Comptroller of the City of Chicago that the Sanitary District will accept said bonds at par in payment of said debt.

Mr. Lawley moved that the report of the Committee be adopted.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Lawley, Mueller, Nance and Paullin—Seven.

Nays—None.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gillon,
Clerk.

C43s

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING

THURSDAY, MAY 29, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were:

Present: Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent: None.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the regular meetings of May 8 and 15, 1919, be approved, as printed, without being read.

The motion prevailed.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 29, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has had under consideration the advisability of changing the locations of the office of the Marshal of the Sanitary District and of the switchboard.

The Architect states that the necessary work of removing the office of the Marshal can be performed by the Superintendent of the building at an estimated cost of $180.00 and the work of removing the switchboard to a new location can be done by the Chicago Telephone Company at an estimated cost of $180.00.

Your Committee having considered the matter is if the opinion that such changes should be made and therefore recommends the passage of the following order:

Ordered, That the Architect be and he is hereby authorized and directed to make the necessary arrangements with the Superintendent of the building to remove the Marshal's office to a new location provided the cost of the same shall not exceed the sum of $180.00 and to make similar arrangements with the Chicago Telephone Company to remove the switchboard to a new location provided the cost of the same shall not exceed the sum of $180.00.

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.
MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Eight.

Nays—None.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, May 29, 1919.

To the Honorable, the President and Members of the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance begs to submit herewith the following vouchers for part of May payrolls, for payments on sundry contracts and for miscellaneous services and supplies, and recommends that they be approved and ordered paid:

Respectfully submitted,

JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
Committee on Finance.

Mr. Lawley moved that the report be adopted and that the vouchers be approved and ordered paid.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Engineering.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 29, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that it has received a communication from the Chief Engineer in which he states that the two 280 H. P. four-pass Edgemoor boilers at the Lawrence avenue pumping station are not equipped with soot blowers and at the present time the boiler tubes are cleaned once daily by a steam lance, which is a dangerous and inefficient method of doing said work, and he recommends that mechanical soot blowers be installed by which the boiler tubes can be cleaned by the firemen thoroughly three or four times a day, which will result in a large yearly saving of coal and a reduction in the cost of labor.

He further states that the experience of the Engineering Department has shown that the best soot blower on the market is that of the Diamond Power Specialty Company called the "Diamond Soot Blower," which can be purchased for the sum of $456.20, and he requests authority to purchase two of said soot blowers and install the same at an additional estimated cost of $420.00 for each installation.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That the Chief Engineer be and he is hereby authorized and directed to purchase the two Diamond soot blowers above specified and install the same in the Lawrence avenue pumping station provided the cost of the said blowers and the installation of the same shall not exceed the sum of $1,753.00.

Respectfully submitted,

WALLACE G. CLARK,
Chairman.

JAS. H. LAWLEY,
PATRICK J. CARR,
H. E. LITTLER,
MATT A. MUELLER,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 29, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering reports that in accordance with the terms of a contract dated September 24, 1914 (page 1629 of the Proceedings), between James O. Heyworth and the Sanitary District, for the excavation and collateral work on contract section one of the Calumet-Sag Channel of The Sanitary District of Chicago, the Sanitary District has retained from time to time, as a reserve percentage, 12½ per cent of the amount due said contractor, up to and including April 30, 1919, which less a payment therefrom of $40,000 made August 2, 1917, equals the sum of $61,019.20, which sum under the terms of said contract cannot be

paid said Contractor until 30 days after the completion of the work under said contract, and said Contractor has requested that he be paid one-half of said sum.

Your Committee further reports that it is advised by the Chief Engineer that the water connection between the Calumet-Sag Channel and the Main Channel has been made and there only remains to be done about $40,000.00 of work for which the Contractor will be paid and about $10,000.00 worth of work for which he will receive no compensation and in addition the Contractor has a plant on the work valued at $100,000 and the Chief Engineer states it as his belief that the interests of the Sanitary District will be sufficiently safeguarded if the contractor is paid the sum of $25,000.00 from said reserve.

Your Committee having considered the matter, therefore recommends the passage of the following order:

Ordered, That the Chairman of the Committee on Finance of the Board of Trustees and the Clerk be, and they are hereby authorized and directed to pay upon the voucher of the Chief Engineer to James O. Heyworth the sum of $25,000.00 out of the reserve percentage retained on said contract, provided said James O. Heyworth obtains the consent in writing of the surety on his bond to the payment of said sum and that all the other terms and conditions of said contract shall remain in full force and effect.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
PATRICK J. CARR,
Committee on Engineering.

Mr. Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—

Nays—Messrs. Sergel and Nance—Two.

Mr. Clark presented the following report from the Committee on Engineering:

CHICAGO, May 29, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Engineering, to which were referred at the meeting of May 15, 1919 (page 535A of the Proceedings), bids for the construction of the sprinkling filter and appurtenances in the Village of Morton Grove, having considered all the proposals presented and the qualifications of each bidder, together with the report submited by the Chief Engineer, is of the opinion that all bids for doing said work should be rejected for the reason that the same are excessive.

Your Committee having considered the matter, recommends the passage of the following order:

Ordered, That all bids received for the construction of the sprinkling filter and appurtenances in the Village of Morton Grove be and the same are hereby rejected for the reason stated, and it is further

Ordered, That the Clerk be and he is hereby authorized and directed to readvertise for bids for the work above specified, and it is further

Ordered, That the checks of the respective bidders for said work be returned to said bidders.

Respectfully submitted,
WALLACE G. CLARK,
Chairman.
MATT A. MUELLER,
PATRICK J. CARR,
JAS. H. LAWLEY,
Committee on Engineering.

Mr Clark moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Employment.

Mr. Paullin presented the following report from the Committee on Employment:

CHICAGO, May 29, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment herewith transmits the following report of actions taken:

NEW APPOINTMENTS.

Provided for in 1919 Budget.

Engineering Department.

Chas. Matjesk, carpenter helper, 50 cents per hour.

John McGee, laborer, 45 cents per hour.

Chas. Pusateri, laborer, 45 cents per hour.

E. Cody, laborer, 45 cents per hour.

A. Rodighiero, laborer, 45 cents per hour.

Carmello Falzone, laborer, 45 cents per hour.

Frank Frelichowski, laborer, 45 cents per hour.

Frank Stradata, laborer, 45 cents per hour.

Nunzio Corigliore, laborer, 45 cents per hour.

Electrical Department.

Charles Dietz, operator (vacation period), $125.00 per month.

REINSTATEMENT.

Due to Honorable Discharge from the U. S. Army Service.

Law Department.

William E. Helander, Asst. Attorney, $250.00 per month.

Respectfully submitted,
GEORGE W. PAULLIN,
Chairman.

WALLACE G. CLARK.
MATT. A. MUELLER,
JAS. H. LAWLEY,
H. E. LITTLER,
Committee on Employment.

Mr. Paullin moved that the report be received, approved and placed on file.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

Mr. Paullin presented the following resolutions with preambles from the Committee on Employment:

CHICAGO, May 29, 1919.

To the Honorable, the President and the Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Employment presents the following resolutions with preambles:

WHEREAS, At the present time, and for some years past, a controversy exists, and has existed, between The Sanitary District of Chicago and the United States Government involving the right of the Sanitary District to withdraw from Lake Michigan the amount of water necessary to divert the sewage and drainage of the Sanitary District, and thereby protect the only water supply of the people of Chicago and its environs, involving also the power of the Sanitary District to utilize the vast works installed by it at an expense of many millions of dollars; and

WHEREAS, For a number of years past the Sanitary District has advocated the adoption by the General

Assembly of the State of Illinois of legislation making possible the use of the water power now going to waste and for several years so wasted, and actually created by the operation of the Sanitary District's works for sewage and drainage diversion, and there are now pending before the General Assembly of Illinois certain bills, which, if enacted into law, will authorize and make possible the utilization of this vast water power for the benefit of the people—not only of the Sanitary District, but also of the State generally—and the said bills, in addition, provide for the extension of the deep waterway from the southern terminus of the Sanitary District's canal to the head of navigation at Utica, and ultimately the long dreamed of deep waterway to the Gulf of Mexico; this was expressed as a policy of the State in a joint resolution of the House and Senate of the General Assembly on May 28, 1889—thirty years ago, when the Sanitary District Act was passed and adopted—and the bills now pending in the General Assembly for the utilization of the water power at Brandon's Road near Joliet and at other points along the Des Plaines and Illinois Rivers, and providing for the extension of the waterway constructed by the Sanitary District, have passed the Senate unanimously and are now on third reading in the House of Representatives ready for final passage; and

WHEREAS, The Board of Trustees of the Sanitary District has heretofore fully appreciated the importance of the claim made by the Federal Government in the injunction suits instituted by the United States to enjoin the Sanitary District from withdrawing from Lake Michigan more water than the amount that the Government claims that it should divert, which is less than half of the State law requirement, and the Trustees of the Sanitary District did immediately upon the institution of said suits cause a complete and full defense to be made by the introduction of documentary evidence and the presentation of oral testimony by hydraulic and sanitary engineers of national reputation at an expense of many thousands of dollars to the Sanitary District, all of which was fully justified by virtue of the importance of the litigation to the people of Chicago and its environs; and

WHEREAS, It is well known that the success of the Federal Government in its contention that the withdrawal of water from Lake Michigan should be limited as it contends would not only require an expenditure of many millions of dollars by the people of the Sanitary District in the construction of works to purify sewage, but also would endanger the health and lives of the people of the Sanitary District (Chicago and its environs) by compelling the Sanitary District to substitute untried and impractical methods of disposing of the sewage of the people living within its territorial limits. Furthermore, a large part of the money already expended in the construction of works designed to divert the sewage and drainage from Lake Michigan would be lost to the people; and

WHEREAS, The Board of Trustees of the Sanitary District, believing that all controversies between the United States and the Sanitary District with reference to the withdrawal of water from Lake Michigan and the alleged effect of such withdrawal upon the levels of Lakes Michigan, Huron, Erie and Ontario should be settled, notwithstanding the litigation above mentioned pending in the District Court of the United States for the Northern District of Illinois, on January 5, 1918, passed an ordinance offering to pay to the Federal Govern-

ment an amount of money equal to the cost of constructing works necessary to compensate or offset the alleged lowering of the levels of said lakes; and the said compensation works to be constructed were suggested and recommended by the Engineer's Corps of the United States Army, and consisted of submerged weirs or dams in the St. Clair and Niagara Rivers, which compensation works would contract the flowage capacity of said rivers an amount equal to the withdrawal at Chicago. According to the compromise plan prepared, the Government of the United States was, through Congress, to authorize and empower the Sanitary District to withdraw water as required from Lake Michigan to the maximum amount of twelve thousand cubic feet per second (not "gallons"); and

WHEREAS, The Sanitary District, pursuant to said compromise plan, caused to be introduced in Congress a bill providing for the settlement of the controversy in the manner outlined, and the said bill was referred to the Secretary of War and Chief of Engineers, and the Sanitary District, through its legal and engineering representatives, has been negotiating with the Engineers' Corps of the United States Army in regard to such compromise, and representatives of said Engineers' Corps visited Chicago and inspected the works of the Sanitary District in October, 1918, and, pursuant to further conferences and negotiations, the Chief of Engineers of the United States Army and the Division Engineer at Chicago recently made thorough inspection of the Sanitary District's works; and as a result thereof the Sanitary District is preparing a brief collating the facts and arguments upon which it relies for the favorable action of the Secretary of War and Chief of Engineers. It, furthermore, has employed in this matter the former Attorney of the Sanitary District, who prepared the defense and presented all the evidence, and wrote the briefs, in the two injunction suits hereinbefore mentioned pending in the United States District Court at Chicago, and, who, by reason of six years of continuous application to said matters is thoroughly conversant, not only with the historical data having to do with the controversy but also with the intricate and complicated hydraulic and sanitary engineering and legal problems involved. The Sanitary District has also employed Mr. Francis C. Shenehon to prepare plans for the compensating works above mentioned, as well as for works to offset the alleged lowering of the levels of water of the lower St. Lawrence River at Montreal, due to the Chicago diversion. Mr. Shenehon was for years Head of the Lake Survey, a bureau under the jurisdiction of the War Department, which makes the measurements of the outflow of the various lake outlets and has before it many other important hydraulic questions arising on the Great Lakes system. For a number of years he was Dean of the Engineering Department of the University of Minnesota; and

WHEREAS, The Board of Trustees of the Sanitary District has at all times believed that it had the right and authority to divert from Lake Michigan the amount of water required by State law to the maximum capacity of the Sanitary District's Main Channel, and has been justified in such position by reason of the various recommendations of the International Waterways Commission, reports of Government Engineers and Boards of Engineers and Commissions appointed pursuant to congressional authority and by reason of the necessity of withdrawing such amount of water to protect

the health and preserve the lives of the people of the Sanitary District, thus complying with the Act under which the Sanitary District was organized. The Board of Trustees of the Sanitary District has always appreciated that even though the amount of water required by State law may be withdrawn, nevertheless, in certain localities artificial purification works would be required to supplement the works constructed to divert the sewage, drainage and water from Lake Michigan; that at certain places within the limits of the Sanitary District sufficient water for dilution could not be delivered to properly oxidize and take care of the sewage, thus avoiding local nuisances; and that trade wastes arising in the Stock Yards and along the north branch of the Chicago River and elsewhere should be taken care of in co-operation with the industries responsible for the production of such wastes. With these propositions in view, the Board of Trustees of the Sanitary District has caused to be made extensive experiments covering a period of years to determine the best method of artificially purifying sewage, and has purchased sites for the construction of artificial sewage disposal works, and has actually constructed, and is now constructing, works to purify sewage by artificial means in localities where water from Lake Michigan cannot be delivered to properly oxidize the sewage, thereby avoiding certain nuisances peculiar to such localities; and the Board of Trustees of the Sanitary District has for some time carried on negotiations with representatives of the Stock Yards interests looking to a complete solution of the trade wastes problem of Packingtown, complicated by reason of the many industrial plants located there; and

WHEREAS, The President of the Board of Trustees of the Sanitary District in his inaugural message of December 5, 1916 proposed that the Sanitary District abandon the basic principles upon which the Sanitary District works were constructed, thus throwing into the junk heap a large portion of the sewage diversion works now constructed and in operation, as well as the Sanitary District's hydro-electric plant, which furnishes the people of Chicago with street lighting at very low cost, and that the Sanitary District enter upon a program of constructing and installing works at a cost of upwards of $200,000,000 to take the place of works already installed for diverting sewage, and this proposal was made without any previous engineering investigation or recommendation; and it is the belief of the Board of Trustees of the Sanitary District that such proposal was either made in ignorance of the results which would follow, or recklessly without regard to consequences, and such proposal has very materially embarrassed the Sanitary District in its endeavor to solve the problems confronting it; and

WHEREAS, The solution of the problems hereinbefore mentioned is vital to the interests of the people of Chicago and its environs, as well as to the people of the State of Illinois; and

WHEREAS, The co-operation of every Trustee and official of the Sanitary District is required in order that the people of Chicago may save this immense expense and so that there may be preserved to the people the benefit of the investment already made, and the present practical and efficient works for the protection of the water supply may not be wrecked; and

WHEREAS, The injection of the questions hereinbefore mentioned into petty controversies is liable to seriously affect the solution of these

problems so important to the people; and

WHEREAS, Innuendoes, suggestions and vicious statements made regarding the conduct of the business of the Sanitary District may unjustly bring into disrepute, ridicule and contempt the Sanitary District as a responsible and important municipal enterprise, thus embarrassing it in the prosecution of its works and the carrying out of plans fundamentally important to the people of Chicago and its environs; and

WHEREAS, It has recently come to the attention of the Board of Trustees of the Sanitary District that statements widely circulated have been made by a member, or members, of the Board of Trustees of the Sanitary District by vicious innuendo criticising the management of the affairs of the Sanitary District, charging mismanagement, which statements may seriously endanger and imperil the solution of the important problems of the Sanitary District; and

WHEREAS, These attacks come at a time when bills are on final passage empowering the Sanitary District to acquire and utilize water power at Brandon's Road and elsewhere along the Des Plaines and Illinois Rivers for so many years sought by the Sanitary District, and such attacks and criticism may seriously endanger and imperil the passage of said bills, all of which the party, or parties, making such attacks knew, or should have known, at the time such statements were made:

NOW, THEREFORE, for the purpose of removing any possible criticism of the management of the affairs of the Sanitary District, or any misapprehension that may have arisen with reference to such management, be it

RESOLVED, That the Bureau of Public Efficiency of Chicago, which has heretofore been invited to make an investigation of the management of the affairs and business of the Sanitary District, be, and it is hereby again invited to make a complete and thorough investigation and report upon the management of the affairs and business of the Sanitary District, and that all officers and employees of the Sanitary District, be, and they are hereby instructed to give said Bureau of Public Efficiency of Chicago full and complete opportunity to make said investigation and to give it any and all information that may be requested by it as to the investigation that it may make; and be it further

RESOLVED, That Mr. Gardner S. Williams, of Ann Arbor, Michigan, a Civil Engineer of national reputation, who has heretofore made a report upon the Electrical Department of the Sanitary District and has surveyed and classified the employees of that Department and who is generally familiar with the Sanitary District's works and their operation, be, and he is hereby employed to make a complete survey of the qualifications of the employees and employment of the Engineering and Electrical Department of the Sanitary District, and that J. L. Jacobs & Company, budgetary experts, who, in 1917, installed a budget system for the Sanitary District and who are thoroughly familiar with the financial affairs of the Sanitary District, be, and they are hereby employed to make a classification of the employment and all employees of the Sanitary District; and be it further

RESOLVED, That said Gardner S. Williams and J. L. Jacobs & Company, be, and they are hereby authorized to cooperate with said Bureau of Public Efficiency of Chicago in any investigation which said Bureau may make; and be it further

RESOLVED, That this resolution be printed in the proceedings of the Board of Trustees of the Sanitary

District; that one thousand copies be printed for distribution, and that one copy be sent to the Governor, Lieutenant Governor, Speaker of the House of Representatives and to each member of the General Assembly of the State of Illinois and to the various civic organizations.

Respectfully submitted,
GEORGE W. PAULLIN,
Chairman.
JAS. H. LAWLEY,
MATT A. MUELLER,
WALLACE G. CLARK,
H. E. LITTLER,
Committee on Employment.

Mr. Paullin moved that the preambles and resolutions be adopted.

Mr. Nance presented a resolution and moved, if in order, that it be substituted for the preambles and resolutions presented by Mr. Paullin.

The Chairman ruled that the motion was in order.

Mr. Clark appealed from the ruling of the chair.

The roll being called on the question whether the ruling of the chair shall be sustained, was lost by the following vote:

Yeas—Messrs. Sergel and Nance—Two.

Nays—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

TEMPORARY CHAIRMAN.

President Sergel called Mr. Healy to the chair, and took a chair on the floor of the Board room.

President Sergel moved that the motion made by Mr. Paullin be amended so as to read that the resolutions be adopted and not the preambles.

Mr. Lawley moved that the motion to amend be laid upon the table.

On roll call the motion to lay on the table was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

The question recurring upon the motion that the preambles and resolutions be adopted, was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

PETITIONS AND COMMUNICATIONS.

The Clerk presented a communication from the Western Quarries Company, which states that its lease of certain land of the Sanitary District at Lemont expires January 31, 1920 and requests a renewal of same for a period of three years.

Referred to the Committee on Real Estate Development.

The Clerk presented a copy of a resolution adopted by the City Planning Committee of the City Club of Chicago, with preambles, resolving that the Chicago river be straightened between Polk and Sixteenth streets; that no bridge be built at Twelfth street which should make this straightening of the river more difficult when ultimately carried out; that no bridge shall be built at Twelfth street which is of unsightly design such as the vertical lift bridge now contemplated; and that copies of said resolution be sent to the members of the City Council, the members of the Sanitary District, the Chicago Plan Commission, the Chicago Railway Terminal Commission and any other civic bodies that are known to be interested.

Referred to the Committee on Engineering.

The Clerk presented a copy of a communication from The Strauss Bascule Bridge Co., referring to the pro-

posed bridge at California avenue, and inviting attention to the fact that a single leaf Strauss Bascule bridge can be furnished for outlying districts for a cost no greater than estimated by the Sanitary District for a swing bridge.

Referred to the Committee on Engineering.

MISCELLANEOUS AND NEW BUSINESS.

President Sergel presented the following ordinance, which was referred to the Committee on Rules:

AN ORDINANCE

Amending an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on October 28, 1915, "Providing Certain Rules and Regulations and Rules of Order of the Board of Trustees of the Sanitary District of Chicago," as Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on December 23, 1915, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on December 1, 1916, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 4, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on January 11, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of the Sanitary District of Chicago on January 18, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on April 5, 1917, as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on May 3, 1917, and as Further Amended by an Ordinance Passed by the Board of Trustees of The Sanitary District of Chicago on July 12, 1917.

Be It Ordained by the Board of Trustees of The Sanitary District of Chicago:

SECTION 1. That Section 1 of an ordinance passed by the Board of Trustees of The Sanitary District of Chicago on October 28, 1915, as amended, be and the same is hereby further amended by striking out the words and figures "fifty thousand ($50,000.00) dollars" in Rule and Regulation No. 16, as printed in the third and fourth lines of the first column of page 1417 of the Proceedings of 1915, and inserting in lieu thereof the words and figures "two hundred thousand ($200,000.00) dollars."

SEC. 2. This ordinance shall be in full force from and after its passage.

Mr. Nance presented a resolution.

Mr. Nance moved that the resolution be adopted.

Mr. Lawley moved that it be referred to the Committee on Judiciary.

Mr. Clark moved that the motion to refer be amended to read: "referred to the Committee on Judiciary without being published in the Proceedings."

Mr. Lawley accepted the amendment.

On roll call the motion, as amended, was carried by the following vote:

Yeas—Messrs. Carr, Clark Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

Mr. Nance presented an order.

Mr. Nance moved that the order be passed.

Mr. Lawley moved as a substitute that the order be referred to the Committee on Finance without being published in the Proceedings.

On roll call the substitute was carried by the following vote:

Yeas—Messrs. Carr, Clark, Healy, Lawley, Littler, Mueller and Paullin—Seven.

Nays—Messrs. Sergel and Nance—Two.

President Sergel took the chair and

Mr. Healy took his place on the floor of the Board room.

Mr. Nance presented the following orders:

WHEREAS, On May 27, 1919, various units of the Thirty-third Division of the United States Army, composed principally of young men from Chicago and Illinois, who have been fighting the battles of their country on foreign fields in the war between democracy and autocracy, came home and received a welcome from a grateful state and city such as never before has been accorded returning warriors in Illinois, and

WHEREAS, On that day Michigan avenue was profusely decorated with flags which hung from practically every floor in every building between Twelfth street and the river, except from the windows of the Sanitary District, from which a naked flag staff protruded while the District offices remained open, although other public offices were closed in honor of the city's heroic sons, and

WHEREAS, The failure to fly the flag from the District offices and to close the District as marks of welcome to the soldiers have caused adverse comment, therefore be it

Ordered, That the Clerk of the District be and he is hereby directed to purchase a flag of suitable size to be in keeping with the dignity and importance of this public body and to fly the same from a window of the District on all occasions when returning troops are being welcomed to Chicago, and be it further

Ordered, That on the day the major part of the remaining units of the Thirty-third Division come home the offices of the District shall be closed, with the exception of such clerks as may be needed for emergency business of the District.

Mr. Nance moved that the orders be passed.

The Clerk, after permission being given, stated the elements had previously destroyed two new flags displayed from the windows of the Sanitary District on the seventh floor of this office building, and that on the occasions named the District's other flags and bunting formed part of the beautiful display on the lower floors and ground floor entrance of its office building. Also that the District's offices were, generally speaking, closed, and employes allowed part holiday from time parade actually began on those days.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

ADJOURNMENT.

Mr. Lawley moved that the Board adjourn.

The motion prevailed.

John W. Gilbert
Clerk.

UNIVERSITY OF ILLINOIS LIBRARY

JUL 19 1919

PROCEEDINGS

OF THE

BOARD OF TRUSTEES

OF

THE SANITARY DISTRICT OF CHICAGO.

REGULAR MEETING.

THURSDAY, JUNE 5, 1919, 2 O'CLOCK P. M.

OFFICIAL RECORD.

Published by Authority of the Board of Trustees of The Sanitary District of Chicago.

President Sergel took the chair and, the roll being called, there were

Present—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Absent—None.

MINUTES.

Mr. Lawley moved that the minutes of the Proceedings of the regular meeting of May 22, 1919 be approved, as printed, without being read.

The motion prevailed.

REPORTS OF OFFICERS.

The President presented the following message:

CHICAGO, June 4, 1919.

To the Honorable, the Board of Trustees of The Sanitary District of Chicago.

The Preamble and Resolutions offered by the Employment Committee and adopted at the last meeting of this Board are misleading and indefinite. The preamble contains an untrue statement of the president's position. The opinions expressed in his inaugural were contained in his platform and approved by the people. The Sanitary Board itself has taken as advanced a

stand on the same subject, the question of sewage treatment. Other trustees have been elected on a similar platform. Evidently the cuttle-fish among the trustees emitted this irrelevant matter to obscure the issue. One of the chief points in the preamble has already been shown to be false by the passage by the legislature of the Sanitary District power bill and other waterway bills.

In the words of the resolutions, the Bureau of Public Efficiency "is invited to make a complete and thorough investigation and report upon the management of the affairs and business of the Sanitary District." These terms are too general. Not only should this investigation be made, but the Bureau should be asked to suggest improvements in our present system and to lay out a constructive program in lines of efficiency. It is not enough to examine the acts of department heads and employes. The trustees themselves should be subjected to a searching investigation—not only the present nine trustees, but also all those who have held office in recent years. Some of the points to be looked into are as follows:

The relations of trustees to purchases of land, of coal, and other supplies; the valuations and leases of the District's lands; the violations of the trustees of certain statutes of the state; the relation between the trustees and contractors, and the voting of "extras," the question of specifications apparently made to fit only one bidder; the garbling and falsifications and omissions in the printed proceedings; the action of a trustee who voted on the Sanitary Board for taxes against other citizen's property, and then, taking advantage of his own acts, attacked the tax levies in court to avoid paying his own just taxes.

The evidence in this case, consisting of documents attested to under the seal of the County Clerk, will be submitted to the Bureau of Public Efficiency.

I recommend that all these subjects be referred to the Bureau for investigation and report.

Respectfully,
CHARLES H. SERGEL,
President.

Mr. Nance moved that the message of the President be received and published in the Proceedings.

Mr. Clark moved that the motion be amended to read, that the message of the President be received and published in the Proceedings, and that the subjects referred to by the President in his message be given the right-of-way over all other subjects under the previous order of the Board of Trustees calling upon the Chicago Board of Public Efficiency and others to make a survey and report upon the methods and affairs of the Sanitary District.

Mr. Clark addressed the Board and at the expiration of ten minutes was informed by the Chairman that under the rules of the Board a member could not speak longer than ten minutes at any time without consent of the Board.

Mr. Clark moved that the rules be suspended to permit him to finish his address.

The motion prevailed.

Mr. Nance accepted the amendment to his motion offered by Mr. Clark.

On roll call the motion, as amended, was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

REPORTS OF COMMITTEES.

Finance.

Mr. Lawley presented the following report from the Committee on Finance:

CHICAGO, June 5, 1919.

To the Honorable, the President and Board of Trustees of The Sanitary District of Chicago.

GENTLEMEN—Your Committee on Finance reports that it has examined and

approved the bond of the Murphy Plumbing Company with the Massachusetts Bonding & Insurance Co. thereon as surety, for the faithful performance of its contract for furnishing, delivering and installing plumbing service piping, gas fittings and conductor pipe work at the Evanston Sewage Pumping Station for The Sanitary District of Chicago and therefore recommends the passage of the following order:

Ordered, That the bond of the Murphy Plumbing Company for the faithful performance of the above specified contract, said bond being in the penal sum of $903.00, be and the same is hereby approved, and it is further

Ordered, That the form of said contract and bond be printed in the Proceedings of the Board.

Respectfully submitted,
JAS. H. LAWLEY,
Chairman.

MATT A. MUELLER,
WILLIS O. NANCE,
GEORGE W. PAULLIN,
Committee on Finance.

Mr. Lawley moved that the report be adopted and the accompanying order passed.

On roll call the motion was carried by the following vote:

Yeas—Messrs. Sergel, Carr, Clark, Healy, Lawley, Littler, Mueller, Nance and Paullin—Nine.

Nays—None.

The following is the contract of the Murphy Plumbing Company with the Sanitary District:

THE SANITARY DISTRICT OF CHICAGO,

CONTRACT AND SPECIFICATIONS FOR PLUMBING, SERVICE PIPING, GAS FITTING AND CONDUCTOR PIPE WORK FOR EVANSTON SEWAGE PUMPING STATION.

THIS AGREEMENT, Made and entered into this 22nd day of May, A. D. 1919, by and between The Sanitary District of Chicago, a municipal corporation organized and existing under and by virtue of the laws of the State of Illinois, party of the first part, hereinafter designated the Sanitary District, and the Murphy Plumbing Company, a corporation organized under the laws of the State of Illinois, party of the second part, hereinafter designated the Contractor.

WITNESSETH: That the said Contractor has covenanted, contracted and agreed, and by these presents does covenant, contract and agree with the said Sanitary District, for and in consideration of the payments to be made as provided for herein, to the Contractor by said Sanitary District, and under the penalty expressed in the bond hereto attached, at his proper cost and expense to do all the work and furnish all materials, tools, labor and all appliances and appurtenances called for by this agreement, free from all claims, liens and charges whatsoever, in the manner and under the conditions hereinafter specified, that are necessary for furnishing, delivering and installing the Plumbing, Service Piping, Gas Fitting and Conductor Pipe Work as called for under Subdivision b of the attached specifications, complete, as specified, at the Evanston Sewage Pumping Station of the Sanitary District of Chicago, in the city of Evanston, County of Cook, State of Illinois.

The work done and equipment furnished shall be strictly pursuant to and in conformity with the specifications and the plans, which plans are signed, and attached hereto. The specifications and drawings furnished by the Contractor with his proposal and the additional drawings or prints and other information to be furnished by the Contractor in accordance with Section 4 of the specifications are made a part of this agreement. The said specifications, plans, drawings or prints are intended to co-operate, and any work appearing in or upon the one and not mentioned in the other, shall be executed according to the true intent and meaning of the said specifications, and plans, drawings or prints, the same as though the said work was contained and described in all.

It is further covenanted and agreed that the work shall be executed under the direction and supervision of the Chief Engineer of The Sanitary District of Chicago, and his properly authorized agents, by whose calculations said quantities and amounts (including extras) of the work performed under this contract shall be deter-

mined and on whose inspection all work shall be accepted or condemned, The said Chief Engineer or other Engineer designated by the Chief Engineer of said Sanitary District, shall have full power to reject or condemn all materials furnished or work performed under this contract, which in his opinion do not conform to its spirit and to the terms and conditions herein expressed.

To prevent all disputes and litigation, it is further agreed by and between the said Sanitary District and said Contractor that said Engineer shall determine all questions in relation to said work and the construction thereof, and he shall in all cases decide all questions which may arise relative to the execution of the work under this contract on the part of said Contractor, and his estimate and decision shall be final and conclusive and such estimate and decision, in case any question may arise, shall be a condition precedent to the right of said Contractor to receive any money or compensation for anything done or furnished under this contract.

Wherever the words "Chief Engineer" or "Engineer" are used herein, they shall be understood to mean the Chief Engineer of The Sanitary District of Chicago, or other designated Engineer in charge of the work.

Wherever the word "Contractor" is used, spelled with a capital "C," it shall be understood to refer to the Contractor under this contract, namely, for Subdivision b at the Evanston Sewage Pumping Station.

Wherever the words "the work" or "the equipment" are used herein, they shall be interpreted to mean the plumbing, service piping, gas fitting and conductor pipe work, and all other fittings and appurtenances, including all materials, labor, tools and appliances necessary to perform and complete everything specified or implied in the contract or shown on the plans, the specifications and drawings furnished by the Contractor with his proposal, and the additional plans and information furnished by the Contractor under Section 4 of this contract, in full compliance with the terms and conditions hereof.

Wherever the word "section" is used herein, it shall be understood to refer to the entire section of the specifications following the number referred to in the parenthesis.

The general sections are numbered consecutively. The particular sections describing the various items of each subdivision for all the plumbing, service piping, gas fitting and conductor pipe work are numbered, a1, a2 ect., b1, b2, etc., respectively, to correspond to the division.

Whenever, under the provisions hereof, an order from the Engineer to the Contractor is required, such order shall be understood to mean a written order addressed to the Contractor and signed by the Chief Engineer of The Sanitary District of Chicago.

General Specifications.

Location of Work.

(1) The Evanston Sewage Pumping Station is now under construction on property owned by the Sanitary District situated on the north-east corner of the junction of Lake street and Elmwood avenue, in the City of Evanston, County of Cook, State of Illinois. The property on which the station is located is immediately adjacent to the main line of the Chicago & Northwestern Railway.

Description.

(2) The work included under this contract and specifications consists in furnishing, delivering and installing at the Evanston Sewage Pumping Station the following: Plumbing, service piping, gas fitting and conductor pipe work.

The Contractor shall also furnish all appurtenances to said items specified or necessary to make the work complete in accordance with the most modern practice.

Provisions for Handling Equipment at Site.

(3) At the Evanston Sewage Pumping Station, the Sanitary District will provide access to the station site, for teams, from Elmwood avenue on the west, and from Lake street on the south. A hand crane will be available for handling the equipment to be installed in the pump room. The Contractor shall operate this, however, at his own expense, and shall properly oil and maintain it during his use thereof.

The Contractor shall, at his own expense, provide any temporary blocking, supports or other protection for the station floor necessary to prevent

injury to the same, and shall make good at his own expense any damages done by him to the station structure or its appurtenances in unloading and installing any of the equipment included under this contract, or in removing plant or other property or in cleaning up.

The Contractor shall furnish such protection as may be necessary against damage in any way to the equipment included under the contract after the same has been installed, and shall be fully responsible for such equipment until its final acceptance.

The Contractor shall also furnish his own storage facilities.

Contract Drawings.

(4) The specifications and plans are intended to cover complete equipment. It is not the intent to give every detail in the plans and specifications. The Sanitary District will not be responsible for the absence of any detail the Contractor may require, or for any special construction which may be found necessary as the work progresses. No additional compensation will be allowed for material or labor used in performing any work hereunder unless the work can be clearly shown to be beyond the intent and scope of the plans and specifications, to the satisfaction of the Chief Engineer.

Within thirty (30) days after the approval by the Board of Trustees of the Sanitary District of the bond of the Contractor, he shall submit to the Engineer, for approval, additional drawings or prints in duplicate, of the final layouts included under this contract, other than that for which working drawings are given in the plans attached hereto by the Sanitary District, together with other information in such detail as may be necessary to permit the Engineer to inform himself of the design of the same and the character of the various materials which the Contractor proposes to use.

The Contractor shall make such changes in the above drawings as may be found necessary upon inspection by the Engineer to make the same conform to the specifications, or to the station layout, at his own expense. Prior to the approval of any such drawings any work which the Contractor may do on the equipment covered by the same shall be at his own risk, as the Sanitary District will not be responsible for any expense incurred by the Contractor in changing equipment or layout to make the same conform to the drawings as finally approved.

The Contractor shall also furnish the Engineer tabulated lists, from time to time, showing the name of the manufacturer and the catalog number and type of equipment proposed, together with such prints, dimensions, specifications, samples, or other data, as may be required to permit intelligent judgment of the acceptability of the equipment and materials proposed.

Upon approval of the above drawings, lists, prints, samples and other data, the same shall become a part of this contract, and the equipment furnished shall be in conformance with the same; provided, that the approval of the above drawings, lists, prints, specifications, samples or other data shall in no way release the Contractor from his responsibility for the proper fulfillment by any equipment of the requirements of this contract and of the purpose for which said equipment is installed, nor from his liability to replace the same should it prove defective.

Checking Drawings.

(5) The Contractor shall check all dimensions and quantities on the drawings furnished by the Sanitary District or by himself, and shall notify the Engineer of all errors or omissions which he may discover by examining and checking the same. He will not be allowed to take advantage of any error or omission in the drawings, as full instructions will be furnished by the Engineer, should such error or omission be discovered, and the Contractor shall carry out such instructions as if originally specified.

Co-operative Service.

(6) The sub-structure and superstructure of the pumping stations will be erected by the contractor under Division A of the Evanston Sewage Pumping Station contracts respectively. As the work progresses, from time to time, material called for under this contract (Division E, subdivision b) will require placing in the concrete, brickwork, or elsewhere, as necessary to properly complete the

structure. The purpose of this contract is to provide for the labor and material required from time to time for this work, as specified herein, and to secure prompt service.

The Contractor under Division E (subdivision b) shall co-operate with the contractor under Division A by promptly placing all piping included under this contract, where it passes through or lies in walls, floors, roofs, or other parts of the building. Promptly upon notice from the Engineer, the Contractor shall furnish and place material as required, and shall securely line up and fasten any piping in concrete forms. He shall also rough in piping to be bedded in walls as required. He shall furnish labor and material, as required from time to time to keep step with the work under Division A.

The Contractor shall further give in advance to the Engineer all information needed as to boxes, chases, holes, gullets, or other openings needed in the work to be placed by the contractor under Division A.

The Contractor shall keep posted on the progress of the work under Division A, and shall be ready at all times upon demand to supply labor and material as required at the proper time without delay.

Under existing contracts, the Sanitary District expects to have the Evanston Sewage Pumping Station building roofed in by October 5, 1919, and the pumping station completed by April 2, 1920. These dates are not guaranteed, however, but are stated as approximate.

Shipment and Installation.

(7) Upon notification, the Contractor shall from time to time deliver the equipment included under this contract upon the station grounds, shall unload the same, providing all necessary labor, power, blocking, hoisting apparatus and other material, shall place the same in a position as called for on the drawings and as directed by the Engineer, shall line up and adjust the various parts one to another, complete all joints and do all other work necessary to completely install and prepare for operation all the equipment included under this contract, and afterwards shall take down and remove from the premises any scaffolding, tackle, blocking or other apparatus which may have been used in the installation, but which is not a part of the equipment included under this contract.

Cutting, Fitting and Patching.

(8) The Contractor under subdivision b of Division E shall, whenever possible, give in advance definite and exact information to the Engineer so that the Engineer can instruct the contractor under Division A (the substructure and superstructure) to leave the required holes, chases or boxes as the work progresses. Should any cutting be required through the neglect of the Contractor under Division E to give the necessary information to the Engineer, sufficiently in advance, the Contractor shall have the work done, at his own expense, by the appropriate trade. Excessive cutting will not be allowed. Only sharp tools suitable for the purpose shall be used. No beams, purlins, joists or other structural features shall be cut without the express permission of the Engineer and then only when and as directed.

All work shall be neatly fitted. Excessive openings will not be permitted.

The Contractor shall have all patching done by the appropriate trade at his own expense.

Tests.

(9) The Contractor shall make all tests required to demonstrate the tightness of his work under the working conditions specified. Where pipes are to be painted, coated or jacketed, after erection, the tests shall be made first. The Contractor shall furnish, at his own expense, all apparatus, water, and appurtenances necessary or proper for all tests, except the gages. All joints shall be examined and all visible leaks stopped.

SPECIFICATIONS.

DIVISION E—SUBDIVISION B.

Description.

(Eb1) The work to be done under this division of the Evanston Sewage Pumping Station contract includes the plumbing, service piping, gas fitting and conductor pipe work as specified hereinafter under the following heads:

I. Sanitary Plumbing.
II. Service Water Piping.
III. Gas Fitting and Water Heater.
IV. Conductor Pipes and Heads and Miscellaneous Drain Piping.

All of the work specified herein shall be executed thoroughly in a first-class manner, strictly in accordance with the ordinances of the City of Evanston. The Contractor shall obtain and pay for all necessary permits required by said ordinances relating to the execution of work under this contract.

The specifications are not intended to describe every detail of construction. The Contractor shall, therefore, furnish and place all pipes, traps, fixtures, fittings, supports, bolts or devices, of every description, which may be necessary to fully complete the entire work, whether said details are particularly specified or not.

Where pipes or fittings are to be walled in or pass through the walls, floor or roof of the structure the Contractor shall install all such pipes and fittings, when and as ordered by the Engineer, so that the work may be proceeded with simultaneously and as fast as the work under other contracts is executed. All such work so installed shall be properly capped temporarily so as to be kept free from all debris or other clogging material.

Materials.

(Eb2) All materials used in the construction of work under this contract shall be of the best grade in established use for the purposes furnished.

All wrought iron piping shall be Byers genuine wrought iron pipe, or equal of standard weight and thickness for the various sizes specified or required. All pipe shall be smooth on the inside, free from imperfections and true to shape. All threads shall be clean cut and true.

All fittings for wrought iron pipe shall be malleable iron, free from all defects with clean cut taper threads.

All unions shall be galvanized malleable iron with brass seats inserted to make brass to iron joints on all piping 2½-inch diameter and smaller.

All soil and conductor pipes shall be of extra heavy cast iron free from all defects.

Unless otherwise specified herein, all wrought-iron pipe and fittings shall be galvanized and all soil pipe shall be coated both inside and out with an asphaltum or other approved pipe dip, applied hot.

All fixtures shall be of the specified quality, properly set in place, connected up and left in perfect working order upon completion of the work.

Placing of Pipes.

(Eb3) All pipes shall be carefully and properly placed and graded. All risers, returns and drops shall be erected plumb and straight. A liberal number of unions shall be used on wrought-iron pipe work to permit the ready removal of any section of pipe.

All pipe shall be neatly supported by hangers or fastenings of approved design, to be furnished by the Contractor at his own expense.

The screwed joints of water piping shall be made tight with a paste of graphite and engine oil. The screwed joints of gas piping shall be made tight by applying a pure red lead paste.

Where exposed pipes pass through the walls, floors or ceilings, nickel-plated plates or collars shall be used. Where screws or anchor bolts are used to attach piping, supports or fixtures to walls, lead plugs shall be used, into which the bolts or screws are to be inserted. The use of wooden plugs will not be permitted.

Valves.

(Eb4) All gate valves shall be of the double disc type of Crane Company make, or equal, with rising stems, fitted with hand wheels. All valves under three (3) inches in size shall be of brass except the hand wheel, which shall be of iron. The valves three (3) inches in size or over shall be of cast iron with full brass mountings. All valves shall open by turning to the left. All valves shall be packed with approved materials, and left in good working condition upon completion of the work.

Compression Wall Hydrants.

(Eb5) The Contractor shall furnish and install three (3) brass compression wall hydrants of Crane Company B8860 type or equal, with bent hose nozzle, as indicated on the drawings and as directed by the Engineer. One each shall be installed near the north and south corners of the station on its west wall and one near the middle of the station on the east wall, each about two (2) feet above grade line. They shall be three-quarter (¾) inch size, provided with wall flanges and loose keys for turning on and shutting off the water. The holes through walls for inserting

the hydrants shall be drilled by the Contractor.

I—SANITARY PLUMBING.

General.

(Eb6) The sanitary plumbing shall include the water closets, urinal, shower bath, drinking fountain, lavatory and sink, together with all taps, vents, revent piping, soil and waste pipes, hot and cold water faucets and valves, and all necessary fittings and fixtures.

The catalog numbers of fixtures referred to in these specifications are those of the L. Wolff Mfg. Co. of Chicago. Other fixtures of equal quality and finish may be used, subject to the approval of the Engineer.

All marble work will be furnished and placed by the Sanitary District under another contract.

Waste, Drain, Vent and Revent Piping.

(Eb7) All waste and drain pipes shall be of standard weight wrought-iron pipe, Durham system, with standard Durham cast-iron drainage fittings. The pipe and fittings shall be coated inside and out with hot asphaltum vanish or an approved pipe dip. All vent pipes, except those included with fixtures, shall be galvanized wrought-iron with galvanized malleable iron fittings as specified.

The fixtures are to be trapped and connected with waste and soil pipes led to discharge chamber as shown on plans.

The waste, vent and revent pipes shall be two (2) inches, inside diameter. The soil and vent pipes shall extend above the roof and shall be flashed perfectly watertight at the roof line with four (4) pound sheet lead flashings. The pipes shall be supported in and upon the walls or ceilings, as the case may be, with suitable galvanized pipe supports and hangers, at proper intervals. All cast iron pipe shall be caulked at joints with oakum and molten lead to make a perfectly tight joint. All revent pipes shall be connected into soil and vent pipes and shall be concealed in the walls and back of marble partitions.

The soil and urinal waste pipes shall be provided with clean-out openings at the floor line or at other convenient locations with brass caps screwed in place.

Water Closets.

(Eb8) The water closets shall be the No. A-1324 "Superior" or equal syphon jet duroware lipped bowl closets with No. 8 "Vitlow" tank with operating lever and china handle, brass flush connection, No. 5 quarter sawed oak sanitary seat with cast brass box hinges, reinforcing rings, three-eighths (⅜) inch iron pipe size, seamless brass supply pipe with stop valve, floor screws and china caps. All exposed metal parts shall have "Wolffloid" white finish or equal.

Each water closet and shower bath compartment door shall be provided with a No. H-8935 combination bumper and coat hook. In each water closet compartment a No. H-6278 toilet paper holder shall be securely fastened to the marble partition slabs with suitable brass bolts. All of these fittings and bolts shall have "Wolffloid," or equal, white finish.

Lavatory.

(Eb9) The lavatory shall be the No. H-3525 "Monument" vitreous "Virginia" or equal, equipped with apron, bowl and overflow integral with "Monument" vitreous leg with iron rod, two (2) enameled iron wall supports with brass screws and toggle bolts, two (2) No. H-912 "Gielow," or equal, self-closing faucets with china index handles, one and one-quarter (1¼) inch cast brass trap to wall with cast brass escutcheon, No. H-5165 supply pipes and stop valves, chain stay, chain and rubber stopper. All exposed metal parts above the lavatory shall be duro-white metal and all metal parts below shall have "Wolffloid," or equal, white finish.

Shower.

(Eb10) One (1) shower with "Niedecken" mixer, or equal, is to be mounted on the marble wainscot, provided with one-half (½) inch supplies to wall, one-half (½) inch mixing pipe, ball joint and a four (4) inch cast brass perforated head with removable face. Two (2) combination hooks shall be installed on the wall in the dressing room compartment. All exposed metal is to be of the "Wolffloid," or equal, white finish. The floor slab of marble in the shower compartment is to drain to the center into a No. H-2121 trap, enameled on the inside and provided with a white metal strainer.

Urinal.

(Eb11) The urinal shall be a No. H-8529, Class B, one part, porcelain urinal, twenty-four (24) inches wide and forty-eight (48) inches high, with integral drip receptor, glazed inside and on exposed parts outside, with cast brass waste outlet connection and porcelain strainer, No. H-2121 drum traps enameled inside and painted outside. The flushing tank shall be of vitreous china, automatic in action, with cast brass angle supports and with brass flush pipe and flush connection. All exposed metal shall be of "Wolffloid," or equal, white finish.

Slop Sink.

(Eb12) The slop sink shall be No. H-8137, eighteen (18) by twenty-two (22) inch size, cast iron roll rim sink with integral back twelve (12) inches high. The sink shall be provided with two (2) inch adjustable trap standards with outlet tapped for two (2) inch wrought iron pipe and shall be enameled inside and out, with white metal cast brass strainer and two (2) five-eighths (⅝) inch white metal "Quaturn" compression faucets with metal handles. One faucet shall be provided with a three-quarter (¾) inch hose connection.

Drinking Fountain.

(Eb13) A No. 6945 vitreous china pedestal drinking fountain shall be placed where shown on the plans and as directed by the Engineer. This fountain shall be thirty (30) inches high with vitreous china bubbling cup, concealed waste and supply pipes and with white metal self closing valve with loose key stop cock to control water supply.

II—SERVICE WATER SYSTEM.

General Description.

(Eb14) The Contractor shall furnish, deliver and install all the service water system, consisting of the taps to the city main, the service pipe from the city street main, and the cold and hot water distribution piping in the pumping station, with all valves, fittings and connections, complete, with appurtenances as specified herein or indicated on the drawings accompanying these specifications.

The operating pressure to be carried by the service water system will be the normal pressure from the street service main which is approximately thirty (30) pounds per square inch. The system shall, however, be capable of standing any pressure which may be put upon it by the City of Evanston, without leaking, up to sixty (60) pounds per square inch.

Service Pipe.

(Eb15) The Contractor shall obtain from the Commissioner of Public Works of the City of Evanston all necessary permits and pay all fees for completely installing and connecting up the service piping for supplying the pumping station.

The Contractor shall have made two (2) 1-inch taps in the city main on Elmwood avenue and shall furnish and place the required corporation cocks, to which the service pipe shall be connected.

The service pipe shall be "strong lead" of one and one-quarter (1¼) inch internal diameter and shall weigh not less than four and three-quarters (4¾) pounds per lineal foot. It shall extend from the street main to one (1) foot inside the outer basement wall. The service pipe shall be equipped with a curb valve and shut-off box the cover of which shall bear the words "City Water." The Contractor shall furnish and install an approved water meter in the basement with a master check and waste cock between the meter and the end of service pipe.

All work and material entering into the installing of the service pipe and meter shall be in accordance with the established rules and regulations of the Department of Public Works and shall meet the approval of the Commissioner of Public Works of the City of Evanston.

Cold Water Header and Connections.

(Eb16) The distributing header from the meter connection shall be one and one-quarter (1¼) inch. It shall run the full length of the building, reducing in size as indicated on the drawings and provided with the necessary distributing connections. Each connection taken from the distributing header shall be equipped with a union and gate valve, and the following connections shall be provided and completely connected up to the particular apparatus to be served: A one (1) inch line for supplying the heating boiler and a one (1) inch line to the three-quarter (¾)
